Quality Indicator Framework (QIF)

Essential Note :

The **SSR** has to be filled in an **online format** as available on the **NAAC Website.**

The QIF given below presents the Metrics under each **Key Indicator** (KI) **for All** the **Seven Criteria.**

While going through the QIF , **details are given** each Metric in the form of :

- **Data Required**

- **Formula** for calculating the information, wherever required.

- **File description** – for **Uploading** of the **document** where so-ever required.

Quality Indicator Framework (QIF)

For some Qualitative Metrics (QM) :

which seek descriptive data, it is specified as to what kind of information has to be given and how much. It is advisable to keep data compiled accordingly beforehand.

For the Quantitative Metrics (QnM) :

wherever formulas are given, it must be noted that these are given merely to inform the HEIs about the manner in which data submitted by them will be used. The actual online format seeks only data in a specified manner which will then be **Processed Digitally.**

Metric – wise weightage is also given.

The actual online format may change slightly from the QIF given in this Manual, in order to bring about compatibility with the IT design. Observe this carefully while filling up.
