Curriculum of BCA (Bachelor of Computer Application)

(Revised as on 01 August 2023)

Foreword

I am thrilled to observe the updated curriculum of the Computer Application & Information Technology Department for the BCA (Bachelor of Computer Applications)

Program, which seamlessly integrates the most recent technological advancements and adheres to the guidelines set forth by UGC. The revised curriculum also thoughtfully incorporates the directives of NEP-2020 and the Sustainable Development Goals.

The alignment of course outcomes (COs), Programme Outcomes (POs), and Programme Specific Outcomes (PSOs) has been intricately executed, aligning perfectly with the requisites of NEP-2020 and NAAC standards. I hold the belief that this revised syllabus will significantly enhance the skills and employability of our students.

With immense satisfaction, I hereby present the revised curriculum for the B.Sc. IT (Bachelor of Science in Information Technology) program for implementation in the upcoming session.

Er. Anant Soni

Pro Chancellor and Chairman

A K S University

Faculty of Computer Application & Information Technology and Science

Department of Computer Application& Information Technology

BCA (Bachelor of Computer Applications)

From the Desk of the Vice-Chancellor

AKS University is currently undergoing a process to revamp its curriculum into an outcome-based approach, to enhance the teaching and learning process. The foundation of quality of quality education lies in the implementation of a curriculum that aligns with both societal and industrial needs, focusing on relevant outcomes. This entails dedicated and inspired faculty members, as well as impactful industry internships. Hence, it is of utmost importance to begin this endeavor by crafting an outcome-based curriculum in collaboration with academia and industry experts. This curriculum design should be informed by the latest technological advancements, market demands, the guidelines outlined in the National Education Policy (NEP) of 2020, and sustainable goals.

I'm delighted to learn that the revised curriculum has been meticulously crafted by the Computer Application & Information Technology Department, in consultation with an array of experts from the Computer Science industry, research institutes, and academia. This curriculum effectively integrates the principles outlined in the NEP-2020 guidelines, as well as sustainable goals. It also adeptly incorporates the latest advancements in Computer Science manufacturing technology.

Furthermore, the curriculum takes into account the specific needs of the Indian Computer Science industry, focusing on the production of cost-effective, high-quality Computer Science. It extends its reach to optimizing power consumption by including insights on waste heat recovery systems utilized in Computer Science plants. This inclusion not only imparts knowledge but also encourages students' independent thinking for potential enhancements in this area.

The curriculum goes beyond theoretical learning and embraces practical applications by incorporating the utilization of industrial and domestic waste in Computer Science production. To enhance students' skills, the curriculum integrates Hands-On Training, industrial visits, on-the-job training experiences, research, and progress. This well-rounded approach ensures that students receive a comprehensive education, fostering their skill development and preparing them for success in the Computer Science industry.

I am confident that the updated curriculum for Computer Application & Information Technology will not only enhance students' technical skills but also contribute significantly to their employability. During the process of revising the curriculum, I am pleased to observe that the Computer Application & Information Technology department has diligently adhered to the guidelines provided by the UGC. Additionally, they have maintained a total credit requirement of 120 for the BCA program.

It's worth noting that curriculum revision is an ongoing and dynamic process, designed to address the continuous evolution of technological advancements and both local and global concerns. This ensures that the curriculum remains responsive and attuned to the changing landscape of education and industry. AKS University warmly invites input and suggestions from industry expert technocrats and Alumni students to enhance the curriculum and make it more student-centered. Your valuable insights will greatly contribute to shaping an education that best serves the needs and aspirations of our students.

AKS University, Satna ***Professor B. A. Chopade***

01 August 2023 *Vice-Chancellor*

Preface

As part of our commitment to ongoing enhancement, the Department of Computer Application & Information Technology consistently reviews and updates its BCA program curriculum every three years. Through this process, we ensure that the curriculum remains aligned with the latest technological advancements, as well as local and global industrial and social demands.

During this procedure, the existing curriculum for the BCA Program undergoes evaluation by a panel of technocrats, industry specialists, and academics. Following meticulous scrutiny, the revised curriculum has been formulated and is set to be implemented starting from August 01, 2023. This implementation is contingent upon the endorsement of the curriculum by the University's Board of Studies and Governing Body.

This curriculum closely adheres to the UGC model syllabus distributed in 2020. It seamlessly integrates the guidelines set forth by the Ministry of Higher Education, Government of India, through NEP-2020, as well as the principles of Sustainable Development Goals. To foster the holistic skill development of students, a range of practical activities, including Hands-On Training, Industrial Visits, Project planning and execution, Report Writing, Seminars, and Industrial on-the-job training, have been incorporated. Furthermore, in alignment with AICTE's directives, the total credit allocation for the BCA program is capped at 120 credits.

To ensure a comprehensive learning experience, detailed evaluation schemes and rubrics have also been meticulously provided.

For each course, a thorough mapping of Course Outcomes, Program Outcomes, and Programme Specific Outcomes has been undertaken. As the course syllabus is meticulously developed, various elements such as session outcomes, laboratory instruction, classroom instruction, self-learning activities, assignments, and mini-projects are meticulously outlined.

We hold the belief that this dynamic curriculum will undoubtedly enhance the independent thinking, skills, and overall employability of the students.

Professor Akhilesh A. Waoo
Associate Dean and Head CS/IT

Introduction

AKS University proudly stands as a pioneer, being the first in the nation to introduce a comprehensive 3-year *Bachelor of Computer Applications (BCA)* program back in 2012. This innovative curriculum has been meticulously crafted to align with the dynamic needs of the computer and information industry and the most current technological advancements. Currently, a vibrant community of 170 students is actively engaged in pursuing their BCA within this department. The Faculty of Computer Applications & Information Technology and Sciences boasts cutting-edge laboratories that serve as hubs for immersive hands-on training, enabling students to delve into practical applications of their learning. The program incorporates both in house training and sandwich apprenticeship training, vital components that enrich the educational journey. Distinguished by a faculty composed of computer industry experts who bring with them a wealth of industrial experience, the department combines robust classroom instruction with practical and industrial acumen. This unique blend empowers our students to confidently contribute to software development and make a significant impact in the field.

Vision

To emerge as power house of information Technology and Allied areas developing competent computer professionals to meet the dynamic needs of disruptive technologies.

Mission

M01: To impart technical knowledge through innovative teaching, research and consultancy

MO2: Provides state-of-the-art facilities and internationally recognized faculty.

MO3: To adapt to the dynamic needs of industries through curriculum update

MO4: Promotes partnerships with industry and community and electrical energy in cement manufacture and environmental needs.

MO5: To produce competent graduates with professional ethics and life skills.

Program Educational Objectives (PEO)

PEO01: To develop technical and managerial skills among the students with practical knowledge to work in cement manufacturing unit and able to handle day to day plant problems.

PEO02: To develop R&D temperament among the students for development, innovation and sustainable technology in cement manufacturing process.

POE03: To develop ethical principles among the students and commitment to

fulfilling international, national and local needs and social responsibilities with his/her professional excellence.

PEO04: Ability to understand the impact of professional engineering solutions in societal, economic and environmental contexts and demonstrate knowledge and need for sustainable development

Program Outcomes (POs)

PO1: Computational information: Appreciate and apply mathematical organization, computing and domain information for the conceptualization of computing models from clear harms.

PO2: Difficulty Analysis: Talent to classify, significantly evaluate and prepare complex computing problems using fundamentals of computer knowledge and request domains.

PO3: Drawing / Improvement of Solutions: Facility to transform composite production scenarios and present-day issues into problems, explore, recognize and propose included solutions using rising technologies.

PO4: Accomplish Investigations of Compound Computing Troubles: Ability to invent and ways experiments interpret data and present well up to date conclusions.

PO5: Current Implement Procedure: Skill to select recent computing tools, skills and techniques compulsory for original software solutions

PO6: Proficient Principles: Facility to apply and give expert principles and cyber systems in a universal monetary situation.

PO7: Ultimate Education: Identify the need for and enlarge the ability to appoint in permanent education as a Computing qualified.

PO8: Mission Administration: Skill to recognize administration and computing philosophy with computing acquaintance to supervise projects in multidisciplinary environments.

PO9: Announcement Usefulness: Converse successfully with the computing society as well as culture by being able to know successful documentations and presentations.

PO10: Public & Ecological Alarm: Ability to make out cost-effective, green, public, fitness, authorized, moral issues concerned in the use of processor expertise and other significant tasks applicable to qualified observers.

PO11: Personality & Group Job: Ability to job as a part or manager in various teams in multidisciplinary situations.

PO12: Modernization and Private Enterprise: Classify opportunities, private enterprise dream and use of original thoughts to build worth and means for the betterment of the human being and the world.

Program Specific Outcomes (PSOs)

On completion of BCA program, the students will achieve the following program specific outcomes:-

PSO1: An ability to enhance the application of knowledge of theory subjects in diverse fields.

PSO2: Develop language proficiency to handle corporate communication demands.

PSO3: Preparing students in various disciplines of technologies such as computer applications, computer networking, software engineering, JAVA, database concepts and programming.

PSO4: In order to enhance programming skills of the young IT professionals, the concept of project development in using the technologies learnt during the semester has been introduced.

Mapping of PEOs with Mission of the Department

PEO	M1	M2	M3	M4
PEO1	3	2	3	2
PEO2	2	2	2	3
PEO3	2	3	2	1
PEO4	2	2	3	3

General Course Structure & Scheme

1. Definition of Credit

1 Hr. Lecture (L) per week	1 Credit
1 Hr. Tutorial (T) per week	1 Credit
2 Hours Practical (P) per week	1 Credit

2. Range of Credits:

In the light of the fact that a typical Model three-year Under Graduate degree program in computer application has about 160 credits, the total number of credits proposed for the three-year Bachelor of Science in Information Technology is kept as 160 considering NEP-20 and NAAC guidelines.

A K S University

Faculty of Engineering and Technology

Department of Computer Application& Information Technology

Curriculum of B.C.A. Program

(Revised as on 01 August 2023)

Semester-I

Course Code: 0SDG01

Course Title: **Sustainable Development Goals (SDGs)**

Pre-requisite: Student should have basic knowledge of Environment, Natural resources, Climate change and sustainability.

Rationale: To inculcate the knowledge base on sustainable development with a view to balance our economic, environmental and social needs, allowing prosperity for now and future generations. To train students to undertake major initiatives in the efficient management of natural resources and the prevention of environmental pollution with focus on Sustainable Development.
To use environmental management tools that help to improve the quality of environment, to assess local vulnerabilities with respect to climate, natural disasters and to achieve sustainable developmental needs.

Course Outcomes:

0SDG01**.1:** Examine critically the 17 newly minted UN Sustainable Development Goals and understand the historical evolution, key theories, and concepts of sustainable development.
0SDG01**.2:** Identify and apply methods for assessing the achievement of sustainable development and discover the science, technology, economics, and politics underlying the concepts of sustainability.
0SDG01**.3:** Understand the implications of overuse of resources, population growth and economic growth and sustainability and explore the challenges the society faces in making transition to renewable resource use.
0SDG01**.4:** Develop skills to understand attitudes on individuals, society and their role regarding causes and solutions in the field of sustainable development and apply critical thinking skills to evaluate the quality, credibility and limitations of an argument for solution.
0SDG01**.5:** Describe the steps of the design thinking methodology and how design thinking can accelerate effective SDG implementation. Deepen knowledge and pedagogical tools to incorporate values-based education for sustainable development in educational Programmes and processes.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credits (C)
			Cl	LI	SW	SL	Total Study Hours (CI+LI+SW+SL)	
Foundation	0SDG01	Sustainable Development Goal	2	0	1	1	4	2

Legend: **CI:** Class room Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),
LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)
SW: Sessional Work (includes assignment, seminar, mini project etc.),
SL: Self Learning,
C: Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Scheme of Assessment:

Theory

Board of Study	Couse Code	Course Title	Scheme of Assessment (Marks)							
			Progressive Assessment (PRA)						End Semester Assessment (ESA)	Total Marks (PRA+ ESA)
			Class/Home Assignment 5 number 3 marks each	Class Test 2 (2 best out of 3) 10 marks each (CT)	Seminar one (SA)	Class Activity any one (CAT)	Class Attendance (AT)	Total Marks (CA+CT+SA+ CAT+AT)		
Foundation	0SDG01	Sustainable Development Goal	15	20	5	5	5	50	50	100

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

0SDG01**.1:** Examine critically the 17 newly minted UN Sustainable Development Goals and understand the historical evolution, key theories, and concepts of sustainable development.

COs, POs and PSOs Mapping

Program: B.C.A.
Course Code: 0SDG01
Course Title: Sustainable Development Goals (SDGs

Course Outcomes	Program Outcomes												Program Specific Outcome				
	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2	PSO 3	PSO 4	PS0 5
	Engineering knowledge	Problem analysis	Design/development of solutions	Conduct studies of difficult problems	Utilization of modern tools	Engineers and society	Environment and sustainability	Ethics	Individual and team work	Communication	Project management and finance	Life-longlearning	Use fundamental knowledge of math, science, and engineering to comprehend, evaluate, and create computer Programmes in the fields of algorithms, multimedia, big data analytics, machine learning, artificial intelligence, and networking for the effective design of computer-based systems of various complexity	Utilize relevant methods and cutting-edge hardware and software engineering tools to develop and integrate computer systems and related technologies. This PSO2 also encourages lifelong learning for the advancement of technology and its use in multidisciplinary settings	Applying professional engineering solutions for societal improvement while taking into account the environmental context, being conscious of professional ethics, and being able to effectively communicate.	Learn and use the most recent Artificial Intelligence and Data Science technologies in the fields of engineering and computer science	Recognize and examine issues in real life, then offer creative software solutions with the help o AI and Data Science Technologies.
CO101.1: Examine critically the 17 newly minted UN Sustainable Development Goals and understand the historical evolution, key theories, and concepts of sustainable development.	1	1	2	2	3	2	3	2	2	1	3	2	2	3	3	1	2

Semester-I

Course Code: 0EVS03

Course Title: Environmental Science

Pre- requisite: To study this course, the student must have a knowledge about the environmental components, pollution, biodiversity, and Ecosystem at senior secondary, Class 12th level.

Rationale: The students studying Environmental Science should possess foundational understanding about environment and its components. They should also know the importance of ecosystems in our surroundings.

Course Outcomes:

0EVS03.**1:** To understand various aspects of life forms, ecological, processes, and the impacts on them by the human during Anthropocene era.

0EVS03.**2:** To build capabilities to identify relevant environmental issues, analyze the various underlying causes, evaluate the practices and policies, and develop framework to make inform decisions.

0EVS03.**3:** To develop empathy for all life forms, awareness, and responsibility towards environmentalprotection and nature preservation.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credit (C)
			Cl	LI	SW	SL	Total Study Hours (CI+LI+SW+SL)	
Foun dation	0EVS03	Environmental Science	2	0	1	1	5	2

Legend: **CI:** Classroom Instruction (Includes different instructional strategies i.e., Lecture (L) and Tutorial (T) and others),

LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

SW: Sessional Work (includes assignment, seminar, mini project etc.),

SL: Self Learning,

C: Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Scheme of Assessment: Theory

Board of Study	Couse Code	Course Title	Scheme of Assessment (Marks)							
			Progressive Assessment (PRA)						End Semester Assessment (ESA)	Total Marks (PRA + ESA)
			Class/Home Assignment 5 number 3 marks each (CA)	Class Test 2 (2 best out of 3) 10 marks each (CT)	Seminar one (SA)	Class Activity any one (CAT)	Class Attendance (AT)	Total Marks (CA+CT+SA+CAT+AT)		
Foundation	0EVS03	Environmental Education	15	20	5	5	5	50	50	100

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

0EVS03.1: To understand various aspects of life forms, ecological, processes, and the impacts on them by the human during Anthropocene era.

Approximate Hours

Item	AppX Hrs.
Cl	08

SW	1
SL	2
Total	11

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self-Learning (SL)
SO1.1 Know multidisciplinary nature of environmental science. SO1.2 Learn about the natural resources. SO1.3 Know the problems associated with land resource. SO1.4 Learn the conservation of resources. SO1.5 Know alternative energy resources.	.	**Unit-1 Environment and Natural Resources:** 1.1 The Multidisciplinary nature of environmental studies. 1.2 Scope and Importance of Environmental studies 1.3 Components of Environment: 1.4 Atmosphere, Hydrosphere, 1.5 Lithosphere, and Biosphere. 1.6 Brief account of Natural Resources and 1.7 associated problems 1.8 Land Resource 1.9 Water Resource 1.10 Energy Resource 1.11 Concept of Sustainability and 1.12 Sustainable Development	i. What is environmental Science? ii. What are resources?

SW-1 Suggested Sessional Work (SW):

a. Assignments:

- **i.** Write the definition and causes of soil erosion.
- **ii.** Define desertification and write its causes.
- **iii.** Describe structure of atmosphere.
- **iv.** Explain lithosphere.

0EVS03.2: To build capabilities to identify relevant environmental issues, analyze the various underlying causes, evaluate the practices and policies, and develop framework to make inform decisions.

LI	0
SW	2
SL	2
Total	09

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self-Learning (SL)
SO2.1 Understand the concept of ecosystem. **SO2.2** Learn the structure of ecosystem. **SO2.3** Know the function of ecosystem. **SO2.4** Describe the structure of forest ecosystem. **SO2.**5 Learn about biodiversity and its conservation.		Unit-2 Biomes, **Ecosystem and Biodiversity** 2.1 Major Biomes: Tropical, Temperate, Forest, Grassland, Desert, 2.2 Tundra, Wetland, 2.3 Estuarine and Marine Ecosystem: Structure 2.4 Function and types their Preservation 2.5 Restoration Biodiversity and its conservation practices.	i. What is biotic and abiotic components of environment? ii. What are interactions?

SW-2 Suggested Sessional Work (SW):

a. Assignments:

i. What do you mean by ecosystem? Describe the structure of ecosystem.
ii. Give a brief classification of ecosystem.
iii. Write the function of an ecosystem.
iv. Define biodiversity write strategies of biodiversity conservation.

b. Mini Project:

Visit to various ecosystem and study biotic and abiotic ecosystem.

0EVS03.3: To develop empathy for all life forms, awareness, and responsibility towardsenvironmental protection and nature preservation.

Approximate Hours

Item	AppX Hrs
Cl	07
LI	0
SW	02
SL	2
Total	11

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self-Learning (SL)
SO3.1. Learn about pollution and its sources. **SO3.2** Know the sources of different pollutant. **SO3.3** Understand the law & legislation related to environment. **SO3.4** Learn the control of pollution. **SO3.**5 Describe the role of information technology in environment and human health.		Unit-3: **Environmental Pollution, Management and** Social **Issues:** 3.1 Pollution: Types, Control measures, 3.2 Management and associated problems. 3.3 Environmental Law and Legislation: 3.4 Protection and conservation Acts. International Agreement & **Program** 3.5 Environmental Movements, communication and public awareness Program. 3.6 National and International organizations related to environment conservation and monitoring. 3.7 Role of information technology in environment and human health.	i. What is pollution basic introduction? ii. What is pollutant?

SW-3 Suggested Sessional Work (SW):

a. Assignments:

i. Write an essay on air pollution.
ii. What do you mean by acid rain write its causes and effects.
iii. Describe the effects of water pollution.
iv. How soil pollution can be control?

v. Describe the role of information technology in environment and human health.

vi. Mention some national and international organizations related to environment conservation and monitoring.

b. Other Activities (Specify):

Visit to different polluted sites and study the source of pollution and their effects.

Brief of Hours suggested for the Course Outcome

Course Outcomes	Class Lecture (Cl)	Sessional Work (SW)	Self-Learning (Sl)	Total hour (Cl+SW+Sl)
CO.1: To understand various aspects of life forms, ecological processes, and the impacts on them by the human during Anthropocene era.	10	1	2	13
CO.2: To build capabilities to identify relevant environmental issues, analyze the various underlying causes, evaluate the practices and policies, and develop framework to make inform decisions.	10	2	2	14
CO.3: To develop empathy for all life forms, awareness, and responsibility towards environmental protection and nature preservation.	10	2	2	14
Total Hours	30	05	06	41

Suggestion for End Semester Assessment

Suggested Specification Table (For ESA)

CO	Unit Titles	Marks Distribution			Total Marks
		R	U	A	
CO-1	**Environment and Natural Resources:**	03	01	01	05
CO-2	Biomes, **Ecosystem and Biodiversity**	02	06	02	10
CO-3	**Environmental Pollution, Management and** Social **Issues**	03	07	05	15
Total		11	26	13	50

Legend: R: Remember, U: Understand, A: Apply

The end of semester assessment for Fundamental of Environmental Science will be held with written

examination of 50 marks

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Visit to cement plant
7. Demonstration
8. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)
9. Brainstorming

Suggested Learning Resources:

(a) Books:

A K S University

Faculty of Engineering and Technology

Department of Computer Application& Information Technology

Curriculum of B.C.A. Program

Semester-I

Course Code: 01CA112

Course Title : Computer Fundamentals, Organization and Architecture

Pre- requisite: To study this Course, a student must have basic knowledge of computers

Rationale: Study of Computer Fundamentals will help students to understand Organization and Architecture data. Insights from Organization and Architecture help students in industry placements. Good knowledge of Organization and Architecture will provide students chance to appear in product bases companies also students will able to develop problem solving skills after the study of this subject.

Course Outcomes:

01CA112.1: Understand the basic stricture, operation and characteristics of digital computer
01CA112.2: Design simple combinational digital circuits based on given parameters.
01CA112.3: Understand the working of arithmetic and logic unit.
01CA112.4: Know about hierarchical memory system including cache memories and virtual memory.
01CA112.5: Know the contributions of Indians in the field of Indians in the field of computer architecture and related technologies.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credit (C)

The end of semester assessment for Introduction to Portland cement will be held with writtenexamination of 50 marks

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Visit to cement plant
7. Demonstration
8. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)
9. Brainstorming

Suggested Learning Resources:

Department of Computer Application& Information Technology

Curriculum of BCA Program

Semester-I

Course Code: **02CA121**
Course Title: PROGRAMMING IN C
Pre-requisite: Student should have a basic understanding of Fundamental of Computer.
Rationale: Importance of C programming and its practical applications C programming language holds immense importance in the software development industry. Its simplicity, efficiency, and versatility make it a powerful tool for developing a wide range of applications. From operating systems to embedded systems, C finds its use in numerous domains.

Course Outcome:

02CA121.1: Explain the core concept of C programming Algorithms and Flowcharts.
02CA121.2: Use various input output operations and control statements.
02CA121.3: Use Array and Function in programs.

02CA121.4: Describe the pointers and use of structure and union
02CA121.5: Use File handling Programs.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credits(C)
			Cl	LI	SW	SL	Total Study Hours(CI+LI+SW+SL)	
Minor	02CA121	**PROGRAMMING IN C**	4	4	1	1	10	6

Legend: **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),

LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, fielder other locations using different instructional strategies)

SW: Sessional Work (includes assignment, seminar, mini project etc.),

SL: Self Learning,

C: Credits.

Note: SW&SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Scheme of Assessment: Theory

Board of Study	Couse Code	Course Title	Scheme of Assessment(Marks)							
			Progressive Assessment(PRA)						End Semester Assessment (ESA)	Total Marks (PRA+ESA)
			Class/HomeAssignment5number 3 marks each (CA)	Class Test 2 (2best out of3) 10 marks each (CT)	Seminar one (SA)	Class Activity any one (CAT)	Class Attendance (AT)	Total Marks (CA+CT+SA+CAT+AT)		
Minor	02CA121	Programming in C Language	15	20	5	5	5	50	50	100

Scheme of Assessment: Practical

Board of Study	Couse Code	Course Title	Scheme of Assessment (Marks)						
			Progressive Assessment (PRA)					End Semester Assessment (ESA)	Total Marks (PRA+ ESA)
			Class/Home Assignment 5 number 3 marks each (CA)	Viva1 (5)	Viva2 (5) (SA)	Class Attendance (AT)	Total Marks (CA+CT+SA+CAT+AT)		
Minor	ES104	Programming in C Language	35	5	5	5	50	50	100

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

02CA121.1: At the end of this chapter the student will explain the core concept of C programming Algorithms and Flowcharts.

SW-1 Suggested Sessional Work (SW):

Session Outcomes (SOs)	**Laboratory Instruction (LI)**	**Classroom Instruction (CI)**	**Self-Learning (SL)**
SO1.1 Understand about Language and programming paradigm. **SO1.2** Understand Over view of procedural Programming and object-oriented Programming **SO1.3** Understand Algorithms Flow Charts - Symbols, Rules for making. **SO1.4** Understand Flow chart, Types of flowcharts **SO1.5** Understand about techniques of problem solving: Programming Techniques — Top down, bottom up, Modular **SO1.**6 use of Structured - Features, Merits & Demerits **SO1.7** Learn about Programming Logics- Simple Branching, Looping Recursion, Cohesion & Coupling. **SO1.8** Learn about the Programming. Testing & debugging & their Tools.	LI1.1. Write an algorithm to print the sum and product of digits of an integer. LI 1.2 Draw a flowchart to find greatest between 2 numbers. LI1.3 Write an algorithm to check the inputted year is leap year or not. LI 1.4 Draw a flowchart for calculation factorial of given number. LI1.5 Draw a flowchart for calculation Fibonacci of given number LI1.6. Write an algorithm to print sum of first 10 natural numbers.	**Unit-1.0 Introduction**: 1.1 Programming Paradigm. 1.2 Overview of object-oriented Programming. 1.3 Understanding Algorithms 1.4 C program structure 1.5 Flowcharts and its Symbols 1.6 Programming logics 1.7 use of Structured 1.8 - Features, 1.9 Merits& 1.10 Demerits 1.11 Testing & debugging & 1.12 theirTools	1. Use of algorithms for develop program. .

SW: 1. Assignment

02CA121.2: At the end of this chapter the student will use various input output operations and control statements.

Session Outcomes (SOs)	**Laboratory Instruction (LI)**	**Classroom Instruction (CI)**	**Self-Learning (SL)**
SO2.1 Understand about language and programming paradigm. **SO2.2** Understand about use of Character set **SO2.3** Use of Identifier and keyword **SO2.4** Understand about Data Types **SO2.5**Understand about constant and variable. **SO2.**6 use of operator in programming **SO2.7**Learn about the decision control statements in C language. **SO2.**8 Learn about the Looping Statement in C programming.	LI2.1. Write a program to print the sum of digits of an integer. LI2.2.product of digits of an integer. LI 2.3 Write a program to reverse digit of a number. LI2.4 Write a program to compute the sum of the first n terms of the following series S = 1+1/2+1/3+1/4+…… LI 2.5. WAP to computethe sum of the first n terms of the following series S =1-2+3- 4+5…… LI2.6. Example of if else statement	**Unit-1.0 Introduction**: 2.1 Programming Paradigm. 2.2 C-Character Set. 2.3 Identifier and Keyword 2.4 Data Types 2.5 Constant and Variable 2.6 Operator 2.7 Decision Control Statement 2.8 Decision Control Statement 2.9 Looping control Statement 2.10 Looping control Statement 2.11 For loop 2.12 While loops	1. Create program in C use of decision and looping statement.

SW-2 Suggested Sessional Work (SW):

a) Assignments:

- Create a program in C to check the input no is prime or not.

- Create a program in C to print a factorial of given no.

b) Mini Project:

- C Program to Make a Simple Calculator Using switch...case.

c) Other Activities (Specify):

- Printing patterns using C programs

02CA121.3: At the end of this chapter the student will use Array and Function in programs.

Approximate Hours

Session Outcomes(SOs)	**LaboratoryInstruction(LI)**	**Classroom Instruction (CI)**	**Self-Learning (SL)**
SO3.1 Understand Array.**SO3.2** Types of arrays. **SO3.3** Use of function **SO3.4** Understand about call by value andcall by reference **SO3.5** Understand about storage classes. **SO3.6** use of String functions	LI 3.1 Write a function that checks whether agiven string is Palindrome or not. LI3.2.Use this function to find whether the stringentered by user is Palindrome or not. LI 3.3 Write a program that prints a table indicating the number of occurrences of each alphabet in the text entered ascommand line arguments. LI 3.4 Program for factors of a given number. LI3.5 Program for call by value and call by reference LI3.6 Program for for and while loop	**Unit-3.0 Array**: 3.1 Defining, Declaring and 3.2 Initializing Array. 3.3 Types of Arrays. 3.4 Types of Arrays. 3.5 C-Function: 3.6 Declaration and definition 3.7 Call by value 3.8 and call by reference 3.9 Storage Classes 3.10 Storage Classes 3.11 String functions 3.12 Learning by example	1. Use of array for develop program. 2. Create program in C use of function.

SW-2 Suggested Sessional Work (SW):

a) Assignments:
- Create a program in C to create two-dimensional array.

b) Mini Project:
- C Program to add two matrices.

c) Other Activities (Specify):
- Printing patterns using C programs

02CA121.4: At the end of this chapter the student will describe the pointers and use of structure and union.

A K S University

Faculty of Engineering and Technology

Department of Computer Application& Information Technology

Curriculum of BCA Program

Semester-I

Course Code: **03MS173**

Course Title: Discrete Mathematics

Pre- requisite: Basics Mathematics

Rationale: Concepts and notations from discrete mathematics are useful in studying and describing objects and problems in branches of computer science, such as computer algorithms, programming languages, cryptography, automated theorem proving, and software development.

Course Outcome:

03MS173.1: Understand concepts of relation & lattices
03MS173.2: Apply the Boolean algebra switching circuits and their application.
03MS173.3: Graph, their types and its application in study of shortest path algorithm
03MS173.4: Apply the tree & matrix in problem
03MS173.5: Understand the discrete numeric function generating functions and Recurrence relation.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credits (C)
			Cl	LI	SW	SL	Total Study Hours (CI+LI+SW+SL)	
Open Elective	03MS173	Discrete mathematics	4	0	1	1	5	4

Legend: **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),

LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, fielder other locations using different instructional strategies)

SW: Sessional Work (includes assignment, seminar, mini project etc.),

SL: Self Learning,

C: Credits.

Note: SW&SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Scheme of Assessment: Theory

Board of Study	Course	Course Title	Scheme of Assessment (Marks)							
			Progressive Assessment (PRA)						End Semester Assessment	Total Marks (PRA+ESA)
			Class/Home Assignment 5 number 3 marks each	Class Test 2 (2 best out of 3)	Seminar one	Class Activity any one (CAT)	Class Attendance (AT)	Total Marks (CA+CT+SA+CAT+AT)	(ESA)	
OE	03 MS 173	Discrete mathematics	15	20	5	5	5	50	50	100

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

03MS173.1: Understand concepts of relation & Lattices

Approximate Hours

Item	AppX Hrs
Cl	12
LI	0
SW	1
SL	1
Total	14

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self-Learning (SL)

SO1.1 Understand the concept of relations **SO1.2** Understand the concept of lattices **SO1.3** Apply types of relation and lattices	.	**Unit-1.0** understand concepts of relation & lattices I. 1.1 Binary relation 1.2 Inverse relation 1.3 Composite & 1.4 equivalence relation 1.5 equivalence classes & 1.6 its property 1.7 portions of sets 1.8 totally order sets & 1.9 Hesse diagram 1.10 lattice 1.11 lattice, 1.12 Examples & types	1. To solve numerical based question 2. Draw the Hesse diagram

SW-1 Suggested Sessional Work (SW):

Assignments:

i. Numerical based on back propagation.
ii. Numerical based on radial basis.
iii. Numerical based on recurrent network.

03MS173.2: Apply the Boolean algebra switching circuits and application

Approximate Hours

Item	AppX Hrs
Cl	12
LI	0
SW	1
SL	1
Total	14

session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self-Learning (SL)

SO2.1 Understand the concept of Boolean Algebra **SO2.2** Use the Boolean algebra **SO2.3** Switching circuit	.	**Unit-2.0** Apply the Boolean algebra switching circuits and their application II. 2.1. Boolean algebra 2.2. Definition & 2.3. properties of Boolean algebra 2.4. Switching circuits and 2.5. its application 2.6. Boolean function 2.7. Disjunctive & conjunctive 2.8. Bool's expansion theorem 2.9. Karnaugh map-1 2.10. Karnaugh map-2 2.11. Minimize the Boolean function 2.12. Normal forms	1. How Boolean algebra is used to solve real life problems. 2. Numerical based on Boolean Algebra

SW- Suggested Sessional Work (SW):

Assignments:

i. Numerical based on Fuzzy logic.
ii. Numerical based on Membership Function.
iii. Numerical based on Genetic algorithm.

03MS173.3: Graph, their types and its application in study of shortest path algorithm

Approximate Hours

Item	AppX Hrs
Cl	12
LI	0
SW	1
SL	1
Total	14

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self-Learning (SL)
SO3.1 Understand the concept of graph and search tree **SO3.2** Use Graphs search algorithms **SO3.3** Apply shortest path algorithms	.	**Unit-3.0** graph, their types and its application in study of shortest path algorithm 3.1. Basic concepts of graph 3.2. Basic concepts of search algorithm. 3.3. Types of graphs-1 3.4. Types of graphs-2 3.5. Application of graph 3.6. Walk 3.7. path and 3.8. circuit 3.9. Dijkstra's algorithm for shortest path. 3.10. Hamiltonian path and 3.11. circuit 3.12. Weighted graph	1. Compare and analyze all search algorithm.

SW- Suggested Sessional Work (SW):

Assignments:

i. Numerical based on Fuzzy logic.
ii. Numerical based on Membership Function.
iii. Numerical based on Genetic algorithm.

03MS173.4: Apply tree and Matrix in problems

Approximate Hours

Item	AppX Hrs
Cl	12
LI	0
SW	1
SL	1
Total	14

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self-Learning (SL)
SO4.1 Understand the concept of Trees representation	.	**Unit-4.0 Apply tree and Matrix in problems**	1. Compare and analyze all Tree algorithm. 2. Numerical based on problems

SO4.2 Use of Trees **SO4.3** Apply Tree; spanning tree, cut-set, Matrix representation of graph		4.1. Trees representation 4.2. Structured representation: frames 4.3. Definition of Trees and 4.4. its properties 4.5. Rooted, binary and 4.6. spanning tree 4.7. Rank and nullity of a graph 4.8. Kruskal's and prim's Algorithm 4.9. Fundamental circuit and Cut-set and its properties 4.10. Planar graphs 4.11. Matrix representation of graphs 4.12. Types of matrix	

SW-1 Suggested Sessional Work (SW):

Assignments:

i. Questions based on frames.
ii. Questions based on scripts.
iii. Questions based on formal logic.

03MS173.5: Understand the discrete numeric functions, generating function and Recurrence relation

Approximate Hours

Item	AppX Hrs
Cl	12
LI	00
SW	01
SL	01
Total	14

Session Outcomes (SOs)	**Laboratory Instruction (LI)**	**Class room Instruction (CI)**	**Self-Learning (SL)**
SO5.1 Understand the concept of discrete numeric function **SO5.2** Concept of Recurrence relations and recursive algorithms **SO 5.3** Solution of generating function	.	**Unit-5.0 Understand the discrete numeric functions, generating function and Recurrence relation** 5.1. Operation on numeric function 5.2. Asymptotic 5.3. Behavior of numeric function 5.4. Generating function 5.5. Recurrence relation 5.6. Recurrence relation with constant coefficients 5.7. Homogeneous solution-1 5.8. Homogeneous solution-2 5.9. Particular solution 5.10. Solution by the method of generating functions	1. Compare and analyze all techniques.

		5.11. Total solution 5.12. Linear recurrence relation	

SW-1 Suggested Sessional Work (SW):

Assignments:

i. Different types of learning techniques.

ii. Use of Dempster-Shafer Theory of Evidential reasoning

Brief of Hours suggested for the Course Outcome

Course Outcomes	Class Lecture (Cl)	Sessional Work (SW)	Self-Learning (Sl)	Total hour (Cl+SW+Sl)
03MS173.1 Understand concepts of relation &Lattices	12	1	01	14
03MS173.2: Apply the Boolean algebra switching circuits and application	12	1	01	14
03MS173.3: Graph, their types and its application in study of shortest path algorithm	12	1	01	14
03MS173.4: Apply tree and Matrix in problems	12	1	01	14
03MS173-5: Understand the discrete numeric functions, generating function and Recurrence	12	1	01	14
Total Hours	60	5	5	70

Suggestion for End Semester Assessment

Suggested Specification Table (For ESA)

CO	Unit Titles	Marks Distribution			Total Marks
		R	U	A	
03MS1731.1 Understand concepts of relation & Lattices	Understand concepts of relation & Lattices I.	03	02	03	08
03MS173.2: Apply the Boolean algebra switching circuits and application	Apply the Boolean algebra switching circuits and application	03	01	05	09
03MS173.3: Graph, theirtypes and its application in study of shortest path algorithm	Graph , their types and its application in study of shortest path algorithm	03	07	02	12

03MS173.4: Apply tree andMatrix in problems	Apply tree and Matrix in problems.	03	05	05	13
03MS173-5: Understandthe discrete numeric functions, generating function and Recurrence	Understand the discrete numeric functions, generating function and Recurrence	03	02	03	08
Total		15	17	18	50

Legend: **R: Remember,** **U: Understand,** **A: Apply**

The end of semester assessment for Introduction to Portland cement will be held with writtenexamination of 50 marks

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Visit to cement plant
7. Demonstration
8. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT,Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)
9. Brainstorming

Suggested Learning Resources:

Department of Computer Application & Information Technology

Curriculum of B.C.A. Program

(Revised as on 01 August 2023)

Semester-II

Course Code: OSSD02

Course Title: Communication skills

Pre-requisite: Students must have basic knowledge of English language.

Rationale: In order to compete in this fast-growing world, LSWR skills of the students should be well developed and enhanced. Besides, they must have effective communication skills as it plays a vital role in shaping individual's personality and career. It also booststhe confidence and prepares them to face the audience fearlessly.

Course Outcomes:

After completion of the course:

OSSD02.1 Speak confidently in public as all the topics chosen emphasis on improving speaking skills anddeveloping self confidence amongst them.

OSSD02.2 Interact properly with improved Leadership Skills, Problem Solving Skills, Social skills andCommunication Skills. Students will also be able to understand the Importance of Team Work.

OSSD02.3 Communicate effectively in Hindi and English languages without hindrances.

OSSD02.4 Convey their messages accurately by understanding the significance of grammar as it plays a vitalrole in improving speaking and writing skills.

OSSD02.5 Understanding of Indian Culture and English Language will be developed through the study of Dramas and Poems written by Indian Writers.

Scheme of Studies:

Department of Computer Application& Information Technology

Curriculum of B.C.A. Program

(Revised as on 01 August 2023)

Semester-II

Course Code: 0IKS04

Course Title: Indian Knowledge System

Pre- requisite: Creating awareness among the youths about the true history and past rich culture of India.

Rationale: India has very rich and versatile knowledge system and cultural heritage since antiquity. The Indian Knowledge systems was developed on life science, medical science, literature, drama, art, music, dance, astronomy, mathematics, architecture (Sthapatyaveda), chemistry, aeronautics etc, during ancient period. In this basic course, a special attention is given to the ancient and historical perspective of ideas occurrence in the ancient society, and implication to the concept of material world and religious, social and cultural beliefs. On the closer examination, religion, culture and science have appeared epistemological very rigidly connected in the Indian Knowledge System. This land of Bharat Bhumi has provided invaluable knowledge stuff to the society and the world in all sphere of life.

Course Outcomes:

0IKS04.**1:** To understand the ancient civilization, Indian Knowledge Systems, Concept of Panch Mahabhuta, Origin of name Bharat Varsha, Ancient Rivers, Ancient Universities and ancient agriculture.

0IKS04.**2:** Have the ability to learn about ancient books, religious places, basic concept of Indian dance, music and arts, and fundamental aspects of Sangeeta and Natyashashtra etc.

0IKS04.**3:** To gain knowledge on Vedic Science, Astronomy, Astrovastu, Vedic Mathematics, Aeronautics, Metallurgy, Nakhatras,Panchang, Concept of Zero, Pi and point etc.

0IKS04.**4:** Understanding on ancient Engineering, Science and Technology, Town Planning, Temple architecture, Chemistry and Metallurgy, Metal manufacturing etc.

0IKS04.**5: U**nderstand about the Life, Nature and Health through basic concept of Ayurveda and Yoga, Traditional Medicinal Systems,Ethnomedicine, Nature conservation, World Heritage Sites etc.

Scheme of Studies:

Category of Course	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credits (C)
			CI	LI	SW	SL	Total Study Hours CI+LI+SW+SL	
Foundation	0IKS04	Indian Knowledge System	2	0	1	1	4	2

Legend:

CI: Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),

LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

SW: Session Work (includes assignment, seminar, mini project etc.),

SL: Self Learning,

C: Credits.

Proposed examination scheme (Marking) as per the recommendation of University Grant Commission (UGC) for Under Graduate Courses in Fundamentals of Indian Knowledge Systems 2022-23 onwards

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

CO1. To understand Indian Civilization and Indian Knowledge Systems

Approximate Hours

Item	Approximate Hours
CI	**6**
LI	**0**
SW	**2**
SL	**1**
Total	**9**

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self-Learning (SL)
SO 1.1. Understand Overview of Indian Knowledge Systems (IKS) SO 1.2. Understand Classification of Ancient IKS texts SO 1.3. Understand Introduction to Panch Mahabhutas (Earth, Water, Fire, Sky and Air)		**Unit-1. Indian Civilization and Indian Knowledge Systems** 1.1. Overview of Indian Knowledge Systems (IKS) 1.2 Classification of Ancient IKS texts	Golden era of ancient India

SO 1.4. Understand Origin of the name Bharatvarsha: the Land of Natural Endowments SO 1.5. Understand Rivers of ancient India (The Ganga, Yamuna, Godawari, Saraswati, Narmada, Sindhu and Kaveri) SO 1.6. Understand Ancient Agriculture and ancient Universities: Takshashila and Nalanda, Gurukul system		1.3 Introduction to Panch Mahabhutas (Earth, Water, Fire, Sky and Air) 1.4 Origin of the name Bharatvarsha: the Land of Natural Endowments 1.5 Rivers of ancient India (The Ganga, Yamuna, Godawari, Saraswati, Narmada, Sindhu and Kaveri) 1.6 Agriculture system in ancient India, Ancient Universities: Takshashila and Nalanda, Gurukul system.	

SW-1 Suggested Sessional Work (SW):

a. Assignments:

i. Concepts of Panch Mahabhuta, Classification of ancient texts, origin of ancient rivers

b. Mini Project:

i. Ancient Universities: Takshashila and Nalanda,

c. Other Activities (Specify):

CO2: have the ability to apply the knowledge gained about Indian Art, Literature and Religious Places

Approximate Hours

Item	Approximate Hours
CI	**6**
LI	**0**
SW	**2**
SL	**1**
Total	**9**

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self-Learning (SL)
SO 2.1. Understand the Ancient Indian Books: Vedas, Puranas, Shastras, Upanishads, Mahakavyas (Ramayana & Mahabharata), Smrities, Samhitas SO 2.2. Understand the Religious places: Puries, Dhams, Jyotiralinga, Shaktipeeths, Kumbha Mela SO 2.3. Understand the Legendary places of Madhya Pradesh: Ujjain, Chitrakoot, Omkareshwar, Bharhut, Maihar SO 2.4. Understand the Basic concept of Indian Art, Music and Dance, Indian Musical Instruments		**Unit-2. Indian Art, Literature and Religious Places** 2.1.Ancient Indian Books: Vedas, Puranas, Shastras, Upanishads, Mahakavyas (Ramayana & Mahabharata),Smrities, Samhitas 2.2. Religious places: Puries, Dhams, Jyotiralinga, Shaktipeeths, Kumbha Mela 2.3.Legendary places of Madhya Pradesh: Ujjain, Chitrakoot, Omkareshwar, Bharhut, Maihar 2.4.Basic concept of Indian Art, Music and Dance, Indian Musical Instruments	**1.** Indian Art, Music and Dance

SO 2.5. Understand the Fundamental aspects of Sangeeta and Natya shastra SO 2.6. Understand the different schools of music, dance and painting in different regions of India.		2.5. Fundamental aspects of Sangeeta and Natya shastra 2.6. Different schools of music, dance and painting in different regions of India	

SW-2 Suggested Sessional Work (SW):

a. Assignments:

i. Visit of Chitrakoot, Maihar and Bharhuta

b. Mini Project:

ii. Kumbhmela, Story of Ramayana and Mahabharata

c. Other Activities (Specify):

CO3: Student will be able to understand Ancient Science, Astronomy and Vedic Mathematics

Approximate Hours

Item	Approximate Hours
CI	**6**
LI	**0**
SW	**2**
SL	**1**
Total	**9**

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self-Learning (SL)
SO 3.1. Understand Vedic Cosmology SO 3.2. Understand the Astronomy, Astrovastu, Vedang Jyotish, Nakshatras, Navagraha, Rashis, Vastushastra and their related plants SO 3.3. Understand the Time and Calendar, Panchang SO 3.4. Understand the Concept of Zero, Point, Pi -number system, Pythagoras SO 3.5. Understand the Vedic Mathematics, Vimana-Aeronautics, Basic idea of planetary model of Aryabhatta SO 3.6. Understand the Varanamala of Hindi language based on classification of sounds on the basis of their origin, Basic purpose of science of Vyakarana.		**Unit-3. Ancient Science, Astronomy, Mathematics** 3.1. Vedic Cosmology 3.2. Astronomy, Astrovastu, Vedang Jyotish, Nakshatras, Navagraha, Rashis, Vastushastra and their related plants 3.3. Time and Calendar, Panchang 3.4. Concept of Zero, Point, Pi -number system, Pythagoras 3.5. Vedic Mathematics, Vimana-Aeronautics, Basic idea of planetary model of Aryabhatta 3.6. Varanamala of Hindi language based on classification of sounds on the basis of their origin, Basic purpose of science of Vyakarana.	1. Ancient Science, Astronomy and Vedic Mathematics

SW-2 Suggested Sessional Work (SW):

a. Assignments:

1. Varanamala of Hindi language based on classification of sounds on the basis of their origin

b. Mini Project:

1. Nakshatras, Navagraha and their related plants

c. Other Activities (Specify):

CO4: Understand the Engineering, Technology and Architecture

Approximate Hours

Item	Approximate Hours
CI	**6**
LI	**0**
SW	**2**
SL	**1**
Total	**9**

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self-Learning (SL)
SO 4.1. Understand the Engineering Science and Technology in Vedic and Post Vedic Era SO 4.2. Understand the Town and Home planning, Sthapatyaveda SO 4.3. Understand the Chemistry and Metallurgy as gleaned from archeological artifacts SO 4.4. Understand the Chemistry of Dyes, Pigments used in Paintings, Fabrics, Potteries and Glass SO 4.5. Understand the Temple Architecture: Khajuraho, Sanchi Stupa, Chonsath Yogini temple SO 4.6. Understand the Mining and manufacture in India of Iron, Copper, Gold from ancient times		**Unit-4. Engineering, Technology and Architecture** 4.1. Engineering Science and Technology in Vedic and Post Vedic Era 4.2. Town and Home planning, Sthapatyaveda 4.3. Chemistry and Metallurgy as gleaned from archeological artifacts 4.4 Chemistry of Dyes, Pigments used in Paintings, Fabrics, Potteries and Glass 4.5. Temple Architecture: Khajuraho, Sanchi Stupa, Chonsath Yogini temple 4.6. Mining and manufacture in India of Iron, Copper, Gold from ancient times.	2. Ancient Science, Astronomy and Vedic Mathematics

SW-2 Suggested Sessional Work (SW):

a. Assignments:

i. Varanamala of Hindi language based on classification of sounds on the basis of their origin

b. Mini Project:

i. Nakshatras, Navagraha and their related plants

c. Other Activities (Specify):

CO5: Understand about the Life, Nature and Health

Approximate Hours

Item	Approximate Hours
CI	**6**
LI	**0**
SW	**2**
SL	**1**
Total	**9**

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self-Learning (SL)
SO 5.1. Understand the Fundamentals of Ayurveda (Charaka & Shushruta) and Yogic Science (Patanjali), Ritucharya and Dinacharya SO 5.2. Understand the Traditional system of Indian medicines (Ayurveda, Siddha, Unani and Homoeopathy) SO 5.3. Understand Fundamentals of Ethnobotany and Ethnomedicines of India SO 5.4. Understand the Nature Conservation in Indian ancient texts SO 5.5. Understand the Introduction to Plant Science in Vrikshayurveda SO 5.6. Understand the World Heritage Sites of Madhya Pradesh: Bhimbetka, Sanchi, Khajuraho		**Unit-5. Life, Nature and Health** 5.1. Fundamentals of Ayurveda (Charaka & Shushruta) and Yogic Science (Patanjali), Ritucharya and Dinacharya 5.2. Traditional system of Indian medicines (Ayurveda, Siddha, Unani and Homoeopathy) 5.3. Fundamentals of Ethnobotany and Ethnomedicines of India 5.4. Nature Conservation in Indian ancient texts 5.5 Introduction to Plant Science in Vrikshayurveda 5.6. World Heritage Sites of Madhya Pradesh: Bhimbetka, Sanchi, Khajuraho.	1. Concept of Ayurveda and Yoga 2. Traditional system of Indian medicines 3. Ethnobotany and Ethnomedicines of India 4. World Heritage Sites

SW-2 Suggested Sessional Work (SW):

a. Assignments:

i. Visit to world Heritage Site Khajuraho

b. Mini Project:

i. Ritucharya and Dincharya, Ethnomedicinal plants

c. Other Activities (Specify):

Brief of Hours suggested for the Course Outcome

CO 5	Life, Nature and Health	**2**	**5**	**2**	**9**
Total		**10**	**26**	**14**	**50**

Legend: R: Remember, U: Understand, A: Apply

The end of semester assessment for **Indian Knowledge Systems** will be held with written examination of 50 marks

Note. Detailed Assessment rubric need to be prepared by the course teacher for above tasks. Teacher can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Visit to Religious places, World Heritage Sites
7. Demonstration
8. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Facebook, Twitter, Whatsapp, Mobile, Online sources)
9. Brainstorming

Suggested Learning Resources:

(a) Books:

Department of Computer Application& Information Technology

Curriculum of B.C.A. Program

Semester-II

Course Code: **01CA211**
Course Title : Programming Methodology & Data Structures

Pre-requisite: Student should have basic knowledge of components and architecture of digital computersystem
Rationale: The students should possess foundational understanding about the basic components of digital Computer system. This encompasses familiarity with the operational elements of digital computer system. Additionally, Students ought to acquire fundamental insights into different types of computers, their applications.

Course Outcomes:

01CA211.1: .Develop simple algorithms and flow charts to solve a problem with Programming using top down design principles
01CA211.2: Writing efficient and well-structured computer algorithms/Programs. Learn to formulate iterative solutions and arrayprocessing algorithms for problems.
01CA211.3: Implement and know the applications of algorithms searching and sorting
01CA211.4: Use recursive techniques, pointers and searching methods in Programming
01CA211.5: Know the contributions of Indians in the field of Programming and data structures.

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credit (C)
			Cl	LI	SW	SL	Total Study Hours (CI+LI+SW+SL)	
Major	01CA211	Programming Methodology & Data Structure	4	4	2	1	11	6

Legend: **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),
LI: Laboratory Instruction (Includes Practical performance laboratory workshop, field or other locations using different instructional strategies)
SW: Sessional Work (includes assignment, seminar, mini project etc.),
SL: Self Learning,
C: Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Scheme of Assessment: Theory

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

01CA211.**1:** .Develop simple algorithms and flow charts to solve a problem with Programming using top down design principles

Session Outcomes (SOs)	**Laboratory Instruction (LI)**	**Classroom Instruction (CI)**		**Self-Learning (SL)**
SO2.1 To Understand the basic Classes & Objects **SO2.2**To learn Memory Allocation for Objects **SO2.3**To understand Constructor & Destructor. **SO2.4** discuss about Inheritance. **SO2.5** discuss about Polymorphism.	1. Write a Program to find factorial of a given number using recursion 2. Write a Program to convert decimal (integer) number into equivalent binary number. 3. Write a Program to check given string is palindrome or not 4. Write a Program to print digits of entered number in reverse order. 5. Write a **Program** to print sum of two matrices 6. Write a **Program** to print multiplication of two matrices.	Unit-2 **Classes & Objects (11 Lectures)** 2.1 A Sample C++ Program with Class Defining Member Making an Outside Function Inline 2.3 Nesting of Member Functions, Private Member Functions. 2.4 Arrays within a Class, Memory Allocation for Objects 2.5 Static Data Members, Static Member, Functions, 2.6 Object as Function Arguments, Friend Functions Array of Objects, 2.7 Virtual functions, Returning Objects, Constant member functions, Pointer to Members, Local Classes . 2.8 Constructor, Parameterized Constructor, Multiple Constructors in a Class, and Constructors with Default Argument		1. Learn about Nesting of Member Functions.

		2.9 Dynamic Initialization of Objects, Copy Constructor 2.10 Dynamic Constructor and Destructor. 2.11 Defining Derived Classes, Single Inheritance, Making a Private Member Inheritable 2.12 Multilevel Inheritance, Hierarchical Inheritance, Multiple Inheritance, Hybrid Inheritance 2.13 Virtual Base Classes Abstract Classes, Constructor in Derived Classes 2.14 Polymorphism, Pointers, Pointers with Arrays C++, Stream. 2.15 C++ Stream Classes, Unformatted V/O Operation, Formatted I/O Operation, Managing Output with Manipulators, Exception Handling.		

SW-2 Suggested Seasonal Work (SW):

a. Assignments:

(i) Dynamic Initialization of Multilevel Inheritance, Hierarchical Inheritance, Multiple Inheritance.

b. Presentation

c. Pictorial representation of Destructor:

01CA211.3: Implement and know the applications of algorithms searching and sorting

Curriculum of B.C.A. Program

(Revisedason01August2023)

Semester-II

Course Code: **03MS231**

Course Title: Numerical Method

Pre- requisite: Higher knowledge of mathematics.

Rationale: The aim of the course is to introduce to the field of mathematics with emphasis on its use to solve real world problems for which solutions are difficult to express using the different methods. It explores the essential theory and m e t h o d s for developing systems that demonstrate intelligent behavior including dealing with uncertainty, learning from experience and following problem-solving strategies found in nature.

Course Outcomes:

03MS231.1: Understand numerical methods to find the solution of a system of linear equations.

03MS231.2: Compute interpolation value for real data.

03MS231.3: Find quadrature by using various numerical methods.

03MS231.4: Solve system of linear equations by using various numerical techniques.

03MS231: Obtain solutions of ordinary differential equations by using numerical methods.

Scheme of Studies:

Curriculum of BCA

(Revised as on 01 August 2023)

Semester-II

Course Code: **02CA221**

Course Title: Operating System

Pre-requisite: Student should have a basic understanding of Fundamental of Computer.

Rationale: Study of Operating System helps students to learn the importance of computer system resources and the role of operating system in their management policies and algorithms as well as the evolution of Operating Systems. Students will understand various process management concepts and can compare various scheduling techniques, synchronization, and deadlocks, memory management and file management.

Course Outcomes:

02CA221.1: Specify objectives of modern operating systems and describe how operating systems have evolved over time.

02CA221.2: Understand various process management concepts and can compare various scheduling techniques, synchronization, and deadlocks. Also identify the best suited process management technique for any process.

02CA221.3: Understand the concepts of memory management techniques and file management.

02CA221.4: Understand the concepts of disk management. Understand and identify potential threats to Operating systems and the security features to guard against them.

02CA221.5: Understand and operate the Linux system as well as the contribution of Indians in the field.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies (Hours/Week)					Total Credits (C)
			Cl	LI	SW	SL	Total Study Hours (CI+LI+SW+SL)	
Minor	02CA 221	Operating System	4	4	1	1	10	6

Legend: **CI:** Classroom Instruction (Includes different instructional strategies i.e., Lecture(L) and Tutorial (T) and others),
LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)
SW: Sessional Work (includes assignment, seminar, mini projected.),
SL: Self-Learning,
C: Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback teachers ensure outcome of Learning.

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

Curriculum of BCA

(Revised as on 01 August 2023)

02CA221.1: Specify objectives of modern operating systems and describe how operating systems have evolved over time.

Approximate Hours

Item	Appx. Hrs.
CI	13
LI	12
SW	1
SL	1
Total	27

Session Outcomes (SOs)	**Laboratory Instruction (LI)**	**Classroom Instruction (CI)**	**Self-Learning (SL)**
SO1.1 Understand OperatingSystem **SO1.2** Understand basic functionsof Operating System **SO1.3** Resource Abstraction. **SO1.4** Understand Batch Systems,Multi-Programming Systems. **SO1.5** Understand Multiprocessing Systems, Time Sharing Systems **SO1.6** Understand Distributed OS, Real time systems **SO1.7** Learn about Operating System for Personal Computers. **SO1.8** Learn about Operating System for Workstations. **SO1.9** Learn about Operating System for Hand-held Devices. **SO1.10** Understand use of Operating System in real world. **SO1.11** Learn about commonly used Operating systems - Windows, MacOS. **SO1.12** Learn about commonly used Operating systems - UNIX/Linux **SO1.13** Learn about commonly used Operating systems - Android,IOS, Blackberry OS, Symbian, Bada etc.	1. How to install Linux. 2. Linux Directory Commands: pwd, mkdir, 3. Linux Directory Commands rm -rf, ls, 4. Linux Directory Commands cd,cd /,cd~ 5. Linux File Commands: touch, cat, cal >, cat >>, 6. Linux Directory Commands rm, cp, mv, rename	**Unit-1.0 Introduction** 1.1 Introduction to Operating System: What is Operating System? History and Evolution of OS. 1.2 Basic OS functions 1.3 Resource Abstraction. Types of OperatingSystems— Batch Systems,Multi-Programming Systems. 1.5 Types of Operating Systems— Multiprocessing Systems, Time Sharing Systems 1.6 Types of Operating Systems— Distributed OS, Real time systems. 1.7 Operating System for Personal Computers 1.8 Operating System for Workstations 1.9 Operating System for Hand-held Devices. 1.10 Applications of various operating system in real world. 1.11 Some prevalent operating systems — Windows, MacOS 1.12 Some prevalent operating systems — UNIX/Linux. 1.13 Some prevalent operating systems — Android, IOS, Blackberry OS, Symbian, Bada etc	1. Learn Basics of Computer Fundamental.

SW-1 Suggested Sessional Work (SW):

a. Assignments:

1. What is an Operating System? Describe its functions.
2. Write short notes on Types of Operating Systems— Batch Systems, Multi-Programming Systems, Multiprocessing Systems, Time Sharing Systems, Distributed OS, Real time systems.

b. Mini Project:
NA

c. Other Activities (Specify):NA

02CA221.2: Understand various process management concepts and can compare various scheduling techniques, synchronization, and deadlocks. Also identify the best suited process management technique for any process.

Department of Computer Application & Information Technology

Curriculum of B.C.A. Program

(Revised as on 01 August 2023)

Semester-III

Course Code: **0CA301**

Course Title: Data Analytics & Visualization through Spread Sheet

Pre-requisite: Student should have basic knowledge of MS-Excel

Rationale: Data analytics and visualization is important because it helps to process data sets and creating visual instances.

Course Outcomes:

0CA3011: Students should be familiar with various characteristics of the spreadsheet.
0CA301: Learn how to format spreadsheet, and viewing its appearance before printing.
0CA3013: Importing/Exporting Access Data and Text Files. Securing worksheet and workbook.
0CA3014: Calculate values and process data through various formula, and using data validation formula.
0CA3015: Visualize data values through various types of charts.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies (Hours/Week)					Total Credits (C)
			Cl	LI	SW	SL	Total Study Hours (CI+LI+SW+SL)	
Skill Enhancement	0CA301	Data Analytics & Visualization through Spread Sheet	2	0	2	1	5	2

Legend: **CI:** Classroom Instruction (Includes different instructional strategies i.e., Lecture(L) and Tutorial (T) and others),
LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)
SW: Sessional Work (includes assignment, seminar, mini projected.),
SL: Self-Learning,
C: Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback teachers ensure outcome of Learning.

Scheme of Assessment: Theory

Board of Study	Couse Code	Course Title	Scheme of Assessment (Marks)							
			Progressive Assessment (PRA)						End Semester Assessment (ESA)	Total Marks (PRA+ ESA)
			Class/Home Assignment 5 number 3 marks each (CA)	Class Test 2 (2 best out of 3) 10 marks each (CT)	Seminar one (SA)	Class Activity any one (CAT)	Class Attendance (AT)	Total Marks (CA+CT+SA+ CAT+AT)		
Skill Enhancement	0CA301	Data Analytics & Visualization through Spread Sheet	15	20	5	5	5	50	50	100

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

0CA301.1: Students should be familiar with various characteristics of the spreadsheet.

Approximate Hours

Item	Appx. Hrs.
CI	6
LI	0
SW	2
SL	1
Total	9

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self-Learning (SL)

SO1.1 Understanding various brands of spreadsheets. **SO1.2** Understanding basic components of spreadsheet. **SO1.3** Understanding cell modes. **SO1.4** Understanding various data types used in spreadsheet.		**Unit-1.0 Introduction to Spreadsheet** 1.1 Brands and Platforms, Excel, Calc, and Google Sheets, 1.2 User Interface, Ribbon, Quick Access toolbar. 1.3 Workbooks and Worksheets. Opening new file and saving Spreadsheet, Rows, Columns, Cells, 1.4 Fundamentals of rows, Columns and cell and navigation; 1.5 Various modes of selecting cells (shift arrow, ctrl shift arrow, mouse click and drag, mouse click and shift click); 1.6 Merging cells; Selecting rows and columns, Non-contiguous cells; How to enter data (numeric, text, date),	Learning basic features and components of sheets.

SW-1 Suggested Sessional Work (SW):

a. Assignments:

1. Create MS-Excel Sheet and Save it.
2. Show cells merging in sheet.

b. Mini Project:

Creating a sheet having 100 student's data.

c. Other Activities (Specify):

NA

0CA301.2: Learn how to format spreadsheet, and viewing its appearance before printing.

Approximate Hours

Item	Appx. Hrs.
CI	6
LI	0
SW	2
SL	1
Total	9

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self-Learning (SL)
SO2.1 Understand printing area and preview of worksheet. **SO2.2** Understand page layout and orientation. **SO2.3** Understand page color and border. **SO2.3** Understand header and footer.		**Unit-2.0 Printing Worksheet** 2.1 Select print area, See print preview, Adjusting margin during print preview. 2.2 Page Formatting: Page layout - Orientation, Size, margins; Watermark, 2.3 Page color, Page borders; 2.4 Inserting headers and footer, Inserting page numbers, 2.5 Date, Path and filename. Viewing: Easy view using freeze panes, Split windows, Layout view 2.6 Saving and Sharing File.	Learning sheet formatting and its preview.

SW-2 Suggested Sessional Work (SW):

a. Assignments:

1. Insert header and footer in sheet
2. Split window into sheet

b. Mini Project:

Create a sheet format it using various possible tools.

c. Other Activities (Specify):

NA

0CA301.3: Importing/Exporting Access Data and Text Files. Securing worksheet and workbook.

Approximate Hours

Item	Appx. Hrs.
CI	6
LI	0
SW	2
SL	1
Total	9

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self-Learning (SL)
SO3.1 Understanding importing Access Data. **SO3.2** Understanding XML data format. **SO3.3** Understanding protection and security properties. **SO3.4** Understanding Microsoft queries.		**Unit-3.0 Import and Export Data** 3.1 Import Access Data, 3.2 Microsoft Query, XML. 3.3 Import/Export Text Files, 3.4 Protecting/Securing using file properties: 3.5 Protect Workbook, Read-only Workbook. 3.6 Protect Sheet, Lock Cells,	Exporting and Importing data and protecting sheets.

SW-3 Suggested Sessional Work (SW):

a. Assignments:

1. Prepare XML file.
2. Protect workbook.

b. Mini Project:

Create Access Database and Import into MS-Excell Sheet.

c. Other Activities (Specify):

NA

0CA301.4: Calculate values and process data through various formula, and using data validation formula.

Approximate Hours

Item	Appx. Hrs.
CI	6
LI	0
SW	2
SL	1
Total	9

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self-Learning (SL)
SO4.1 Understanding editing and copying formula. **SO4.2** Understanding cell referencing. **SO4.3** Understanding date rejection and validation. **SO4.4** Understanding measurement standards.		**Unit-4.0 Calculations** 4.1 Entering formula, Editing formula, Copying formula 4.2 Cell references, Paste formula 4.3 Data Validation, Reject Invalid Dates, Prevent Duplicate Entries 4.4 Budget Limit, Product Codes, 4.5 Drop-down List, Dependent Drop-down Lists, 4.6 CM to Inches, KG to GM.	Learning different types of formula and data validation methods.

SW-4 Suggested Sessional Work (SW):

a. Assignments:

1. Write down various steps for copying and pasting formula.
2. Write down various steps for entering and editing formula.

b. Mini Project:

Create a summary on Budget Limit features.

c. Other Activities (Specify):

NA.

0CA301.5: Visualize data values through various types of charts.

Approximate Hours

Item	Appx. Hrs.
CI	6
LI	0
SW	2
SL	1
Total	9

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self-Learning (SL)
SO5.1 Understanding basics of chart. **SO5.2** Understanding various types of charts. **SO5.3** Understanding chart components. **SO5.4** Understanding format and design of chart.		**Unit-5.0 Data Visualization** 5.1 Introduction to charts, Various type of charts (Column, Bar, Pie, Area, XY Scatter, Bubble, Net, Stock, Column & Line) 5.2 3-D Shape (Bar, Cylinder, Cone, Pyramid); 5.3 Chart elements (Title, Subtitle, X-axis, Y- axis, Z-axis, Display grids, Legends, Display data series); 5.4 Creating a Chart, Selecting data series, 5.5 Select chart type, Select chart components 5.6 Labels, background, axes, Format and design.	Creating different types of charts.

SW-5 Suggested Sessional Work (SW):

a. Assignments:

1. Crete a simple pie chart.
2. Create 3-D shape chart.

b. Mini Project:

Apply various 3-D features into chart.

c. Other Activities (Specify):

NA.

Brief of Hours suggested for the Course Outcome

Course Outcomes	Class Lecture (Cl)	LI (Laboratory Instruction)	Sessional Work (SW)	Self-Learning (Sl)	Total hour (Cl+SW+Sl)
0CA301.1: familiar with various characteristics of the machine learning.	6	0	2	1	9

0CA301.2: learn how algorithm works for data processing and instance generation.	6	0	2	1	9
CO3: create genome sequence by using machine learning algorithm.	6	0	2	1	9
CO4: implement classification and regression process techniques for data processing.	6	0	2	1	9
CO5: Apply statistics in machine learning for probabilistic analysis.	6	0	2	1	9
Total Hours	30	0	10	5	45

Suggestion for End Semester Assessment

Suggested Specification Table (For ESA)

CO	Unit Titles	Marks Distribution			Total Marks
		R	U	A	
0CA301.1	Students should be familiar with various characteristics of the spreadsheet.	02	05	01	08
0CA301.2	Learn how to format spreadsheet, and viewing its appearance before printing.	02	03	05	10
0CA301.3	Importing/Exporting Access Data and Text Files. Securing worksheet and workbook.	02	03	07	12
0CA301.4	Calculate values and process data through various formula, and using data validation formula.	1	3	7	10
0CA301.5	Visualize data values through various types of charts.	1	05	05	10
Total		13	26	13	50

Legend: R: Remember, U: Understand, A: Apply

The end of semester assessment for Data Analytics & Visualization through Spread Sheet will be held with written examination of 50 marks.

Faculty of Engineering and Technology

Department of Computer Application & Information Technology

Curriculum of BCA Program

Semester-III

Course Code: 0CA302

Course Title : DTP [Desktop Publishing]

Pre-requisite: MS word, Excel, MS Paint

Rationale: This course introduces students to the principles of design applicable to publications created using desktop publishing software and computer technology. Special attention is given to design principles, typography, and layout and production techniques. This class focuses on gaining professional-level skills and knowledge. In this course, the students will discover how to use the essential building blocks of design type, art and line in new and creative ways, learn clever ways to locate and use resources such as graphics and scanned art, learn to think about audience and medium and how those affect the way you craft your message and also be learning to use new technical tools to create those effective messages.

Course Outcomes:

0CA302.1: Understand basics of computer and its related terminology.
0CA302.2: Write, Edit & Print documents using PageMaker.
0CA302.3: Understand various Photoshop tools used for Desktop Publishing and would be able to edit an image.
0CA302.4: Apply different CorelDraw tools and options to create a poster, Monogram, Visiting card etc.
0CA302.5: Understand Color concept in Printing.

Scheme of Studies:

Curriculum of B.C.A. Program

(Revised as on 01 August 2023)

Semester-III

Course Code: **01CA311**

Course Title: Programing in C#

Pre-requisite: Fundamentals of Computer.

Rationale: C# Programing language is one of the widely used programing language amount game developer and application for creating application based on dot net framework.

Course Outcomes:

On successful completion of this course, the students will be able to:

01CA311.1. Knowledge of the structure and model of the programming language C #.

01CA311.2. Determine logical alternatives with C# decision structures utilizing iteration, class methods, fields, and properties.

01CA311.3. Using the programming language C # for various programming technologies (understanding) 4. Develop software in C#.

01CA311.4. Evaluate user requirements for software functionality required to decide whether the programming language C # canmeet user requirements.

01CA311.5. Use of certain technologies by implementing them in the C # programming language to solve the given problem.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credits (C)

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

01CA311.1: Knowledge of the structure and model of the programming language C#.

Approximate Hours

Item	**Appx. Hrs.**

SW	1
SL	1
Total	26

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self-Learning (SL)
SO1.1 Master C# syntax, variables, data types, operators, and keywords. SO1.2 Understand functions (call by value, reference, out parameters). SO1.3 Utilize constructors, destructors, static members, and Enums. SO1.4 Explore inheritance, aggregation, and polymorphism. SO1.5 Manage strings, exceptions, and file I/O. .	1. Demonstrate the declaration and usage of different variable types in C#. Provide examples showcasing their initialization, modification, and usage in operations. 3 Explore various data types in C# including primitive and reference types. 4. Illustrate their usage with suitable examples. 5.Discuss different operators and their precedence in C#. 6. Provide examples demonstrating their usage in arithmetic, logical, and relational operations.	Unit-1 Introduction to Programing in C# Syntax and Control Flow Introduce and discuss key syntax elements. Engage in hands-on coding exercises for control flow statements Functions and Arrays: Explore functions, emphasizing call by value, Reference, and out parameters. Practice array manipulation through coding exercises. 1.6 Objects and Classes: Understand the core principles of object-oriented programming. Dive into practical coding with constructors, destructors, static members, and Enums. Inheritance, Polymorphism, Abstraction: Learn about inheritance, aggregation, and polymorphism. Engage in coding activities focusing on abstraction using abstract classes and interfaces. Inheritance, Polymorphism, Abstraction: Learn about inheritance, aggregation, and polymorphism. Engage in coding activities focusing on abstraction using abstract classes and interfaces.	Basic Feature of C# Programing, Syntax Based Code.

SW-1 Suggested Sessional Work (SW):

Assignments:

I. Write a program to create a simple calculator using variable and operators.

II. Write a C# program to determine if a user-input integer is prime, using if-else statements and a custom primality-checking function.

Mini Project:

I. Write a C# program to determine if a user-input integer is prime, using if-else statements and a custom primality-checking function.

01CA311.2: Determine logical alternatives with C# decision structures utilizing iteration, class methods, fields, and properties.

Session Outcomes (SOs)	**Laboratory Instruction (LI)**	**Class room Instruction (CI)**	**Self-Learning (SL)**
SO2.1 Demonstrate a deep understanding of C# decision structures, including if-else statements and switch-case, in solving logical problems. **SO2.2** Master iteration using for loops, while loops, and do-while loops in C#. **SO2.3** Understand the concept of methods within classes in C#. **SO2.4** Utilize properties to enforce validation rules and provide a clean interface for class consumers. **SO2.5** Implement class methods and fields to encapsulate functionality and data within a class.	1. Define functions in C# and differentiate between call by value and call by reference mechanisms. Provide examples to demonstrate their implementation. 2. Create a program that utilises arrays in C#. Implement functions to perform operations like sum, average, and searching within arrays. 3. Design a class in C# representing a student. Include appropriate constructors, member variables, and methods for setting and retrieving student information. and. 4. Utilise enums and structs in C# to define custom data types. 5. Provide examples demonstrating their usage and advantages over primitive data types. 6. Example of data validation	**Unit-2.0 C# Functions:** 2.1. Decision Structures Exploration: 2.2. Begin with a review of if-else statements and 2.3. introduce switch-case structures. • Discuss scenarios where each decision structure is most effective. 2.4. Iteration Techniques: • Cover for loops, while loops, and do-while loops. 2.5. Discuss when to choose one iteration technique over another based on the problem at hand. 2.6. Class Methods and Fields: 2.7. Understand the role of methods within classes. 2.8. Explore the implementation of class methods and fields for encapsulation. 2.9. 1.4 Properties in C#: 2.10. Introduce the concept of properties for controlled access to class fields. 2.11. Discuss the significance of using properties for data validation 2.12. and encapsulation.	Program of Functions & Basic Understanding

SW-2 Suggested Sessional Work (SW):

a. Assignments:

i. Develop a C# program to convert numerical grades to letter grades using if-else. Add a loop for continuous user input, allowing grades to be processed until the user decides to exit.

ii. Create a C# banking account class with methods for deposit, withdrawal, and balance inquiry. Implement properties to ensure secure access to the account balance.

Mini Project:

Build a C# mini project for real-time IoT data processing. Use decision structures for anomaly detection, employ iteration for continuous processing, and design a class with methods and properties for efficient data management. Prioritize error handling and optimal data processing techniques.

01CA311.3: Using the programming language C # for various programming technologies (understanding). Develop software in C #.

SO3.1 Understanding C# in Diverse Technologies: **SO3.2** Developing Software in C#: **SO3.3** Web Development with C# (ASP.NET): **SO3.4** Multiplatform Application Development Windows & Linux **SO3.5** Concept of Multidimensional Arrays.	1. Implement properties in C# to encapsulate data within a class. 2.Explain the advantages of using properties over public variables. 3.Implement polymorphism in C# by overloading methods and overriding base class methods. 4. Provide examples demonstrating method overloading and method overriding. 5. Create an abstract class representing a shape in C#. Derive concrete shapes like rectangle, circle, and triangle from the abstract class. Implement	**Unit-3.0 Programing Platform & Technologies.** **3.1.** Introduction to C# in Different Technologies: **3.2.** Discuss the diverse applications of C# in web development, mobile app creation, and cloud services. **3.3.** 3.2 Hands-on Development with C#: **3.4.** Engage in practical coding sessions to **3.5.** develop software solutions using C#. **3.6.** 3.3 Web Development with C# (ASP.NET): **3.7.** Conduct a web development workshop, **3.8.** creating a basic web application using C# and ASP.NET. **3.9.** 3.4 Cross-Platform **3.10.** Mobile App Development **3.11.** Develop a basic mobile application that **3.12.** runs seamlessly on both	Full Fledge Application using C# interdependent platform interface.

	methods for calculating area and perimeter for each shape. And Define an interface in C# representing a printable object. 6. Implement the interface in classes representing documents, images, and text files. Demonstrate the usage of interfaces.	Android and iOS platforms.	

SW-3 Suggested Sessional Work (SW):

a. Assignments:

i. Create a C# program that uses ASP.NET to build a simple web application for a bookstore. Implement features for adding, editing, and deleting books from an online catalogue.

ii. Develop a cross-platform mobile app using Xamarin and C#. The app should have a user authentication system and a feature that allows users to share images with captions.

b. Mini Project:

iii. Design a cloud-based task manager using C# and Microsoft Azure. Implement features for task creation, assignment, and completion tracking.

01CA311.4: Evaluate user requirements for software functionality required to decide whether the programminglanguage C # can meet user requirements.

Explore advanced file I/O operations in C# using FileStream, BinaryReader, and BinaryWriter classes. Implement a program that reads binary data from a file, performs operations, and writes back the modified binary data. 5. Implement custom exceptions in C# to handle specific error scenarios in a program. Provide examples demonstrating the creation and usage of custom exceptions. 6. Utilize serialization and deserialization techniques in C# to persist and retrieve object data. Implement a program that serializes objects to a file and deserializes them back.	**Unit-4.0 C# Strings, Exceptions, File I/O** 4.1 String Manipulation in C#: 4.2 Explore the various methods and operations available for string manipulation 4.3 Editingformula 4.4 Exception Handling Techniques: 4.5 Understand the importance of exception handling in writing robust C# programs. 4.6 File Input/Output Operations: 4.7 Dive into the world of file input/output using C#. 4.8 Serialization and Deserialization: Grasp the concepts of serialization and deserializationin C#. 4.9 System.IO Namespace and Advanced 4.10 File Operations: 4.11 Explore the classes within the System.IO namespace for 4.12 advanced file manipulations	Exception Handling & String.

SW-4 **Suggested Sessional Work (SW):**

a. Assignments:

i. Write a C# program that takes a user-input sentence and performs the following string manipulations:Convert the sentence to uppercase.Reverse the sentence.Count the occurrences of a specific character (user-defined) in the sentence.

ii. Develop a C# program that involves file I/O operations. Implement exception handling to address scenarios like file not found, unauthorized access, and invalid file format. Provide meaningful error messages for each exception.

b. Mini Project:

i. Task: Design a C# mini project for a file explorer utility application. Include features such as file listing, copying, moving, and deleting. Implement robust exception handling for potential file-related errors. Utilize C# strings for efficient file path manipulation.

01CA311.5: Use of certain technologies by implementing them in the C # programming language to solve the givenproblem.

	Implement a program that dynamically loads and invokes methods using reflection. 4. Implement multithreading in C# to perform concurrent tasks. Create a program that utilizes multiple threads to perform CPU-intensive and I/O-bound operations concurrently. 5. Ensure thread safety in C# programs using synchronization techniques like locks and mutexes. Implement a program that demonstrates the usage of synchronization to avoid race conditions. 6. Create a simple web service in C# using ASP.NET Web API. Implement endpoints for CRUD operations on a resource and demonstrate their functionality using a client application.	.	

SW-5 Suggested Sessional Work (SW):

a. Assignments

i. Develop a C# program that utilizes generics to create a flexible data structure (e.g., a generic list, stack, or queue). Demonstrate the application of generic types and methods for various data types.

ii. Write a C# program that simulates a shared resource accessed by multiple threads. Implement multithreading to enhance performance and synchronization mechanisms to ensure thread safety.

b. Mini Project:

i. Design a C# mini project for an interactive web quiz application. Implement features such as user registration, quiz creation, and scoring. Utilize web services for real-time updates and leverage multithreading for improved responsiveness.

A K S University

Faculty of Engineering and Technology

Department of Computer Application& Information Technology

Curriculum of B.C.A. Program

(Revised as on 01 August 2023)

Semester-III

Course Code: **02CA321**

Course Title : Internet of Things

Pre-requisite: Student should know basic knowledge of computer & digital electronics.

Rationale: 'It's all about the role of Sensors log Data!'
IoT is the super set of information technology driven by the sensors and cloud to make the real things like smart things for your network.
To understand the concepts of web of Things, Cloud of Things and emphasis on Mobile cloud.

Course Outcomes:

02CA321.1: Learn the basics of IoT and IoT Architectural view.
02CA321.2: Understand various theoretical and practical principles involved in the design of Data Storage in IoTand use of Software defined networking.
02CA321.3: Learn the Web communication Protocols for connected devices and Message communication Protocolsfor connected devices.
02CA321.4: Design and implement Sensor Technology and Participatory Sensing.
02CA321.5: Design an IoT Privacy and security solutions.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credits (C)
			Cl	LI	SW	SL	Total Study Hours(CI+LI+SW+SL	
Minor	02CA321	IOT	4	4	1	1	10	6

Legend: CI: Classroom Instruction (Includes different instructional strategies i.e., Lecture (L) and Tutorial (T) and others),

LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

SW: Sessional Work (includes assignment, seminar, mini project etc.),

SL: Self Learning,

C: Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback ofteacher to ensure outcome of Learning.

Scheme of Assessment: Theory

Board of Study	Couse Code	Course Title	Scheme of Assessment (Marks)							
			Progressive Assessment (PRA)						End Semester Assessment (ESA)	Total Marks (PRA+ ESA)
			Class/Home Assignment 5 number 3 marks each (CA)	Class Test 2 (2 best out of 3) 10 marks each (CT)	Seminar one (SA)	Class Activity any one (CAT)	Class Attendance (AT)	Total Marks (CA+CT+SA+CAT+AT)		
Minor	02CA 321	IoT	15	20	5	5	5	50	50	100

Scheme of Assessment: Practical

Board of Study	Couse Code	Course Title	Scheme of Assessment (Marks)						
			Progressive Assessment (PRA)					End Semester Assessment (ESA)	Total Marks (PRA+ ESA)
			Class/Home Assignment 5 number 3 marks each (CA)	Viva1 (5)	Viva2 (5) (SA)	Class Attendance (AT)	Total Marks (CA+CT+SA +CAT+AT)		
Minor	02CA 321	IoT	35	5	5	5	50	50	100

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, whichstudents are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement ofCourse Outcomes (COs) upon the course's conclusion.

02CA321.1: Learn the basics of IoT and IoT Architectural view.

Approximate Hours

Item	Appx Hrs.
Cl	12

Session Outcomes (SOs)	(LI)	Classroom Instruction (CI)	(SL)
SO1.1 Understand the Definition and concept of Internet of Things. **SO1.2** Understand the concept of Characteristics of IoT **SO1.3** Understand the IoT Conceptual framework. **SO1.4** Preparation of Physical design, Logical design of IoT with Architectural view. **SO1.5** Preparation of Application of IoT.	1. Explore Arduino 2. Explore raspberry PI 3. Select any one development board (Eg., Arduino or Raspberry Pi) and control LED using the board. 4. Using the same board as in (1), read data from a sensor. 5. Experiment with bothanalog and digital sensors. 6. Control any two actuators connected to the development board using wireless network	**Unit-1.0 Theoretical Framework of IoT** 1.1. Introduction to IoT 1.2 Definition of IoT 1.3 Characteristics of IoT 1.4 IoT Conceptual framework 1.5 IoT Architectural 1.6 Physical design of IoT 1.7 Logical design of IoT 1.8 Application of IoT 1.9 learn by case study 1.10 learn by example 1.11 IoT view 1.12 Applications in education department	

SW-1 Suggested Sessional Work (SW):

a. **Assignments:**

b. **Presentation**

02CA321.2: Understand various theoretical and practical principles involved in the design of Data Storage in IoT anduse of Software defined networking.

Approximate Hours

Item	Appx Hours

Session Outcomes (SOs)	**(LI)**	**Classroom Instruction (CI)**	**(SL)**
SO5.1 Understand about the concept of oT Design methodology: **SO5.2** Preparation of Specification-Requirement, Process, Model, service. **SO5.3** Preparation of necessary Functional & Operational View **SO5.4** Understanding about the IoT Privacy and security solutions, Raspberry Pi & Arduino devices **SO5.5** Understanding about the **IoT Case Studies**: Smart City Streetlights control & monitoring.	1. Inhouse weather monitoring system. 2. Agriculture moisture management system.(Smar t Farming) 3. Smart infrared remote-control system for controlling home appliances 4. Compare Raspberry Pi & Arduino 5. Human arm replica using servo motor. 6. Laser audio transmission through laser diode.	**Unit 5.0:** IoT Design methodology: 5.1 Specification 5.2 Requirement 5.3 Process, Model, service 5.4 Functional & Operational View 5.5 IoT Privacy and security solutions 5.6 Raspberry Pi & Arduino devices. **5.7 IoT Case Studies** 5.8 Smart City Streetlights 5.9.Applictions in home security 5.10 Security Concepts. 5.11 Control & monitoring system 512 learn by real life example.	

Brief of Hours suggested for the Course Outcome

Course Outcomes	Class Lecture (Cl)	Laboratory Instruction (LI)	Sessional Work (SW)	Self-Learning(Sl)	Total hour (Cl+SW+Sl)
02CA321.1: Acquire the knowledge of IoTconcept and its Architecture.	12	12	1	1	26
02CA321.2: Acquire the basic concept ofSoftware defined networking and Machine-to-Machine (M2M).	12	12	1	1	26

02CA321.3: Exposed to various web communication Protocols for connected devices & Message communication Protocols for connected devices.	12	12	1	1	26
02CA321.4: Familiarize and understand the basic Sensor data CommunicationProtocols.	12	12	1	1	26
02CA321.5: Smart City Streetlights control &monitoring.	12	12	1	1	26
Total Hours	60	60	5	5	130

Suggestion for End Semester Assessment

Suggested Specification Table (For ESA)

CO	Unit Titles	Marks Distribution			Total Marks
		R	U	A	
CO-1	Acquire the knowledge of IoT concept and its Architecture.	01	01	03	05
CO-2	Acquire the basic concept of Software defined networking and Machine-to-Machine (M2M).	01	01	03	05
CO-3	Exposed to various web communication Protocols for connected devices & Message communication Protocols for connected devices.	-	03	10	13
CO-4	Familiarize and understand the basic Sensor data Communication Protocols.	-	03	10	13
CO-5	Develop the application skills regarding the Smart City Streetlights control & monitoring.	01	03	10	14
Total		03	12	36	50

Legend:R: Remember, U: Understand, A: Apply

The end of semester assessment for Financial Accounting will be held with written examination of 50 marks

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Brainstorming

Suggested Learning Resources:

(a) Books:

S. No.	Title	Author	Publisher	Edition&Year
1	"Internet of Things (A Hand book approach)	Vijay Madisetti & Arshdeeep Bahga	Universal Press	First Edition
2	"The Internet of Things: Connecting Objects"	Hakima Chaouchi	Wiley publication	
3	"MySQL for The Internet of Things"	Charless Bell	A Press publication.	
5	Lecture note provided by Dept. of C A & I T And Science, AKS University, Satna.			

Curriculum Development Team

1. Dr. Akhilesh A. Waoo, HOD, Department of Computer Science and Engineering.
2. Dr. Pramod Singh, Associate Professor, Department of Computer Science and Engineering.
3. Ms. Shruti Gupta, Assistant Professor, Department of Computer Science and Engineering.
4. Ms. Pragya Shrivastava, Assistant Professor, Department of Computer Science and Engineering.
5. Mr. Lokendra Gaur, Assistant Professor, Department of Computer Science and Engineering.
6. Mr. Vinay Kumar Dwivedi, Assistant Professor, Department of Computer Science and Engineering.
7. Ms. Pinki Sharma, Assistant Professor, Department of Computer Science and Engineering.
8. Ms. Pushpa Kushwaha, Assistant Professor, Department of Computer Science and Engineering.

A K S University

Faculty of Engineering and Technology

Department of Computer Science & Application

Curriculum of B.C.A. Program

(Revised as on 01 August 2023)

Semester-III

Course Code: 03CA331

Course Title: Data Communication and Computer Network

Pre- requisite: Computer Fundamental

Rationale: Data communication and computer networks have transformed modern society by enabling individuals and organizations to share resources and access information. As technology continues to evolve, networking will play an increasingly important role in how we work, live, and interact with each other.

Course Outcomes:

03CA331.1: Demonstrate the Basic Concepts of Networking and network topology

03CA331.2: Demonstrate the Significance, Purpose and application of transmission media,switching and multiplexing.

03CA331.3: Describe types of networks, their working and network standards.

03CA331.4: Understand OSI Model and its layers.

03CA331.5: Compare networking devices and use routing protocols.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credits(C)
			Cl	LI	SW	SL	Total Study Hours (CI+LI+SW+SL)	
Open Elective	03CA331	Data Communication and Computer Network	4	0	1	1	5	4

Legend:

CI: Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),

LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

SW: Sessional Work (includes assignment, seminar, mini project etc.),

SL: Self-Learning,

C: Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Scheme of Assessment: Theory

Board of Study	Course	Course Title	Scheme of Assessment (Marks)							
			Progressive Assessment (PRA)						End Semester Assessment (ESA)	Total Marks
			Class/Home Assignment 5 number3 marks each(CA)	Class Test 2(2 best out	Seminar one(SA)	Class Activity any one (CAT)	Class Attendance (AT)	Total Marks (CA+CT+SA+CAT+AT)		
OE	03CA331	Data Communication and Computer Network	15	20	5	5	5	50	50	100

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

03CA331.1: Demonstrate the Basic Concepts of Networking and network topology.

Semester-III

Course Code 03CA332

Course Title Optimization Techniques

Pre-requisites Basic Math's concept

Rationale related fields The rationale behind discrete mathematics is grounded in its practical applications to computer science and

Course Outcome

03CA332.1 Formulate real life problems into linear programming problem.

03CA332.2: Apply the simplex method to find an optimal vector for the standard linear programming problemand the corresponding dual problem.

03CA332.3: Find optimal solution of transportation.

03CA332.4: Formulate and solve linear programming model of two-person zero sum game.

03CA332.5: Solve nonlinear programming problems using Kuhn Tucker conditions.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credits (C)

Semester-IV

Course Code: **0EN401**

Course Title : Entrepreneurship Development

Pre-requisite: Student should have basic knowledge of computer

Rationale: Computer ethics is essential because it guides ethical behavior in the digital age, addresses ethical dilemmas in technology use, and promotes the responsible and ethical development, deployment, and use of technology for the benefit of individuals and society as a whole.

Course Outcomes:

0EN401.1: student will Advance their skills in customer development, customer validation, competitive Analysis, and iteration while utilizing design thinking and process tools to evaluate in real-world Problems and projects.

0EN401.2: Mobilize people and resources

0EN401.3: Increase their awareness and deliberately practice the skills and disciplines necessary to Increase confidence and agency.

0EN401.4: Demonstrate knowledge of current information, theories and models, and techniques and Practices in all of the major business disciplines including the general areas of Accounting and Finance, Information Technologies, Management, Marketing, and Quantitative Analysis.

0EN401.5: the end of this chapter the student will Increase their awareness and deliberately practice the skills and disciplines necessary to increase confidence and agency

Scheme of Studies:

Curriculum of B.C.A. Program

(Revised as on 01 August 2023)

Semester-IV

Course Code: 01CA411

Course Title : Database Management Systems Using PL/SQL

Pre-requisite: Student should have basic knowledge of components and architecture of digital computer system

Rationale: The students should possess foundational understanding about the basic components of digital Computer system. This encompasses familiarity with the operational elements of digital computer system. Additionally, Students ought to acquire fundamental insights into different types of computers, their applications.

Course Outcomes:

01CA411.1: Explain the features of database management systems and relational database.

01CA411.2: Design Conceptual Models Of A Database Using ER Modelling For Real Life Applications And Construct Queries In Relational Algebra.

01CA411.3: Create and Populate A RDBMS for A Real-Life Application, With Constraints and Keys, Using SQL

01CA411.4: Retrieve Any Type Of Information From A Database By Formulating Complex Queries In SQL.

01CA411.5 Analyses The Existing Design Of A Database Schema And Apply Concepts Of Normalization To Design An Optimal Database.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credit (C)
			Cl	LI	SW	SL	Total Study Hours (CI+LI+SW+SL)	
Major	01CA411	Database Management Systems Using PL/SQL	4	4	1	1	10	6

Legend: **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),
LI: Laboratory Instruction (Includes Practical performance laboratory workshop, field or other locations using different instructional strategies)
SW: Sessional Work (includes assignment, seminar, mini project etc.),
SL: Self Learning,
C: Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Scheme of Assessment: Theory

Board of Study	Couse Code	Course Title	Scheme of Assessment (Marks)							
			Progressive Assessment (PRA)						End Semester Assessment (ESA)	Total Marks (PRA + ESA)
			Class/Home Assignment 5 number 3 marks each (CA)	Class Test 2 (2 best out of 3) 10 marks each (CT)	Seminar one (SA)	Class Activity any one (CAT)	Class Attendance (AT)	Total Marks (CA+CT+SA+CAT+AT)		
Major	01CA411	Database Management Systems Using PL/SQL	15	20	5	5	5	50	50	100

Scheme of Assessment: Practical

Board of Study	Couse Code	Course Title	Scheme of Assessment (Marks)						
			Progressive Assessment (PRA)					End Semester Assessment (ESA)	Total Marks (PRA + ESA)
			Class/Home Assignment 5 number 3 marks each (CA)	Viva1 (5)	Viva2 (5) (SA)	Class Attendance (AT)	Total Marks (CA+CT+SA +CAT+AT)		
Major	01CA411	Database Management Systems Using PL/SQL	35	5	5	5	50	50	100

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

A K S University

Faculty of Engineering and Technology

Department of Computer Application& Information Technology

Curriculum of B.C.A. Program

(Revised as on 01 August 2023)

01CA411.1: Explain the features of database management systems and relational database.

Item	Appx. Hrs.
Cl	12
LI	12
SW	1
SL	1
Total	26

Session Outcomes (SOs)	**Laboratory Instruction (LI)**	**Classroom Instruction(CI)**	**Self-Learning (SL)**
SO1.1 Define DBMS Discuss about the Characteristics. **SO1.2 Explain** Architecture andModeling **SO1.3Explain**1 Entity Relationship(ER) Model **SO1.4** Enhanced Entity Relationshi (EER) Model **SO1.**5 **Explain** Generalization	LI1.1. Draw ER Model and Relational Model for a given database. LI1.2. Show ER to Relational Model reduction. LI1.3. Create a table and use select command. LI1.4. Example of floating-point representation. LI1.5. Example of aggregation LI1.6. Example of Generalization	**Unit-1. Introduction to DBMS:(13 Lectures)** 1.4 Why database? Characteristics of data in database Functional Units. 1.5 What are database advantages of DBMS?, 1.6 Conceptual, physical and logical database models. 1.7 Role of DBA, Database design 1.8 Components of ER-model,ER modeling symbols. Relationships. 1.9 An introduction, Superclassand subclass entity types. Specialization, Generalization. 1.10 Attribute inheritance, Categorization& Aggregation. 1.11 DBMS, DBA, Entity Relationship (ER), S EER, Superclass 1.12 Subclass, Specialization Floating-Point Representation, Generalization, Categorization & Aggregation.4	1. Why we are using database. And how much it's important.

SW-1Suggested Sessional Work (SW):

a. Assignments:

(i) Explain Components of ER-model and ER modeling symbols.

b. **Presentation.**
c. **Pictorial representation of ER-Model:**

01CA411.2: Design Conceptual Models Of A Database Using ER Modelling For Real Life Applications And Construct Queries InRelational Algebra.

Faculty of Engineering and Technology

Department of Computer Application & Information Technology

Curriculum of B.C.A. Program

(Revised as on 01 August 2023)

Semester-IV

Course Code: **02CA421**

Course Title: Internet Applications using Java Programming Operating System

Pre-requisite: Student should have a basic understanding of Fundamental of Computer.

Rationale: The study of this subject will develop understanding of Java core concepts. Java is an object-oriented language that is best suited for Internet applications. All these concepts will help students to develop elementary internet applications using JAVA that solve real world problems.

Course Outcomes:

02CA421.1: Able to use an integrated development environment to write, compile, run, and test simple object-oriented Java programs.
02CA421.2: Understand and apply the concepts of Inheritance and Interfaces.
02CA421.3: Learn and apply applet programming to create basic web pages.
02CA421.4: Understand the Java event handling model and apply to create interactive web pages.
02CA421.5: Able to implement I/O operations and connect to database to solve real world problems.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies (Hours/Week)					Total Credits (C)
			Cl	LI	SW	SL	Total Study Hours (CI+LI+SW+SL)	
Minor	02CA421	Internet Applications using Java Programming	4	4	1	1	10	6

Legend: **CI:** Classroom Instruction (Includes different instructional strategies i.e., Lecture(L) and Tutorial (T) and others),
LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)
SW: Sessional Work (includes assignment, seminar, mini projected.),
SL: Self-Learning,
C: Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback teachers ensure outcome of Learning.

Scheme of Assessment: Theory

Board of Study	Couse Code	Course Title	Scheme of Assessment (Marks)							
			Progressive Assessment (PRA)						End Semester Assessment (ESA)	Total Marks (PRA+ ESA)
			Class/Home Assignment 5 number 3 marks each (CA)	Class Test 2 (2 best out of 3) 10 marks each (CT)	Seminar one (SA)	Class Activity any one (CAT)	Class Attendance (AT)	Total Marks (CA+CT+SA+ CAT+AT)		
Minor	02CA421	Internet Applications using Java Programming	15	20	5	5	5	50	50	100

Scheme of Assessment: Practical

Board of Study	Couse Code	Course Title	Scheme of Assessment (Marks)						
			Progressive Assessment (PRA)					End Semester Assessment (ESA)	Total Marks (PRA+ ESA)
			Class/Home Assignment 5 number 3 marks each (CA)	Viva1 (5)	Viva2 (5) (SA)	Class Attendance (AT)	Total Marks (CA+CT+SA+ CAT+AT)		
Minor	02CA421	Internet Applications using Java Programming	35	5	5	5	50	50	100

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

A K S University

Faculty of Engineering and Technology

Department of Computer Application & Information Technology

Curriculum of B.C.A. Program

(Revised as on 01 August 2023)

02CA421.1: Able to use an integrated development environment to write, compile, run, and test simpleobject-oriented Java programs.

Approximate Hours

Item	Appx. Hrs.
CI	15
LI	12
SW	1
SL	1
Total	29

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self-Learning (SL)
O1.1 Understand about language and programming paradigm **SO1.2** Understand OOPs concept, how java works. **SO1.3** Understand the concept of PATH and CLASS PATH **SO1.4** Learn about structure, compilation and execution of a Java program and role of JVM **SO1.5** Learn about data sets, operators and expressions **SO1.6** Learn about operators and expressions. **SO1.7** Learn about decision control statements and looping statements. **SO1.8** Understand the concepts of Classes. **SO1.9** Learn to create Objects and methods **SO1.10** Understand the concepts of	1. Write a program to print numbers in words using Nested if and Switch Case. 2. Write a program called PassFail which prints "PASS" if the int variable "mark" is more than or equal to 50; or prints "FAIL" otherwise 3. Write a program called OddEven which prints "Odd Number" if the int variable "number" is odd, or "Even Number" otherwise. 4. Write a Program to find sum & average of 10 no. using arrays. 5. Example of classes and object 6. Example of constructor	**Unit-1.0 The Java Environment** 1.1 History and features of java, C++ Vs java. 1.2 OOPs concept, how java works. 1.3 The concept of PATH and CLASS PATH. 1.4 A simple program, its compilation and execution, JAVA Program Structure, Java Virtual Machine concepts 1.5 Java platform overview, Primitive data types, variables and constants. 1.6 Operators, expression. 1.7 Statement-branching, looping and jumping, labeled statements. 1.8 Classes, objects and methods: defining a class, adding variables and methods. 1.9 Creating objects, constructor 1.10 Instances, field and methods initialization	1. Use of algorithms for develop program. 2. Create program in Java use of decision and looping statement.

Constructor **SO1.11** Understand Memory allocation and garbage collection in java **SO1.12** Learn about keywords. **SO1.13** Learn about arrays **SO1.14** Learn about String and String buffer classes **SO1.15** Learn about Wrapper classes, using the JDK tools.		by constructors, Copy constructor, 1.11 Memory allocation and garbage collection in java. 1.12 Java keywords, access methods 1.13 Arrays 1.14 String and String buffer classes. 1.15 Wrapper classes, using the JDK tools.	

SW-1 Suggested Sessional Work (SW):

a. Assignments:

1. Create a program in Java to check the input no is prime or not.
2. Create a program in Java to print a factorial of given no.

b. Mini Project:

Java Program to Make a Simple Calculator Using switch...case.

c. Other Activities (Specify):

NA

02CA421.2: Understand and apply the concepts of Inheritance and Interfaces.

Approximate Hours

Item	Appx. Hrs.
CI	11
LI	12
SW	1
SL	1
Total	25

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self-Learning (SL)

O2.1 Understand about Inheritance. **SO2.2** Learn about method overloading **SO2.3** Learn about abstract classes. **SO2.4** About Interface and implementing an interface **SO2.5** Create programs implementing an Interface **SO2.6** Learn about multithreading. **SO2.7** Understand the lifecycle of a thread. **SO2.8** Learn creating a thread **SO2.9** Learn thread synchronization. **SO2.10** Understand Thread	1. Write a program to display reverse of a digit no. usingarray. 2. Write a program to display grade according to the marks obtained by the student. 3. Find the factorial of number if number is given by user using command line argument.	**Unit-2.0 Inheritance and Interfaces** 2.1 Inheritance basics, Super class, Sub-class. 2.2 Method overloading 2.3 Abstract classes. 2.4 Defining an interface, implementing & applying interfaces, variables in interfaces 2.5 Create programs implementing an Interface 2.6 Extending interfaces, Multithreading and Exception Handling: Basic idea of multithreaded programming 2.7 The lifecycle of a thread 2.8 Creating thread with the thread class and runnable	1. Study and practice implementing interfaces. Study exception handling
scheduling. **SO2.11** Learn exception handling.	4. Write a program to print Fibonacci series. 5. Example of thread using Thread clas 6. Example of thread using Runnable interface.	interface. 2.9 Thread synchronization 2.10 Thread scheduling 2.11 Basic idea of exception handling: 2.12 The try, catch and throw, throws	

SW-2 Suggested Sessional Work (SW):

a. Assignments:

1. Write a program in Java to show method overloading.
2. Write a program in Java implementing the concept of multi-threading.

b. Mini Project:

NA

c. Other Activities (Specify):

NA

02CA421.3: Learn and apply applet programming to create basic web pages.

Approximate Hours

Item	Appx. Hrs.
CI	11
LI	12
SW	1
SL	1
Total	25

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self-Learning (SL)
3.1 Learn about Applets. **SO3.2** Learn creating applets. **SO3.3** Understand applets and alignment. **SO3.4** Understand Java security, passing parameter to applets, Aligning the Display **SO3.5** Learn basic HTML Tags **SO3.6** Learn how to take inputs from the user. **SO3.7** Understand class hierarchy and basic user interface components. **SO3.8** Understand basic user interface components. **SO3.9** Understand basic user interface components. **SO3.10** Understand various types of layouts. **SO3.11** Understand various types of layouts.	1. Write a program to display tables from 2 to10. 2. Write a program to take an input from user and check given number is prime or not. 3. Write a program to implement method overriding. 4. Write a program to convert given string into. Uppercase and lowercase and get the length of string using array. 5. Example of Label and Button 6. Example of Checkbox and radio button	**Unit-3.0 Applet Programming** 3.1 Local and Remote Applets, Applet Vs Application 3.2 Creating and executing java applets 3.3 Inserting applets in a web page 3.4 Java security, passing parameter to applets, Aligning the Display 3.5 HTML Tags & Applet Tag 3.6 Getting Input from User 3.7 The class hierarchy of window fundamentals; The basic user interface components Label, Button 3.8 Check Box, Radio Button 3.9 Choice menu, Text area, scroll list, Scroll bar 3.10 Frame, Layout managers-flow layout 3.11 Grid layout, Border layout, Card layout	1. Study about Applet. 2. Create web pages using applets.

SW-3 Suggested Sessional Work (SW):

a. Assignments:

1. Create a web page using applets?
2. Differentiate between Local and Remote applets?

b. Mini Project:

Create the homepage and Contact Us page for the University website.

c. Other Activities (Specify):NA

02CA421.4: Understand the Java event handling model and apply to create interactive web pages.

Approximate Hours

Item	Appx. Hrs.
CI	13
LI	12
SW	1
SL	1
Total	27

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self-Learning (SL)
O4.1 Understand the basic concepts of Event handling model in Java. **SO4.2** Understand the basic concepts of Event handling model in Java. **SO4.3** Learn about event class hierarchy. **SO4.4** Learn about event class hierarchy. **SO4.5** Learn about Adapter classes, Event classes, action Event. **SO4.6** Understand about various types of Events supported by Java. **SO4.7** Understand about various types of Events supported	1. Example of Menu 2. Example Layout 3. Write a programto overload volume method to find out volume of cube and cuboid. 4. Write a programto design a class using abstract Methods and Classes. 5. Write a programto implement multiple inheritance by using Interface. 6. Write a program to create a package of your name and use that package in a class.	**Unit-4.0 The Java Event Handling Model** 4.1 Java's event delegation model ignoring the event 4.2 Self- contained events, Delegating events 4.3 The event class hierarchy 4.4 The relationship between interface, methods called, parameters and event source 4.5 Adapter classes, Event classes, action Event 4.6 Adjustment Event, Container Event 4.7 Focus Event, Item Event 4.8 Event, Mouse Event 4.9 Text Event, Window Event 4.10 Networking basics 4.11 Networking classes and interfaces 4.12 Using java.net package	1. Study about Event Handling in Java.

by Java. **SO4.8** Understand about various types of Events supported		4.13 TCP/IP and datagram programming	
by Java. **SO4.9** Understand about various types of Events supported by Java. **SO4.10** Learn about basics of networking. **SO4.11** Learn about networking related Java classes. **SO4.12** Learn about TCP/IP and datagram programming. **SO4.13** Learn about TCP/IP and datagram programming.			

SW-4 Suggested Sessional Work (SW):

a. Assignments:

1. Implement event handling using Java.
2. Give brief overview of TCP/IP and explain some of the events supported by Java.

b. Mini Project:

NA

c. Other Activities (Specify):

NA.

02CA421.5: Able to implement I/O operations and connect to database to solve real world problems.

Approximate Hour

Item	Appx. Hrs.
CI	10
LI	12
SW	1
SL	1
Total	24

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self-Learning (SL)
SO5.1 Learn about Java i/o, **SO5.2** Learn about Directories, stream classes. **SO5.3** Understand Byte Stream. **SO5.4** Learn about Input and Output stream. **SO5.5** Learn to access files. **SO5.6** Learn about buffered reader and writer. **SO5.7** Understand database connectivity. **SO5.8** Understand database connectivity. **SO5.9** Learn about JDBC and its classes. **SO5.10** Learn about JDBC and its classes.	1. Write a program to implement parameterized constructor with default argument. 2. Define an exception called "Marks out of Bound" exception that is thrown if the entered marks are greater than 100. 3. Develop a simple real life application to illustrate the use of multithreading 4. Design an applet that takes three numerical values as input from the user and then Displays the largest of those three numbers onthe screen. 5. Java dataset connectivity example. 6. Example of file handling in java	**Unit-5.0 Input/Output and JDBC** 5.1 Exploring Java i/o. 5.2 Directories, stream classes. 5.3 The Byte Stream: Input stream, output stream 5.4 file input stream, file output stream, print stream 5.5 Random access file, the character streams 5.6 Buffered reader, buffered writer, print writer, serialization 5.7 JDBC-ODBC bridge, The connectivity model; The driver manager 5.8 Navigating the result set object contents 5.9 java.sql Package, The JDBC exception classes 5.10 Connecting to Remote database	1. Study about JDBC and SQL/PL.

SW-5 Suggested Sessional Work (SW):

a. Assignments:

1. Explain JDBC architecture.

2. Describe how are files accessed using Java.

b. Mini Project:
Create the login page and validate the credentials using database

c. Other Activities (Specify):NA.

Brief of Hours suggested for the Course Outcome

Curriculum of B.C.A. Program

(Revised as on 01 August 2023)

Course Code: 03CA431

Course Title: **E-Commerce**

Pre-requisite: Basic understanding of Business concepts and Online technologies.

Rationale: This syllabus aims to equip students with a robust foundation in e-commerce, integrating historical context, technological advancements, and critical security considerations for a comprehensive understanding of this dynamic field.

Course Outcomes:

03CA431.1: To learn the fundamentals of E — Commerce and its process.

03CA431.2: To understand the role of E- commerce in the present scenario along with the concepts of security and its applications.

03CA431.3: To gain knowledge of e-commerce business needs and resources and match to technology consideringhuman factors and budget constraints.

03CA431.4: To apply knowledge of changing technology on traditional business models and strategy.

03CA431.5: To have skills to Communicate effectively and ethically using electronic communication.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies (Hours/Week)					Total Credits (C)
			Cl	LI	SW	SL	Total Study Hours (CI+LI+SW+SL)	
Open Elective	03CA431	**E-Commerce**	4	0	1	1	6	4

SO1.1 Understand the historical evolution and categorization of e-commerce. **SO1.2** Differentiate between the types of e-commerce and articulate their respective advantages and disadvantages. **SO1.3** Identify and analyze the key elements of e-	.	**Unit-1.0 Introduction to E-Commerce** 1.1 Introduction & Brief history of e-commerce 1.2 Types 1.3 Advantages & Disadvantages of e-commerce 1.4 Elements of e-commerce	1. Explore the evolution and current trends of e-commerce through online articles and case studies.

commerce in practical scenarios. **SO1.4** Evaluate the principles underlying effective e-commerce strategies. **SO1.**5 Assess the significance of common service infrastructure and other key support layers in the e-commerce ecosystem. .		1.5 Principles of e-commerce 1.6 Messaging and Information distribution 1.7 Messaging and information distribution 1.8 Common service infrastructure 1.9 other key support layers.	

SW-1Suggested Sessional Work (SW):

a. **Assignments**:

1. Analyze a specific e-commerce platform, outlining its history, business model, advantages, and potential areas for improvement.

b. Mini Project:

1. Develop a basic e-commerce website with essential functionalities, emphasizing user-friendly design and secure payment gateways.

c. Other Activities (Specify):

1. Participate in a virtual panel discussion or webinar on emerging technologies shaping the future of e-commerce.

03CA431.2: To understand the role of E- commerce in the present scenario along with the concepts ofsecurity and its applications.

SO1.1 Define EDI and its origin, understanding the system approach and communication strategies. **SO1.2** Explain the migration process to open EDI, emphasizing its benefits. **SO1.3** Demonstrate the mechanics involved in EDI, showcasing practical application. **SO1.4** Evaluate the integration of E-commerce with WWW/Internet, discerning its impact. **SO1.5** Develop an understanding of E-Government concepts and apply them in various contexts, including G2C, G2B, and G2G applications.	.	**Unit-2.0 EDI** **Introduction** 1.1 EDI to e-commerce: 1.2 EDI - Origin System approach 1.3 Communication approach 1.4 Migration to open EDI-Approach Benefits 1.5 Mechanics 1.6 E.com with WWW/Internet 1.7 E-Government Concepts 1.8 Applications of G2C 1.9 G2B 1.10 G2G	1. Explore EDI's evolution, covering its origin, system approach, and communication strategies.

SW-2 Suggested Sessional Work (SW):

a. **Assignments**:
   1. Investigate the advantages and migration processes of open EDI, emphasizing its approach and benefits.

b. Mini Project:
   1. Develop an E-commerce platform integrated with the WWW/Internet, showcasing practical applications and mechanics.

c. Other Activities (Specify):
   1. Dive into E-Government concepts and highlight real-world scenarios with Applications of G2C, G2B, and G2G interactions

03CA431.3: To gain knowledge of e-commerce business needs and resources and match to technology considering human factors and budget constraints.

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self-Learning (SL)

SO3.1 Apply OSI and TCP/IP Models for Efficient Network Communication. **SO3.**2. Evaluate the Advantages and Disadvantages of LAN, WAN, MAN Internetworking. **SO3.**3. Analyze the Distinctions Between Internet and Online Services. **SO3.**4. Assess the Impact of Architecture Choices: Open vs. Closed, Controlled vs. Uncontrolled. **SO3.**5. Critically Examine Pricing Models: Metered Pricing vs. Flat Pricing, Balancing Innovation and Control.	.	**Unit-3: Basics of Electronic communication** 3.1. Electronic communication PC 3.2. Networking 3.3. Network topologies 3.4. Communication media 3.5. E-mail 3.6. OSI and TCP/IP Models 3.7. LAN, WAN, MAN Internetworking — Bridges and gateways 3.8. Internet Vs Online services 3.9. Open vs. Closed Architecture 3.10. Controlled contained 3.11. Uncontrolled contained 3.12. Metered Pricing Vs Flat pricing Innovation Vs Control.	1. Explore electronic communication, PC, and networking fundamentals, covering network topologies, communication media, and the OSI/TCP/IP models.

SW-3 Suggested Sessional Work (SW):

a. **Assignments**:
   1. Analyze the distinctions between LAN, WAN, MAN, and investigate the role of bridges and gateways in internetworking, comparing Internet and online services with a focus on open vs. closed architecture.

b. Mini Project:
   1. Develop a controlled content e-commerce platform, emphasizing metered pricing versus flat pricing strategies, integrating innovative features while ensuring user security.

c. Other Activities (Specify):
   1. Participate in discussions on the implications of controlled versus uncontrolled content in e-commerce, examining the balance between innovation and control for sustainable business growth.

03CA431.4: To apply knowledge of changing technology on traditional business models and strategy.

AKS University

Faculty of Engineering and Technology

Department of Computer Application & Information Technology

Curriculum of B.C.A. Program

(Revised as on 01 August 2023)

Semester-IV

Course Code: **03CA432**

Course Title: **Computer Maintenance and Troubleshooting**

Pre-requisite: Basic understanding of Business concepts and Online technologies.

Rationale: This syllabus aims to equip students with a robust foundation in computer maintenance

Course Outcomes:

03CA432.1: To learn the fundamentals CPU organization and architecture

03CA432.2: To understand the laptop maintenance

03CA432.3: To gain knowledge Peripheral maintenance.

03CA432.4: To apply knowledge Monitor and Network devices

03CA432.5: To have skills to Tools and Techniques

.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies (Hours/Week)					Total Credits (C)
			Cl	LI	SW	SL	Total Study Hours (CI+LI+SW+SL)	
Open Elective	**03CA432**	**Computer Maintenance and Troubleshooting**	4	0	1	1	6	4

Legend: **CI**: Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),
LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)
SW: Sessional Work (includes assignment, seminar, mini project etc.),
SL: Self Learning,
C: Credits.

Note: SW &SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Scheme of Assessment: Theory

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

03CA432.**1:** To learn the fundamentals of Computer Maintenance.

Approximate Hours

A K S University

Faculty of Computer Application & Information Technology and Science

Department of Computer Application& Information Technology

BCA (Bachelor of Computer Applications)

Semester-V

Course Code: 0CA504

Course Title: Cyber Security

Pre-requisite: In order to learn Cyber Security, students must be familiar with the basics of computer science. To understand how to protect information systems from attack, it is necessary to understand how systems work.

Rationale: The objective of this course is to introduce Cyber Security Application of Cyber Security, pattern matching and cluster analysis is included to aware students of broad Cyber Security areas.

Course Outcome:

Upon completion of the degree program, students will be:-

0CA504.1: Understand the cyber security threat landscape.
0CA504.2: Develop a deeper understanding and familiarity with various types of cyberattacks, cybercrimes,vulnerabilities and remedies thereto.
0CA504.3: Analyze and evaluate existing legal framework and laws on cyber security.
0CA504.4: Analyze and evaluate the digital payment system security and remedial measures against digitalpayment frauds.
0CA504.5: Students will adeptly comprehend, apply, and utilize digital device security principles, tools, andtechnologies to mitigate cyber threats effectively.

Scheme of Studies:

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

0CA504.1: Understand the cyber security threat landscape.

Approximate Hours

Item	Appx Hrs.

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self-Learning (SL)

SO1.1 Defining Cyberspace and Overview of Computer and Web-technology **SO1.2** Architecture of cyberspace. **SO1.3** Communication and web technology, Internet, World wide web, **SO1.4** Advent of internet, Internet infrastructure for data transfer and governance **SO1.**5 Issues and challenges of cyber security		**Module-1.0 Introduction to Cyber security**: 1.1. Defining Cyberspace and 1.2 Overview of Computer and 1.3 Web-technology 1.4 Architecture of cyberspace. 1.5 Communication and web technology, 1.6 Internet, World wide web, 1.7 Advent of internet, 1.8 Internet infrastructure for data transfer and governance 1.9 Internet society, 1.10 Regulation of cyberspace, 1.11 Concept of cyber security, 1.12 Issues and challenges of cyber security	1. Learn about Cyber Security.

SW-1 Suggested Sessional Work (SW):

a. **Assignments:**
   - Issues and challenges of cyber security
   - Concept of cyber security

b. **Mini Project:**
   - Explore common cyber threats such as malware, phishing, ransomware, and DDoS attacks.

c. **Other Activities (Specify):**
   - Provide examples and case studies.

0CA504.2: Develop a deeper understanding and familiarity with various types of cyberattacks,cybercrimes, vulnerabilities and remedies thereto.

Approximate Hours

Item	Appx Hrs.

Session Outcomes (SOs)	**Laboratory Instruction (LI)**	**Classroom Instruction (CI)**	**Self-Learning (SL)**
SO2.1 Understand Classification of cybercrimes, **SO2.2** LearnAbout Common cybercrimes- cybercrime targeting computers and mobiles **SO2.3** Understand about social engineering attacks, malware and ransomware attacks, zero day and zero click attacks, **SO2.4** Cybercriminals modus-operandi , Reporting of cybercrimes, Remedial and mitigation measures, **SO2.**5 Legal perspective of cybercrime, IT Act 2000 and its amendments,		**Module 2.0 Cyber-crime and Cyber law** 2.1 Classification of cyber-crimes, 2.2 Common cyber-crimes 2.3 cyber-crime targeting computers and mobiles 2.4 cybercrime against women and children, 2.5 financial frauds, 2.6 social engineering attacks, 2.7 malware and ransomware attacks,	SL1. Students, at the end of this module, should be able to understand the cyber-crimes, their nature, legal remedies and as to how report the crimes through available platforms and procedures.

		2.8 zero day and zero click attacks, 2.9 Cybercriminals modus-operandi , Reporting of cyber-crimes, Remedial and mitigation measures, 2.10 Legal perspective ofcyber-crime, IT Act 2000 and its amendments, 2.11 Cyber-crime and offences, organizations dealing with Cybercrime and 2.12 Cyber security in India	

SW-2 Suggested Sessional Work (SW):

a) Assignments:
- Define social engineering attacks, malware and ransomware attacks, zero day and zero click attacks.

b) Mini Project:
- Explore common cyber threats such as malware, phishing, ransomware, and DDoS attacks.

c) Other Activities (Specify):
- Provide examples and case studies.

0CA504.3: Analyze and evaluate existing legal framework and laws on cyber security.

Curriculum of B.C.A (Computer Science& Application) Program

Semester-V

Course Code: 01CA511

Course Title: Python programming

Pre-requisite: To study this Course, a student must have basic knowledge of computers

Rationale: Python has become a staple in data science, allowing data analysts and other Professionals to use the language to conduct complex statistical calculations, create Data visualizations, build machine learning algorithms, manipulate and analyses data, andcomplete other data-related tasks

Course Outcomes: After completing this course student will be**:**

01CA511.1: Develop and execute simple Python programs
01CA511.2: Structure a Python program into functions
01CA511.3: Using Python lists, tuples to represent compound data
01CA511.4: Develop Python Programs for file processing
01CA511.5: Implement error handling

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme ofstudies (Hours/Week)					Total Credits(C)

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should show case their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) up on the course's conclusion.

01CA511.1: Develop and execute simple Python programs

Approximate Hours

Item	AppX Hrs
Cl	15
LI	12
SW	1
SL	1
Total	29

Session Outcomes (SOs)	LaboratoryInstruction(LI)	Classroom Instruction (CI)	Self- Learning(SL)
SO1.1 Understand the PYTHON **SO1.2 Explain** Object oriented, Embeddable **SO1.3 Discuss** Unix, Linux and Mac **SO1.4** Definition Jupyter Note Book, PyCharm **SO1.**5 Explain ATOM	1. Write a programto demonstrate different data types in Python. 2. Write a programto perform different Arithmetic Operations on numbers in Python. 3. Example of comments in python 4. Example of Input operation in python 5. Example of Output operation in python 6. Example of variables.	**Unit-1 What is Python**:- 1.1 WHY PYTHON? History 1.2 Dynamic, Interpreted 1.3 Object oriented, Embeddable 1.4 Extensible, Large standard libraries 1.5 Free and Open source 1.6 Download &Python Installation Process inWindows 1.7 Unix, Linux andMac 1.8 Online Python IDLE 1.9 Python Real time IDES like Spyder 1.10 Jupyter Note Book, PyCharm 1.11 Rodeo,Visual Studio code 1.12 ATOM 1.13 PyDevetc, Data Types and Variables 1.14 Numbers, Operators Commentsin Python 1.15 Input output operation in Python.	1 Rodeo, Visual Studio code 2 Numbers, Operators Comments in Python

SW-1 Suggested Sessional Work (SW):

a. Assignments:

i. Extensible, Large standard libraries

ii. Python Real time IDES like Spyder

iii. Input output operation in python.

b. Major - Paper I:

c. Other Activities (Specify): Seminar

01CA511.2: Structure a Python program into functions

Approximate Hours

Item	Appx Hrs
Cl	11
LI	12
SW	1
SL	1
Total	25

Session Outcomes (SOs)	**Laboratory Instruction (LI)**	**Classroom Instruction (CI)**	**Self-Learning (SL)**
SO2.1 To Understand the Control Statements **SO2.2** To learn if, If else, If-elif-else **SO2.3** To lean about Function in python **SO2.4 Explain the** types of function in python **SO2.**5 define map, reduce, filter function	1 Write a program to create, concatenate and print a string and accessing sub-string from a given string. 2 Write a python script to print the current date in the following format a. "Fri Oct 1102:26:23 IST2019". 3 Example of else if 4 Example of List and tuple 5 Example of Dictionary 6 Example of for and while.	**Unit-2 Control Statements:** **2.1** Conditional control statements **2.2** if, If else, If-elif-else **2.3** control statements- **2.4** for, while **2.5** Data Structure & Collection **2.6** String, List, Tuple, Set, Dictionary **2.7** Comparison of List, Tuple and Set **2.8** Function in python **2.9** types of function in python **2.10** map, reduce, filter function **2.11** Lambda Function	1. Conditional control statements 2. String,List,Tuple,Set, Dictionary

SW-2 Suggested Sessional Work (SW):

a. Assignments:

i. control statements-for, while

ii. String, List, Tuple, Set, Dictionary

iii. Data Structure & Collection

A Major - Paper I:

b. Other Activities (Specify):

01CA511.3: Using Python lists, tuples to represent compound data

Approximate Hours

Item	Appx Hrs
Cl	10
LI	12
SW	1
SL	1
Total	24

Session Outcomes (SOs)	**Laboratory Instruction (LI)**	**Classroom Instruction (CI)**	**Self-Learning (SL)**
SO3.1 To Understand the Importance of modular programming **SO3.2** To learn What is module? Types of Modules**SO3.3** To understand the User defines module creation **SO3.4** To design Package v/sFolder **SO3.5 define the** File and Directory handling in Python	1. Write a program to create, append, and remove lists in python. 2 Write a program to demonstrate working with tuples in python. Example of modules. 3. Example of modules 4. Example of date functions. 5. Example of time functions 6. Example of userdefined functions.	**Unit-3: Importance of modular:** **3.1** Importance of modular programming **3.2** What is module? Types ofModules **3.3** Pre-defined, User defined. **3.4** User defines module creation **3.5** OS, Date-time, math modules **3.6** organizing python project intopackages **3.7** Types of packages **3.8** - pre defined, user defined. **3.9** Package v/s Folder, **3.10** File and Directory handlingin Python	1. What is module? Types of Modules 2. organizing python project into packages

SW-3SuggestedSessionalWork (SW):

a. Assignments:

What is module? Types of Modules

1. organizing python project into packages
2. File and Directory handling in Python

b. Major - Paper I:

c. Other Activities (Specify):

01CA511.4: Develop Python Programs for file processing

Approximate Hours

Item	Appx Hrs

LI	12
SW	1
SL	1
Total	25

Session Outcomes (SOs)	**Laboratory Instruction (LI)**	**Classroom Instruction (CI)**	**Self-Learning (SL)**
SO4.1 Evaluation of Procedural v/s Object oriented programming **SO4.2** Understanding the Abstraction, Polymorphism **SO4.3 Explain** Exception handling types of errors **SO4.4** To lean about raise, and Need to Custom exceptions **SO4.5 define the** regular expression	1. Write a program to demonstrate working with dictionaries in python. 2. Write a python program to find largest of three numbers. 3. Example of abstraction 4. Example of Polymorphism 5. Example of Inheritance 6. Example of try and catch	**Unit-4 : Procedural v/s Object:-** **4.1** Procedural v/s Object oriented programming **4.2** Principles of OOP – Encapsulation **4.3** Abstraction, **4.4** Polymorphism **4.5** Inheritance. Inner Classes **4.6** Exception handling **4.7** types of errors **4.8** try, except, finally **4.9** raise, and Need to Custom exceptions **4.10** Case studies, **4.11** regular expression	**1.** Principles of OOP – Encapsulation **2.** Polymorphism Inheritance.

SW-4Suggested Sessional Work (SW):

a. Assignments:

1. Inheritance. Inner Classes
2. raise, and Need to Custom exceptions
3. Abstraction, Polymorphism

b. Major - Paper I:

c. Other **Activities (Specify):**

01CA511.5: Implement error handling

Approximate Hours

Item	AppX Hrs

LI	12
SW	1
SL	1
Total	30

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self-Learning (SL)
SO5.1 understand the Multithreading and multiprocessing in python **SO5.2 Explain** Threading module, Creating thread **SO5.3** To understand the Single threaded application **SO5.4** To understand We call run () directly? Need to start(), method **SO5.**5 Explain Base Communications (PDBC),	1. Write a python program to define a module to find Fibonacci Numbers and import the module to another program. 2. Write a python program to define a module and import a specific function in that module to another program. 3. Example of multithreading in python. 4. Example of synchronization. 5. Use of NumPy panda. 6. MatPlot Lib	**Unit5: Multithreading and multiprocessing:** 5.1 Multithreading and multiprocessing in python 5.2 Threading module, Creating thread 5.3 inheriting Thread class 5.4 Using callable object, 5.5 Life cycle of thread, 5.6 Single threaded application, 5.7 Multithreaded application 5.8 We call run () directly? 5.9 Need to start(), method , 5.10 Sleep() & Join(), 5.11 Synchronization - Lock class - acquire(), 5.12 release() functions 5.13 Garbage collection. Python Data Base Communications (PDBC), Introduction of Numpy, Pandas &MatPlotLib, Drawin lots.	1. Threading module, Creating thread 2. We call run () directly? Need to start(),method, Sleep() & Join(),

SW-4Suggested Sessional Work (SW):

a. Assignments:

1. Threading module, creating thread
2. Base Communications (PDBC), Introduction of Numpy.
3. Synchronization - Lock class – acquire (),release() functions

b. Major - Paper I:

c. C. Other Activities (Specify):

Brief of Hours suggested for the Course Outcome

Course Outcomes	Class Lecture (Cl)	Sessional Work (SW)	Self-Learning (Sl)	Total hour(Cl+SW+Sl)
01CA511.1: Develop and execute simplePython programs	15	02	01	18
01CA511.2: Structure a Python program intofunctions	11	02	01	14
01CA511.3: Using Python lists, tuples torepresent compound data	10	02	01	13

A K S University

Faculty of Engineering and Technology

Department of Computer Science & Engineering

Curriculum of B.C.A (Computer Science& Application) Program

Semester-V

Course Code: 05CA521-A

Course Title: Multimedia And Animation

Pre- requisite: Basic knowledge of computers

Rationale: The aim of the course is to introduce to the field of Multimedia with emphasis on its use to solve real world problems for which solutions are difficult to express using the traditional algorithmic approach. It explores the essential theory behind methodologies for developing systems that can create new Multimedia technologies like video Editing, animation, image editing.

Course Outcomes:

05CA521-A .1: Demonstrate knowledge of the fundamental principles of multimedia.
05CA521-A .2: Apply Fonts and image fundamentals.
05CA521-A .3: Fundamentals of Audio and Video
05CA521-A .4: Familiarize knowledge representation in Animation.
05CA521-A .5: Comprehend the use of 2D and 3D Animation.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credits(C)
			CI	LI	SW	SL	Total Study Hours (CI+LI+SW+SL)	
DSE-1	05CA521-A	Multimedia And Animation	4	0	1	1	6	4

Legend:
CI: Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),
LI: Laboratory Instruction (Includes Practical performances in laboratory workshop,field or other locations using different instructional strategies)
SW: Sessional Work (includes assignment, seminar, mini project etc.),
SL: Self Learning,
C: Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Scheme of Assessment: Theory

Board of Study	Course	Course Title	Scheme of Assessment (Marks)							
			Progressive Assessment (PRA)						End Semester Assessment	Total Marks
			Class/Home Assignment 5 number	Class Test 2 (2 best out of 3)	Seminar one	Class Activity any one (CA)	Class Attendance (AT)	Total Marks (CA+CT+SA+CAT+AT)	**(ESA)**	
DSE-1	05CA521-A	Multimedia And Animation	15	20	5	5	5	50	50	100

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

05CA521-A .1: Demonstrate knowledge of the fundamental principles of multimedia.

A K S University

Faculty of Computer Application & Information Technology and Science

Department of Computer Application & Information Technology

Curriculum of BCA (Bachelor of Computer Applications)

(Revised as on 01 August 2023)

Semester-V

Course Code: 05CA521-B

Course Title: Design and Analysis of Algorithms

Pre- requisite: Data Structures and

Rationale: Study of this subject help students to understand different problem-solving skills like divide and conquer, Dynamic programming, Greedy Strategy and Back Tracking. These problem-solving skills will develop intelligence in student to solve real time problems of society and Industry.

Course Outcomes:

05CA521-B.1. Demonstrate knowledge of Graph and its applications.
05CA521-B.2. Apply greedy approach and Huffman coding.
05CA521-B.3. Use various divide and conquer algorithm and recurrence relation
05CA521-B.4. Familiarize with the dynamic programming approach
05CA521-B.5. Comprehend the use of concept of computation and network flow.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credits (C)
			Cl	LI	SW	SL	Total Study Hours (CI+LI+SW+SL)	
DSE-1	**05CA521-B**	Design and analysis of algorithms	4	0	1	1	6	4

Legend: **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),
LI: Laboratory Instruction (Includes Practical performances in laboratory workshop,field or other locations using different instructional strategies)
SW: Sessional Work (includes assignment, seminar, mini project etc.),
SL: Self-Learning,
C: Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback ofteacher to ensure outcome of Learning.

Scheme of Assessment: Theory

Board of Study	Course	Course Title	Scheme of Assessment (Marks)							
			Progressive Assessment (PRA)						End Semester Assessment (ESA)	Total Marks (PRA+ ESA)
			Class/Home Assignment5 number3 marks	Class Test2(2 best out of 3)10 markseach CT)	Seminar one(SA)	Class Activityany one (CAT)	Class Attendance (AT)	Total Marks (CA+CT+SA+CAT+AT)

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

05CA521-B .1: Demonstrate knowledge of Graph and its applications.

Approximate Hours

Item	Appx Hrs.
Cl	9
LI	0
SW	2
SL	1
Total	12

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self-Learning (SL)

SO1.1 Understand the concept of Graph **SO1.2** Compare DFS and BFS **SO1.3** Analyze connectivity of graphs.	.	**Unit-1.0** Applications of Graph Search 1.1 Intro Graph Search algorithms 1.2 BFS 1.3 Application and example of BFS 1.4 DFS 1.5 Application and Example of DFS 1.6 Checking if an undirected graph is 2-edge connected 1.7 Based Examples 1.8 Checking if a directed graph is strongly connected 1.9 Based Examples	1. Discuss terminology related to graph. 2. See applications of graph.

SW-1 Suggested Sessional Work (SW):

Assignments:

i. Numerical based on BFS.
ii. Numerical based on DFS
iii. Numerical based on Graph

05CA521-B .2: Apply greedy approach and Huffman coding.

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self-Learning (SL)

SO2.1 Understand the concept of Greedy approach. **SO2.2** Use of Kruskal and prim algorithms. **SO2.3** Demonstrate the use of Huffman coding.	.	**Unit-2.0** Greedy algorithms 2.1. Introduction to the greedy paradigm 2.2. Some Greedy algorithms 2.3. Examples of activity selection 2.4. Examples of deadline scheduling 2.5. fractional knapsack 2.6. based example 2.7. Kruskal's algorithm for minimum spanning trees 2.8. Based examples 2.9. Huffman coding 2.10. Based examples	1. Prim's algorithm for minimum spanning trees. 2. Examples where greedy algorithms are not optimal.

SW-1 Suggested Sessional Work (SW):

Assignments:

iv. Other algorithms based on Greedy approach.
v. Numerical based on fractional knapsack.
vi. Numerical based on Huffman Coding.

05CA521-B .3: Use various divide and conquer algorithm and recurrence relation.

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self-Learning (SL)
SO3.1 Understand the concept of Divide and conquer **SO3.2** Use various Divide and conquer algorithms. **SO3.3** Solve recurrence relation		**Unit-3.0** Divide and Conquer 3.1. Intro to Divide and conquer approach 3.2. Explain why the divide andconquer paradigm is useful. 3.3. Illustrate the paradigm through integer multiplication. 3.4. Writing recurrence relations and solving them. 3.5. Various methods to solve recurrence relation -I 3.6. Various methods to solve recurrence relation -II 3.7. Examples based on recurrence relation 3.8. Further examples from geometry – domination numberof a set of points, 3.9. Identifying maximal points, closest pair of points. 3.10. Linear time algorithm for findingthe median. 3.11. Randomized divide and conquer algorithms: 3.12. randomized quicksort and 3.13. selection	1. Solve some recurrence relations. 2. Modify discussed algorithms (e.g., dividing into three parts instead of two parts, or two unequal parts, etc.)and analyze using recurrences. 3. Some elementary exercises on expectation calculation.

SW-1 Suggested Sessional Work (SW):

Assignments:

vii. Numerical based on Fuzzy logic.
viii. Numerical based on Membership Function.
ix. Numerical based on Genetic algorithm.

05CA521-B .4: Familiarize with the dynamic programming approach.

Approximate Hours

Item	Appx. Hrs.
Cl	10
LI	0
SW	2
SL	1
Total	13

Session Outcomes (SOs)	**Laboratory Instruction (LI)**	**Class room Instruction (CI)**	**Self-Learning (SL)**
SO4.1 Understand the concept of Dynamic Programming **SO4.2** Understand the concept of shortest paths **SO4.3** Analyze various dynamic programming algorithms.	.	**Unit-4.0** Dynamic Programming and shortest paths 4.1. Computing Fibonacci numbers and why divide-and- conquer is not a good idea. Ideaof storing function calls, tables 4.2. Notion of sub problems and optimal substructure 4.3. Illustration through subset sum 4.4.(integer) knapsack 4.5.longestincreasing subsequence 4.6.longestcommon subsequence 4.7. matrix chain multiplication 4.8. Dijkstra's algorithm for single-source shortest paths 4.9. Bellman-Ford for SSSP with	1. Exercises on dynamic programming.

		negative weights 4.10. Floyd Warshall for APSP	

SW-1 Suggested Sessional Work (SW):

Assignments:

i. Questions based on frames.
ii. Questions based on scripts.
iii. Questions based on formal logic.

05CA521-B .5: Comprehend the use of concept of computation and network flow.

Approximate Hours

Item	AppX Hrs
Cl	18
LI	00
SW	02
SL	01
Total	21

Session Outcomes (SOs)	**Laboratory Instruction (LI)**	**Class room Instruction (CI)**	**Self-Learning (SL)**
SO5.1 Understand the concept of Network flows. **SO5.2** Understand the concept of computations.	.	**Unit-5.0** Network flows & Intractability 5.1. The maximum s-t flow problemin capacitated networks 5.2. Ford Fulkerson algorithm or maximum flow 5.3. Max-flow min-cut theorem 5.4. integrality of maximum flow for integral capacities 5.5. Applications of max flow to maximum bipartite matching, max disjoint paths 5.6. Models of computation	1. Exercises on reductions 2. Exercises on NP-completeness. 3. Problems which areNP-hard but not in NP. 4. Examples of poly time reductions.

		5.7.Turing machines 5.8.PRAM model 5.9.Brief discussion on other modelsof computation e.g. PRAM model 5.10. Memory Hierarchy 5.11. Notion of polynomial time computation 5.12. Polynomial time reductions 5.13. Yes and No instances of decision problems 5.14. Decision vs optimization. 5.15. NP as a class of problems with Yes certificates which can be efficiently checked 5.16. NP-hardness and Cook-Levin theorem (just the statement). 5.17. NP-completeness. 5.18. Examplesof Reductions.	

SW-1 Suggested Sessional Work (SW):

Assignments:

i. Different types of learning techniques.
ii. Use of Dempster-Shafer Theory of Evidential reasoning

Brief of Hours suggested for the Course Outcome

Course Outcomes	Class Lecture (Cl)	Sessional Work (SW)	Self-Learning (Sl)	Total hour (Cl+SW+Sl)
05CA521-B .1 Demonstrate knowledgeof Graph and its applications.	09	02	01	13
05CA521-B .2. Apply greedy approachand Huffman coding.	10	02	01	13

Suggestion for End Semester Assessment

Suggested Specification Table (For ESA)

CO	Unit Titles	Marks Distribution			Total Marks
		R	U	A	
CO-1	Applications of Graph Search	03	02	03	08
CO-2	Greedy algorithms	03	01	05	09
CO-3	Divide and conquer	03	07	02	12
CO-4	Dynamic Programming and shortest paths	03	05	05	13
CO-5	Network flows & Intractability	03	02	03	08
Total		15	17	18	50

Legend: R: Remember, U: Understand, A: Apply

The end of semester assessment will be held with written examination of 50 marks
Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Visit to IT Industry
7. Demonstration
8. ICT Based Teaching Learning (Video

Demonstration/Tutorials CBT, Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)

9. Brainstorming

Suggested Learning Resources:

A. Books:

S.No.	Title	Author	Publisher	Edition &Year
1	Algorithm Design	Jon Kleinberg and Éva Tardos	Pearson.	1st Edition
2	Algorithms	Sanjoy Dasgupta, Christos Papadimitriou, Umesh Vazirani	MIT Press	3rd Edition
3	Introduction to Algorithms	Thomas H Cormen, Charles E Lieserson, Ronald L Rivestand Clifford Stein	McGraw-Hill	2nd Edition
4	Algorithm Design: Foundations, Analysis, and Internet Examples	Michael TGoodrich and Roberto Tamassia	Wiley	2nd Edition

B. Alternative NPTEL/SWAYAM/MOOC Course (if any):

S. No.	NPTEL Course Name	Instructor	Host Institute
1.	Design and Analysis of Algorithms	Prof. Madhavan Mukund	Chennai Mathematical Institute
2.	Design and Analysis of Algorithms	Prof. Abhiram Ranade	IIT Bombay

Curriculum Development Team

1. Dr. Akhilesh A. Waoo, HOD, Department of Computer Science and Engineering.
2. Dr. Pramod Singh, Associate Professor, Department of Computer Science and Engineering.
3. Ms. Shruti Gupta, Assistant Professor, Department of Computer Science and Engineering.
4. Ms. Pragya Shrivastava, Assistant Professor, Department of Computer Science and Engineering.
5. Mr. Lokendra Gaur, Assistant Professor, Department of Computer Science and Engineering.
6. Mr. Vinay Kumar Dwivedi, Assistant Professor, Department of Computer Science and Engineering.
7. Ms. Pinki Sharma, Assistant Professor, Department of Computer Science and Engineering.

(Revised as on 01 August 2023)

Semester-V

Course Code: 06CA551

Course Title: Field Project

Pre- requisite: Student should have knowledge of programming languages, Software Engineering, and Many more tools and framework.

Rationale:

- To apply the knowledge and skills learnt in previous semesters, to solve real life industrial / engineering / professional problems.
- To modify/ improve the existing engineering / professional systems.
- To develop systems / components / methods / processes / resources to cater the needs of the nearby small scale / medium industry.
- To learn to solve real life engineering / professional problems which often have many aspects to be considered and addressed.

Course Outcomes:

06CA551.1: - The student will be able to prepare a detailed project plan for solving any real-life related engineering / technical / professional / industrial problem.
06CA551.2: - The student will be able to implement the project plan and manage the project.
06CA551.3: - The student will be able to present the completed project work.

Scheme of Studies:

Introduction to Project Work

Project work is a very important course in all branches of diploma programmes. It offers following opportunities to students of final semester: -

1. To learn skills and abilities which are otherwise not possible either inclassroom or in structured environment of laboratory such as: -
   - Skill to work in groups or teams,
   - Skill to face real life professional problems and to create reallife solutions for them.
   - Skill to take professional decisions under real life constraints andcircumstances,
   - Skill to learn in self-directed way to pursue the specific professional projects (Self Directed Learning)
   - Skill to learn from real life self- experiences (l i f e l o n g learning)
   - Skill to manage the real- l i f e engineering / professional projects
   - Skill to plan and organize the self / group professional work
   - skills to apply the engineering management principles in real lifeprofessional projects
   - Skill to defend / justify self- real life engineering / professionalwork in front of

significant others

- Skill to complete the professional tasks / work keeping in viewsocietal, legal and environmental considerations
- Skill to collect relevant data in real life situations
- Skill to relate engineering / professional knowledge gained in various semesters with real life engineering / professional problems
- Skill to estimate the duration and costs in real life engineering / professional work
- Skill to assess the theoretical feasibility, financial feasibility and time feasibility of real-life engineering / professional tasks.

With an objective to ensure the learning of above skills and abilitiesas well as to earn maximum marks in NBA assessment,

The Course on Project Work consists of five phases: -

	Description of phases	Learn Hrs.
1	Literature / industry's need survey and finalization of topic / title	15Hrs
2	Detailed planning of the project work	
3	Implementing the detailed project plan	60Hrs
4	Managing the project activities	
5	Reporting of the project work output/outcome / prototype	15Hrs
	Total	90 Hrs

General Guidelines for Project Work

- The project topics should be related to concerned branch of engineering / profession, but, should not be the exact content of the curriculum taughtin the discipline.
- Student's project topics should be preferably 'real life' topics. It means the project topics should have substantial element of uncertainty, complexity and multi-disciplinary-ness which can be coped up by the students. These elements offer opportunities to students to apply engineering/ professional knowledge in real life settings, solve real life problems and to take real life decisions. As a project guide, concerned teacher should ensure these by suitably altering / framing / reframing the statement of topic / title.
- The project topics should be such that students can get opportunity to refer IS codes, Manuals, Handbooks, norms and standards, opportunity to conduct standard tests, and opportunity to operate modern laboratory equipment's following SOPs.
- For student's interest, active participation and ownership in the project work, their self-motivation is necessary. Therefore, students should be actively involved in finalizing the topic of project.
- Students should be asked to conduct a brief review of literature for problems and issues in their engineering / professional areas of interest,where they think they can contribute effectively. The project guide should facilitate them in this regard, through his/her expertise and experience.

Every student group should be asked to propose at least three topics oftheir interest.

- The topics proposed by student project groups should be assessed bythe facilitator-teacher on following three criteria: -
    - **The work on the topic should be theoretically and practically feasible.**
    - **The project work on the topic should be completed withinapprox. Three and half months.**
    - **Availability of required resources should be certain. Cost ofproject work should also be bearable.**
- Normally, students' project works should be carried out in small groups (1 to 2 students).
- All faculty members of department should be engaged as project guides. Every faculty member should be project guide of at least one student project group.
- Normally, project guides should be assigned to the students through lottery system and students under each faculty should be asked to formtheir small groups.

Semester-VI

Course Code: 01CA611

Course Title : Web Technology

Pre- requisite: Student should have basic knowledge of Signal, Circuit, Computer fundamentals.

Rationale: Study of this subject will develop different skills in students to create and manage the websites. Concepts like Html, CSS and JavaScript will helpful to develop front end design of website. And knowledge of PHP will help students to develop back-end design. Advance concepts like Angular and React will help students to make website dynamic.

Course Outcomes:

On successful completion of this course, the students will

01CA611.1: Have knowledge of HTML, its essential tags, Attributes, Text styles, Links to External Documentsand different sections of a HTML page.

01CA611.2: Develop skills to generate HTML and CSS page and have knowledge of JavaScript assisted style sheets (JSSS).

01CA611.4: Have knowledge of PHP, PHP Syntax, Comments, Variables and Constants, Embedding PHP in HTML pre-defined and used defined, Have knowledge of Angular JS, XML Fundamentals, J Query

01CA611.5: Develop skills to generate Static and dynamic application designing, Google form designing, Django

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credits (C)
			Cl	LI	SW	SL	Total Study Hours (CI+LI+SW+SL)

Major	01CA611	Web Technology-Lab	35	5	5	5	50	50	100

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels,

which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

01CA611.1: Have knowledge of HTML, its essential tags, Attributes, Text styles, Links to External Documents and different sections of a HTML page.

Session Outcomes (SOs)	**Laboratory Instruction (LI)**	**Class room Instruction (CI)**	**Self-Learning (SL)**
SO1.1 Understand basics of HTML SO1.2 Understanding various tags used with HTML SO1.3 Understanding types of List in Html. SO1.4 Understanding different input types SO1.5 Understand client server architecture. .	LI1.1 Design web pages for your college containing a description of the courses, departments, faculties,library, etc, use href,list tags. LI1.2 Create your class timetable using the table tag. LI1.3 Create user Student feedback form (use textbox, text area, checkbox, radio button, select box, etc.) LI1.4. Design web pages for your hobbies. LI1.5. Design web pages for a retail shop LI1.6. Design web	Unit-1.0 Topics Basics of Internet and Web **1.1** Introduction to HTML **1.2** Essential Tags **1.3** Tags and Attributes **1.4** Text Styles and Text **1.5** An-arguments, **1.6** Text, Effects Event **1.7** coupling tools, Form elements **1.8** Table layout and presentation **1.9** Use of different input types .List types **1.10** various tags: Canvas, **1.11** DIV and SPAN **1.12** Introduction to basic client-side technologies	1. Learning various concepts related with internet.

	pages for a ecommerce ssite.		

SW: Suggested Sessional Work (SW):

a. Assignments:

i. Explain basic terminologies used with HTML.

ii. Explain various types of tags.

b. Mini Project:

01CA611.2: Develop skills to generate HTML and CSS page and have knowledge of Java Script assistedstyle sheets (JSSS).

Session Outcomes (SOs)	**Laboratory Instruction(LI)**	**Class room Instruction(CI)**	**Self- Learning (SL)**
SO3.1 Learning server-side scripting language PHP. **SO3.2** Will learn PHP Syntax, Comments Tags and	LI3.1 Acquaintance with elements, tags and basic structure of HTMLfiles. LI3.2.Practicing basic and advanced text for formatting. LI3.3 Practice use of image,video and sound in HTMLdocuments LI3.4 Designing of web pages- Document layout, list, tables. LI3.5	**Unit-3 : PHP** 3.1 Introduction to server-side scripting language PHP. 3.2 Data types in PHP 3.3 PHP Syntax, Comments Tags and Attributes 3.4 Variables and Constants 3.5 Embedding PHP in HTML 3.6 CSS and JavaScript run time data communications 3.7 pre-defined and used defined Functions	1. Learning various attributes of HTML tags. 2.Learning online HTML editors.

Attributes .**SO3.3** Learn CSS and JavaScript run time data communications . **SO3.4** Creating forms using HTML. **SO3.**5 Implement front end to back end any data base communication	PracticingHyperlinkof web pages, working with frames. LI3.6 Working with formsand controls.	3.8 Strings functions and Array 3.9 CRUD3.10 ront end to back end any data base communication3.11 Learn by example 3.12 Case Study	

SW-3 Suggested Sessional Work (SW):

a. Assignments:

i. Explain basic PHP tags and their properties.
ii. Create an HTML page that contains a CSS.

b. Mini Project:

iii. Create an admission form using HTML tags & CSS.

c. Other Activities (Specify):

Use of latest editors for web development like. VS Code, Notepad++ etc.

01CA611.4: Have knowledge of Angular JS, XML Fundamentals, J Query

Approximate Hours

Item	AppX Hrs
Cl	12
LI	12

SL	1

Total	26

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self-Learning (SL)
SO4.1 Understanding Angular JS . **SO4.2** Learn XML Fundamentals **SO4.3** Learn J Query **SO4.4** Learn Accessing Data from XML Documents **SO4.**Understand working of JSON.	LI4.1 Create a web form using php for login page. LI4.2 Create a simple xml document with following details: Rollno, Sname, Contact, Email & Address. LI4.3 Write a simple PHP script to perform crud operations. LI4.4 Create a web form using php for enquiry details. LI3.5 Working with background,text, font, list Properties LI3.6 Create a XML document	**Unit-4 :** 4.1 Introduction to Angular JS 4.2 MVC Architecture and Angular JS applications 4.3 XML: - Introduction, 4.4 XML Fundamentals 4.5 XML Syntax, Accessing Data from 4.6 XML Documents 4.7 J Query Introduction, 4.8 J Query Syntax 4.9 J query selectors, Events 4.10 working with JSON. 4.11 learn by example 4.12 Case Study	i. Differentiate between HTML and DHTML. ii. Learn CSS and JSSS.

SW-4 **Suggested Sessional Work (SW):**

a. Assignments:

i. Write down the features of Angular JS.

ii. Explain XML.

a. Mini Project:

i. Design a page And use Angular JS.

b. Other Activities (Specify):

Implementing CSS in your previously created web page.

01CA611.5: Develop skills to generate Static and dynamic application designing, Google form

designing,Django

Approximate Hours

Item	AppX Hrs
Cl	12

SW	1
SL	1
Total	26

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self-Learning (SL)
SO5.1 Learn Static and dynamic application designing. **SO5.2** Implementing Google forms. **SO5.3** Learn Django **SO5.4** Implementing template customization and developdynamic applications **SO5.**5 Learn MVT (ModelView Template) with Django.	LI5.1 Customize a template using Django LI5.2 Create a MySQL data base and connect with PHP. LI5.3 Write PHP script for storing and retrieving user information from my SQL table. LI5.4. Write a HTML page which takes Name, Address, Email and Mobilenumber from user(register PHP). LI5.5. Store this data in MySQL data base. Next page displays all user in HTML table using PHP (display PHP). LI5.6 Write a PHP program to print first ten Fibonacci numbers	**Unit-5** Static dynamic application designing dynamic application designing Google form designing. customerreview panel Introductionto Django MVT (Model View Template) with Django template customization develop dynamic applications 4.10 Learn by Example 4.11 Case Study 4.12 Develop Application	1. Learn PHP as server side scripting. 2. Use PHP to connect any database.

SW-5 Suggested Sessional Work (SW):

a. Assignments

i. Write a PHP program to print first ten Fibonacci numbers.

ii. Create HTML page with java script which takes integer number as a input and tells whether the number is divisible by 4 or not.

b. Mini Project:

i. Using HTML, CSS, Java script, PHP, MySQL, design and authentication module of a web page.

c. Other Activities (Specify):

Create form validation using PHP.

Brief of Hours suggested for the Course Outcome

Course Outcomes	Class Lecture (Cl)	Sessional Work (SW)	Self-Learning (Sl)	Total hour (Cl+SW+Sl)
01CA611.1: Have knowledge of HTML, it's essential tags, Attributes, Text styles, Links to External Documents and different sections of a HTML page.	12	2	1	15
01CA611.2: Develop skills to generate HTML and CSS page and have knowledge of Java Script assisted style sheets (JSSS).	12	2	1	15

Suggestion for End Semester Assessment

A K S University

Faculty of Engineering and Technology

Department of Computer Application & Information Technology

Curriculum of B.C.A. Program

(Revised as on 01 August 2023)

Suggested Specification Table (For ESA)

CO	Unit Titles	Marks Distribution			Total Marks
		R	U	A	
CO-1	Topics Basics of Internet and Web	02	01	01	04
CO-2	Web Client and Web Sever	02	06	02	10
CO-3	PHP	03	07	05	15
CO-4	Angular JS, XML Fundamentals, J Query	02	10	05	17
CO-5	Google form designing, Django	03	02	02	07
Total		12	26	15	53

Legend: R: Remember, U: Understand, A: Apply

The end of semester assessment for Web Technology will be held with written examination of 50 marks

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Visit to IT Industry
7. Demonstration
8. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)
9. Brainstorming

Suggested Learning Resources:

(a) Books :

S. No.	Title	Author	Publisher	Edition & Year
1	Beginning PHP5, Apache, and MySQL Web Development	Elizabeth Naramore, Jason Gerner, Yann Le Scouarnec, Jeremy Stolz	Glass Wrox Publication	2005

2	Beginning HTML, XHTML, CSS, and JavaScript 2010	Jon Duckett	Wiley Publishing	2010
3	Web Technologies, Black Book, Dream Tech Press 2010	Kogent	Learning Solutions Inc Dream Tech Press	2010
4	HTML, XHTML and CSS Bible	Bryan Pfaffenberger, Steven M. Schafer, Chuck White	**John Wiley & Sons**	2004

Curriculum Development Team

1. Dr. Akhilesh A. Waoo, HOD, Department of Computer Science and Engineering.
2. Dr. Pramod Singh, Associate Professor, Department of Computer Science and Engineering.
3. Ms. Shruti Gupta, Assistant Professor, Department of Computer Science and Engineering.
4. Ms. Pragya Shrivastava, Assistant Professor, Department of Computer Science and Engineering.
5. Mr. Lokendra Gaur, Assistant Professor, Department of Computer Science and Engineering.
6. Mr. Vinay Kumar Dwivedi, Assistant Professor, Department of Computer Science and Engineering.
7. Ms. Pinki Sharma, Assistant Professor, Department of Computer Science and Engineering.

A K S University

Faculty of Engineering and Technology

Department of Computer Application& Information Technology

Curriculum of B.C.A. Program

(Revised as on 01 August 2023)

Semester-VI

Course Code: 05CA621-A

Course Title : AI and Data science

Pre-requisite: Basic knowledge of Data Structures, Data Management and Matrices.

Rationale: The purpose of this course is to provide an introduction to Artificial Intelligence (AI) and its application in solving real-world problems that are hard to articulate using traditional algorithmic approaches. The course covers the fundamental concepts behind different methodologies for creating intelligent systems that can deal with uncertainty, learn from Experience, and apply problem-solving strategies inspired by nature.

Course Outcomes:

05CA621-A .1: Demonstrate knowledge of the fundamental principles of Artificial Intelligence.
05CA621-A .2: Apply different searching techniques.
05CA621-A .3: Demonstrate knowledge of Data Science.
05CA621-A .4: Familiarize knowledge representation in Data science.
05CA621-A .5: Comprehend the use of Python

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credits (C)
			Cl	LI	SW	SL	Total Study Hours (CI+LI+SW+SL+T)	
DSE-2	05CA621-A	AI and Data Science	3	0	2	2	8	4

Legend: **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),
LI: Laboratory Instruction (Includes Practical performances in laboratory workshop,field or other locations using different instructional strategies)
SW: Sessional Work (includes assignment, seminar, mini project etc.),
SL: Self Learning,
C: Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback of teachers to ensure the outcome of Learning.

Department of Computer Application& Information Technology

BCA (Bachelor of Computer Applications)

Semester-VI

Course Code: 05CA621-B

Course Title: Data Warehouse and Mining

Pre-requisite: Database Management System

Rationale: Data Warehouse and Mining is important because it helps to process and store large amount of data sets.

Course Outcomes:

05CA621-B .1: Students should be familiar with various characteristics of the data warehouse.
05CA621-B .2: Learn how data can be stored in data warehouse into its specified architecture.
05CA621-B .3: Understand data mining from basic to advance, including various useful tools and techniques.
05CA621-B .4: Implement data classification and clustering using various algorithms.
05CA621-B .5: Implement advance mining techniques with association rules.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies (Hours/Week)					Total Credits (C)
			Cl	LI	SW	SL	Total Study Hours (CI+LI+SW+SL)	
DSE-2	05CA621-B	Data Warehouse and Mining	4	0	2	1	7	4

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

05CA621-B .1: Students should be familiar with various characteristics of the data warehouse.

Approximate Hours

Item	Appx. Hrs.
CI	12
LI	6
SW	2
SL	1
Total	21

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self-Learning (SL)

SO1.1 Understanding data warehousing definition, usage, and trends. **SO1.2** Understanding data warehouses and statistical databases. **SO1.3** Understanding multidimensional data model. **SO1.4** Understanding stars, snowflakes, and fact constellations.		**Unit-1.0 Data Warehouse Basic** 1.1 Data Warehousing Definition, 1.2 Usage and Trends, 1.3 DBMS vs. Data Warehouse, 1.4 Statistical Databases vs. Data Warehouses. 1.5 Data Marts, Metadata, 1.6 Multidimensional Data Model, 1.7 Data Cubes, 1.8 Schemas for Multidimensional Database: 1.9 Stars, Snowflakes and 1.10 Fact Constellations. 1.11 Learn by example 1.12 Case Study	Learning basics of data warehouse trends and technology.

SW-1 Suggested Sessional Work (SW):

a. Assignments:
1. Data Marts
2. Data Cubes

b. Mini Project:
Multidimensional Data Model

c. Other Activities (Specify):
NA

05CA621-B .2: Learn how data can be stored in data warehouse into its specified architecture.

Approximate Hours

Item	Appx. Hrs.
CI	12
LI	6
SW	2
SL	1
Total	21

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self-Learning (SL)

SO2.1 Understanding data warehouse storage and architecture. **SO2.2** Understanding distributed and virtual data warehouse. **SO2.3** Understanding data consolidation and warehouse internals. **SO2.4** Understanding online analytical processing system.		**Unit-2.0 Storage and Architecture of Data Warehouse** 2.1 Data warehouse process & architecture, 2.2 OLTP vs. OLAP, 2.3 ROLAP vs. MOLAP 2.4 Types of OLAP servers, 2.5 3-Tier data warehouse architecture, 2.6 Distributed and 2.7 virtual data warehouses, 2.8 Data warehouse manager, 2.9 Data consolidation, 2.10 Warehouse internals, 2.11 Storage and Indexing, Operations, Materialized, 2.12 Online analytical processing (OLAP) system.	Learning storage architecture of data warehouse.

SW-2 Suggested Sessional Work (SW):

a. Assignments:
1. Bayes Theorem
2. ROLAP vs. MOLAP

b. Mini Project:
3-Tier data warehouse architecture

c. Other Activities (Specify):
NA

05CA621-B .3: Understand data mining from basic to advance, including various useful tools and techniques.

Approximate Hours

Item	Appx. Hrs.
CI	12

Total	21

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self-Learning (SL)

SO4.1 Understanding statistical based and distance-based learning. **SO4.2** Understanding major issues with classification technique. **SO4.3** Understanding clustering technique useful in data mining. **SO4.4** Understanding various hierarchical algorithms.		**Unit-4.0 Classification and Clustering** 4.1 Issues in classification, 4.2 Statistical Based Algorithms, Distance Based Algorithms, 4.3 Decision Tree Based Algorithms, ID3, C4.5, 4.4 Evaluating the Performance. 4.5 Clustering: Basic concepts, 4.6 Partition algorithms, 4.7 Agglomerative 4.8 Hierarchical algorithms, 4.9 DBSCAN, BIRCH, 4.10 CURE Algorithm. 4.11 Clustering with categorical attributes, Comparison 4.12 Case Study	Learning classification and clustering techniques in data mining.

SW-4 Suggested Sessional Work (SW):

a. Assignments:
1. Distance Based Algorithms
2. Statistical Based Algorithms

b. Mini Project:
Clustering

c. Other Activities (Specify):
NA.

05CA621-B . 5: Implement advance mining techniques with association rules.

Approximate Hours

Item	Appx. Hrs.
CI	12
LI	6
SW	2
SL	1
Total	21

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self-Learning (SL)
SO5.1 Understanding core concept of frequent itemset generation and rule generation. **SO5.2** Understanding compact representation of frequent itemset. **SO5.3** Understanding principal component analysis. **SO5.4** Understanding spatial mining and temporal mining.		**Unit-5.0 Association Rules** 5.1 Frequent Itemset generation, 5.2 Apriori Algorithm. 5.3 Rule Generation, 5.4 Compact representation of frequent Itemset 5.5 Advanced Topics: 5.6 Dimensionality 5.7 Reduction, 5.8 Overview of Principle Component 5.9 Analysis and SYD, 5.10 Spatial Mining, and Temporal Mining. 5.11 Web Mining, 5.12 Case Study	Learning various algorithms applicable in data mining.

SW-5 Suggested Sessional Work (SW):

a. Assignments:

1. Itemset Generation
2. Rule Generation

b. Mini Project:

Principal Component Analysis

c. Other Activities (Specify):

NA.

A K S University

Faculty of Engineering and Technology

Department of Computer Science & Engineering

Curriculum of B.C.A(Bachelor of Computer Application) Program

Semester-VI

Course Code: 05CA622-A

Course Title: Computer graphics

Pre- requisite: Basic Mathematics and Multimedia

Rationale: The aim of the course is to introduce to the field of ComputerGraphics with emphasis on its use to solve real world problems for which solutions are difficult to express using the traditional algorithmic approach. It explores the essential theory behind methodologies for developing systems that demonstrate graphical behavior.

Course Outcomes:

05CA622-A .1: Demonstrate knowledge of the fundamental principles of Computer raphics.
05CA622-A.2: Apply scan Conversion algorithms.
05CA622-A.3: Use various filled area primitives.
05CA622-A.4: Familiarize knowledge of clipping.
05CA622-A.5: Comprehend the use of animation.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credits(C)
			CI	LI	SW	SL	Total Study Hours (CI+LI+SW+SL)	
DSE-3	05CA622-A	Computer graphics	4	0	1	1	6	4

Legend:

Suggestion for End Semester Assessment

Suggested Specification Table (For ESA)

CO	Unit Titles	Marks Distribution			Total Marks
		R	U	A	
CO-1	Introduction to Computer Graphics:	03	02	03	08
CO-2	Scan Conversion	03	01	05	09
CO-3	Filled Area Primitives:	03	07	02	12
CO-4	Clipping Techniques.	03	05	05	13
CO-5	Animation	03	02	03	08
Total		15	17	18	50

Legend: R: Remember, U: Understand, A: Apply

The end of semester assessment will be held with written examination of 50 marks

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Visit to IT Industry
7. Demonstration
8. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)
9. Brainstorming

Suggested Learning Resources:

A. Books:

S. No.	Title	Author	Publisher	Edition & Year
1	Computer Graphics C Version	Hearn	Pearson Education India;	2nd edition, 2002.
2	Computer Graphics: Principles and Practice	John Hughes, Andries van Dam, Morgan McGuire, David Sklar, James Foley	Addison-Wesley Professional	3rd Edition 2013
3	Lecture note provided by Dept. of CS&E, AKS University, Satna.			

B. Alternative NPTEL/SWAYAM/MOOC Course (if any):

S. No.	NPTEL Course Name	Instructor	Host Institute

(Revised as on 01 August 2023)

Semester-VI

Course Code: 05CA622-B

Course Title: Cloud Computing

Pre-requisite: Database Management System

Rationale: Cloud Computing is important because it helps to process and store large amount of data sets on virtual space.

Course Outcomes:

05CA622-B 1: Students should be familiar with various characteristics of the cloud platforms.
05CA622-B 2: Learn how virtual platform works for application execution and storage.
05CA622-B 3: Create relational database and other cloud-based file system.
05CA622-B 4: Understand the privacy issues and security strategies in cloud storage.
05CA622-B 5: Implement real time application over various cloud-based platform.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies (Hours/Week)					Total Credits (C)
			Cl	LI	SW	SL	Total Study Hours (CI+LI+SW+SL)	
DSE-3	05CA622-B	Cloud Computing	4	0	2	1	7	4

Legend: **CI:** Classroom Instruction (Includes different instructional strategies i.e., Lecturer (L) and Tutorial (T) And others),
LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)
SW: Sessional Work (includes assignment, seminar, mini projected.),
SL: Self-Learning,
C: Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback teachers ensure outcome of Learning.

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

05CA622-B 1: Students should be familiar with various characteristics of the cloud platforms.

(Revised as on 01 August 2023)

SEMESTER-VII

Course Code: 06CA651

Course Title: Field Project

Pre- requisite: Student should have knowledge of programming languages, Software Engineering, and Many more tools and framework.

Rationale:

- To apply the knowledge and skills learnt in previous semesters, to solve real life industrial / engineering / professional problems.
- To modify/ improve the existing engineering / professional systems.
- To develop systems / components / methods / processes / resources to cater the needs of the nearby small scale / medium industry.
- To learn to solve real life engineering / professional problems which often have many aspects to be considered and addressed.

Course Outcomes:

06CA651.1: - The student will be able to prepare a detailed project plan for solving any real-life related engineering / technical / professional / industrial problem.
06CA651.2: - The student will be able to implement the project plan and manage the project.
06CA651.3: - The student will be able to present the completed project work.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies (Hours/Week)					Total Credits (C)
			CI	LI	SW	SL	Total Study Hours (CI+LI+SW+SL)	
Project	06CA651	Field Project	0	12	0	0	12	6

INTRODUCTION TO PROJECT WORK

Project work is a very important course in all branches of diploma programmes. It offers following opportunities to students of final semester: -

2. To learn skills and abilities which are otherwise not possible either inclassroom or in structured environment of laboratory such as: -
   - Skill to work in groups or teams,
   - Skill to face real life professional problems and to create reallife solutions for them.
   - Skill to take professional decisions under real life constraints and circumstances,
   - Skill to learn in self-directed way to pursue the specific professional projects (Self Directed Learning)

- Skill to learn from real life self- experiences (l i f e l o n g learning)
- Skill to manage the real- l i f e engineering / professional projects
- Skill to plan and organize the self / group professional work
- skills to apply the engineering management principles in real lifeprofessional projects
- Skill to defend / justify self- real life engineering / professionalwork in front of significant others
- Skill to complete the professional tasks / work keeping in viewsocietal, legal and environmental considerations
- Skill to collect relevant data in real life situations
- Skill to relate engineering / professional knowledge gained in various semesters with real life engineering / professional problems
- Skill to estimate the duration and costs in real life engineering / professional work
- Skill to assess the theoretical feasibility, financial feasibility and time feasibility of real- l i f e engineering / professional tasks.

With an objective to ensure the learning of above skills and abilitiesas well as to earn maximum marks in NBA assessment,

The Course on Project Work consists of five phases: -

	Description of phases	Learn Hrs.
1	Literature / industry's need survey and finalization of topic / title	15Hrs
2	Detailed planning of the project work	
3	Implementing the detailed project plan	60Hrs
4	Managing the project activities	
5	Reporting of the project work output /outcome / prototype	15Hrs
	Total	90 Hrs

General Guidelines for Project Work

- The project topics should be related to concerned branch of engineering / profession, but, should not be the exact content of the curriculum taughtin the discipline.
- Student's project topics should be preferably 'real life' topics. It means the project topics should have substantial element of uncertainty, complexity and multi-disciplinary-ness which can be coped up by the students. These elements offer opportunities to students to apply engineering/ professional knowledge in real life settings, solve real life problems and to take real life decisions. As a project guide, concerned teacher should ensure these by suitably altering / framing / reframing the statement of topic / title.
- The project topics should be such that students can get opportunity to refer IS codes, Manuals, Handbooks, norms and standards, opportunity to conduct standard tests, and opportunity to operate modern laboratory equipment's following SOPs.
- For student's interest, active participation and ownership in the project work, their self-motivation is necessary. Therefore, students should be actively involved in finalizing the topic of project.
- Students should be asked to conduct a brief review of literature for problems and issues in their engineering / professional areas of interest,where they think they can contribute effectively. The project guide should facilitate them in this regard, through his/her expertise and experience.

Every student group should be asked to propose at least three topics oftheir interest.

- The topics proposed by student project groups should be assessed bythe facilitator-teacher on following three criteria: -
    - **The work on the topic should be theoretically and practically feasible.**
    - **The project work on the topic should be completed within approx. Three and half months.**
    - **Availability of required resources should be certain. Cost of project work should also be bearable.**
- Normally, students' project works should be carried out in small groups (1 to 2 students).
- All faculty members of department should be engaged as project guides. Every faculty member should be project guide of at least one student project group.
- Normally, project guides should be assigned to the students through lottery system and students under each faculty should be asked to formtheir small groups.

Faculty of Computer Application & Information Technology and Science

Department of Computer Application & Information Technology

BCA (Bachelor of Computer Applications)

Semester-VII

Course Code: 06RM701

Course Title : Research Methodology

Pre-requisite: Student should have basic knowledge of research and Statistics.

Rationale: This course will help them to select an appropriate research design. With the help of this course, students will be able to take up and implement a research project/ study. The course will also enable them to collect the data, edit it properly and analyze it accordingly.

Course Outcomes:

06RM701.1: Understand research problem formulation.
06RM701.2: Analyze research related information and Follow research ethics
06RM701.3: Understand that today's world is controlled by Computer, Information Technology, buttomorrow world will be ruled by ideas, concept, and creativity.
06RM701.4: Understanding that when IPR would take such important place in growth of Individuals & nation, it is needless to emphasis the need of information about Intellectual Property Right to be promoted among students in general & engineering In particular.
06RM701.5: IPR protection incentivizes inventors to invest in R&D, leading to new and improved products, economic growth, and social benefits.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credit (C)
			Cl	LI	SW	SL	Total Study Hours (CI+LI+SW+SL)	
Research	06RM701	Research Methodology	4	0	2	1	6	4

Legend: **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),
LI: Laboratory Instruction (Includes Practical performance laboratory workshop, field or other locations using different instructional strategies)
SW: Sessional Work (includes assignment, seminar, mini project etc.),
SL: Self Learning,
C: Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Scheme of Assessment:

Theory

Board of Study	Couse Code	Course Title	Scheme of Assessment (Marks)							
			Progressive Assessment (PRA)						End Semester Assessment (ESA)	Total Marks (PRA + ESA)
			Class/Home Assignment 5 number 3 marks each (CA)	Class Test 2 (2 best out of 3) 10 marks each (CT)	Seminar one (SA)	Class Activity any one (CAT)	Class Attendance (AT)	Total Marks (CA+CT+SA+CAT+AT)		
Research	06RM701	Research Methodology	15	20	5	5	5	50	50	100

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

06RM701.1: Understand research problem formulation.

Approximate Hours

Item	Appx Hrs
Cl	11
LI	0
SW	2
SL	1
Total	14

Session Outcomes(SOs)	**Laboratory Instruction (LI)**	**Classroom Instruction (CI)**	**Self-Learning (SL)**
SO1.1 Define a research problem **SO1.2** Explain Characteristics of a good research problem **SO1.3** Explain Scope and objectives of research problem **SO1.4** Discuss data collection **SO1.5** Explain analysis, interpretation .	.	**Unit-1 Introduction to Research** 1.1 Meaning of research problem, 1.2 Sources of research problem 1.3 Criteria Characteristics of a good research problem, 1.4 Errors in selecting a research problem 1.5 Scope of research problem. 1.6 objectives of research problem. 1.7 Approaches of investigation of solutions for research problem 1.8 data collection, 1.9 data analysis, 1.10 data interpretation, 1.11 Necessary instrumentations-1	1. Write a Process of research problem identification

SW-1 Suggested Sessional Work (SW):

a. Assignments:

(i) Discuss about Errors in selecting a research problem

b. Presentation

c. Pictorial representation of different components of computer

06RM701.2: Analyze research related information and Follow research ethics

Approximate Hours

Item	Appx Hrs
Cl	12
LI	0
SW	2
SL	1

Total	16

Session Out comes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self-Learning (SL)
SO4.1 To Understand Nature of Intellectual Property **SO4.2** To understand Patents, Designs, Trade and Copyright **SO4.3** Explain the process of patenting **SO4.4** To understand the development of technological research **SO4.5** To Understand Procedure for grants of patents, Patenting under PCT.	.	**Unit-4 : Intellectual Property** 4.1 Nature of Intellectual Property. 4.2 Patents, 4.3 Designs, 4.4 Trade and 4.5 Copyright 4.6 Process of Patenting and 4.7 Development technological research 4.8 innovation, 4.9 patenting, 4.10 development. 4.11 International cooperation on Intellectual Property 4.12 Procedure for grants of patents, 4.13 Patenting under PC	i. Prepare a intellectual property proposal ii. Draw a classification diagram of RAID

SW-4 Suggested Seasonal Work (SW):

a. Assignments:

b. (i) Write the process of patent design

c. Presentation

d. Pictorial representation of different steps of patent design.

06RM701.5: IPR protection incentivizes inventors to invest in R&D, leading to new and improved products, economic growth, and social benefits.

Approximate Hours

Item	Appx Hrs
Cl	13
LI	0
SW	2
SL	1
Total	16

Session Outcomes(SOs)	**Laboratory Instruction (LI)**	**Classroom Instruction (CI)**	**Self-Learning (SL)**
SO5.1 Explain Patent Rights **SO5.2** Discuss Licensing and transfer of technology **SO5.3**Discuss about Patent information and databases **SO5.4** Understand Geographical Indications **SO5.5** Explain new developments in IPR		**Unit5: IPR protection and Developments in IPR** Patent Rights-1 5.1 Patent Rights-2 5.2 Scope of Patent Rights 5.3 Licensing and transfer of technology-1 5.4 information and databases-1 5.5 Geographical Indication 5.6 Administration of Patent System. 5.7 New developments in IPR; 5.8 IPR of Biological Systems, 5.10 IPR of Computer software tc. 5.11 Traditional knowledge 5.12 Case Studies, IPR and IITs	i. Learn about scope of patent rights ii. Learn about IPR

SW-5Suggested Seasonal Work (SW):

a. Assignments:
(i) Explain in detail about geographical indications.

b. Presentation:

c. Other Activities (Specify):
(i) Group discussion of important topics.

Brief of Hours suggested for the Course Outcome

Course Outcomes	Class Lecture (Cl)	Sessional Work (SW)	Self-Learning (Sl)	Total hour (Cl+SW+Sl)
06RM701.1 Understand researchproblem formulation	11	2	1	14
06RM701.2 Analyze research related information and Follow researchethics	11	2	1	14
06RM701.3 Understand that today's world is controlled by Computer, Information Technology, buttomorrow world will be ruled by ideas, concept, and creativity.	12	2	1	15
06RM701.4 Understanding that when IPRwould take such important place ingrowth of Individuals & nation, it is needless to emphasis the need of information about Intellectual Property Right to be promoted among students in general & engineering In particular.	13	2	1	16
06RM701.5 IPR protection incentivizesinventors to invest in R&D, leading to new and improved products, economic growth, and social benefits.	13	2	1	16
Total Hours	60	10	6	76

Suggestion for End Semester Assessment

Suggested Specification Table (For ESA)

CO	Unit Titles	Marks Distribution			Total Marks
		R	U	A	
CO-1	Unit-1	03	02	03	08
CO-2	Unit-2	03	01	05	09
CO-3	Unit-3	03	07	02	12
CO-4	Unit-4	03	05	05	13
CO-5	Unit-5	03	02	03	08
Total		15	17	18	50

Legend: **R: Remember, U: Understand, A: Apply**

The end of semester assessment for Research Methodology & IPR will be held with written examination of 50 marks

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Data center
7. Demonstration
8. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)
9. Brainstorming

Suggested Learning Resources:

A. Books:

S. No.	Title	Author	Publisher	Edition & Year
1	Research Methodology	C R Kothari ,Gaurav Garg	New Age International	2023
2	Research Methodology: Concepts And Cases	Deepak Chawla (Author), Neena Sondhi (Author)	Vikas Publishing House	May 2016

B. Alternative NPTEL/SWAYAM/MOOC Course (if any): NA

C. Curriculum Development Team

1. Dr. Akhilesh A. Waoo, HOD, Department of Computer Science and Engineering.
2. Dr. Pramod Singh, Associate Professor, Department of Computer Science and Engineering.
3. Ms. Shruti Gupta, Assistant Professor, Department of Computer Science and Engineering.
4. Ms. Pragya Shrivastava, Assistant Professor, Department of Computer Science & Engineering.
5. Mr. Lokendra Gaur, Assistant Professor, Department of Computer Science and Engineering.
6. Mr. Vinay Kumar Dwivedi, Assistant Professor, Department of Computer Science & Engineering.
7. Ms. Pinki Sharma, Assistant Professor, Department of Computer Science and Engineering.

BCA (Bachelor of Computer Applications)

(Revised as on 01 August 2023)

Semester-VII

Course Code: 01CA711

Course Title : Current trends and technology

Pre-requisite: Basic knowledge of HTML, CSS and JAVASCRIPT.

Rationale: Studying this subject will help students develop an understanding of current technologies such as Blockchains, ReactJS, NodeJS, Express, and MongoDB. By learning about these technologies, students will gain insights into how various industries are using them for their products and what the current demand is. As industries are seeking full-stack developers in this era of rapid technological advancement, this study will help students become industry-ready.

Course Outcomes:

01CA711.1: Understand Concepts of Blockchain, basic cryptocurrency, cryptocurrency benefits and Cryptographic use in cryptocurrency.

01CA711.2: Use of JAVAScript knowledge to learn different types of new Frameworks available in a market that are also current industry need.

01CA711.3: Develop client-server connectivity with the use of Node JS and use of Express frameworks.

01CA711.4: Develop algorithms for text processing applications and Dynamic programming Applications.

01CA711.5: Design Web applications using MongoDB database with NodeJS Technology in Backend.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credits (C)

SO3.1. Recall the basics of	LI3.1. Create a	**Unit-3 : ReactJS**	1. Practice

ReactJS **SO3.2.** Differentiate DOM and Virtual DOM **SO3.3.** Illustrate rendering of element **SO3.4.** Explain class component and functional component **SO3.5.** Develop basic applications of React	component called "Fruit List" that receives an array of fruit names as a propand displays them asa list. LI3.2. Create a functional component called "Greeting" that takesa "name" prop and displays a personalized greeting. LI3.3. Refactor the "HelloWorld" component to use React Hooks for state management instead of a class component. LI3.4. Example of event handling LI3.5. Example of keys LI3.6. Example of list	3.1 Introduction to react, features of React JS, Component based programming 3.2 3.2 Virtual DOM, JSX 3.3 Basic program in React JS 3.4 Rendering elements 3.5 Components: class components and 3.6 functional components 3.7 State management, 3.8 Lifecycle methods 3.9 Event handling in React 3.10 Conditional rendering 3.11 List and keys 3.12 Basic form handling in React	Basic programs based on React concept 2. Study of list and keys

SW-3 Suggested Sessional Work (SW):

a. Assignments:

1. Design a Web page to explain props and state management.
2. Explain list and keys.
3. Explain Form handling in React.

b. Other Activities(Specify):

Seminar and Tutorial

01CA711..4: Develop client-server connectivity with the use of Node JS and use of Express Frameworks.

Department of Computer Application & Information Technology

BCA (Bachelor of Computer Applications)

(Revised as on 01 August 2023)

Semester-VII

Course Code: 05CA721-A

Course Title : Theory of computation

Pre-requisite: Basic knowledge of set theory and its properties.

Rationale: Students will understand fundamental mathematical and computational principles that are foundations of computer science. They should learn about abstract models of computation, finite representations for languages and gain formal understanding of algorithms and procedures

Course Outcomes:

05CA721-A**.1:** Understand models and abstractions: automata as a basic model of computation.
05CA721-A**.2:** Students will acquire to represent regular expression and Finite State Automata.
05CA721-A**.3:** Students will acquire to represent CFL and Pushdown Automata.
05CA721-A**.4:** Students will recall Turing machines and the concept of computability, including Decidability and un-decidability.
05CA721-A**.5:** Students will Link between languages, automata, and decision problems.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credits (C)
			Cl	LI	SW	SL	Total Study Hours (CI+LI+SW+SL+T)	
DSE-4	05CA721-A	Theory of Computation	4	0	1	1	6	4

Legend: **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),
LI: Laboratory Instruction (Includes Practical performances in laboratory workshop,field or other locations using different instructional strategies)
SW: Sessional Work (includes assignment, seminar, mini project etc.),
SL: Self Learning,
C: Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback

Teachers ensure outcome of Learning.

Scheme of Assessment:

Theory

Board of Study	Couse Code	Course Title	Scheme of Assessment (Marks)							
			Progressive Assessment (PRA)						End Semester Assessment (ESA)	Total Marks (PRA+ ESA)
			Class/Home Assignment 5 number 3 marks each (CA)	Class Test 2 (2 best out of 3) 10 marks each (CT)	Seminar one (SA)	Class Activity any one (CAT)	Class Attendance (AT)	Total Marks (CA+CT+SA+ CAT+AT)		
DSE-4	05CA7 21-A	Theory of Computation	15	20	5	5	5	50	50	100

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

05CA721-A.1: Understand models and abstractions: automata as a basic model of computation.

BCA (Bachelor of Computer Applications)

(Revised as on 01 August 2023)

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self-Learning (SL)
SO1.1. Recall the concepts of alphabet strings and languages **SO1.2.** Recognize the automata and its types **SO1.3.** Identify formal languages **SO1.4.** Derive Inductive proofs **SO1.5.** Differentiate NFA and DFA		**Unit-1** **Introduction to Computational Science** 1.1 Definition of Alphabet, String, Language 1.2 Introduction to formal proof 1.3 Introduction to formal proofs continues 1.4 Additional forms of proof, Inductive proofs 1.5 Chomsky Hierarchy for Formal Languages and Automata 1.6 Finite Automata and its Type 1.7 Deterministic Finite Automata(DFA) 1.8 Deterministic Finite Automata(NFA) 1.9 Epsilon – NFA 1.10 Conversion of NFA to DFA 1.11 Conversion of NFA to DFA practice problems 1.12 Conversion Epsilon NFA to NFA 1.13 Conversion Epsilon	1. Study of Set Theory Basics and properties 2. Practice questions on FA.

		NFA to NFA Examples	

SW-1 Suggested Sessional Work (SW):

a. Assignments:

1. Explain Chomsky Hierarchy with example.
2. Practice question of DFA and NFA.
3. Differentiate among NFA, DFA and epsilon NFA

b. Other Activities (Specify):

Seminar and Tutorial

05CA721-A.2: Student will acquire to represent regular expression and Finite State Automata.

A K S University

Faculty of Computer Application & Information Technology and Science

Department of Computer Application & Information Technology

BCA (Bachelor of Computer Applications)

(Revised as on 01 August 2023)

Semester-VII

Course Code: 05CA721-B

Course Title : Compiler Design

Pre- requisite: C/C++/Java programming language. Data structures and algorithms. Automata theory

Rationale: Study of this subject will develop knowledge of compiler design concepts like Parsers, Lexical Analysis, Syntax analysis and semantic analysis. These concepts will help students to understand design of compiles briefly. Students will develop interest to work in new compilers.

Course Outcome:

05CA721-B.1: To understand the role, functionality and structure of program translation andInterpretation in Software Development

05CA721-B.2: To understand the difference between abstraction levels of a high levelLanguage and a Machine language

05CA721-B.3: To understand the role of a sequence of intermediate representations in Lowering the Level of abstractions in the process of language translation.

05CA721-B.4: To get a first-hand experience of a practical application of elegant data structures,Algorithms, and other core CS concepts such as automata theory

05CA721-B.5: To make effective use of tools such as LEX and YACC

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credits (C)
			Cl	LI+T	SW	SL	Total Study Hours (CI+LI+SW+SL+T)	
DSE-4	05CA721-B	Compiler Design	4	0	2	2	8	4

Legend: **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) And Tutorial (T) and others),

LI: Laboratory Instruction (Includes Practical performances in laboratory workshop,field or other locations using different instructional strategies)

SW: Sessional Work (includes assignment, seminar, mini project etc.),
SL: Self Learning,
C: Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback teachers ensure outcome of Learning.

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

Scheme of Assessment:

Theory

Board of Study	Couse Code	Course Title	Scheme of Assessment (Marks)							
			Progressive Assessment (PRA)						End Semester Assessment (ESA)	Total Marks (PRA+ ESA)
			Class/Home Assignment 5 number 3 marks each (CA)	Class Test 2 (2 best out of 3) 10 marks each (CT)	Seminar one (SA)	Class Activity any one (CAT)	Class Attendance (AT)	Total Marks (CA+CT+SA+ CAT+AT)

(Revised as on 01 August 2023)

Semester-VIII

Course Code: 06CA751

Course Title: Field Project

Pre- requisite: Student should have knowledge of programming languages, Software Engineering, and Many more tools and framework.

Rationale: To apply the knowledge and skills learnt in previous semesters, to solve real life industrial / engineering / professional problems.

To modify/ improve the existing engineering / professional systems.

To develop systems / components / methods / processes / resources to cater the needs of the nearby small scale / medium industry.

To learn to solve real life engineering / professional problems which often have many aspects to be considered and addressed.

Course Outcomes:

06CA751.1: - The student will be able to prepare a detailed project plan for solving any real-life related engineering / technical / professional / industrial problem.
06CA751.2: - The student will be able to implement the project plan and manage the project.
06CA751.3: - The student will be able to present the completed project work.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies (Hours/Week)					Total Credits (C)
			CI	LI	SW	SL	Total Study Hours (CI+LI+SW+SL)	
Project	06CA751	Field Project	0	5	0	1	4	6

INTRODUCTION TO PROJECT WORK

Project work is a very important course in all branches of diploma programmes. It offers following opportunities to students of final semester: -

3. To learn skills and abilities which are otherwise not possible either inclassroom or in structured environment of laboratory such as: -
   - Skill to work in groups or teams,
   - Skill to face real life professional problems and to create reallife solutions for them.
   - Skill to take professional decisions under real life constraints and circumstances,
   - Skill to learn in self-directed way to pursue the specific professional projects (Self Directed Learning)
   - Skill to learn from real life self- experiences (l i f e l o n g learning)

- Skill to manage the real-life engineering / professional projects
- Skill to plan and organize the self / group professional work
- skills to apply the engineering management principles in real lifeprofessional projects
- Skill to defend / justify self-real life engineering / professionalwork in front of significant others
- Skill to complete the professional tasks / work keeping in viewsocietal, legal and environmental considerations
- Skill to collect relevant data in real life situations
- Skill to relate engineering / professional knowledge gained in various semesters with real life engineering / professional problems
- Skill to estimate the duration and costs in real life engineering / professional work
- Skill to assess the theoretical feasibility, financial feasibility and time feasibility of real-life engineering / professional tasks.

With an objective to ensure the learning of above skills and abilitiesas well as to earn maximum marks in NBA assessment,

The Course on Project Work consists of five phases: -

	Description of phases	Learn Hrs.
1	Literature / industry's need survey and finalization of topic / title	15Hrs
2	Detailed planning of the project work	
3	Implementing the detailed project plan	60Hrs
4	Managing the project activities	
5	Reporting of the project work output /outcome / prototype	15Hrs
	Total	90 Hrs

General Guidelines for Project Work

- The project topics should be related to concerned branch of engineering / profession, but, should not be the exact content of the curriculum taughtin the discipline.
- Student's project topics should be preferably 'real life' topics. It means the project topics should have substantial element of uncertainty, complexity and multi-disciplinary-ness which can be coped up by the students. These elements offer opportunities to students to apply engineering/ professional knowledge in real life settings, solve real life problems and to take real life decisions. As a project guide, concerned teacher should ensure these by suitably altering / framing / reframing the statement of topic / title.
- The project topics should be such that students can get opportunity to refer IS codes, Manuals, Handbooks, norms and standards, opportunity to conduct standard tests, and opportunity to operate modern laboratory equipment's following SOPs.
- For student's interest, active participation and ownership in the project work, their self-motivation is necessary. Therefore, students should be actively involved in finalizing the topic of project.
- Students should be asked to conduct a brief review of literature for problems and issues in their engineering / professional areas of interest,where they think they can contribute effectively. The project guide should facilitate them in this regard, through his/her expertise and experience.

Every student group should be asked to propose at least three topics oftheir interest.

- The topics proposed by student project groups should be assessed bythe facilitator-teacher on following three criteria: -
    - **The work on the topic should be theoretically and practically feasible.**
    - **The project work on the topic should be completed withinapprox. Three and half months.**
    - **Availability of required resources should be certain. Cost ofproject work should also be bearable.**
- Normally, students' project works should be carried out in small groups (1 to 2 students).
- All faculty members of department should be engaged as project guides. Every faculty member should be project guide of at least one student project group.

- Normally, project guides should be assigned to the students through lottery system and students under each faculty should be asked to formtheir small groups.

Semester VIII

Course Code: 06RM801

Course Title: English for Research Paper Writing

Pre- requisite: Students should have basic knowledge of presenting themselves, their thoughts and ideas

Rationale: Writing a research paper is the primary channel for passing on knowledge to the scientist working in the same field or related fields. It is important to know the skill of writing papers to demonstrate your ability to understand, relate to what has been learnt, as well as receive critical peer feedback.

06RM801 1: Student will learn how to improve their writing skills, and level of readability
06RM801 2: Students will understand the concept of plagiarism, and how to avoid ambiguity and vagueness
06RM801 3: Students will learn about what to write in each section of paper
06RM801 4: Students will understand significance of each section of paper, and learn how to write it at thesame time.
06RM801 5: Ensure the good quality of paper at very first-time submission

Research	06RM801	English for Research Paper Writing	15	20	5	5	5	50	50	100

Course-Curriculum Detailing

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

06RM801 1: Student will learn how to improve their writing skills, and level of readability

Approximate Hours

Item	Appx Hrs.
Cl	12
LI	0

SW	1
SL	1
Total	14

Session Outcomes (SOs)	**(LI)**	**Class room Instruction (CI)**	**(SL)**
SO1.1 Students learn to design the research paper. SO1.2 Students learn to read the research paper in a systematic way. SO1.3 Examine and identify the redundancy in a research paper SO1.4 Learn to summarise and be concise SO1.5 Understand the concept of ambiguity and vagueness		Unit 1: Preparation of Research Paper 1.1 Steps to introduce to the technique of reading research paper 1.2 Steps to introduce to the technique of reading research paper continued 1.3 Breaking up of sentences, 1.4 Breaking up of sentences continued 1.5 structuring paragraphs 1.6 structuring paragraphs continued 1.7 Making the paper concise 1.8 Making the paper concise continued 1.9 removing redundancy 1.10 removing redundancy Continued 1.11 Concept of Ambiguity and 1.12 Concept of Vagueness	Reading research papers on relevant topics

06RM801 2: Students will understand the concept of plagiarism, and how to avoid ambiguity andvagueness

Semester-VIII

Course Code: 01CA811

Course Title : Statistical Thinking for Data Science

Pre-requisite: Student should have basic knowledge of Statistics and database

Rationale: Statistical Thinking for Data Science boosts the discovery of new and unexpected insights From data.

Course Outcomes:

01CA811.1: Understand the statistical foundation for data science

01CA811.2: Apply statistical thinking in collecting, modeling and analyzing data

01CA811.3: Apply statistical thinking in collecting, modeling and analyzing data

01CA811.4: Ability to visualize all types of data

01CA811.5: Understand how to use R for different types of data

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credits (C)
			Cl	LI	SW	SL	Total Study Hours (CI+LI+SW+SL)	
Major	01CA811	Statistical Thinking for Data Science	4	4	2	1	11	6

Legend: **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),
LI: Laboratory Instruction (Includes Practical performance laboratory workshop, field or other locations using different instructional strategies)
SW: Sessional Work (includes assignment, seminar, mini project etc.),
SL: Self Learning,
C: Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Scheme of Assessment:

Theory

Board of Study	Couse Code	Course Title	Scheme of Assessment (Marks)

A K S University

Faculty of Computer Application & Information Technology and Science

Department of Computer Application & Information Technology

BCA (Bachelor of Computer Applications)

Semester-VIII

Course Code: 6CA851

Course Title: Research Project

Pre- requisite: Student should have knowledge of programming languages, Software Engineering, and Many more tools and framework.

Rationale: To apply the knowledge and skills learnt in previous semesters, to solve real life industrial / engineering / professional problems.

To modify/ improve the existing engineering / professional systems.

To develop systems / components / methods / processes / resources to cater the needs of the nearby small scale / medium industry.

To learn to solve real life engineering / professional problems which often have many aspects to be considered and addressed.

Course Outcomes:

6CA851.1: - The student will be able to prepare a detailed project plan for solving any real-life related engineering / technical / professional / industrial problem.
6CA8512: - The student will be able to implement the project plan and manage the project.
6CA851.3: - The student will be able to present the completed project work.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies (Hours/Week)					Total Credits (C)
			CI	LI	SW	SL	Total Study Hours (CI+LI+SW+SL)	
Project	6CA851	Research Project	0	20	0	1	4	10

INTRODUCTION TO PROJECT WORK

Project work is a very important course in all branches of diploma Programmes. It offers following opportunities to students of final semester: -

To learn skills and abilities which are otherwise not possible either inclassroom or in structured environment of laboratory such as: -

- Skill to work in groups or teams,
- Skill to face real life professional problems and to create reallife solutions for them.
- Skill to take professional decisions under real life constraints and circumstances,
- Skill to learn in self-directed way to pursue the specific professional projects (Self Directed Learning)
- Skill to learn from real life self- experiences (l i f e l o n g learning)
- Skill to manage the real- l i f e engineering / professional projects
- Skill to plan and organize the self / group professional work

- Skills to apply the engineering management principles in real lifeprofessional projects
- Skill to defend / justify self-real-life engineering / professionalwork in front of significant others
- Skill to complete the professional tasks / work keeping in viewsocietal, legal and environmental considerations
- Skill to collect relevant data in real life situations
- Skill to relate engineering / professional knowledge gained in various semesters with real life engineering / professional problems
- Skill to estimate the duration and costs in real life engineering / professional work
- Skill to assess the theoretical feasibility, financial feasibility and time feasibility of real-life engineering / professional tasks.

With an objective to ensure the learning of above skills and abilitiesas well as to earn maximum marks in NBA assessment,

The Course on Project Work consists of five phases: -

	Description of phases	Learn Hrs.
1	Literature / industry's need survey and finalization of topic / title	15Hrs
2	Detailed planning of the project work	
3	Implementing the detailed project plan	60Hrs
4	Managing the project activities	
5	Reporting of the project work output /outcome / prototype	15Hrs
	Total	90 Hrs

General Guidelines for Project Work

- The project topics should be related to concerned branch of engineering / profession, but, should not be the exact content of the curriculum taughtin the discipline.
- Student's project topics should be preferably 'real life' topics. It means the project topics should have substantial element of uncertainty, complexity and multi-disciplinary-ness which can be coped up by the students. These elements offer opportunities to students to apply engineering/ professional knowledge in real life settings, solve real life problems and to take real life decisions. As a project guide, concerned teacher should ensure these by suitably altering / framing / reframing the statement of topic / title.
- The project topics should be such that students can get opportunity to refer IS codes, Manuals, Handbooks, norms and standards, opportunity to conduct standard tests, and opportunity to operate modern laboratory equipment's following SOPs.
- For student's interest, active participation and ownership in the project work, their self-motivation is necessary. Therefore, students should be actively involved in finalizing the topic of project.
- Students should be asked to conduct a brief review of literature for problems and issues in their engineering / professional areas of interest,where they think they can contribute effectively. The project guide should facilitate them in this regard, through his/her expertise and experience.

Every student group should be asked to propose at least three topics oftheir interest.

- The topics proposed by student project groups should be assessed bythe facilitator-teacher on following three criteria: -
    - **The work on the topic should be theoretically and practically feasible.**
    - **The project work on the topic should be completed within approx. Three and half months.**
    - **Availability of required resources should be certain. Cost of project work should also be bearable.**
- Normally, students' project works should be carried out in small groups (1 to 2 students).
- All faculty members of department should be engaged as project guides. Every faculty member should be project guide of at least one student project group.
- Normally, project guides should be assigned to the students through lottery system and students under each faculty should be asked to formtheir small groups.

COs, POs and PSOs Mapping

Course Title: BCA

Course Code: 06CA851

Course Title: Research Project

Course Outcomes	Program Outcomes												Program Specific Outcome				
	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2	PSO 3	PSO 4	PS0 5
	Engineering knowledge	Problem analysis	Design/development of solutions	Conduct studies of difficult problems	Utilization of modern tools	Engineers and society	Environment and sustainability	Ethics	Individual and team work	Communication	Project management and finance	Life-long learning	Use fundamental knowledge of math, science, and engineering to comprehend, evaluate, and create computer Programmes in the fields of algorithms, multimedia, big data analytics, machine learning, artificial intelligence, and networking for the effective design of computer-based systems of various complexity	Utilize relevant methods and cutting-edge hardware and software engineering tools to develop and integrate computer systems and related technologies. This PSO2 also encourages lifelong learning for the advancement of technology and its use in multidisciplinary settings	Applying professional engineering solutions for societal improvement while taking into account the environmental context, being conscious of professional ethics, and being able to effectively communicate.	Learn and use the most recent Artificial Intelligence and Data Science technologies in the fields of engineering and computer science	Recognize and examine issues in real life, then offer creative software solutions with the help of AI and Data Science Technologies.
