**Curriculum of BSC (IT) (Bachelor of Science)**  
(Revised as on 01 August 2023)

## **Foreword**

*I am thrilled to observe the updated curriculum of the Computer Application & Information Technology Department for the B.Sc. IT (Bachelor of Science in Information Technology) Program, which seamlessly integrates the most recent technological advancements and adheres to the guidelines set forth by UGC. The revised curriculum also thoughtfully incorporates the directives of NEP-2020 and the Sustainable Development Goals.*

*The alignment of course outcomes (COs), Programme Outcomes (POs), and Programme Specific Outcomes (PSOs) has been intricately executed, aligning perfectly with the requisites of NEP-2020 and NAAC standards. I hold the belief that this revised syllabus will significantly enhance the skills and employability of our students.*

*With immense satisfaction, I hereby present the revised curriculum for the B.Sc. IT (Bachelor of Science in Information Technology) program for implementation in the upcoming session.*

Curriculum of BSC (IT) (Bachelor of Science)  
(Revised as on 01 August 2023)

## From the Desk of the Vice-Chancellor

AKS University is currently undergoing a process to revamp its curriculum into an outcome-based approach, to enhance the teaching and learning process. The foundation of quality of quality education lies in the implementation of a curriculum that aligns with both societal and industrial needs, focusing on relevant outcomes. This entails dedicated and inspired faculty members, as well as impactful industry internships. Hence, it is of utmost importance to begin this endeavor by crafting an outcome-based curriculum in collaboration with academia and industry experts. This curriculum design should be informed by the latest technological advancements, market demands, the guidelines outlined in the National Education Policy (NEP) of 2020, and sustainable goals.

I'm delighted to learn that the revised curriculum has been meticulously crafted by the Computer Application & Information Technology Department, in consultation with an array of experts from the Computer Science industry, research institutes, and academia. This curriculum effectively integrates the principles outlined in the NEP-2020 guidelines, as well as sustainable goals. It also adeptly incorporates the latest advancements in Computer Science manufacturing technology.

Furthermore, the curriculum takes into account the specific needs of the Indian Computer Science industry, focusing on the production of cost-effective, high-quality Computer Science. It extends its reach to optimizing power consumption by including insights on waste heat recovery systems utilized in Computer Science plants. This inclusion not only imparts knowledge but also encourages students' independent thinking for potential enhancements in this area.

The curriculum goes beyond theoretical learning and embraces practical applications by incorporating the utilization of industrial and domestic waste in Computer Science production. To enhance students' skills, the curriculum integrates Hands-On Training, industrial visits, on-the-job training experiences, research, and progress. This well-rounded approach ensures that students receive a comprehensive education, fostering their skill development and preparing them for success in the Computer Science industry.

I am confident that the updated curriculum for Computer Application & Information Technology will not only enhance students' technical skills but also contribute significantly to their employability. During the process of revising the curriculum, I am pleased to observe that the Computer Application & Information Technology department has diligently adhered to the guidelines provided by the AICTE. Additionally, they have maintained a total credit requirement of 170 for the B. Tech Computer Application & Information Technology program.

It's worth noting that curriculum revision is an ongoing and dynamic process, designed to address the continuous evolution of technological advancements and both local and global concerns. This ensures that the curriculum remains responsive and attuned to the changing landscape of education and industry. AKS University warmly invites input and suggestions from industry expert technocrats and Alumni students to enhance the curriculum and make it more student-centered. Your valuable insights will greatly contribute to shaping an education that best serves the needs and aspirations of our students.

# A K S University

Faculty of Computer Application & Information Technology and Science  
Department of Computer Application & Information Technology  
Curriculum of BSC (IT) (Bachelor of Science)  
(Revised as on 01 August 2023)

## **Preface**

*As part of our commitment to ongoing enhancement, the Department of Computer Application & Information Technology consistently reviews and updates its BSC (IT) program curriculum every three years. Through this process, we ensure that the curriculum remains aligned with the latest technological advancements, as well as local and global industrial and social demands.*

*During this procedure, the existing curriculum for the BSC (IT) Program undergoes evaluation by a panel of technocrats, industry specialists, and academics. Following meticulous scrutiny, the revised curriculum has been formulated and is set to be implemented starting from August 01, 2023. This implementation is contingent upon the endorsement of the curriculum by the University's Board of Studies and Governing Body.*

*This curriculum closely adheres to the UGC model syllabus distributed in 2020. It seamlessly integrates the guidelines set forth by the Ministry of Higher Education, Government of India, through NEP-2020, as well as the principles of Sustainable Development Goals. To foster the holistic skill development of students, a range of practical activities, including Hands-On Training, Industrial Visits, Project planning and execution, Report Writing, Seminars, and Industrial on-the-job training, have been incorporated. Furthermore, in alignment with AICTE's directives, the total credit allocation for the BSC (IT) program is capped at 120 credits.*

*To ensure a comprehensive learning experience, detailed evaluation schemes and rubrics have also been meticulously provided.*

*For each course, a thorough mapping of Course Outcomes, Program Outcomes, and Programme Specific Outcomes has been undertaken. As the course syllabus is meticulously developed, various elements such as session outcomes, laboratory instruction, classroom instruction, self-learning activities, assignments, and mini-projects are meticulously outlined.*

*We hold the belief that this dynamic curriculum will undoubtedly enhance the independent thinking, skills, and overall employability of the students.*

(Revised as on 01 August 2023)

## Introduction

AKS University proudly stands as a pioneer, being the first in the nation to introduce a comprehensive 3-year Bachelor of Science in Information Technology (BSc IT) program back in 2012. This innovative curriculum has been meticulously crafted to align with the dynamic needs of the computer and information industry and the most current technological advancements. Currently, a vibrant community of 170 students is actively engaged in pursuing their BSc IT within this department. The Faculty of Computer Applications & Information Technology and Sciences boasts cutting-edge laboratories that serve as hubs for immersive hands-on training, enabling students to delve into practical applications of their learning. The program incorporates both in house training and sandwich apprenticeship training, vital components that enrich the educational journey. Distinguished by a faculty composed of computer industry experts who bring with them a wealth of industrial experience, the department combines robust classroom instruction with practical and industrial acumen. This unique blend empowers our students to confidently contribute to software development and make a significant impact in the field.

## Vision

To emerge as power house of information Technology and Allied areas developing competent computer professionals to meet the dynamic needs of disruptive technologies.

## Mission

MO1: To impart technical knowledge through innovative teaching, research and consultancy

MO2: Provides state-of-the-art facilities and internationally recognized faculty.

MO3: To adapt to the dynamic needs of industries through curriculum update

MO4: Promotes partnerships with industry and community and electrical energy in cement manufacture and environmental needs.

MO5: To produce competent graduates with professional ethics and life skills.

## Program Educational Objectives (PEO)

**PEO01:** To develop technical and managerial skills among the students with practical knowledge to work in cement manufacturing unit and able to handle day to day plant problems.

**PEO02:** To develop R&D temperament among the students for development, innovation and sustainable technology in cement manufacturing process.

**PEO03:** To develop ethical principles among the students and commitment to fulfilling international, national and local needs and social responsibilities with his/her professional excellence.

*Faculty of Computer Application & Information Technology and Science*  
**Department of Computer Application & Information Technology**  
**Curriculum of BSC (IT) (Bachelor of Science)**  
(Revised as on 01 August 2023)

**PEO04:** Ability to understand the impact of professional engineering solutions in societal, economic and environmental contexts and demonstrate knowledge and need for sustainable development

## **Program Outcomes (POs)**

PO1: Computational information: Appreciate and apply mathematical organization, computing and domain information for the conceptualization of computing models from clear harms.

PO2: Difficulty Analysis: Talent to classify, significantly evaluate and prepare complex computing problems using fundamentals of computer knowledge and request domains.

PO3: Drawing / Improvement of Solutions: Facility to transform composite production scenarios and present-day issues into problems, explore, recognize and propose included solutions using rising technologies.

PO4: Accomplish Investigations of Compound Computing Troubles: Ability to invent and ways experiments interpret data and present well up to date conclusions.

PO5: Current Implement Procedure: Skill to select recent computing tools, skills and techniques compulsory for original software solutions

PO6: Proficient Principles: Facility to apply and give expert principles and cyber systems in a universal monetary situation.

PO7: Ultimate Education: Identify the need for and enlarge the ability to appoint in permanent education as a Computing qualified.

PO8: Mission Administration: Skill to recognize administration and computing philosophy with computing acquaintance to supervise projects in multidisciplinary environments.

PO9: Announcement Usefulness: Converse successfully with the computing society as well as culture by being able to know successful documentations and presentations.

PO10: Public & Ecological Alarm: Ability to make out cost-effective, green, public, fitness, authorized, moral issues concerned in the use of processor expertise and other significant tasks applicable to qualified observers.

PO11: Personality & Group Job: Ability to job as a part or manager in various teams in multidisciplinary situations.

PO12: Modernization and Private Enterprise: Classify opportunities, private enterprise dream and use of original thoughts to build worth and means for the betterment of the human being and the world.

Faculty of Computer Application & Information Technology and Science

Department of Computer Application & Information Technology

Curriculum of BSC (IT) (Bachelor of Science)

(Revised as on 01 August 2023)

### Program Specific Outcomes (PSOs)

On completion of B.Sc. IT program, the students will achieve the following program specific outcomes:-

PSO1: An ability to enhance the application of knowledge of theory subjects in diverse fields.

PSO2: Develop language proficiency to handle corporate communication demands.

PSO3: Preparing students in various disciplines of technologies such as computer applications, Computer networking, software engineering, JAVA, database concepts and programming.

PSO4: In order to enhance programming skills of the young IT professionals, the concept of project Development in using the technologies learnt during the semester has been introduced.

### Mapping of PEOs with Mission of the Department

| PEO  | M1 | M2 | M3 | M4 |
|------|----|----|----|----|
| PEO1 | 3  | 2  | 3  | 2  |
| PEO2 | 2  | 2  | 2  | 3  |
| PEO3 | 2  | 3  | 2  | 1  |
| PEO4 | 2  | 2  | 3  | 3  |

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High) “-”: No correlation

### General Course Structure & Scheme

#### 1. Definition of Credit

|                                |          |
|--------------------------------|----------|
| 1 Hr. Lecture (L) per week     | 1 Credit |
| 1 Hr. Tutorial (T) per week    | 1 Credit |
| 2 Hours Practical (P) per week | 1 Credit |

#### 2. Range of Credits:

In the light of the fact that a typical Model three-year Under Graduate degree program in computer application has about 120 credits, the total number of credits proposed for the three- year Bachelor of Science in Information Technology is kept as 120 considering NEP-20 and NAAC guidelines.

Curriculum of BSC (IT) (Bachelor of Science)

(Revised as on 01 August 2023)

## Semester - I

**Course Code:** OSDG01

**Course Title:** Sustainable Development Goals (SDGs)

**Pre-requisite:** Student should have basic knowledge of Environment, Natural resources, Climate change and sustainability.

**Rationale:** To inculcate the knowledge base on sustainable development with a view to balance our economic, environmental and social needs, allowing prosperity for now and future generations. To train students to undertake major initiatives in the efficient management of natural resources and the prevention of environmental pollution with focus on Sustainable Development. To use environmental management tools that help to improve the quality of environment, to assess local vulnerabilities with respect to climate, natural disasters and to achieve sustainable developmental needs.

### Course Outcomes:

**OSDG01.1:** Examine critically the 17 newly minted UN Sustainable Development Goals and understand the historical evolution, key theories, and concepts of sustainable development.

**OSDG01.2:** Identify and apply methods for assessing the achievement of sustainable development and discover the science, technology, economics, and politics underlying the concepts of sustainability.

**OSDG01.3:** Understand the implications of overuse of resources, population growth and economic growth and sustainability and explore the challenges the society faces in making transition to renewable resource use.

**OSDG01.4:** Develop skills to understand attitudes on individuals, society and their role regarding causes and solutions in the field of sustainable development and apply critical thinking skills to evaluate the quality, credibility and limitations of an argument for solution.

**OSDG01.5:** Describe the steps of the design thinking methodology and how design thinking can accelerate effective SDG implementation. Deepen knowledge and pedagogical tools to incorporate values-based education for sustainable development in educational Programmes and processes.

### Scheme of Studies:

| Board of Study | Course Code | Course Title                 | Scheme of studies(Hours/Week) |    |    |    |                                 | Total Credits (C) |
|----------------|-------------|------------------------------|-------------------------------|----|----|----|---------------------------------|-------------------|
|                |             |                              | CI                            | LI | SW | SL | Total Study Hours (CI+LI+SW+SL) |                   |
| Foundati on    | OSDG01      | Sustainable Development Goal | 2                             | 0  | 1  | 1  | 4                               | 2                 |

# A K S University

Faculty of Computer Application & Information Technology and Science

Department of Computer Application & Information Technology

Curriculum of BSC (IT) (Bachelor of Science)

(Revised as on 01 August 2023)

- Legend:**
- CI:** Class room Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),
  - LI:** Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)
  - SW:** Sessional Work (includes assignment, seminar, mini project etc.),
  - SL:** Self Learning,
  - C:** Credits.

**Note:** SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

## Scheme of Assessment:

### Theory

| Board of Study | Course Code | Course Title                 | Scheme of Assessment (Marks)                |   |                  |                              |                       |                               |                               |                       |

|                |             |                              | Class/Home Assignment 5 number 3 marks each | Class Test 2 (2 best out of 3) 10 marks each (CT) | Seminar one (SA) | Class Activity any one (CAT) | Class Attendance (AT) | Total Marks (CA+CT+SA+CAT+AT) |                               |                       |
| Foundation     | OSDG01      | Sustainable Development Goal | 15  | 20  | 5                | 5                            | 5                     | 50                            | 50                            | 100                   |

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

- OSDG01.1:** Examine critically the 17 newly minted UN Sustainable Development Goals and Understand the historical evolution, key theories, and concepts of sustainable development.

# A K S University

Faculty of Computer Application & Information Technology and Science

Department of Computer Application & Information Technology

Curriculum of BSC (IT) (Bachelor of Science)

(Revised as on 01 August 2023)

| Session Outcomes (SOs)   | Laboratory Instruction (LI) | Classroom Instruction (CI)  | Self-Learning (SL)   |
|--|-----------------------------|---|--|
| <p><b>SO4.1</b> Understand environmental sustainability is crucial in reducing the impacts of climate change</p> <p><b>SO4.2</b> Discuss causes of emission of GHGs and its consequences</p> <p><b>SO4.3</b> Explain how climate change and sustainable development both play a role in shaping the human and environmental factors of the world.</p> <p><b>SO4.4</b> Explain the importance of sustainable production and consumption</p> <p><b>SO4.5</b> Climate change is disrupting national economies and affecting lives and livelihoods, especially for the most vulnerable and its mitigation.</p> |                             | <p><b>Unit-4.0</b> Climate Change, Energy and Sustainable Development</p> <p>4.1 The greenhouse effect: Causes and Consequences</p> <p>4.2 Climate Change: A Threat to Sustainable Development</p> <p>4.3 Adaptation to Current and Future Climate Regimes</p> <p>4.4 The consequences: crop failure</p> <p>4.5 Solutions technology and lifestyle changes</p> <p>4.6 Mitigating Climate Change</p> | <p>1 Agreement on Climate Change, Trade, and Sustainability Carbon Credit, carbon trading</p> <p>2. Kyoto Protocol</p> |

### SW-1 Suggested Sessional Work (SW):

#### a. Assignments:

Urban Sustainability and Climate Change, Sustainable Development Policies, Agreement on Climate Change, Trade and Sustainability, Resilient cities – What makes a city sustainable, green, and resilient?

#### b. Other Activities (Specify):

**OSDG01.5:** Describe the steps of the design thinking methodology and how design thinking can accelerate effective SDG implementation. Deepen knowledge and pedagogical tools to incorporate values-based education for sustainable development in educational programme and processes.

(Revised as on 01 August 2023)

## Brief of Hours suggested for the Course Outcome

| Course Outcomes   | Class Lecture (CI) | Sessional Work (SW) | Self-Learning (SI) | Total hour (CI+SW+SI) |
|---|--------------------|---------------------|--------------------|-----------------------|
| <b>OSDG01.1:</b> Examine critically the 17 newly minted UN Sustainable Development Goals and understand the historical evolution, key theories, and concepts of sustainable development.  | 6                  | 1                   | 1                  | 8                     |
| <b>OSDG01.2:</b> Identify and apply methods for assessing the achievement of sustainable development and discover the science, technology, economics, and politics underlying the concepts of Sustainability.   | 6                  | 1                   | 1                  | 8                     |
| <b>OSDG01.3:</b> Understand the implications of overuse of resources, population growth and economic growth and sustainability and explore the challenges the society faces in making transition to renewable Resource use.   | 6                  | 1                   | 1                  | 8                     |
| <b>OSDG01.4:</b> Develop skills to understand attitudes on individuals, society and their role regarding causes and solutions in the field of sustainable development and apply critical thinking skills to evaluate the quality, credibility and limitations of an Argument for solution.    | 6                  | 1                   | 1                  | 8                     |
| <b>OSDG01.5:</b> Describe the steps of the design thinking methodology and how design thinking can accelerate effective SDG implementation. Deepen knowledge and pedagogical tools to incorporate values-based Education for sustainable development in educational Programmes and processes. | 6                  | 1                   | 1                  | 8                     |
| <b>Total Hours</b>  | <b>30</b>          | <b>5</b>            | <b>5</b>           | <b>40</b>             |

## Suggestion for End Semester Assessment

### Suggested Specification Table (For ESA)

| CO   | Unit Titles  | Marks Distribution |    |    | Total Marks |
|------|--|--------------------|----|----|-------------|
|      |  | R                  | U  | A  |             |
| CO-1 | Need and Importance of Sustainable Development   | 03                 | 01 | 01 | 05          |
| CO-2 | Education for Sustainable Development (ESD): Tools, Systems, and Innovation for Sustainability | 02                 | 06 | 02 | 10          |

# A K S University

Faculty of Computer Application & Information Technology and Science

Department of Computer Application & Information Technology

Curriculum of BSC (IT) (Bachelor of Science)

(Revised as on 01 August 2023)

|       |   |    |    |    |    |
|-------|---|----|----|----|----|
| CO-3  | Discuss the sustainable production and consumption          | 03 | 07 | 05 | 15 |
| CO-4  | How Climate Change may be Threat to Sustainable Development | -  | 10 | 05 | 15 |
| CO-5  | Role of Corporations and Ecological Sustainability          | 03 | 02 | -  | 05 |
| Total |   | 11 | 26 | 13 | 50 |

**Legend: R: Remember, U: Understand, A: Apply A: Analyze E: Evaluate C: Create**

The end of semester assessment for Sustainable Development Goals will be held with written examination of 50 marks

**Note.** Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

### Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Visit to industry, water treatment plant
7. Demonstration
8. ICT Based Teaching Learning (Video Demonstration /Tutorials CBT, Blog, Facebook, Twitter, Whatsapp, Mobile, Online sources)
9. Brainstorming

### Suggested Learning Resources:

#### (a) Books:

| S. No. | Title   | Author                             | Publisher            | Edition & Year           |

Curriculum of B.Sc. IT

## Semester-I

**Course Code:** 0EVS03  
**Course Title:** Environmental Science  
**Pre- requisite:** To study this course, the student must have a knowledge about the environmental components, pollution, biodiversity, and Ecosystem at senior secondary, Class 12<sup>th</sup> level.  
**Rationale:** The students studying Environmental Science should possess foundational understanding about environment and its components. They should also know the importance of ecosystems in our surroundings.

### Course Outcomes:

**0EVS03.1:** To understand various aspects of life forms, ecological, processes, and the impacts on them by the human during Anthropocene era.

**0EVS03.2:** To build capabilities to identify relevant environmental issues, analyze the various underlying causes, evaluate the practices and policies, and develop framework to make informed decisions.

**0EVS03.3:** To develop empathy for all life forms, awareness, and responsibility towards environmental protection and nature preservation.

### Scheme of Studies:

| Board of Study | Course Code | Course Title          | Scheme of studies(Hours/Week) |    |    |    | Total Study Hours (CI+LI+SW+SL) | Total Credit (C) |
|----------------|-------------|-----------------------|-------------------------------|----|----|----|---------------------------------|------------------|
|                |             |                       | CI                            | LI | SW | SL |                                 |                  |
| Foundation     | 0EVS03      | Environmental Science | 2                             | 0  | 1  | 1  | 5                               | 2                |

**Legend:** **CI:** Classroom Instruction (Includes different instructional strategies i.e., Lecture (L) and Tutorial (T) and others),

**LI:** Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

**SW:** Sessional Work (includes assignment, seminar, mini project etc.),

**SL:** Self Learning,

**C:** Credits.

**Note:** SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

### Scheme of Assessment: Theory

| Board of | Course Code | Course Title | Scheme of Assessment (Marks) |

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

**0EVS03.1:** To understand various aspects of life forms, ecological, processes, and the impacts on them by the human during Anthropocene era.

#### Approximate Hours

| <p><b>SO3.1.</b> Learn about pollution and its sources.</p> <p><b>SO3.2</b> Know the sources of different pollutant.</p> <p><b>SO3.3</b> Understand the law &amp; legislation related to environment.</p> <p><b>SO3.4</b> Learn the control of pollution.</p> <p><b>SO3.5</b> Describe the role of information technology in environment and human health.</p> |                             | <p><b>Unit-3: Environmental Pollution, Management and Social Issues:</b></p> <p>3.1 Pollution: Types, Control measures,</p> <p>3.2 Management and associated problems.</p> <p>3.3 Environmental Law and Legislation:</p> <p>3.4 Protection and conservation Acts. International Agreement &amp; <b>Program</b></p> <p>3.5 Environmental Movements, communication and public awareness Program.</p> <p>3.6 National and International organizations related to environment conservation and monitoring.</p> <p>3.7 Role of information technology in environment and human health.</p> | <p>i. What is pollution basic introduction?</p> <p>ii. What is pollutant?</p> |

## SW-3 Suggested Sessional Work (SW):

### a. Assignments:

- i. Write an essay on air pollution.
- ii. What do you mean by acid rain write its causes and effects.
- iii. Describe the effects of water pollution.
- iv. How soil pollution can be control?
- v. Describe the role of information technology in environment and human health.
- vi. Mention some national and international organizations related to environment conservation and monitoring.

### b. Other Activities (Specify):

Visit to different polluted sites and study the source of pollution and their effects.

## Brief of Hours suggested for the Course Outcome

# A K S University

Faculty of Engineering and Technology

Curriculum of B.Sc. IT

| Course Outcomes   | Class Lecture (Cl) | Sessional Work (SW) | Self-Learning (Sl) | Total hour (Cl+SW+Sl) |
|---|--------------------|---------------------|--------------------|-----------------------|
| <b>CO.1:</b> To understand various aspects of life forms, ecological processes, and the impacts on them by the human during Anthropocene era.   | 10                 | 1                   | 2                  | 13                    |
| <b>CO.2:</b> To build capabilities to identify relevant environmental issues, analyze the various underlying causes, evaluate the practices and policies, and develop framework to make inform decisions. | 10                 | 2                   | 2                  | 14                    |
| <b>CO.3:</b> To develop empathy for all life forms, awareness, and responsibility towards environmental protection and nature preservation.   | 10                 | 2                   | 2                  | 14                    |
| Total Hours   | 30                 | 05                  | 06                 | 41                    |

## Suggestion for End Semester Assessment

### Suggested Specification Table (For ESA)

| CO    | Unit Titles  | Marks Distribution |    |    | Total Marks |
|-------|--|--------------------|----|----|-------------|
|       |  | R                  | U  | A  |             |
| CO-1  | <b>Environment and Natural Resources:</b>                    | 03                 | 01 | 01 | 05          |
| CO-2  | <b>Biomes, Ecosystem and Biodiversity</b>                    | 02                 | 06 | 02 | 10          |
| CO-3  | <b>Environmental Pollution, Management and Social Issues</b> | 03                 | 07 | 05 | 15          |
| Total |  | 11                 | 26 | 13 | 50          |

**Legend: R: Remember, U: Understand, A: Apply**

The end of semester assessment for Fundamental of Environmental Science will be held with written examination of 50 marks

**Note.** Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

### Suggested Instructional/Implementation Strategies:

1. Improved Lecture

# A K S University

Faculty of Engineering and Technology

Department of Computer Application & Information Technology

Curriculum of B.Sc. IT

2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Visit to cement plant
7. Demonstration
8. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)
9. Brainstorming

## Suggested Learning Resources:

# A K S University

Faculty of Engineering and Technology

Department of Computer Application & Information Technology

Curriculum of B.Sc. IT

## Semester-I

**Course Code: 011T101**

**Course Title: Introduction to Information Technology and ICT Tools**

**Pre-requisite: Open for All**

**Rationale:** The rationale for introducing individuals to Information Technology and ICT tools lies in their fundamental importance for navigating the digital world, enhancing communication and productivity, accessing information, fostering digital literacy, unlocking career opportunities, fostering innovation, enabling global connectivity, and promoting adaptability and lifelong learning.

### Course Outcomes:

011T101.1: Students will learn about various formats to represent different types of data.

011T101.2: Students learn about basic computer organization and its peripherals.

011T101.3: Students make use of word processor, spreadsheet and slide presentation software or effective Information us age.

011T101.4: Students will learn about various cutting-edge technologies used in managing Information.

011T101.5: Students will learn about various network technologies

### Scheme of Studies:

| Course Category | Course Code | Course Title   | Scheme of studies(Hours/Week) |    |    |    |                                | Total Credits<br>(C) |

**Legend:** **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),

**LI:** Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

**SW:** Sessional Work (includes assignment, seminar, mini project etc.),

**SL:** Self Learning,

**C:** Credits.

**Note:** SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

### Course-Curriculum Detailing:

This course curriculum illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should show case their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) up on the course's conclusion.

Legend: R: Remember, U: Understand, A: Apply

The end-of-semester assessment for Introduction to Introduction to Information Technology and ICT Tools will be held with written examination of 50 marks.

**Note.** Detailed Assessment rubric need to be prepared by the course wise Teachers for above tasks. Teachers can also design different tasks as per requirement, for end Semester assessment.

### Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Visit to Software Company
7. Demonstration
8. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)
9. Brainstorming

### Suggested Learning Resources:

Computer Application & Information Technology Curriculum of BSC (IT)  
(Bachelor of Science)  
(Revised as on 01 August 2023)

## Semester - I

**Course Code:** 02CA121

**Course Title:** Programming in C Language

**Pre-requisite:** Student should have a basic understanding of Fundamental of Computer.

**Rationale:** Importance of C programming and its practical applications C programming language holds immense importance in the software development industry. Its simplicity, efficiency, and versatility make it a powerful tool for developing a wide range of applications. From operating systems to embedded systems, C finds its use in numerous domains.

### Course Outcome:

**02CA121.1:** At the end of this chapter the student will explain the core concept of C programming Algorithms and Flowcharts.

**02CA121.2:** At the end of this chapter the student will use various input output operations and control statements.

**02CA121.3:** At the end of this chapter the student will use Array and Function in programs.

**02CA121.4:** At the end of this chapter the student will describe the pointers and use of structure and union

**02CA121.5:** At the end of this chapter the student will use File handling Programs.

### Scheme of Studies:

| Board of Study        | Course Code | Course Title              | Scheme of studies(Hours/Week) |    |    |    | Total Study Hours(CI+LI+SW +SL) | Total Credits(C) |
|-----------------------|-------------|---------------------------|-------------------------------|----|----|----|---------------------------------|------------------|
|                       |             |                           | CI                            | LI | SW | SL |                                 |                  |
| Program Core(TBSC IT) | 02CA121     | PROGRAMMING IN C LANGUAGE | 4                             | 4  | 1  | 1  | 10                              | 6                |

**Legend:** **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),

**LI:** Laboratory Instruction (Includes Practical performances in laboratory workshop, fielder other locations using different instructional strategies)

# AKS University

Faculty of Computer Application & Information Technology and Science

Department of Computer Application & Information Technology

Curriculum of BSC (IT) (Bachelor of Science)

(Revised as on 01 August 2023)

**SW:** Sessional Work (includes assignment, seminar, mini project etc.),

**SL:** Self Learning,

**C:** Credits.

**Note:** SW&SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

## Scheme of Assessment:

### Theory

| Board of Study | Course Code | Course Title              | Scheme of Assessment (Marks)                            |   |                  |                             |                       |                               |    | End Semester Assessment (ESA) | Total Marks (PRA+ESA) |

## Course-Curriculum Detailing:

# A K S University

Faculty of Computer Application & Information Technology and Science

Department of Computer Application & Information Technology

Curriculum of BSC (IT) (Bachelor of Science)

(Revised as on 01 August 2023)

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

**02CA121.1:** At the end of this chapter the student will explain the core concept of C programming Algorithms and Flowcharts.

### Approximate Hours

| Item  | Appx Hrs. |
|-------|-----------|
| CI    | 12        |
| LI    | 12        |
| SW    | 1         |
| SL    | 1         |
| Total | 26        |

### SW-1 Suggested Sessional Work (SW):

| Session Outcomes (SOs)   | Laboratory Instruction (LI)  | Classroom Instruction (CI)   | Self-Learning (SL)                               |
|--|--|--|--|
| <p><b>SO1.1</b> Understand about language and programming paradigm.</p> <p><b>SO1.2</b> Understand Over view of procedural Programming and object-oriented Programming</p> <p><b>SO1.3</b> Understand Algorithms Flow Charts - Symbols, Rules for making.</p> <p><b>SO1.4</b> Understand Flow chart, Types of flowcharts</p> | <p>LI1.1. Write an algorithm to print the sum and product of digits of An integer.</p> <p>LI 1.2 Draw a flowchart to find greatest between 2 Numbers.</p> <p>LI1.3 Write an algorithm to check the inputted year is Leap year or not.</p> <p>LI1.4 Draw flow chart of an educational institute.</p> <p>LI1.5.Draw flowchart for a bank.</p> <p>LI1.6. Write an algorithm to print a table of given number.</p> | <p><b>Unit-1.0</b><br/>Introduction:</p> <p>1.1 Programming Paradigm.</p> <p>1.2 Difference between OOP and POP</p> <p>1.3 Overview of object-oriented Programming.</p> <p>1.4 Understanding Algorithms</p> <p>1.5 C program structure</p> <p>1.6 Flowcharts and its Symbols</p> <p>1.7 Programming logics</p> | <p>1. Use of algorithms for develop program.</p> |

## SW-2 Suggested Sessional Work (SW):

### a) Assignments:

- Create a program in C to check the input no is prime or not.
- Create a program in C to print a factorial of given no.

### b) Mini Project:

- C Program to Make a Simple Calculator Using switch...case.

### c) Other Activities (Specify):

- Printing patterns using C programs

**02CA121.3:** At the end of this chapter the student will use Array and Function in programs.

### Approximate Hours

## SW-2 Suggested Sessional Work (SW):

**a) Assignments:**

- Create a program in C to create two-dimensional array.

**b) Mini Project:**

- C Program to add two matrices.

**c) Other Activities (Specify):**

- Printing patterns using C programs

**02CA121.4:** At the end of this chapter the student will describe the pointers and use of structure and Union.

Faculty of Engineering and Technology

Department of Computer Application & Information Technology

Curriculum of B.Sc. IT

## Semester - I

**Course Code:** 03CA171  
**Course Title :** Desktop Publishing [ DTP]  
**Pre-requisite:** MS word, Excel, MS Paint

**Rationale:** This course introduces students to the principles of design applicable to publications created using desktop publishing software and computer technology. Special attention is given to design principles, typography, and layout and production techniques. This class focuses on gaining professional-level skills and knowledge. In this course, the students will discover how to use the essential building blocks of design type, art and line in new and creative ways, learn clever ways to locate and use resources such as graphics and scanned art, learn to think about audience and medium and how those affect the way you craft your message and also be learning to use new technical tools to create those effective messages.

### Course Outcomes:

- 03CA171.1: Understand basics of computer and its related terminology.
- 03CA171.2: Write, Edit & Print documents using PageMaker.
- 03CA171.3: Understand various Photoshop tools used for Desktop Publishing and would be able to edit an image.
- 03CA171.4: Apply different CorelDraw tools and options to create a poster, Monogram, Visiting card etc.
- 03CA171.5: Understand Color concept in Printing.

### Scheme of Studies:

| Board of Study | Course Code | Course Title | Scheme of studies(Hours/Week) |    |    |    | Total Study Hours<br>(CI+LI+SW+SL) | Total Credit<br>(C) |
|----------------|-------------|--------------|-------------------------------|----|----|----|------------------------------------|---------------------|
|                |             |              | CI                            | LI | SW | SL |                                    |                     |
| Open Elective  | 0CA302      | DTP          | 4                             | 0  | 1  | 1  | 6                                  | 4                   |

**Legend:** **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),  
**LI:** Laboratory Instruction (Includes Practical performance laboratory workshop, field or other locations using different instructional strategies)  
**SW:** Sessional Work (includes assignment, seminar, mini project etc.),

# AKS University

Faculty of Engineering and Technology

Department of Computer Application & Information Technology

Curriculum of B.Sc. IT

**SL:** Self Learning,

**C:** Credits.

**Note:** SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

**Scheme of Assessment:**

**Theory**

| Board of Study | Course Code | Course Title | Scheme of Assessment ( Marks )                                |   |                     |                                    |                              |    |             | End Semester Assessment<br>(ESA) | Total Marks<br><br>(PRA + ESA) |

**Course-Curriculum Detailing:**

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

# AKS University

Faculty of Engineering and Technology

Department of Computer Application & Information Technology

Curriculum of B.Sc. IT

## Semester - I

**Course Code:** 03CA172

**Course Title:** Accounting and Tally

**Pre-requisite:** Student should have basic knowledge of transaction in business

**Rationale:** This syllabus is designed to provide students with a comprehensive understanding of accounting principles and practical skills in accounting software. The progression from basic accounting concepts to advanced tools like Tally and ERP-9 ensures a gradual and thorough learning experience. By covering topics such as the golden rule, trial balances, GST, and alternative tools, students will be equipped to handle both manual and computerized accounting systems. Practical exercises in Tally and ERP-9 enhance their proficiency, preparing them for real-world accounting tasks and ensuring adaptability in diverse professional settings.

### Course Outcome

CO 1: Student will be able to apply fundamental accounting concepts, distinguish manual and computerized systems, and apply the golden rule effectively.

CO 2: Student will be able to prepare financial statements, including trial balances, trading, profit and loss accounts, and balance sheets, addressing outstanding transactions.

CO 3: Student will operate Tally software, from introduction to voucher entries, and effectively manage accounting tasks such as purchase/sales orders and receipts, bills, and journals.

CO 4: Student will be able to use GST tasks like creating masters, handling return of goods, managing exempt transactions, and generating reports for registered and composite dealers.

CO 5: Student will be able to operate, covering Tally Vault, security controls, data import-export, audit procedures, and utilizing online support and help for advanced accounting functions.

### Scheme of Studies:

| Board of Study | Course Code | Course Title         | Scheme of studies(Hours/Week) |    |    |    | Total Study Hours(CI+LI+SW+SL) | Total Credits (C) |
|----------------|-------------|----------------------|-------------------------------|----|----|----|--------------------------------|-------------------|
|                |             |                      | CI                            | LI | SW | SL |                                |                   |
| Open Elective  | 03CA172     | Accounting and Tally | 4                             | 0  | 2  | 1  | 7                              | 4                 |

**Legend:**

- CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),
- LI:** Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)
- SW:** Sessional Work (includes assignment, seminar, mini project etc.),
- SL:** Self Learning,
- C:** Credits.

|                |             |                      | Class/Home Assignment 5 number 3 marks each ( CA ) | Class Test 2 (2 best out of 3) 10 marks each (CT) | Seminar one ( SA ) | Class Activity any one (CAT) | Class Attendance (AT) | Total Marks (CA+CT+SA+CAT+AT) |                         |             |
| Open Elective  | 03CA172     | Accounting and Tally | 15   | 20  | 5                  | 5                            | 5                     | 50                            | 50                      | 100         |

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion

**CO 1** "Student will be able to apply fundamental accounting concepts, distinguish manual and computerized systems, and apply the golden rule effectively."

## Semester-II

Course Code: 0SSD02

**Course Title:** Communication Skills

**Pre-requisite:** Students must have basic knowledge of English language.

**Rationale:** In order to compete in this fast-growing world, LSWR skills of the students should be well developed and enhanced. Besides, they must have effective communication skills as it plays a vital role in shaping individual's personality and career. It also boosts the confidence and prepares them to face the audience fearlessly.

### Course Outcomes:

After completion of the course:

0SSD02.1 Students will be able to speak confidently in public as all the topics chosen emphasis on improving Speaking skills and developing self confidence amongst them.

0SSD02.2 Students will be able to interact properly with improved Leadership Skills, Problem Solving Skills, Social skills and Communication Skills. Students will also be able to understand the Importance of Team Work.

0SSD02.3. Students will be able to communicate effectively in Hindi and English languages without hindrances.

0SSD0 2.4. .Students will be able to convey their messages accurately by understanding the significance of grammar as it plays a vital role in improving speaking and writing skills.

0SSD02.5. The Understanding of Indian Culture and English Language will be developed through the study of Dramas and Poems written by Indian Writers.

### Scheme of Studies:

| Board of Study | Course Code | Course Title         | Scheme of studies (Hours/Week) |    |    |    | Total Study Hours<br>(CI+LI+SW+SL) | Total Credits(C) |

## Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

**CO1: Students will be able to speak confidently in public as all the topics chosen emphasis on improving speaking skills and developing self confidence amongst them.**

## Semester-II

**Course Code:** 0IKS04  
**Course Title:** Indian Knowledge System  
**Pre- requisite:** Creating awareness among the youths about the true history and past rich culture of India.  
**Rationale:** India has very rich and versatile knowledge system and cultural heritage since antiquity. The Indian Knowledge systems was developed on life science, medical science, literature, drama, art, music, dance, astronomy, mathematics, architecture (Sthapatyaveda), chemistry, aeronautics etc, during ancient period. In this basic course, a special attention is given to the ancient and historical perspective of ideas occurrence in the ancient society, and implication to the concept of material world and religious, social and cultural beliefs. On the closer examination, religion, culture and science have appeared epistemological very rigidly connected in the Indian Knowledge System. This land of Bharat Bhumi has provided invaluable knowledge stuff to the society and the world in all sphere of life.

### Course Outcomes:

- 0IKS04. 1:** To understand the ancient civilization, Indian Knowledge Systems, Concept of Panch Mahabhuta, Origin of name Bharat Varsha, Ancient Rivers, Ancient Universities and ancient agriculture.
- 0IKS04.2:** Students will have the ability to learn about ancient books, Religious places, basic concept of Indian dance, music and arts, and fundamental aspects of Sangeeta and Natyashashtra etc.
- 0IKS04.3:** Student will be able to gain knowledge on Vedic Science, Astronomy, Astrovastu, Vedic Mathematics, Aeronautics, Metallurgy, Nakhatras, Panchang, Concept of Zero, Pi and point etc.
- 0IKS04.4:** Understanding on ancient Engineering, Science and Technology, Town Planning, Temple architecture, Chemistry and Metallurgy, Metal manufacturing etc.
- 0IKS04.5:** Student will able to understand about the Life, Nature and Health through basic concept of Ayurveda and Yoga, Traditional Medicinal Systems, Ethnomedicine, Nature conservation, World Heritage Sites etc.

### Scheme of Studies:

## Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

### 0IKS04. 1. To understand Indian Civilization and Indian Knowledge Systems

Department of Computer Application and Science & Technology  
Curriculum of B.Sc. (IT) [Program  
(Revised as on 01 August 2023)

## Semester-II

**Course Code:** 01CA212

**Course Title:** Problem Solving using Python Programming

**Pre-requisite:** This course should help the students to understand the basic knowledge of Problem-Solving using Python Programming. Also, the students should be able to know about basic functioning python

**Rationale:** The students studying Computer Science and Engineering should possess foundational understanding about Python Programming This encompasses familiarity with the invention and evolution of Computer. Additionally, students ought to acquire fundamental insights into various technologies used in Computer and their applications.

### Course Outcomes:

- 01CA212.1: Write simple Python Program using common data structures
- 01CA212.2: Use files for data input and output
- 01CA212.3: Make use of sequences and standard libraries in Programming
- 01CA212.4: Apply object Oriented Programming concepts in problem solving.
- 01CA212.5: Application development in python programming

### Scheme of Studies:

| Board of Study | Course Code | Course Title                             | Scheme of studies (Hours/Week) |    |    |    | Total Study Hours (CI+LI+SW+SL) | Total Credits (C) |
|----------------|-------------|--|--------------------------------|----|----|----|---------------------------------|-------------------|
|                |             |  | CI                             | LI | SW | SL |                                 |                   |
| Major          | 01CA212     | Problem Solving using Python Programming | 4                              | 4  | 1  | 1  | 10                              | 6                 |

### Legend:

**CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),

**LI:** Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

**SW:** Sessional Work (includes assignment, seminar, mini project etc.),

**SL:** Self Learning, **C:** Credits.

**Note:** SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

### Scheme of Assessment:

#### Theory

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

## SW-1 Suggested Sessional Work (SW):

### Assignments:

- Write a Python **Program** which accepts the radius of a circle from the user and compute the area.
- Write a Python **Program** which accepts the user's first and last name and print them in reverse order with a space between them.
- Write a Python **Program** to print the calendar of a given month and **Year**.
- Write a Python **Program** to find whether a given number is prime or not.
- Write a Python **Program** to find factorial of a number.
- Write a Python **Program** to find the least common multiple (LCM) of two positive integers.
- Write a Python **Program** to count occurrence (frequency) of a number in a given list.
- Write a Python **Program** to find the length of string

01CA212.2: Use files for data input and output

### Approximate Hours

| Item  | AppXHrs |
|-------|---------|
| CI    | 12      |
| LI    | 12      |
| SW    | 1       |

|---|---|---|--|

## SW-2 Suggested Sessional Work (SW):

### Assignments:

- Write a Python **Program** to find the length of string
  - Write a Python **Program** to reverse the string alphabets
  - Write a Python **Program** to search an alphabet in the string
  - Write a Python **Program** to concatenate two strings
  - Write a Python **Program** to compare two strings
  - Write a Python **Program** to find a substring in the string
  - Write a python script to concatenate 2Strings.
  - Write a Python script to find all the vowels in the given string
- Write a Python **Program** to reverse the order of the items in the array

## 01CA212.3: Make use of sequences and standard libraries in Programming

### Approximate Hours

| Item  | AppXHrs |

### SW-3 Suggested Sessional Work (SW):

#### Assignments:

- Write a Python **Program** to sum all the items in a list.
- Write a Python **Program** to get the largest number from a list.
- Write a Python **Program** to remove duplicates from a list.
- Write a Python **Program** access the index of a list.
- Write a Python **Program** to create a tuple with numbers and print.
- Write a Python **Program** to add an item in a tuple.
- Write a Python script to sort (ascending and descending) a dictionary by value
- Write a Python script to merge two Python dictionaries

**Semester-II**

|                       |  |
|-----------------------|--|
| <b>Course Code:</b>   | <b>02CA221</b>   |
| <b>Course Title:</b>  | Operating System   |
| <b>Pre-requisite:</b> | Student should have a basic understanding of Fundamental of Computer.  |
| <b>Rationale:</b>     | Study of Operating System helps students to learn the importance of Computer system resources and the role of operating system in their management policies and algorithms as well as the evolution of Operating Systems. Students will understand various process management concepts and can compare various scheduling techniques, synchronization, and deadlocks, memory management and file management. |

**Course Outcomes:**

- 02CA221.1: Specify objectives of modern operating systems and describe how operating systems have evolved over time.
- 02CA221.2: Understand various process management concepts and can compare various scheduling techniques, synchronization, and deadlocks. Also identify the best suited process management technique for any process.
- 02CA221.3: Understand the concepts of memory management techniques and file management.
- 02CA221.4: Understand the concepts of disk management. Understand and identify potential threats to Operating systems and the security features to guard against them.
- 02CA221.5: Understand and operate the Linux system as well as the contribution of Indians in the field.

## Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

**02CA221.1: Specify objectives of modern operating systems and describe how operating systems have evolved over time.**

### Approximate Hours

SW-3 Suggested Sessional Work (SW):

**h. Assignments:**

1. Write short notes on Page replacement algorithms.
2. Differentiate between fragmentation and segmentation.

**i. Mini Project: NA**

**j. Other Activities (Specify):NA**

**02CA221.4: Understand the concepts of disk management. Understand and identify potential threats to Operating systems and the security features to guard against them.**

**Approximate Hours**

| Item | Appx. Hrs. |

(Revised as on 01 August 2023)

## Semester-II

**Course Code:** 03CA231  
**Course Title:** Digital Marketing  
**Pre-requisite:** Basic understanding of marketing principles and online communication.  
**Rationale:** This syllabus equips students with essential skills for navigating the contemporary business landscape, focusing on online strategies, social media, and analytics to drive effective marketing campaigns in the digital age.

**Course Outcomes:** After successful completion of the course, the student will be able to:

- 03CA231.1 Understand digital marketing, importance thereof, meaning of web site and levels of web site, difference between blog, portal & website.
- 03CA231.2 Understand the working of SEO (search engine optimization) on page optimization, off page optimization, and will learn of prepare reports
- 03CA231.3 Learn about SMO (social media optimization) like Facebook, twitter, LinkedIn, Tumblr, Pinterest and other social media servicer’s optimization.
- 03CA231.4 Under paid tools like Google ad words, dispel.
- 03CA231.5 Assess the success of online marketing campaigns based on key performance indicators.

### Scheme of Studies:

| Board of Study | Course Code | Course Title      | Scheme of studies (Hours/Week) |    |    |    | Total Study Hours (CI+LI+SW+SL) | Total Credits (C) |
|----------------|-------------|-------------------|--------------------------------|----|----|----|---------------------------------|-------------------|
|                |             |                   | CI                             | LI | SW | SL |                                 |                   |

| <b>Total</b> |  | <b>11</b>          | <b>26</b> | <b>13</b> | <b>50</b>   |

**Legend: R: Remember, U: Understand, A: Apply**

The end of semester assessment for Digital Marketing will be held with written examination of 50 marks

**Note.** Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks.  
 Teachers can also design different tasks as per requirement, for end semester assessment.

### Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Visit to IT Industry
7. Demonstration
8. ICT Based Teaching Learning (Video Demonstration /Tutorials CBT, Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)
9. Brainstorming

### Alternative NPTEL/SWAYAM Course (if any):

| S.No. | NPTEL Course Name           | Instructor            | Host Institute              |
|-------|-----------------------------|-----------------------|-----------------------------|
| 1.    | Basics of Digital Marketing | Prof. Adrish Banerjee | Devi Ahilya Vishwavidyalaya |

### Suggested Learning Resources:

#### (a) Books:

| S. No. | Title | Author | Publisher | Edition & Year |
|--------|-------|--------|-----------|----------------|
|--------|-------|--------|-----------|----------------|

(Revised as on 01 August 2023)

## Semester-II

**Course Code:** 03CA232

**Course Title:** Multimedia and Animation

**Pre- requisite:** Basic knowledge of computers

**Rationale:** The aim of the course is to introduce to the field of Multimedia with emphasis on its use to solve real world problems for which Solutions are difficult to express using the traditional algorithmic approach. It explores the essential theory behind methodologies for developing systems that can create new Multimedia technologies like video editing, animation, image editing.

### Course Outcomes:

03CA232.1: Demonstrate knowledge of the fundamental principles of multimedia.

03CA232.2: Apply Fonts and image fundamentals. 03CA232.3:

Fundamentals of Audio and Video

03CA232.4: Familiarize knowledge representation in Animation. 03CA232.5:

Comprehend the use of 2D and 3D Animation.

### Scheme of Studies:

| Board of Study | Course Code | Course Title             | Scheme of studies(Hours/Week) |    |    |    |                                 | Total Credits (C) |
|----------------|-------------|--------------------------|-------------------------------|----|----|----|---------------------------------|-------------------|
|                |             |                          | CI                            | LI | SW | SL | Total Study Hours (CI+LI+SW+SL) |                   |
| Open Elective  | 03CA232     | Multimedia And Animation | 3                             | 0  | 1  | 1  | 5                               | 3                 |

**Legend:** **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) And others),

**LI:** Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

**SW:** Sessional Work (includes assignment, seminar, mini project etc.),

**SL:** Self Learning,

**C:** Credits.

**Note:** SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

### Scheme of Assessment:

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

**03CA231.1:** Demonstrate knowledge of the fundamental principles of multimedia.

#### Approximate Hours

| Item  | AppX Hrs |

## Suggestion for End Semester Assessment

### Suggested Specification Table (For ESA)

| CO    | Unit Titles                       | Marks Distribution |    |    | Total Marks |
|-------|-----------------------------------|--------------------|----|----|-------------|
|       |                                   | R                  | U  | A  |             |
| CO-1  | <b>Introduction to Multimedia</b> | 03                 | 02 | 03 | 08          |
| CO-2  | <b>Fonts and Hypertext</b>        | 03                 | 01 | 05 | 09          |
| CO-3  | <b>Audio fundamentals</b>         | 03                 | 07 | 02 | 12          |
| CO-4  | <b>Animation</b>                  | 03                 | 05 | 05 | 13          |
| CO-5  | <b>Basic 2D and 3D animation</b>  | 03                 | 02 | 03 | 08          |
| Total |                                   | 15                 | 17 | 18 | 50          |

**Legend: R: Remember,**

**U: Understand,**

**A: Apply**

The end of semester assessment for Introduction to Computer science will be held with written examination of 50 marks

**Note.** Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks.

Teachers can also design different tasks as per requirement, for end semester assessment.

### Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Visit to software industry
7. Demonstration
8. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)
9. Brainstorming

## Semester-III

|                       |  |
|-----------------------|--|
| <b>Course Code:</b>   | 03CA301  |
| <b>Course Title:</b>  | Data Analytics & Visualization through Spread Sheet  |
| <b>Pre-requisite:</b> | Student should have basic knowledge of MS-Excel  |
| <b>Rationale:</b>     | Data analytics and visualization is important because it helps to process Data sets and creating visual instances. |

### Course Outcomes:

- 03CA232.1: Students should be familiar with various characteristics of the spreadsheet.  
 03CA232.2: Learn how to format spreadsheet, and viewing its appearance before printing.  
 03CA232.3: Importing/Exporting Access Data and Text Files. Securing worksheet and workbook.  
 03CA232.4: Calculate values and process data through various formula, and using data validation formula.  
 03CA232.5: Visualize data values through various types of charts.

### Scheme of Studies:

| Board of Study    | Course Code | Course Title  | Scheme of studies (Hours/Week) |    |    |    |                                 | Total Credits (C) |
|-------------------|-------------|---|--------------------------------|----|----|----|---------------------------------|-------------------|
|                   |             |   | CI                             | LI | SW | SL | Total Study Hours (CI+LI+SW+SL) |                   |
| Skill Enhancement | 03CA301     | Data Analytics & Visualization through Spread Sheet | 2                              | 0  | 2  | 1  | 5                               | 2                 |

**Legend:**

- CI:** Classroom Instruction (Includes different instructional strategies i.e., Lecture(L) and Tutorial (T) and others),
- LI:** Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)
- SW:** Sessional Work (includes assignment, seminar, mini projected.),
- SL:** Self-Learning,
- C:** Credits.

**Note:** SW & SL has to be planned and performed under the continuous guidance and feedback teachers ensure outcome of Learning.

### Scheme of Assessment:

## Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

**03CA232.1: Students should be familiar with various characteristics of the spreadsheet.**

### Approximate Hours

| Item  | Appx. Hrs. |
|-------|------------|
| CI    | 6          |
| LI    | 0          |
| SW    | 2          |
| SL    | 1          |
| Total | 9          |

| Session Outcomes (SOs) | Laboratory Instruction (LI) | Classroom Instruction (CI) | Self-Learning (SL) |
|------------------------|-----------------------------|----------------------------|--------------------|
|                        |                             |                            |                    |

|--|-----------------------------|--|---|
| <p><b>SO2.1</b> Understand printing area and preview of worksheet.</p> <p><b>SO2.2</b> Understand page layout and orientation.</p> <p><b>SO2.3</b> Understand page color and border.</p> <p><b>SO2.3</b> Understand header and footer.</p> |                             | <p><b>Unit-2.0 Printing Worksheet</b></p> <p>2.1 Select print area, See print preview, Adjusting margin during print preview.</p> <p>2.2 Page Formatting: Page layout - Orientation, Size, margins; Watermark,</p> <p>2.3 Page color, Page borders;</p> <p>2.4 Inserting headers and footer, Inserting page numbers,</p> <p>2.5 Date, Path and filename. Viewing: Easy view using freeze panes, Split windows, Layout view</p> <p>2.6 Saving and Sharing File.</p> | <p>Learning sheet formatting and its preview.</p> |

SW-2 Suggested Sessional Work (SW):

**a. Assignments:**

1. Insert header and footer in sheet
2. Split window into sheet

**b. Mini Project:**

Create a sheet format it using various possible tools.

**c. Other Activities (Specify):**

NA

**03CA232.3: Importing/Exporting Access Data and Text Files. Securing worksheet and workbook.**

## Semester-III

**Course Code:** 0CA303  
**Course Title:** Cloud Computing  
**Pre-requisite:** Database Management System  
**Rationale:** Cloud Computing is important because it helps to process and store large amount of data sets on virtual space.

### Course Outcomes:

- CO1: Students should be familiar with various characteristics of the cloud platforms.  
CO2: Learn how virtual platform works for application execution and storage.  
CO3: Create relational database and other cloud-based file system.  
CO4: Understand the privacy issues and security strategies in cloud storage.  
CO5: Implement real time application over various cloud-based platform.

### Scheme of Studies:

| Board of Study     | Course Code | Course Title    | Scheme of studies (Hours/Week) |    |    |    |                                 | Total Credits (C) |
|--------------------|-------------|-----------------|--------------------------------|----|----|----|---------------------------------|-------------------|
|                    |             |                 | CI                             | LI | SW | SL | Total Study Hours (CI+LI+SW+SL) |                   |
| Program Core (PCC) | 0CA303      | Cloud Computing | 4                              | 0  | 2  | 1  | 7                               | 4                 |

**Legend:** **CI:** Classroom Instruction (Includes different instructional strategies i.e., Lecturer (L) and Tutorial (T) And others),  
**LI:** Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)  
**SW:** Sessional Work (includes assignment, seminar, mini projected.),  
**SL:** Self-Learning,  
**C:** Credits.

**Note:** SW & SL has to be planned and performed under the continuous guidance and feedback teachers ensure outcome of Learning.

## Scheme of Assessment: Theory

| Board of Study | Course Code | Course Title    | Scheme of Assessment (Marks)                     |   |                  |                              |                       |                               |                               |                       |
|----------------|-------------|-----------------|--|---|------------------|------------------------------|-----------------------|-------------------------------|-------------------------------|-----------------------|
|                |             |                 | Progressive Assessment (PRA)                     |   |                  |                              |                       |                               | End Semester Assessment (ESA) | Total Marks (PRA+ESA) |
|                |             |                 | Class/Home Assignment 5 number 3 marks each (CA) | Class Test 2 (2 best out of 3) 10 marks each (CT) | Seminar one (SA) | Class Activity any one (CAT) | Class Attendance (AT) | Total Marks (CA+CT+SA+CAT+AT) |                               |                       |
| PE             | OCA303      | Cloud Computing | 15   | 20  | 5                | 5                            | 5                     | 50                            | 50                            | 100                   |

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

**CO1: Students should be familiar with various characteristics of the cloud platforms.**

### Approximate Hours

| Item  | Appx. Hrs. |
|-------|------------|
| CI    | 12         |
| LI    | 0          |
| SW    | 2          |
| SL    | 1          |
| Total | 15         |

| Session Outcomes (SOs) | Laboratory Instruction (LI) | Classroom Instruction (CI) | Self-Learning (SL) |

# AKS University

Faculty of Computer Application and Science & Technology  
Department of Computer Application and Science &  
Technology Curriculum of B.Sc. (IT) [Program  
(Revised as on 01 August 2023)  
**Semester-III**

**Course Code:** 01CA312  
**Course Title:** Object Oriented Programming Using C++  
**Pre-requisite:** Fundamentals of Programing and Programing in C  
**Rationale:**

This subject on Object-Oriented Programming (OOP) in C++ is designed to provide students with a fundamental understanding of software development principles. Starting with the evolution of methodologies, it covers C++ basics, control structures, functions, classes, and objects. Advanced topics include constructors, operator overloading, inheritance, and pointers.

**Course Outcomes:**

On successful completion of this course, the students will be able to:

- 01CA312.1 OOP Mastery: Students will grasp key Object-Oriented Programming principles, applying encapsulation, inheritance, and polymorphism for effective problem-solving.
- 01CA312.2 Attain mastery in C++ programming, from fundamental constructs to advanced topics like operator overloading and dynamic memory management.
- 01CA312.3 Modular Design Skills: Develop expertise in modular design, utilizing functions, classes, and object-oriented principles to create scalable and maintainable software solutions.
- 01CA312.4 Data Persistence Proficiency: Acquire skills in file and stream operations, enabling efficient data reading/writing and ensuring effective management of data persistence in C++ applications.
- 01CA312.5 Advanced Concept Application: Apply advanced concepts like multiple inheritance, virtual functions, and memory management to solve complex programming challenges and contribute effectively to software development projects.

**Scheme of Studies:**

| Board of Study     | Course Code | Course Title                          | Scheme of studies(Hours/Week) |    |    |    | Total Credit (C) |                                 |

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course

# AKS University

Faculty of Computer Application and Science & Technology

 Technology Curriculum of B.Sc. (IT) [Program  
 (Revised as on 01 August 2023)

Outcomes (COs) upon the course's conclusion.

01CA3121

**OOP Mastery: Students will grasp key Object-Oriented Programming principles, applying encapsulation, inheritance, and polymorphism for effective problem-solving.**

### Approximate Hours

**SW-1 Suggested Sessional Work (SW):**

**Assignments:**

- I. Provide a brief analysis of their differences and propose a scenario illustrating the advantages of structured methodologies.
- II. Choose a scenario, create a class diagram, and explain how encapsulation, inheritance, and polymorphism enhance the design.

**Mini Project:**

- I. C++-based Student Information System with OOP Principles Implementation.

**01CA312.2**

Attain mastery in C++ programming, from fundamental constructs to advanced topics like operator overloading and dynamic memory management.

### SW-3 Suggested Sessional Work (SW):

#### a. Assignments:

- Guide students through the application of virtual functions, showcasing their role in accessing normal and virtual member functions with pointers. Implement pure virtual functions, discuss abstract classes, and illustrate the concept of virtual base classes for achieving polymorphism.
- Design a C++ program demonstrating inheritance with both public and private access specifiers. Incorporate pointer manipulation to showcase the interaction between base and derived class objects.

#### b. Mini Project:

- Develop a console-based quiz management system using C++ and OOP principles. Implement classes for quizzes, questions, and user scores, demonstrating encapsulation, inheritance, and polymorphism.

### 01CA312.4

Data Persistence Proficiency: Acquire skills in file and stream operations, enabling efficient data reading/writing and ensuring effective management of data persistence in C++ applications.

## SW-4 Suggested Sessional Work (SW):

### d. Assignments:

- Design a C++ program demonstrating multiple inheritance. Create a scenario with at least three classes, incorporating both public and private inheritance. Implement functions in each class and illustrate how the derived class inherits from multiple base classes
- Develop a C++ program that explores the management of constructors in the context of multiple inheritance. Highlight the order of constructor execution and potential challenges, and demonstrate how virtual base classes can be utilized to address ambiguities.

### e. Mini Project:

- Task: Console-based student management system using C++ that incorporates Object-Oriented

Programming principles. Utilize classes for students, courses, and grades, and implement file handling to persist and retrieve student information.

**01CA312.5**

Advanced Concept Application: Apply advanced concepts like multiple inheritance, virtual functions, and memory management to solve complex programming challenges and contribute effectively to software development projects.

### SW-5 Suggested Sessional Work (SW):

#### c. Assignments

- i. Design an abstract class representing a geometric shape with pure virtual functions for calculating area and perimeter. Implement derived classes for specific shapes (e.g., rectangle, circle) and demonstrate the practical application of the abstract class.
- ii. Develop a C++ program that utilizes file handling to maintain a student database. Implement functionalities for adding, modifying, and deleting student records. Use object I/O to write and read student objects to/from a file, ensuring proper data persistence.

#### b. Mini Project: Online Banking System in C++ with OOP

#### Brief of Hours suggested for the Course Outcome

| Course Outcomes  | Class Lecture (Cl) | Laboratory Instruction (LI) | Sessional Work (SW) | Self-Learning (SI) | Total Hour (Cl+SW+SI) |
|--|--------------------|-----------------------------|---------------------|--------------------|-----------------------|
| 01CA312.1 OOP Mastery: Students will grasp key Object-Oriented Programming principles, applying encapsulation, inheritance, and polymorphism for effective problem-solving.  | 15                 | 12                          | 1                   | 1                  | 29                    |
| 01CA312.2 Attain mastery in C++ programming, from fundamental constructs to advanced topics like operator overloading and dynamic memory management.   | 12                 | 12                          | 1                   | 1                  | 26                    |
| 01CA312.3 Modular Design Skills: Develop expertise in modular design, utilizing functions, classes, and object-oriented principles to create scalable and maintainable software solutions.   | 12                 | 12                          | 1                   | 1                  | 26                    |
| 01CA312.4 Data Persistence Proficiency: Acquire skills in file and stream operations, enabling efficient data reading/writing and ensuring effective management of data persistence in C++ applications.                                 | 10                 | 12                          | 1                   | 1                  | 26                    |
| 01CA312.5 Advanced Concept Application: Apply advanced concepts like multiple inheritance, virtual functions, and memory management to solve complex programming challenges and contribute effectively to Software development projects. | 11                 | 12                          | 1                   | 1                  | 25                    |
| Total Hours  | 60                 | 60                          | 5                   | 5                  | 130                   |

## Suggestion for End Semester Assessment

Suggested Specification Table (For ESA)

| CO        | Unit Titles   | Marks Distribution |    |    | Total Marks |
|-----------|---|--------------------|----|----|-------------|
|           |   | R                  | U  | A  |             |
| 01CA312.1 | Task: Assign a substantial coding project that integrates multiple concepts covered throughout the course. This project should involve aspects such as classes, inheritance, and polymorphism, file I/O, and exception handling.<br>Objective: Evaluate students' ability to apply learned concepts in a real-world scenario and assess their coding proficiency. | 02                 | 01 | 01 | 04          |
| 01CA312.2 | Task: Present a set of complex problems that require the application of various programming concepts, including strings, arrays, and control statements.<br>Objective: Assess students' problem-solving skills and their ability to choose and implement The appropriate programming constructs.  | 02                 | 04 | 02 | 08          |
| 01CA312.3 | Task: Have students participate in a code review session where they present and explain their code for a specific project or problem-solving task.<br>Objective: Evaluate code quality, adherence to best practices, and the ability to communicate and defend coding decisions.  | 03                 | 05 | 04 | 12          |
| 01CA312.4 | Task: Include a written exam with a mix of theoretical and practical questions covering all units of the course, including topics like generics, delegates, reflection, and multithreading.<br>Objective: Assess students' theoretical Knowledge, understanding of programming concepts, and ability to express ideas coherently.                                 | 02                 | 08 | 05 | 15          |
| 01CA312.5 | Task: Assign a mini project related to web service integration or another advanced topic covered in The course. Have students present their projects,   | 03                 | 05 | 03 | 11          |

|       | Explaining the design decisions, challenges faced, and solutions implemented.<br>Objective: Evaluate practical application skills, project management, and communication skills. |    |    |    |    |
| Total |  | 12 | 23 | 15 | 50 |

**Legend: R: Remember, U: Understand, A: Apply**

The end of semester assessment for Data Analytics & Visualization will be held with written examination of 50 marks

**Note.** Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

### Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Visit any software development company
7. Demonstration
8. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)
9. Brainstorming

### Suggested Learning Resources:

#### Textbooks:

## Semester-III

**Course Code:** 02CA322

**Course Title:** Data Structures

**Pre-requisite:** To study this Course, a student must have basic knowledge of computers

**Rationale:** Data structures are used to implement the physical forms of abstract data types. Data structures are a crucial part of designing efficient software

### Course Outcomes:

After completion of course, students would be able to:

**02CA322.1:** Understand the different types of data structure to be implemented using any programming language

**02CA322.2:** Choose the data structures that effectively model the information in a problem and an analysis the efficiency trade-offs (run time and memory usage) among alternative data structure implementation so combinations.

**02CA322.3:** Design, implement, test, and debug programs using a variety of data structures including stacks, queues, hash tables, binary and general tree structures, search trees, and graphs.

**02CA322.4:** Apply efficient data structure (linked lists, stacks and queues) to solve a particular problem.

PC203.5: Apply Sorting and Searching

### Scheme of Studies:

| Board of Study     | Course Code | Course Title     | Scheme of studies(Hours/Week) |    |    |    | Total Study Hours(CI+LI+SW+SL) | Total Credits (C) |
|--------------------|-------------|------------------|-------------------------------|----|----|----|--------------------------------|-------------------|
|                    |             |                  | CI                            | LI | SW | SL |                                |                   |
| Program Core (PCC) | 02CA322     | Data Structures. | 4                             | 4  | 1  | 1  | 10                             | 6                 |

**Legend:**

- CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),
- LI:** Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)
- SW:** Sessional Work (includes assignment, seminar, mini project etc.),
- SL:** Self Learning,
- C:** Credits.

**Note:** SW & SL has to be planned and performed under the continuous guidance and feedback teachers ensure outcome of Learning.

| PCC            | <b>02CA322</b> | Data Structures | 15  | 20   | 5                 | 5                            | 5                     | 50                                | 50 | 100                           |                       |

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) outer course's conclusion.

**02CA322.1:** Understand the different types of data structure to be implemented using any programming Language.

### Approximate Hours

| Total |   | 15                 | 17 | 18 | 50          |

**Legend: R: Remember, U: Understand, A: Apply**

The end of semester assessment for Introduction to Data Structures will be held with written examination of 50 marks

**Note.** Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture

# AKS University

Faculty of Computer Application and Science & Technology  
Department of Computer Application and Science & Technology  
Curriculum of B.Sc. (IT) [Program  
(Revised as on 01 August 2023)

2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Visit to software industry
7. Demonstration
8. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)
9. Brainstorming

Suggested Learning Resources:

**A. Books:**

| S. No. | Title   | Author                  | Publisher              | Edition & Year |

**Curriculum Development Team**

1. Dr. Akhilesh A. Wao, HOD, Department of Computer Science and Engineering.
2. Dr. Pramod Singh, Assistant Professor, Department of Computer Science and Engineering.
3. Ms. Shruti Gupta, Assistant Professor, Department of Computer Science and Engineering.
4. Ms. Pragya Shrivastava, Assistant Professor, Department of Computer Science and Engineering.
5. Mr. Lokendra Gaur, Assistant Professor, Department of Computer Science and Engineering.
6. Mr. Vinay Kumar Dwivedi, Assistant Professor, Department of Computer Science and Engineering.
7. Dr. Pinki Sharma, Assistant Professor, Department of Computer Science and Engineering.
8. Ms. Pushpa Kushwaha, Assistant Professor, Department of Computer Science and Enginee

## CO, PO and PSO Mapping

**Program: B.SC (IT)**

# AKS University

Faculty of Computer Application and Science & Technology  
 Department of Computer Application and Science & Technology  
 Curriculum of B.Sc. (IT) [Program  
 (Revised as on 01 August 2023)  
**Semester-III**

**Course Code:** 03CA333

**Course Title:** Internet of Things

**Pre-requisite:** Student should know basic knowledge of computer & digital Electronics.

**Rationale:**

1. 'It's all about the role of Sensors log Data!' IoT is the super set of Information technology driven by the sensors and cloud to make the real things like smart things for your network.
2. To understand the concepts of web of Things, Cloud of Things and emphasis on Mobile cloud.

### Course Outcomes:

**03CA333.1:** Learn the basics of IoT and IoT Architectural view.

**03CA333.2:** Understand various theoretical and practical principles involved in the design of Data Storage in IoT and use of Software defined networking.

**03CA333.3:** Learn the Web communication Protocols for connected devices and Message communication Protocols for connected devices.

**03CA333.4:** Design and implement Sensor Technology and Participatory Sensing.

**03CA333.5:** Design an IoT Privacy and security solutions.

### Scheme of Studies:

| Board of Study    | Course Code    | Course Title | Scheme of studies(Hours/Week) |    |    |    | Total Study Hours(CI+LI+SW+SL) | Total Credits (C) |
|-------------------|----------------|--------------|-------------------------------|----|----|----|--------------------------------|-------------------|
|                   |                |              | CI                            | LI | SW | SL |                                |                   |
| Program Core (36) | <b>03CA333</b> | IOT          | 6                             | 0  | 0  | 0  | 6                              | 6                 |

**Legend:CI:** Classroom Instruction (Includes different instructional strategies i.e., Lecture (L) and Tutorial (T) and others),

**LI:** Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

**SW:** Sessional Work (includes assignment, seminar, mini project etc.),

**SL:** Self Learning,

**C:** Credits.

**Note:** SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

### Scheme of Assessment: Theory

| Board of Stud | Couse Code | Cour se Title | Scheme of Assessment ( Marks ) |

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

**03CA333.1:** Learn the basics of IoT and IoT Architectural view.

## Suggestion for End Semester Assessment

### Suggested Specification Table (For ESA)

| CO    | Unit Titles   | Marks Distribution |    |    | Total Marks |
|-------|---|--------------------|----|----|-------------|
|       |   | R                  | U  | A  |             |
| CO-1  | Acquire the knowledge of IoT concept and its Architecture.  | 01                 | 01 | 03 | 05          |
| CO-2  | Acquire the basic concept of Software defined networking and Machine-to-Machine (M2M).  | 01                 | 01 | 03 | 05          |
| CO-3  | Exposed to various web communication Protocols for connected devices & Message communication Protocols for connected devices. | -                  | 03 | 10 | 13          |
| CO-4  | Familiarize and understand the basic Sensor data Communication Protocols.   | -                  | 03 | 10 | 13          |
| CO-5  | Develop the application skills regarding the Smart City Streetlights control & monitoring.                                    | 01                 | 03 | 10 | 14          |
| Total |   | 03                 | 12 | 36 | 50          |

**Legend: R: Remember, U: Understand, A: Apply**

The end of semester assessment for Financial Accounting will be held with written examination of 50 marks

**Note.** Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

### Suggested Instructional/Implementation Strategies:

- i. Improved Lecture
- ii. Tutorial
- iii. Case Method
- iv. Group Discussion
- v. Brainstorming

# AKS University

Faculty of Computer Application and Science & Technology  
 Department of Computer Application and Science & Technology  
 Curriculum of B.Sc. (IT) [Program  
 (Revised as on 01 August 2023)  
**Semester-III**

**Course Code:** 03CA332

**Course Title:** Optimization Techniques

**Pre-requisite:** To study this course, a student must have had Certificate Course.

**Rationale:** The rationale behind discrete mathematics is grounded in its practical applications to computer science and related fields.

### Course Outcomes:

After completion of course, students would be able to:

**03CA332.1:-** Formulate real life problems into linear programming problem.

**03CA332.2:-** Apply the simplex method to find an optimal vector for the standard linear programming problem and the corresponding dual problem.

**03CA332.3:-** Find optimal solution of transportation.

**03CA332.4:-** Formulate and solve linear programming model of two person zero sum game.

**03CA332.5:-** Solve nonlinear programming problems using Kuhn Tucker conditions.

### Scheme of Studies:

| Board of Study     | Course Code | Course Title            | Scheme of studies(Hours/Week) |    |    |    | Total Study Hours(CI+LI+SW+SL) | Total Credits (C) |
|--------------------|-------------|-------------------------|-------------------------------|----|----|----|--------------------------------|-------------------|
|                    |             |                         | CI                            | LI | SW | SL |                                |                   |
| Program Core (PCC) | 03CA332     | Optimization Techniques | 4                             | 0  | 2  | 1  | 7                              | 4                 |

**Legend:** **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),

**LI:** Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

**SW:** Sessional Work (includes assignment, seminar, mini project etc.),

**SL:** Self Learning,

**C:** Credits.

**Note:** SW & SL has to be planned and performed under the continuous guidance and feedback teachers ensure outcome of Learning.

### Scheme of Assessment:

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL).

As the course progresses, student should show case the mastery of Session Outcomes (SOs), culminate ting the over all achievement of Course Outcomes (COs) outer course's conclusion.

**03CA332.1:-** Formulate real life problems into linear programming problem.

### Approximate Hours

**Legend:**      **R: Remember,**      **U: Understand,**      **A: Apply**

The end-of-semester assessment for Introduction to Optimization Techniques will be held with a written examination of 50 marks

**Note.** Detailed Assessment rubric need to be prepared by the course wise teachers for above Tasks. Teachers can also design different tasks as per requirement, for end semester Assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Visit to software industry
7. Demonstration
8. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)
9. Brainstorming

Suggested Learning Resources:

**B. Books:**

Department of Computer Application & Information Technology

Curriculum of BSC (IT) (Bachelor of Science)

(Revised as on 01 August 2023)

## Semester-IV

**Course Code:** 0EN401

**Course Title:** Entrepreneurship Development

**Pre-requisite:**

Student should have basic knowledge of computer

**Rationale:**

Computer ethics is essential because it guides ethical behavior in the digital age, addresses ethical dilemmas in technology use, and promotes the responsible and ethical development, deployment, and use of technology for the benefit of individuals and society as a whole.

### Course Outcomes:

0EN401.1: student will Advance their skills in customer development, customer validation, competitive Analysis, and iteration while utilizing design thinking and process tools to evaluate in real-world Problems and projects.

0EN401.2: Mobilize people and resources

0EN401.3: Increase their awareness and deliberately practice the skills and disciplines necessary to increase confidence and agency.

0EN401.4: Demonstrate knowledge of current information, theories and models, and techniques and practices in all of the major business disciplines including the general areas of Accounting and Finance, Information Technologies, Management, Marketing, and Quantitative Analysis.

### Scheme of Studies:

| Board of Study    | Course Code | Course Title                 | Scheme of studies(Hours/Week) |    |    |    | Total Credits (C) |                                 |
|-------------------|-------------|------------------------------|-------------------------------|----|----|----|-------------------|---------------------------------|
|                   |             |                              | CI                            | LI | SW | SL |                   | Total Study Hours (CI+LI+SW+SL) |
| Skill Enhancement | 0EN401      | Entrepreneurship Development | 2                             | 0  | 2  | 1  | 5                 | 2                               |

**Legend:** **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),

**LI:** Laboratory Instruction (Includes Practical performance laboratory workshop, field or other locations using different instructional strategies)

**SW:** Sessional Work (includes assignment, seminar, mini project etc.),

**SL:** Self Learning,

**C:** Credits.

**Note:** SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

0EN401.1: Advance their skills in customer development, customer validation, competitive analysis, and iteration while utilizing design thinking and process tools to evaluate in real-world problems and projects.

### Approximate Hours

| Item  | Appx Hrs |
|-------|----------|
| CI    | 6        |

# A K S University

Faculty of Engineering and Technology

Department of Computer Science & Engineering

Curriculum of B.Tech. (Computer Science & Engineering) Program

(Revised as on 01 August 2023)

## Semester-IV

**Course Code:** OCA402

**Course Title:** Minor Project

**Pre-requisite:** Student should have knowledge of programming languages, Software Engineering, and Many more tools and framework.

### Rationale:

- To apply the knowledge and skills learnt in previous semesters, to solve real life industrial / engineering / professional problems.
- To modify/ improve the existing engineering / professional systems.
- To develop systems / components / methods / processes / resources to cater the needs of the nearby small scale / medium industry.
- To learn to solve real life engineering / professional problems which often have many aspects to be considered and addressed.

### Course Outcomes:

OCA402.1: - The student will be able to prepare a detailed project plan for solving any real-life related engineering / technical / professional / industrial problem.

OCA402.2: - The student will be able to implement the project plan and manage the project.

OCA402.3: - The student will be able to present the completed project work.

### Scheme of Studies:

| Board of Study | Course Code | Course Title  | Scheme of studies (Hours/Week) |    |    |    | Total Study Hours (CI+LI+SW+SL) | Total Credits (C) |
|----------------|-------------|---------------|--------------------------------|----|----|----|---------------------------------|-------------------|
|                |             |               | CI                             | LI | SW | SL |                                 |                   |
| Project        | OCA402      | Minor Project | 0                              | 4  | 0  | 0  | 4                               | 2                 |

The Course on Project Work consists of five phases: -

|   | Description of phases   | Learn Hrs. |
|---|---|------------|
| 1 | Literature / industry's need survey and finalization of topic / title | 15 Hrs     |
| 2 | Detailed planning of the project work                                 |            |
| 3 | Implementing the detailed project plan                                | 60 Hrs     |
| 4 | Managing the project activities                                       |            |
| 5 | Reporting of the project work output/outcome / prototype              | 15 Hrs     |
|   | Total   | 90 Hrs     |

# A K S University

*Faculty of Computer Application & Information Technology and Science*

**Department of Computer Application & Information Technology**

**Curriculum of BSC (IT) (Bachelor of Science)**

(Revised as on 01 August 2023)

## **General Guidelines for Project Work**

- The project topics should be related to concerned branch of engineering / profession, but should not be the exact content of the curriculum taught in the discipline.
- Student's project topics should be preferably 'real life' topics. It means the project topics should have substantial element of uncertainty, complexity and multi-disciplinary-ness which can be coped up by the students. These elements offer opportunities to students to apply engineering/ professional knowledge in real life settings, solve real life problems and to take real life decisions. As a project guide, concerned teacher should ensure these by suitably altering / framing / reframing the statement of topic / title.
- The project topics should be such that students can get opportunity to refer IS codes, Manuals, Handbooks, norms and standards, opportunity to conduct standard tests, and opportunity to operate modern laboratory equipment's following SOPs.
- For student's interest, active participation and ownership in the project work, their self-motivation is necessary. Therefore, students should be actively involved in finalizing the topic of project.
- Students should be asked to conduct a brief review of literature for problems and issues in their engineering / professional areas of interest, where they think they can contribute effectively. The project guide should facilitate them in this regard, through his/her expertise and experience.
- Every student group should be asked to propose at least three topics of their interest. The topics proposed by student project groups should be assessed by the facilitator-teacher on following three criteria: -
  - **The work on the topic should be theoretically and practically feasible.**
  - **The project work on the topic should be completed within approx. Three and half months.**
  - **Availability of required resources should be certain. Cost of project work should also be bearable.**
- Normally, students' project works should be carried out in small groups (1 to 2 students).
- All faculty members of department should be engaged as project guides. Every faculty member should be project guide of at least one student project group.
- Normally, project guides should be assigned to the students through lottery system and students under each faculty should be asked to form their small groups.

Department of Computer Application & Information Technology

Curriculum of BSC (IT) (Bachelor of Science)

(Revised as on 01 August 2023)

## Semester-IV

**Course Code:** 02CA421

**Course Title:** Internet Applications using Java Programming

**Pre-requisite:** Student should have a basic understanding of Fundamental of Computer.

**Rationale:** The study of this subject will develop understanding of Java core concepts. Java is an object-oriented language that is best suited for Internet applications. All these concepts will help students to develop elementary internet applications using JAVA that solve real world problems.

### Course Outcomes:

- 02CA421.1: Able to use an integrated development environment to write, compile, run, and test simple object-oriented Java programs.
- 02CA421.2: Understand and apply the concepts of Inheritance and Interfaces.
- 02CA421.3: Learn and apply applet programming to create basic web pages.
- 02CA421.4: Understand the Java event handling model and apply to create interactive web pages.
- 02CA421.5: Able to implement I/O operations and connect to database to solve real world problems.

### Scheme of Studies:

| Board of Study | Course Code | Course Title                                 | Scheme of studies (Hours/Week) |    |    |    | Total Study Hours<br>(CI+LI+SW+SL) | Total Credits (C) |

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

**02CA421.1: Able to use an integrated development environment to write, compile, run, and test simple object-oriented Java programs.**

**Approximate Hours**

SW-1 Suggested Sessional Work (SW):

**a. Assignments:**

1. Create a program in Java to check the input no is prime or not.
2. Create a program in Java to print a factorial of given no.

**b. Mini Project:**

Java Program to Make a Simple Calculator using switch...case.

**c. Other Activities (Specify):**

NA

**02CA421.2: Understand and apply the concepts of Inheritance and Interfaces.**

|  | Engineering knowledge | Problem analysis | Design/development of solutions | Conduct studies of difficult problems | Utilization of modern tools | Engineers and society | Environment and sustainability | Ethics | Individual and team work | Communication | Project management and finance | Life-longlearning | Use fundamental knowledge of math, science and engineering to comprehend, evaluate, and create computer Programmes in the fields of algorithms, multimedia, big data analytics, machine learning, artificial intelligence, and networking for the effective design of computer-based systems of various complexity | Utilize relevant methods and cutting-edge hardware and software engineering tools to develop and integrate computer systems and related technologies. This PSO2 also encourages lifelong learning for the advancement of technology and its use in multidisciplinary settings | Applying professional engineering solutions for societal improvement while taking into account the environmental context, being conscious of professional ethics, and being able to effectively communicate. | Learn and use the most recent Artificial Intelligence and Data Science technologies in the fields of engineering and computer science | Recognize and examine issues in real life, then offer creative software solutions with the help of AI and Data Science Technologies |
| CO 1: Able to use an integrated development environment to write, compile, run, and test simple object-oriented Java programs. | 2                     | 2                | 3                               | 3                                     | 3                           | 1                     | 1                              | 1      | 1                        | 1             | 1                              | 3                 | 2  | 3   | 3  | 1   | 2   |
| CO 2: Understand and apply the concepts of Inheritance and Interfaces.   | 1                     | 3                | 2                               | 3                                     | 2                           | 2                     | 2                              | 1      | 1                        | 1             | 1                              | 3                 | 2  | 2   | 2  | 1   | 3   |
| CO3: Learn and apply applet programming to create basic web pages.   | 2                     | 2                | 2                               | 3                                     | 3                           | 2                     | 1                              | 1      | 1                        | 1             | 1                              | 3                 | 1  | 1   | 2  | 2   | 2   |
| CO 4: Understand the Java event handling model and apply to create interactive web pages.                                      | 1                     | 2                | 3                               | 2                                     | 3                           | 2                     | 1                              | 1      | 1                        | 2             | 1                              | 3                 | 3  | 3   | 3  | 2   | 2   |
| CO 5: Able to implement I/O operations and connect to database to solve real world problems.                                   | 1                     | 2                | 2                               | 3                                     | 3                           | 1                     | 1                              | 2      | 1                        | 2             | 1                              | 3                 | 3  | 3   | 1  | 3   | 3   |

## Semester-IV

**Course Code:** 01CA411

**Course Title:** Database Management Systems Using PL/SQL

**Pre-requisite:** Student should have basic knowledge of components and architecture of digital computer system

**Rationale:** The students should possess foundational understanding about the basic components of Digital Computer system. This encompasses familiarity with the operational elements of Digital computer system. Additionally, Students ought to acquire fundamental insights into different types of computers, their applications.

### Course Outcomes:

01CA411.1: Explain the Features of Database Management Systems and Relational Database.

01CA411.2: Design Conceptual Models of a Database Using ER Modelling for Real Life Applications and Construct Queries in Relational Algebra.

01CA411.3: Create and Populate A RDBMS for A Real-Life Application, With Constraints and Keys, Using SQL

01CA411.4: Retrieve Any Type of Information from A Database by Formulating Complex Queries In SQL. 01CA411.5 Analyses the Existing Design of a Database Schema and Apply Concepts of Normalization to Design an Optimal Database.

### Scheme of Studies:

| Board of Study | Course Code | Course Title                             | Scheme of studies(Hours/Week) |    |    |    | Total Credits (C) |                                 |
|----------------|-------------|--|-------------------------------|----|----|----|-------------------|---------------------------------|
|                |             |  | CI                            | LI | SW | SL |                   | Total Study Hours (CI+LI+SW+SL) |
| Major          | 01CA411     | Database Management Systems Using PL/SQL | 4                             | 4  | 1  | 1  | 10                | 6                               |

**Legend:** **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) And others),

**LI:** Laboratory Instruction (Includes Practical performance laboratory workshop, field or other locations using different instructional strategies)

**SW:** Sessional Work (includes assignment, seminar, mini project etc.),

**SL:** Self Learning,

**C:** Credits.

**Note:** SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

|                |             |                       | Class/Home Assignment 5 number 3 marks each (CA) | Class Test 2 (2 best out of 3) 10 marks each (CT) | Seminar one (SA) | Class Activity any one (CAT) | Class Attendance (AT) | Total Marks (CA+CT+SA+CAT+AT) |    |                               |                         |
| Major          | 01CA411     | Computer Organization | 15   | 20  | 5                | 5                            | 5                     | 50                            | 50 | 100                           |                         |

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

01CA411.1: Explain The Features Of Database Management Systems And Relational Database.

| Item  | Appx. Hrs. |
|-------|------------|
| CI    | 13         |
| LI    | 12         |
| SW    | 1          |
| SL    | 1          |
| Total | 27         |

| Session Outcomes (SOs) | Laboratory Instruction (LI) | Classroom Instruction (CI) | Self-Learning (SL) |
|------------------------|-----------------------------|----------------------------|--------------------|
|                        |                             |                            |                    |

(Revised as on 01 August 2023)

**Note.** Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

### Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Demonstration
7. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)
8. Brainstorming

### Suggested Learning Resources:

#### Books:

| S. No. | Title  | Author         | Publisher                   | Edition & Year             |
|--------|--|----------------|-----------------------------|----------------------------|
| 1      | SQL, PL/SQL – The Programming Language of Oracle | Ivan Bayross   | Prentice Hall               | 1 Dec 2010                 |
| 2      | SQL & PL / SQL for Oracle 11g Black Book         | P.S. Deshpande | Pearson Education           | 7 Jul 2011                 |
| 3      | Mastering Oracle SQL                             | Sanjay Mishra  | Morgan Kauffmann Publishers | 17 Apr 17 Apr 2002<br>2002 |

### C. Alternative NPTEL/SWAYAM/MOOC Course (if any): NA

#### Curriculum Development Team

1. Dr. Akhilesh A. Wao, HOD, Department of Computer Science and Engineering.
2. Dr. Pramod Singh, Associate Professor, Department of Computer Science and Engineering.
3. Ms. Shruti Gupta, Assistant Professor, Department of Computer Science and Engineering.
4. Ms. Pragya Shrivastava, Assistant Professor, Department of Computer Science and Engineering.
5. Mr. Lokendra Gaur, Assistant Professor, Department of Computer Science and Engineering.
6. Mr. Vinay Kumar Dwivedi, Assistant Professor, Department of Computer Science and Engineering.
7. Ms. Pinki Sharma, Assistant Professor, Department of Computer Science and Engineering.
8. Ms. Pushpa Kushwaha, Assistant Professor, Department of Computer Science and Engineering.

(Revised as on 01 August 2023)

## Semester-IV

**Course Code:** 03CA431  
**Course Title:** E-Commerce

**Pre-requisite:** Basic understanding of Business concepts and online technologies.

**Rationale:** This syllabus aims to equip students with a robust foundation in e-Commerce, integrating historical context, technological advancements, and critical security considerations for a comprehensive understanding of this dynamic field.

### Course Outcomes:

- 03CA431.1. To learn the fundamentals of E — Commerce and its process.
- 03CA431.2. To understand the role of E- commerce in the present scenario along with the concepts of security and its applications.
- 03CA431.3. To gain knowledge of e-commerce business needs and resources and match to technology considering human factors and budget constraints.
- 03CA431.4. To apply knowledge of changing technology on traditional business models and strategy.
- 03CA431.5. To have skills to communicate effectively and ethically using electronic communication.

### Scheme of Studies:

| Board of Study | Course Code | Course Title | Scheme of studies (Hours/Week) |    |    |    | Total Credits (C) |                                 |
|----------------|-------------|--------------|--------------------------------|----|----|----|-------------------|---------------------------------|
|                |             |              | CI                             | LI | SW | SL |                   | Total Study Hours (CI+LI+SW+SL) |
| Open Elective  | 03CA431 A   | E-Commerce   | 4                              | 0  | 1  | 1  | 6                 | 4                               |

**Legend:** CI: Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),

LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

SW: Sessional Work (includes assignment, seminar, mini project etc.),

SL: Self Learning,

C: Credits.

**Note:** SW &SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

**03CA431.1: To learn the fundamentals of E — Commerce and its process.**

### Approximate Hours

| Item  | Appx. Hrs. |
|-------|------------|
| CI    | 9          |
| LI    | 0          |
| SW    | 2          |
| SL    | 1          |
| Total | 12         |

| Session Outcomes (SOs) | Laboratory Instruction (LI) | Classroom Instruction (CI) | Self-Learning (SL) |
|------------------------|-----------------------------|----------------------------|--------------------|
|                        |                             |                            |                    |

| <p><b>SO1.1</b> Understand the historical evolution and categorization of e-commerce.</p> <p><b>SO1.2</b> Differentiate between the types of e-commerce and articulate their respective advantages and disadvantages.</p> <p><b>SO1.3</b> Identify and analyze the key elements of e-commerce in practical scenarios.</p> <p><b>SO1.4</b> Evaluate the principles underlying effective e-commerce strategies.</p> <p><b>SO1.5</b> Assess the significance of common service infrastructure and other key support layers in the e-commerce ecosystem.</p> |  | <p><b>Unit-1.0</b> Introduction to E-Commerce</p> <p>1.1 Introduction &amp; Brief history of e-commerce</p> <p>1.2 Types</p> <p>1.3 Advantages &amp; Disadvantages of e-commerce</p> <p>1.4 Elements of e-commerce</p> <p>1.5 Principles of e-commerce</p> <p>1.6 Messaging and Information distribution</p> <p>1.7 Messaging and information distribution</p> <p>1.8 Common service infrastructure</p> <p>1.9 other key support Layers.</p> | <p>1. Explore the evolution and current trends of e-commerce through online articles and case studies.</p> |
|--|--|--|--|

SW-1 Suggested Sessional Work (SW):

**a. Assignments:**

- Analyze a specific e-commerce platform, outlining its history, business model, advantages, and potential areas for improvement.

**b. Mini Project:**

- Develop a basic e-commerce website with essential functionalities, emphasizing user-friendly design and secure payment gateways.

**c. Other Activities (Specify):**

- Participate in a virtual panel discussion or webinar on emerging technologies shaping the future of e-commerce.

03CA431.2: To understand the role of E-commerce in the present scenario along with the concepts of security and its applications.

**Approximate Hours**

| Item | Appx. Hrs. |

| <p><b>SO1.1</b> Define EDI and its origin, understanding the system approach and communication strategies.</p> <p><b>SO1.2</b> Explain the migration process to open EDI, emphasizing its benefits.</p> <p><b>SO1.3</b> Demonstrate the mechanics involved in EDI, showcasing practical application.</p> <p><b>SO1.4</b> Evaluate the integration of E-commerce with WWW/Internet, discerning its impact.</p> <p><b>SO1.5</b> Develop an understanding of E-Government concepts and apply them in various contexts, including G2C, G2B, and G2G applications.</p> | .                           | <p><b>Unit-2.0</b> EDI<br/>Introduction</p> <p>1.1 EDI to e-commerce:</p> <p>1.2 EDI - Origin System approach</p> <p>1.3 Communication approach</p> <p>1.4 Migration to open EDI-Approach Benefits</p> <p>1.5 Mechanics</p> <p>1.6 E.com with WWW/Internet</p> <p>1.7 E-Government Concepts</p> <p>1.8 Applications of G2C</p> <p>1.9 G2B</p> <p>1.10 G2G</p> | <p>1. Explore EDI's evolution, covering its origin, system approach, and communication strategies.</p> |

## SW-2 Suggested Sessional Work (SW):

### a. Assignments:

1. Investigate the advantages and migration processes of open EDI, emphasizing its approach and benefits.

### b. Mini Project:

1. Develop an E-commerce platform integrated with the WWW/Internet, showcasing practical applications and mechanics.

### c. Other Activities (Specify):

1. Dive into E-Government concepts and highlight real-world scenarios with Applications of G2C, G2B, and G2G interactions

**03CA431.3: To gain knowledge of e-commerce business needs and resources and match to technology considering human factors and budget constraints.**

Uncontrolled contained</p> <p>3.12. Metered Pricing Vs Flat pricing Innovation Vs Control.</p> | <p>1. Explore electronic communication, PC, and networking fundamentals, covering network topologies, communication media, and the OSI/TCP/IP Models.</p> |

## SW-3 Suggested Sessional Work (SW):

### a. Assignments:

1. Analyze the distinctions between LAN, WAN, MAN, and investigate the role of bridges and gateways in internetworking, comparing Internet and online services with a focus on open vs. closed architecture.

### b. Mini Project:

1. Develop a controlled content e-commerce platform, emphasizing metered pricing versus flat pricing strategies, integrating innovative features while ensuring user security.

### c. Other Activities (Specify):

1. Participate in discussions on the implications of controlled versus uncontrolled content in e-commerce, examining the balance between innovation and control for sustainable business growth.

## 03CA431.4: To apply knowledge of changing technology on traditional business models and strategy.

Curriculum of BSC (IT) (Bachelor of Science)

(Revised as on 01 August 2023)

## Semester-IV

**Course Code:** 03CA432  
**Course Title:** Computer Maintenance & Troubleshooting.  
**Pre-requisite:** Open to all, no previous knowledge needed.

**Rationale:** Comprehensive understanding of IT systems, from hardware fundamentals to troubleshooting and maintenance. By covering topics such as computer hardware components, storage devices, input/output devices, output devices, and troubleshooting methodologies, participants gain the necessary knowledge and skills to effectively manage and troubleshoot IT systems. This holistic approach ensures that participants are equipped with a diverse skill set to address various hardware and software issues, optimize system performance, and implement preventive maintenance measures, ultimately contributing to the efficient operation of IT infrastructure in professional settings.

### Course Outcomes:

On successful completion of this course, the students will be able to:

- 03CA432.1 Identify and understand the hardware components in the computersystem.
- 03CA432.2 Install, configure and update Operating Systems, device drivers and software's.
- 03CA432.3 Install, configure and maintain various components in computer systemand peripheral devices.
- 03CA432.4 Diagnose faults, repair and maintain computer system and itsperipherals.
- 03CA432.5 Do preventive maintenance of computer system and its peripherals.

### Scheme of Studies:

| Board of Study | Course Code | Course Title                            | Scheme of studies(Hours/Week) |    |    |    | Total Study Hours (CI+LI+SW+SL) | Total Credit (C) |
|----------------|-------------|---|-------------------------------|----|----|----|---------------------------------|------------------|

## Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

## SW-1 Suggested Sessional Work (SW):

### Assignments:

1. Design a custom computer system tailored for video editing and graphic design tasks. Specify the key components including CPU, motherboard, memory, storage, and graphics card. Justify your component choices based on the client's requirements and workload demands.
2. Compare and contrast a chosen motherboard form factor (e.g., ATX, Mini-ITX) with others. Analyze factors such as size, expansion options, compatibility, and practical applications. Provide examples demonstrating the effectiveness of the chosen form factor in different computing environments.

## SW-2 Suggested Sessional Work (SW):

### I. Assignments:

- SSD vs. HDD Comparison
  - Compare and contrast Solid State Drives (SSDs) and Hard Disk Drives (HDDs) in terms of performance, reliability, and cost-effectiveness.
  - Present findings in a concise report, highlighting key differences and providing recommendations for selecting the appropriate storage solution.
- RAID Storage Design
  - Design a RAID storage solution tailored to meet specific data redundancy and performance requirements.

| <b>03CA432.5</b> | <p>Task:</p> <p>Develop troubleshooting skills for common hardware and software issues, including preventive maintenance practices, to diagnose and resolve problems and implement maintenance measures.</p> <p>Objective:</p> <p>Enhance participants' troubleshooting skills and preventive maintenance knowledge in IT systems, enabling them to apply methodologies effectively and manage IT systems for optimal performance.</p> | 03        | 05        | 03        | 11        |
| <b>Total</b>     |  | <b>12</b> | <b>23</b> | <b>15</b> | <b>50</b> |

**Legend:**      **R: Remember,**                      **U: Understand,**                      **A: Apply**

**Note.** Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

# AKS University

*Faculty of Computer Application & Information Technology and Science*

**Department of Computer Application & Information Technology**

**Curriculum of BSC (IT) (Bachelor of Science)**

(Revised as on 01 August 2023)

## **Suggested Instructional/Implementation Strategies:**

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Visit any software development company
7. Demonstration
8. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)
9. Brainstorming

## **Suggested Learning Resources:**

Textbooks:

- D Balasubramanian, Computer Installation and Servicing, Tata McGraw Hill Education Private Limited
- Mark Minasi, The Complete PC Upgrade & Maintenance Guide, BPB Publications
- Govind Rajalu, IBM PC and clones, Tata McGraw Hill Education Private Limited
- Books published by M.P. Hindi Granth Academy, Bhopal

Curriculum of BSC (IT) (Bachelor of Science)  
(Revised as on 01 August 2023)

## Semester-V

**Course Code:** OCA505

**Course Title:** WEB APPLICATION DEVELOPMENT

**Pre-requisite:** BASICS OF PROGRAMMING & INTERNET

**Rationale:** The purpose of the Web Technologies course is to build the skills students will need as web designers. Web designers understand the principles of web technology and design as well as web design principles. In Web Technologies, students will build their technology skills using scripting with state-of-the-art web design software.

### Course Outcomes:

On successful completion of this course, the students will be able to:

0CA505.1 Understand basics of Internet, World Wide Web(WWW), Client-server Computing and have information of various Protocols.

0CA505.2 Have Knowledge of various web browsers, familiarize with Java scripting, Client side scripting language, Web server Architecture, Database connectivity (DBC) and ODBC

0CA505.3 Have knowledge of HTML, it's essential tags, Attributes, Text styles, Links to External Documents and different sections of a HTML page.

0CA505.4 Develop skills to generate HTML and DHTML page and have knowledge of Java Script assisted style sheets (JSSS)

0CA505.5 Have knowledge of Objects, Methods, Events and Functions and various types of text, styles and be able to relate JavaScript to DHTML

### Scheme of Studies:

| Board of Study    | Course Code | Course Title                | Scheme of studies (Hours/Week) |    |    |    | Total Study Hours (CI+LI+SW+SL) | Total Credits (C) |
|-------------------|-------------|-----------------------------|--------------------------------|----|----|----|---------------------------------|-------------------|
|                   |             |                             | CI                             | LI | SW | SL |                                 |                   |
| Skill Enhancement | OCA505      | Web Application Development | 4                              | 0  | 1  | 1  | 6                               | 4                 |

**Legend:**

- CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),
- LI:** Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)
- SW:** Sessional Work (includes assignment, seminar, mini project etc.),
- SL:** Self Learning,
- C:** Credits.

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

**OCA505.1: Understand basics of Internet, World Wide Web (WWW), Client server computing and have information of various Protocols.**

#### Approximate Hours

| Item  | AppX Hrs |
|-------|----------|
| CI    | 12       |

### SW-1 Suggested Sessional Work (SW):

- a. **Assignments:**
  - i. Explain basic terminologies used in internet.
  - ii. Explain various types of protocols.
- b. **Mini Project: None**
- c. **Other Activities (Specify):**  
Describe client server Architecture.

**OCA505.2: Students will have Knowledge of various web browsers, familiarize with Java scripting, Client side scripting language, Web server Architecture, Database connectivity(DBC) and ODBC.**

### Approximate Hours

### SW-2 Suggested Sessional Work (SW):

#### a. Assignments:

- i. Explain client-side scripting VBScript and JavaScript.
- ii. Explain web database connectivity using DBC and ODBC.

#### b. Mini Project:

Create an image mapping.

**OCA505.3: Students will have knowledge of HTML, it's essential tags, Attributes, Text styles, Links to External Documents and different sections of an HTML page.**

### Approximate Hours

| Item  | AppX Hrs |
|-------|----------|

Learning various attributes of HTML tags.</p> <p>2. Learning online HTML Editors.</p> |

### SW-3 Suggested Sessional Work (SW):

#### a. Assignments:

- i. Explain basic HTML tags and their properties.
- ii. Create an HTML page that contains a selection box with a list of 5 countries.

#### b. Mini Project:

- iii. Create an admission form using HTML tags.

#### c. Other Activities (Specify):

Use of latest editors for web development like. VS Code, Notepad++ etc.

**BSC (IT)\_WT .4: Students will develop skills to generate HTML and DHTML page and have knowledge of Java Script assisted style sheets (JSSS)**

(Revised as on 01 August 2023)

can also design different tasks as per requirement, for end semester assessment.

### Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Visit to software industry
7. Demonstration
8. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)
9. Brainstorming

### Suggested Learning Resources:

#### A. Books:

| S. No. | Title   | Author  | Publisher                               | Edition & Year |
|--------|---|---|---|----------------|
| 1      | Beginning PHP5, Apache, and MySQL Web Development   | Elizabeth Naramore, Jason Gerner, Yann Le Scouarnec, Jeremy Stolz | Glass Wrox Publication                  | 2005           |
| 2      | Beginning HTML, XHTML, CSS, and JavaScript 2010     | Jon Duckett   | Wiley Publishing                        | 2010           |
| 3      | Web Technologies, Black Book, Dream Tech Press 2010 | Kogent  | Learning Solutions Inc Dream Tech Press | 2010           |
| 4      | HTML, XHTML and CSS Bible                           | Bryan Pfaffenberger, Steven M. Schafer, Chuck White               | John Wiley & Sons                       | 2004           |

### Curriculum Development Team

1. Dr. Akhilesh A. Wao, HOD, Department of Computer Science and Engineering.
2. Dr. Pramod Singh, Assistant Professor, Department of Computer Science and Engineering.
3. Ms. Shruti Gupta, Assistant Professor, Department of Computer Science and Engineering.
4. Ms. Pragya Shrivastava, Assistant Professor, Department of Computer Science and Engineering.
5. Mr. Lokendra Gaur, Assistant Professor, Department of Computer Science and Engineering.
6. Mr. Vinay Kumar Dwivedi, Assistant Professor, Department of Computer Science and Engineering.
7. Dr. Pinki Sharma, Assistant Professor, Department of Computer Science and Engineering.

# A K S University

Faculty of Computer Application & Information Technology and Science

Department of Computer Application & Information Technology

Curriculum of BSC (IT) (Bachelor of Science)

(Revised as on 01 August 2023)

## Semester-V

**Course Code:** 01CA512

**Course Title:** Computer Network and Security

**Pre-requisite:** Student should have basic knowledge of computer Network

**Rationale:** The importance of cybersecurity in the digital world is immense. It is because the volume and sophistication of cyberattacks are constantly increasing. As our dependence on technology grows, so does our vulnerability to these attacks. Cybersecurity helps to protect our data and systems from these threats

### Course Outcomes:

01CA512.1: Understand Computer Networks concepts and its uses.

01CA512.2: Understand Network Technologies and protocols.

01CA512.3: Describe network components.

01CA512.4: Use suitable network components transmission media in internal and external Networking.

CO101.5: Understand basic principles of information security and its need.

### Scheme of Studies:

| Board of Study | Course Code | Course Title                  | Scheme of studies(Hours/Week) |    |    |    | Total Credits (C) |                                 |
|----------------|-------------|-------------------------------|-------------------------------|----|----|----|-------------------|---------------------------------|

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

#### 01CA512.1: Understand Computer Networks concepts and its uses

## Suggestion for End Semester Assessment

### Suggested Specification Table (For ESA)

| CO    | Unit Titles   | Marks Distribution |    |    | Total Marks |
|-------|---|--------------------|----|----|-------------|
|       |   | R                  | U  | A  |             |
| CO-1  | Introduction to Computer Networks and networking elements | 03                 | 02 | 03 | 08          |
| CO-2  | Data Communication  | 03                 | 01 | 05 | 09          |
| CO-3  | Routing, Transport and Application                        | 03                 | 07 | 02 | 12          |
| CO-4  | Cyber Security  | 03                 | 05 | 05 | 13          |
| CO-5  | Network Security  | 03                 | 02 | 03 | 08          |
| Total |   | 15                 | 17 | 18 | 50          |

**Legend:**      **R: Remember,**      **U: Understand,**      **A: Apply**

The end of semester assessment for autonomous system for AI and DS will be held with written examination of 50 marks

**Note.** Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

### Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Demonstration
7. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)
8. Brainstorming

#### A. Books:

Curriculum of BSC (IT) (Bachelor of Science)  
(Revised as on 01 August 2023)

## Semester-V

**Course Code:** 05CA521  
**Course Title:** Multimedia And Animation  
**Pre- requisite:** Basic knowledge of computers

**Rationale:** The aim of the course is to introduce to the field of Multimedia with emphasison its use to solve real world problems for which solutions are difficult to express using the traditional algorithmic approach. It explores the essential theory behind methodologies fordeveloping systems that can create new Multimedia technologies like video editing, animation, image editing.

### Course Outcomes:

- 05CA521.1: Demonstrate knowledge of the fundamental principles of multimedia.
- 05CA521.2: Apply Fonts and image fundamentals.
- 05CA521.3: Fundamentals of Audio and Video
- 05CA521.4: Familiarize knowledge representation in Animation.
- 05CA521.5: Comprehend the use of 2D and 3D Animation.

### Scheme of Studies:

| Board of Study | Course Code | Course Title             | Scheme of studies(Hours/Week) |    |    |    |                                 | Total Credits (C) |
|----------------|-------------|--------------------------|-------------------------------|----|----|----|---------------------------------|-------------------|
|                |             |                          | CI                            | LI | SW | SL | Total Study Hours (CI+LI+SW+SL) |                   |
| DSE            | 05CA521     | Multimedia And Animation | 4                             | 0  | 1  | 1  | 6                               | 4                 |

**Legend:** **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),  
**LI:** Laboratory Instruction (Includes Practical performances in laboratory workshop,field or other locations using different instructional strategies)  
**SW:** Sessional Work (includes assignment, seminar, mini project etc.),  
**SL:** Self Learning,  
**C:** Credits.

**Note:** SW & SL has to be planned and performed under the continuous

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

05CA521.1: Demonstrate knowledge of the fundamental principles of multimedia.

### Approximate Hours

The end of semester assessment for Introduction to Portland cement will be held with written examination of 50 marks

**Note.** Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks.

Teachers can also design different tasks as per requirement, for end semester assessment.

## Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Visit to cement plant
7. Demonstration
8. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT,Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)
9. Brainstorming

## Suggested Learning Resources:

### A. Books:

 Curriculum of BSC (IT) (Bachelor of Science)  
 (Revised as on 01 August 2023)

## Semester-V

**Course Code:** 05CA522  
**Course Title:** Design and Analysis of Algorithms  
**Pre-requisite:** Data Structures and

**Rationale:** Study of this subject help students to understand different Problem-solving skills like divide and conquer, Dynamic Programming, Greedy Strategy and Back Tracking. These problem-solving skills will develop intelligence in student to solve real time problems of society and Industry.

### Course Outcomes:

- CO.1. Demonstrate knowledge of Graph and its applications.
- CO.2. Apply greedy approach and Huffman coding.
- CO.3. Use various divide and conquer algorithm and recurrence relation
- CO.4. Familiarize with the dynamic programming approach
- CO.5. Comprehend the use of concept of computation and network flow.

### Scheme of Studies:

| Board of Study | Course Code | Course Title                      | Scheme of studies(Hours/Week) |    |    |    |                                 | Total Credits (C) |
|----------------|-------------|-----------------------------------|-------------------------------|----|----|----|---------------------------------|-------------------|
|                |             |                                   | CI                            | LI | SW | SL | Total Study Hours (CI+LI+SW+SL) |                   |
| DES            | 05CA522     | Design and analysis of algorithms | 4                             | 0  | 1  | 1  | 6                               | 4                 |

**Legend:** **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) And others),

**LI:** Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations Using different instructional strategies)

**SW:** Sessional Work (includes assignment, seminar, mini project etc.),

**SL:** Self-Learning,

**C:** Credits.

**Note:** SW & SL has to be planned and performed under the continuous guidance And feedback of teacher to ensure outcome of Learning.

### Scheme of Assessment:

## Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

**05CA522.1:** Demonstrate knowledge of Graph and its applications.

# A K S University

Faculty of Engineering and Technology

Department of Computer Science & Engineering

Curriculum of B.Tech. (Computer Science & Engineering) Program

(Revised as on 01 August 2023)

## Semester-V

**Course Code:** 06CA552

**Course Title:** Field Project/Internship/Seminar/Workshop

**Pre-requisite:** Student should have knowledge of programming languages, Software Engineering, and Many more tools and framework.

- Rationale:**
- To apply the knowledge and skills learnt in previous semesters, to solve real life industrial / engineering / professional problems.
  - To modify/ improve the existing engineering / professional systems.
  - To develop systems / components / methods / processes / resources to cater the needs of the nearby small scale / medium industry.
  - To learn to solve real life engineering / professional problems which often have many aspects to be considered and addressed.

### Course Outcomes:

06CA552.1: - The student will be able to prepare a detailed project plan for solving any real-life related engineering / technical / professional / industrial problem.

06CA552.2: - The student will be able to implement the project plan and manage the project.

06CA552.3: - The student will be able to present the completed project work.

### Scheme of Studies:

| Board of Study | Course Code | Course Title                              | Scheme of studies (Hours/Week) |    |    |    | Total Study Hours (CI+LI+SW+SL) | Total Credits (C) |
|----------------|-------------|---|--------------------------------|----|----|----|---------------------------------|-------------------|
|                |             |   | CI                             | LI | SW | SL |                                 |                   |
| Project        | 06CA552     | Field Project/Internship/Seminar/Workshop | 0                              | 4  | 0  | 0  | 4                               | 2                 |

The Course on Project Work consists of five phases: -

|   | Description of phases   | Learn Hrs. |
|---|---|------------|
| 1 | Literature / industry's need survey and finalization of topic / title | 15 Hrs     |
| 2 | Detailed planning of the project work                                 |            |
| 3 | Implementing the detailed project plan                                | 60 Hrs     |
| 4 | Managing the project activities                                       |            |
| 5 | Reporting of the project work output/outcome / prototype              | 15 Hrs     |
|   | Total   | 90 Hrs     |

# A K S University

*Faculty of Computer Application & Information Technology and Science*  
**Department of Computer Application & Information Technology**  
**Curriculum of BSC (IT) (Bachelor of Science)**  
(Revised as on 01 August 2023)

## **General Guidelines for Project Work**

- The project topics should be related to concerned branch of engineering / profession, but should not be the exact content of the curriculum taught in the discipline.
- Student's project topics should be preferably 'real life' topics. It means the project topics should have substantial element of uncertainty, complexity and multi-disciplinary-ness which can be coped up by the students. These elements offer opportunities to students to apply engineering/ professional knowledge in real life settings, solve real life problems and to take real life decisions. As a project guide, concerned teacher should ensure these by suitably altering / framing / reframing the statement of topic / title.
- The project topics should be such that students can get opportunity to refer IS codes, Manuals, Handbooks, norms and standards, opportunity to conduct standard tests, and opportunity to operate modern laboratory equipment's following SOPs.
- For student's interest, active participation and ownership in the project work, their self-motivation is necessary. Therefore, students should be actively involved in finalizing the topic of project.
- Students should be asked to conduct a brief review of literature for problems and issues in their engineering / professional areas of interest, where they think they can contribute effectively. The project guide should facilitate them in this regard, through his/her expertise and experience.
- Every student group should be asked to propose at least three topics of their interest. The topics proposed by student project groups should be assessed by the facilitator-teacher on following three criteria: -
  - **The work on the topic should be theoretically and practically feasible.**
  - **The project work on the topic should be completed within approx. Three and half months.**
  - **Availability of required resources should be certain. Cost of project work should also be bearable.**
- Normally, students' project works should be carried out in small groups (1 to 2 students).
- All faculty members of department should be engaged as project guides. Every faculty member should be project guide of at least one student project group.
- Normally, project guides should be assigned to the students through lottery system and students under each faculty should be asked to form their small groups.

Faculty of Computer Application & Information Technology and Science

Department of Computer Application & Information Technology

Curriculum of BSC (IT) (Bachelor of Science)

(Revised as on 01 August 2023)

## Semester-VI

**Course Code:** 01CA612

**Course Title:** Linux Operating System

**Pre-requisite:** Student should have basic knowledge of Operating System.

**Rationale:** The aim of the course is teaching the students to understand the basic principles of Linux OS and also help them understand its utilities. The syllabus includes shell programming, a control Section, and general coding. Linux OS supports programming in various languages like C, C++, Java, etc.

### Course Outcomes:

01CA612.1: Student will understand the basic concepts of Linux OS.

01CA612.2: Student will learn how to install and configure Linux on physical or virtual machines.

01CA612.3: Student will acquire proficiency in using the Linux command-line interface

01CA612.4: Student will learn how to manage user accounts and groups on a Linux system.

01CA612.5: Student will understand Linux security mechanisms

### Scheme of Studies:

| Board of Study | Course Code | Course Title           | Scheme of studies(Hours/Week) |    |    |    |                                 | Total Credits (C) |
|----------------|-------------|------------------------|-------------------------------|----|----|----|---------------------------------|-------------------|
|                |             |                        | CI                            | LI | SW | SL | Total Study Hours (CI+LI+SW+SL) |                   |
| Major          | 01CA612     | Linux Operating System | 4                             | 4  | 1  | 1  | 10                              | 6                 |

**Legend:** **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),

**LI:** Laboratory Instruction (Includes Practical performance laboratory workshop, field or other locations using different instructional strategies)

**SW:** Sessional Work (includes assignment, seminar, mini project etc.),

**SL:** Self Learning,

**C:** Credits.

**Note:** SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

### Scheme of Assessment:

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

01CA612.1: Student will understand the basic concepts of Linux OS.

### Approximate Hours

| Item  | Appx. Hrs. |
|-------|------------|

**SW-1 Suggested Sessional Work (SW):**

- a. Assignments:
  - (i) Describe basic architecture of Linux.
- b. Presentation
- c. Pictorial representation of Installation of Linux.

01CA612.2: Student will learn how to install and configure Linux on physical or virtual machines.

**Approximate Hours**

| Item  | Appx. Hrs. |
|-------|------------|
| CI    | 12         |
| LI    | 12         |
| SW    | 1          |
| SL    | 1          |
| Total | 14         |

### Suggestion for End Semester Assessment

### Suggested Specification Table (For ESA)

| CO    | Unit Titles | Marks Distribution |    |    | Total Marks |
|-------|-------------|--------------------|----|----|-------------|
|       |             | R                  | U  | A  |             |
| CO-1  | Unit-1      | 03                 | 02 | 03 | 08          |
| CO-2  | Unit-2      | 03                 | 01 | 05 | 09          |
| CO-3  | Unit-3      | 03                 | 07 | 02 | 12          |
| CO-4  | Unit-4      | 03                 | 05 | 05 | 13          |
| CO-5  | Unit-5      | 03                 | 02 | 03 | 08          |
| Total |             | 15                 | 17 | 18 | 50          |

**Legend: R: Remember, U: Understand, A: Apply**

The end of semester assessment for autonomous system for AI and DS will be held with written examination of 50 marks

**Note.** Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

### Suggested Instructional/Implementation Strategies:

# A K S University

*Faculty of Computer Application & Information Technology and Science*

**Department of Computer Application & Information Technology**

**Curriculum of BSC (IT) (Bachelor of Science)**

(Revised as on 01 August 2023)

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Demonstration
7. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)
8. Brainstorming

## **Suggested Learning Resources:**

Books:

| <b>S. No.</b> | <b>Title</b>           | <b>Author</b> | <b>Publisher</b> | <b>Edition &amp; Year</b> |
|---------------|------------------------|---------------|------------------|---------------------------|
| 1             | Unix shell programming | Y Kanetkar.   | BPB Publications | 6th edition               |

|  |   |                  |             |
|--|---|------------------|-------------|
| The 'C' Odyssey Unix –The open Boundless C | Meeta Gandhi, Tilak Shetty and Rajiv Shah | BPB Publications | 3rd Edition |
|--|---|------------------|-------------|

## **Curriculum Development Team**

1. Dr. Akhilesh A. Wao, HOD, Department of Computer Science and Engineering.
2. Dr. Pramod Singh, Associate Professor, Department of Computer Science and Engineering.
3. Ms. Shruti Gupta, Assistant Professor, Department of Computer Science and Engineering.
4. Ms. Pragya Shrivastava, Assistant Professor, Department of Computer Science and Engineering.
5. Mr. Lokendra Gaur, Assistant Professor, Department of Computer Science and Engineering.
6. Mr. Vinay Kumar Dwivedi, Assistant Professor, Department of Computer Science and Engineering.
7. Dr. Pinki Sharma, Assistant Professor, Department of Computer Science and Engineering.
8. Ms. Pushpa Kushwaha, Assistant Professor, Department of Computer Science and Engineering.

## COs, POs and PSOs Mapping

**Course Title: B.Sc. (IT)**

**Course Code: 01CA612**

**Course Title: Linux Operating System**

Department of Computer Application & Information Technology

Curriculum of BSC (IT) (Bachelor of Science)

(Revised as on 01 August 2023)

## Semester-VI

**Course Code:** 05CA623-A

**Course Title:** Software Engineering

**Pre- requisite:** Basics knowledge of programming

**Rationale:** Software engineering is important because it helps create high-quality Software that meets user needs and is easy to maintain.

### Course Outcomes:

On successful completion of this course, the students will be able to:

**05CA623-A.1** Students should be familiar with various phases of the software development process, including requirements analysis, design, implementation, testing, deployment, and maintenance.

**05CA623-A.2** Learn how to design software systems, considering factors such as modularity, scalability, and maintainability. Understand architectural patterns and their applications.

**05CA623-A.3** Develop strong programming skills in relevant languages and frameworks. This includes understanding data structures, algorithms, and design patterns.

**05CA623-A.4** Understand the challenges and strategies associated with maintaining and evolving software systems over time. Understand the importance of quality assurance in software development.

**05CA623-A.5** Acquire basic project management skills, including estimation, planning, and tracking progress.

### Scheme of Studies:

| Board of Study | Course Code | Course Title         | Scheme of studies(Hours/Week) |    |    |    | Total Study Hours (CI+LI+SW+SL) | Total Credits (C) |
|----------------|-------------|----------------------|-------------------------------|----|----|----|---------------------------------|-------------------|
|                |             |                      | CI                            | LI | SW | SL |                                 |                   |
| DSE            | 05CA623-A   | SOFTWARE ENGINEERING | 4                             | 0  | 2  | 1  | 7                               | 4                 |

**Legend:** **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),

**LI:** Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

**SW:** Sessional Work (includes assignment, seminar, mini project etc.),

**SL:** Self Learning,

**C:** Credits.

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

**S3-ITEC4Q.1 Students should be familiar with various phases of the software development process, including requirements analysis, design, implementation, testing, deployment, and maintenance.**

### Approximate Hours

| Item  | AppX Hrs |
|-------|----------|

Learning about various SDLC models.</p> |
|---|--|--|---|

### SW-1 Suggested Sessional Work (SW):

**c. Assignments:**

- i. Critically evaluate spiral model.
- ii. Explain agile development model.

**d. Mini Project:**

Compare various software development models.

**e. Other Activities (Specify):**

Find out the characteristics of a good software.

**05CA623-A.2 Learn how to design software systems, considering factors such as modularity, scalability, and maintainability. Understand architectural patterns and their applications.**

**Legend:**      **R: Remember,**                      **U: Understand,**                      **A: Apply**

The end of semester assessment for software engineering will be held with written examination of 50 marks

**Note.** Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

### Suggested Instructional/Implementation Strategies:

- A. Improved Lecture
- B. Tutorial
- C. Case Method
- D. Group Discussion
- E. Role Play
- F. Visit any software development company
- G. Demonstration
- H. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)
- I. Brainstorming

### Suggested Learning Resources:

#### A. Books:

(Revised as on 01 August 2023)

## Semester-VI

**Course Code:** 05CA623-B  
**Course Title:** Mobile Application Development  
**Pre-requisite:** Student should have basic knowledge of Computer fundamentals.

**Rationale:** The study of this subject will develop understanding of Android core concepts. Android is a platform that is best suited for mobile devices. All these concepts will help students to develop elementary internet applications using AND RO ID that solve real-world problems.

### Course Outcome:

- 05CA623-B -1** Able to use an integrated development environment to write, compile, run, and test simple Object-oriented Android programs.
- 05CA623-B -2** Understand and apply the concepts of Inheritance and Interfaces.
- 05CA623-B -3** Learn and apply applet programming to create basic web pages.
- 05CA623-B -4** Understand the Android event handling model and apply it to create interactive web pages.
- 05CA623-B -5** Able to implement I/O operations and connect to database to solve real-world problems.

### Scheme of Studies:

| Board of Study | Course Code | Course Title                   | Scheme of studies (Hours/Week) |    |    |    |                                 | Total Credits(C) |
|----------------|-------------|--------------------------------|--------------------------------|----|----|----|---------------------------------|------------------|
|                |             |                                | CI                             | LI | SW | SL | Total Study Hours(CI+LI+S W+SL) |                  |

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

#### 05CA623-B.1 Able to use an integrated development environment to Mobile devices

| Item  | AppXHrs |
|-------|---------|
| CI    | 8       |
| LI    | 0       |
| SW    | 2       |
| SL    | 2       |
| Total | 12      |

| Session Outcomes (SOs) | Laboratory Instruction (LI) | Classroom Instruction (CI) | Self-Learning (SL) |

### SW-1 Suggested Sessional Work (SW):

a. Assignments:

- i. Create a program in Android to check the input no is prime or not.
- ii. Create a program in Android to print a factorial of given no.

b. Mini Project:

- i. Create a program in Android to grocery store.

**05CA623-B.2** Understand and apply the concepts of Android architecture.

#### Approximate Hours

| Item  | AppXHrs |
|-------|---------|
| CI    | 16      |
| LI    | 0       |
| SW    | 2       |
| SL    | 2       |
| Total | 20      |

## SW-1 Suggested Sessional Work (SW):

a. Assignments:

i. Discuss the concept of Java interoperability in the context of Android development

ii. Describe the process of creating a new Android project.

b. Mini Project:

Create a program in Android to employee management.

**05CA623-B.3** Learn and apply applet programming to create basic Android software development.

Department of Computer Application & Information Technology

Curriculum of BSC (IT) (Bachelor of Science)

(Revised as on 01 August 2023)

## Semester-VI

**Course Code:** 05CA621-A

**Course Title:** AI and Data science

**Pre-requisite:** Basic knowledge of Data Structures, Data Management and Matrices.

**Rationale:** The purpose of this course is to provide an introduction to Artificial Intelligence (AI) and its application in solving real-world problems that are hard to articulate using traditional algorithmic approaches. The course covers the fundamental concepts behind different methodologies for creating intelligent systems that can deal with uncertainty, learn from experience, and apply problem-solving strategies inspired by nature.

### Course Outcomes:

05CA621-A.1: Demonstrate knowledge of the fundamental principles of Artificial Intelligence.

05CA621-A.2: Apply different searching techniques.

05CA621-A.3: Demonstrate knowledge of Data Science.

05CA621-A.4: Familiarize knowledge representation in Data science.

05CA621-A 5: Comprehend the use of Python

### Scheme of Studies:

| Board of Study | Course Code | Course Title        | Scheme of studies(Hours/Week) |    |    |    | Total Study Hours<br>(CI+LI+SW+SL+T) | Total Credits<br>(C) |
|----------------|-------------|---------------------|-------------------------------|----|----|----|--------------------------------------|----------------------|
|                |             |                     | CI                            | LI | SW | SL |                                      |                      |
| DSE            | 05CA621-A   | AI and Data Science | 4                             | 0  | 2  | 2  | 8                                    | 4                    |

**Legend:** **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) And Tutorial (T) and others),

**LI:** Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

**SW:** Sessional Work (includes assignment, seminar, mini project etc.),

**SL:** Self Learning,

**C:** Credits.

**Note:** SW & SL has to be planned and performed under the continuous guidance and feedback of teachers to ensure the outcome of Learning.

| DSE            | 05CA621-A   | AI and Data science | 15                           | 20                             | 5            | 5              | 5                     | 50                    | 50                            | 100                   |

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

#### 05CA621-A.1: Demonstrate knowledge of the fundamental principles of Artificial Intelligence.

#### Approximate Hours

| Item  | Appx. Hrs. |
|-------|------------|
| CI    | 10         |
| LI    | 0          |
| SW    | 2          |
| SL    | 2          |
| Total | 14         |

Curriculum of BSC (IT) (Bachelor of Science)  
(Revised as on 01 August 2023)

## Semester-VI

**Course Code:** 05CA622-A  
**Course Title:** Computer Graphics  
**Pre-requisite:** Basics of Multimedia and Mathematics.

**Rationale:** The aim of the course is to introduce to the field of Computer Graphics with emphasis on its use to solve real world problems for which solutions are difficult to express using the traditional algorithmic approach. It explores the essential theory behind methodologies for developing systems that demonstrate graphical behavior.

### Course Outcomes:

- 05CA622-A.1:** Demonstrate knowledge of the fundamental principles of Computer graphics.
- 05CA622-A .2:** Apply scan Conversion algorithms.
- 05CA622-A.3:** Use various filled area primitives.
- 05CA622-A.4:** Familiarize knowledge of clipping.
- 05CA622-A.5:** Comprehend the use of animation.

### Scheme of Studies:

| Board of Study | Course Code | Course Title      | Scheme of studies(Hours/Week) |     |     |     | Total Credits(C) |                                 |
|----------------|-------------|-------------------|-------------------------------|-----|-----|-----|------------------|---------------------------------|
|                |             |                   | C I                           | L I | S W | S L |                  | Total Study Hours (CI+LI+SW+SL) |
| DSE            | 05CA622-A   | Computer Graphics | 4                             | 0   | 1   | 1   | 6                | 4                               |

**Legend:** **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),  
**LI:** Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)  
**SW:** Sessional Work (includes assignment, seminar, mini project etc.),  
**SL:** Self Learning,  
**C:** Credits.

**Note:** SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

**05CA622-A.1:** Demonstrate knowledge of the fundamental principles of Computer Graphics.

### Approximate Hours

| Item  | AppX Hrs |
|-------|----------|
| CI    | 15       |
| LI    | 0        |
| SW    | 2        |

# A K S University

Faculty of Computer Application & Information Technology and Science

Department of Computer Application & Information Technology

Curriculum of BSC (IT) (Bachelor of Science)

(Revised as on 01 August 2023)

## Assignments:

- i. Questions based on clipping.
- ii. Numerical based on clipping.
- iii. Questions based on Shading.

**05CA622-A.5:** Comprehend the use of animation.

### Approximate Hours

| Item  | AppX Hrs |
|-------|----------|
| CI    | 6        |
| LI    | 0        |
| SW    | 2        |
| SL    | 1        |
| Total | 9        |

| Session Outcomes (SOs)   | Laboratory Instruction (LI) | Class room Instruction (CI)   | Self-Learning (SL)   |
|--|-----------------------------|---|--|
| <p><b>SO5.1</b> Understand the Concept of Animation.</p> <p><b>SO5.2</b> Demonstrate the use of Animation.</p> |                             | <p><b>Unit-5.0 Animation.</b></p> <p>5.1. Animation, Application Areas of Animation,</p> <p>5.2. Animation Functions</p> <p>5.3. 3D Computer Graphics: Three-Dimensional Graphics,</p> <p>5.4. Three Dimensional Transformations, Scaling, Rotation, Rotation about, Arbitrary Axis, Inverse Transformations, Reflection,</p> <p>5.5. Shearing, Hidden Surfaces: Hidden Surface Removal, Back Face Removal Algorithm, Z-Buffer Algorithm</p> <p>5.6. Shearing, Hidden Surfaces: Hidden Surface Removal, Back Face Removal Algorithm, Z-Buffer Algorithm</p> | <p>1. Compare and analyze all Hidden Removal techniques.</p> |

SW-1 Suggested Sessional Work (SW):

## Assignments:

- i. Different types of hidden removal techniques.
- ii. Use of Painter's algorithm.

# A K S University

Faculty of Engineering and Technology

Department of Computer Science & Engineering

Curriculum of B.Tech. (Computer Science & Engineering) Program

(Revised as on 01 August 2023)

## Semester-VI

**Course Code:** 06CA652

**Course Title:** Field Project/Internship/Seminar/Workshop

**Pre-requisite:** Student should have knowledge of programming languages, Software Engineering, and Many more tools and framework.

### Rationale:

- To apply the knowledge and skills learnt in previous semesters, to solve real life industrial / engineering / professional problems.
- To modify/ improve the existing engineering / professional systems.
- To develop systems / components / methods / processes / resources to cater the needs of the nearby small scale / medium industry.
- To learn to solve real life engineering / professional problems which often have many aspects to be considered and addressed.

### Course Outcomes:

06CA652.1: - The student will be able to prepare a detailed project plan for solving any real-life related engineering / technical / professional / industrial problem.

06CA652.2: - The student will be able to implement the project plan and manage the project.

06CA652.3: - The student will be able to present the completed project work.

### Scheme of Studies:

| Board of Study | Course Code | Course Title                              | Scheme of studies (Hours/Week) |    |    |    | Total Study Hours (CI+LI+SW+SL) | Total Credits (C) |
|----------------|-------------|---|--------------------------------|----|----|----|---------------------------------|-------------------|
|                |             |   | CI                             | LI | SW | SL |                                 |                   |
| Project        | 06CA652     | Field Project/Internship/Seminar/Workshop | 0                              | 4  | 0  | 0  | 4                               | 2                 |

The Course on Project Work consists of five phases: -

|   | Description of phases   | Learn Hrs. |
|---|---|------------|
| 1 | Literature / industry's need survey and finalization of topic / title | 15 Hrs     |
| 2 | Detailed planning of the project work                                 |            |
| 3 | Implementing the detailed project plan                                | 60 Hrs     |
| 4 | Managing the project activities                                       |            |
| 5 | Reporting of the project work output/outcome / prototype              | 15 Hrs     |
|   | Total   | 90 Hrs     |

# A K S University

*Faculty of Computer Application & Information Technology and Science*  
**Department of Computer Application & Information Technology**  
**Curriculum of BSC (IT) (Bachelor of Science)**  
(Revised as on 01 August 2023)

## **General Guidelines for Project Work**

- The project topics should be related to concerned branch of engineering / profession, but should not be the exact content of the curriculum taught in the discipline.
- Student's project topics should be preferably 'real life' topics. It means the project topics should have substantial element of uncertainty, complexity and multi-disciplinary-ness which can be coped up by the students. These elements offer opportunities to students to apply engineering/ professional knowledge in real life settings, solve real life problems and to take real life decisions. As a project guide, concerned teacher should ensure these by suitably altering / framing / reframing the statement of topic / title.
- The project topics should be such that students can get opportunity to refer IS codes, Manuals, Handbooks, norms and standards, opportunity to conduct standard tests, and opportunity to operate modern laboratory equipment's following SOPs.
- For student's interest, active participation and ownership in the project work, their self-motivation is necessary. Therefore, students should be actively involved in finalizing the topic of project.
- Students should be asked to conduct a brief review of literature for problems and issues in their engineering / professional areas of interest, where they think they can contribute effectively. The project guide should facilitate them in this regard, through his/her expertise and experience.
- Every student group should be asked to propose at least three topics of their interest. The topics proposed by student project groups should be assessed by the facilitator-teacher on following three criteria: -
  - **The work on the topic should be theoretically and practically feasible.**
  - **The project work on the topic should be completed within approx. Three and half months.**
  - **Availability of required resources should be certain. Cost of project work should also be bearable.**
- Normally, students' project works should be carried out in small groups (1 to 2 students).
- All faculty members of department should be engaged as project guides. Every faculty member should be project guide of at least one student project group.
- Normally, project guides should be assigned to the students through lottery system and students under each faculty should be asked to form their small groups.

# A K S University

Faculty of Computer Application & Information Technology and Science

Department of Computer Application & Information Technology

BSc (Bachelor of Science [Information Technology])

(Revised as on 01 August 2023)

Semester-VII

**Course Code:** 06RM701

**Course Title :** Research Methodology

**Pre-requisite:** Student should have basic knowledge of research and Statistics.

**Rationale:** This course will help them to select an appropriate research design. With the help of this course, students will be able to take up and implement a research project/ study. The course will also enable them to collect the data, edit it properly and analyze it accordingly.

### Course Outcomes:

**06RM701.1:** Understand research problem formulation.

**06RM701.2:** Analyze research related information and Follow research ethics

**06RM701.3:** Understand that today's world is controlled by Computer, Information Technology, but tomorrow world will be ruled by ideas, concept, and creativity.

**06RM701.4:** Understanding that when IPR would take such important place in growth of Individuals & nation, it is needless to emphasis the need of information about Intellectual Property Right to be promoted among students in general & engineering In particular.

**06RM701.5:** IPR protection incentivizes inventors to invest in R&D, leading to new and improved products, economic growth, and social benefits.

### Scheme of Studies:

| Board of Study | Course Code | Course Title         | Scheme of studies(Hours/Week) |    |    |    | Total Study Hours<br>(CI+LI+SW+SL) | Total Credit (C) |
|----------------|-------------|----------------------|-------------------------------|----|----|----|------------------------------------|------------------|
|                |             |                      | CI                            | LI | SW | SL |                                    |                  |
| Research       | 06RM701     | Research Methodology | 4                             | 0  | 2  | 1  | 6                                  | 4                |

**Legend:**

**CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),

**LI:** Laboratory Instruction (Includes Practical performance laboratory workshop, field or other locations using different instructional strategies)

**SW:** Sessional Work (includes assignment, seminar, mini project etc.),

**SL:** Self Learning,

**C:** Credits.

**Note:** SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

| Research       | 06RM701     | Research Methodology | 15   | 20  | 5                | 5                            | 5                     | 50                            | 50                      | 100         |

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

**CO1:** Understand research problem formulation.

### Approximate Hours

| Item  | Appx Hrs |
|-------|----------|
| CI    | 11       |
| LI    | 0        |

BSc (Bachelor of Science [Information Technology])

(Revised as on 01 August 2023)

|       |        |    |    |    |    |
|-------|--------|----|----|----|----|
| CO-2  | Unit-2 | 03 | 01 | 05 | 09 |
| CO-3  | Unit-3 | 03 | 07 | 02 | 12 |
| CO-4  | Unit-4 | 03 | 05 | 05 | 13 |
| CO-5  | Unit-5 | 03 | 02 | 03 | 08 |
| Total |        | 15 | 17 | 18 | 50 |

**Legend: R: Remember, U: Understand, A: Apply**

The end of semester assessment for Research Methodology & IPR will be held with written examination of 50 marks

**Note.** Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

### Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Data center
7. Demonstration
8. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)
9. Brainstorming

### Suggested Learning Resources:

#### A. Books:

| S. No. | Title                                    | Author  | Publisher              | Edition & Year |
|--------|--|---|------------------------|----------------|
| 1      | Research Methodology                     | C R Kothari ,Gaurav Garg                      | New Age International  | 2023           |
| 2      | Research Methodology: Concepts And Cases | Deepak Chawla (Author), Neena Sondhi (Author) | Vikas Publishing House | May 2016       |

#### B. Alternative NPTEL/SWAYAM/MOOC Course (if any): NA

# A K S University

Faculty of Computer Application & Information Technology and Science

Department of Computer Application & Information Technology

BSc (Bachelor of Science [Information Technology])

(Revised as on 01 August 2023)

## Semester-VII

**Course Code:** 01CA711

**Course Title :** Current trends and technology

**Pre-requisite:** Basic knowledge of HTML, CSS and JAVASCRIPT.

**Rationale:** Studying this subject will help students develop an understanding of current technologies such as Blockchains, ReactJS, NodeJS, Express, and MongoDB. By learning about these technologies, students will gain insights into how various industries are using them for their products and what the current demand is. As industries are seeking full-stack developers in this era of rapid technological advancement, this study will help students become industry-ready.

### Course Outcomes:

01CA711.1: Understand Concepts of Blockchain, basic cryptocurrency, cryptocurrency benefits and Cryptographic use in cryptocurrency.

01CA711.2: Use of JavaScript knowledge to learn different types of new Frameworks available in a market that are also current industry need.

01CA711.3: Develop client-server connectivity with the use of Node JS and use of Express frameworks.

01CA711.4: Develop algorithms for text processing applications and Dynamic programming Applications.

OEC-E01 - B.5: Design Web applications using MongoDB database with NodeJS Technology in Backend.

### Scheme of Studies:

| Board of Study | Course Code | Course Title                  | Scheme of studies(Hours/Week) |    |    |    | Total Study Hours<br>(CI+LI+SW+SL) | Total Credits (C) |
|----------------|-------------|-------------------------------|-------------------------------|----|----|----|------------------------------------|-------------------|
|                |             |                               | CI                            | LI | SW | SL |                                    |                   |

Faculty of Computer Application & Information Technology and Science

Department of Computer Application & Information Technology

BSc (Bachelor of Science [Information Technology])

(Revised as on 01 August 2023)

## Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

### 01CA711.1: Understand Concepts of Block chain, basic cryptocurrency, cryptocurrency benefits, and cryptographic use in cryptocurrency.

#### Approximate Hours

| Item  | Appx. Hrs. |
|-------|------------|
| CI    | 12         |
| LI    | 12         |
| SW    | 1          |
| SL    | 1          |
| Total | 26         |

| Session Outcomes (SOs)  | Laboratory Instruction (LI)   | Classroom Instruction (CI)   | Self-Learning (SL)   |
|---|---|--|--|
| <p><b>O1.1</b> Remember basics of Blockchain concepts.</p> <p><b>SO1.2</b> Explain Bitcoin and understanding of smart contracts</p> <p><b>SO1.3</b> Differentiate between public and private Blockchain.</p> <p><b>SO1.4</b> Discuss cryptocurrency and the permission model of Blockchain.</p> <p><b>SO1.5</b> Name Security Measures in Blockchain.</p> | <p><b>LI01.</b> Create a simple block chain in JavaScript.</p> <p>Implement the data structure for blocks and the hashing function for blocks.</p> <p><b>LI02.</b> Implement a basic cryptocurrency transaction in a block chain. Create a transaction class and include it in your blockchain.</p> <p><b>LI03.</b> Implement a basic cryptocurrency transaction in a blockchain. Create a transaction class and include it in your blockchain.</p> <p><b>LI04</b> Purchase a cryptocurrency.</p> | <p><b>Unit-1.0 : Blockchain Technology</b></p> <p>1.1 Introduction to Block chain, Public Ledgers.</p> <p>1.2 Bitcoin, Smart Contracts, Block in a Block chain</p> <p>1.3 Transactions, Distributed Consensus,</p> <p>1.4 Public vs Private Block chain.</p> <p>1.5 Understanding Cryptocurrency to Block chain,</p> <p>1.6 Permissioned</p> | <p>1. Difference between public and private Blockchain</p> <p>2. Learning of different cryptographic models used in Blockchain</p> |

 BSc (Bachelor of Science [Information Technology])  
 (Revised as on 01 August 2023)

|  |   |  |  |
|--|---|--|--|
|  | <b>LI05</b> Demonstrate Hash pointer.<br><b>LI06</b> Demonstrate Merkle Tree. | Model of Block chain<br>1.7 Overview of Security aspects of Block chain; Basic Crypto Primitives.<br>1.8 Cryptographic Hash Function, Properties of a hash function<br>1.9 Hash pointer and Merkle tree.<br>1.10 Digital |  |
|  |   | Signature.<br>1.11 Public Key cryptography<br>1.12 Basic cryptocurrency  |  |

## SW-1 Suggested Sessional Work (SW):

### a. Assignments:

1. Discuss Public ledgers.
2. Discuss basic cryptocurrency and its types.
3. Explain cryptographic hash function.

### b. Other Activities (Specify):

Seminar and Tutorial

**01CA711.2: Use of JAVAScript knowledge to learn different types of new Frameworks available in market that are also current industry need.**

### Approximate Hours

| Item  | Appx. Hrs. |
|-------|------------|
| CI    | 13         |
| LI    | 12         |
| SW    | 1          |
| SL    | 1          |
| Total | 27         |

| <p><b>SO2.1</b> To Understand the basics of JavaScript and role of JavaScript in web world.</p> <p><b>SO2.2</b> Recall data types and variables in JavaScript</p>  | <p><b>LI01.</b> Write a calculator program in JAVASCRIPT</p>   | <p><b>Unit-2: Introduction to JavaScript</b></p> <p>2.1. Basics of JavaScript</p> <p>2.2. JavaScript Data Types and</p> <p>2.3. Variables, constant</p> <p>2.4. JavaScript Operators,</p> <p>2.5. JavaScript statements conditional</p> <p>2.6. Looping statements</p> | <p>1. Study of applications where JavaScript concepts are used</p> <p>2. Study of different operators and loop statements</p> |
| <p><b>SO2.3</b> Understand and recall JavaScript operators and JavaScript conditional and loop statements</p> <p><b>SO2.4</b> Use of functions in JavaScript. Learning of Arrow functions</p> <p><b>SO2.5</b> Understanding of classes and objects in JavaScript</p> | <p><b>LI02.</b> Write a program using event in JavaScript.</p> <p><b>LI03.</b> Write a program to implement dropdown in webpage using JAVASCRIPT</p> <p><b>LI04</b> WAP demonstrate Java script functions.</p> <p><b>LI05</b> WAP to demonstrate constructors in javascript.</p> <p><b>LI06</b> WAP to demonstrate Event handling in javascript.</p> | <p>2.7. 2.4 JavaScript Functions</p> <p>2.8. simple function and</p> <p>2.9. arrow functions</p> <p>2.10. classes, objects and</p> <p>2.11. constructors in JavaScript</p> <p>2.12. Document Object Model (DOM)</p> <p>2.13. Event Handling in JavaScript</p>          |   |

## SW-2 Suggested Sessional Work (SW):

### a. Assignments:

1. Discuss JavaScript features and applications in Real world.
2. Explain Event handling in JavaScript.
3. Explain DOM.

### b. Other Activities(Specify):

Seminar and Tutorial

**01CA711B.3: Apply the knowledge of JAVASCRIPT in the ReactJS framework to create front end of dynamic webpages.**

Faculty of Computer Application & Information Technology and Science

Department of Computer Application & Information Technology

BSc (Bachelor of Science [Information Technology])

(Revised as on 01 August 2023)

## Semester-VII

**Course Code:** 05CA722-A

**Course Title:** Introduction to Cyber Security

**Pre-requisite:** In order to learn Cyber Security, students must be familiar with the basics of computer science. To understand how to protect information systems from attack, it is necessary to understand how systems work.

**Rationale:** The objective of this course is to introduce Cyber Security Application of Cyber Security, pattern matching and cluster analysis is included to aware students of broad Cyber Security areas.

### Course Outcome:

05CA722-A.1: Recall the basics of Cyber Security

05CA722-A.2: Understand the cyber security threat landscape.

05CA722-A.3: Develop a deeper understanding and familiarity with various types of cyberattacks, Cyber-crimes.

05CA722-A.4: Analyse and evaluate existing legal framework and laws on cyber security.

05CA722-A.5: Analyse and evaluate the digital payment system security and remedial measures against Digital Payment frauds.

### Scheme of Studies:

| Board of Study | Course Code | Course Title                   | Scheme of studies (Hours/Week) |    |    |    | Total Study Hours(CI+LI+SW+SL) | Total Credits(C) |
|----------------|-------------|--------------------------------|--------------------------------|----|----|----|--------------------------------|------------------|
|                |             |                                | CI                             | LI | SW | SL |                                |                  |
| DSE            | 05CA722-A   | Introduction to Cyber Security | 4                              | 0  | 2  | 2  | 8                              | 4                |

**Legend: CI:** Classroom Instruction (Includes different instructional strategies i.e., Lecture (L) and Tutorial (T) and others),

**LI:** Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

**SW:** Sessional Work (includes assignment, seminar, mini project etc.)

**SL:** Self Learning.

**C:** Credits.

# A K S University

Faculty of Computer Application & Information Technology and Science  
 Department of Computer Application & Information Technology  
 BSc (Bachelor of Science [Information Technology])  
 (Revised as on 01 August 2023)

**Note:** SW&SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

## Scheme of Assessment:

### Theory

| Board of Study | Course Code | Course Title                   | Scheme of Assessment (Marks) |                                |             |                |                  |       |                               |                        |
|----------------|-------------|--------------------------------|------------------------------|--------------------------------|-------------|----------------|------------------|-------|-------------------------------|------------------------|
|                |             |                                | Progressive Assessment (PRA) |                                |             |                |                  |       | End Semester Assessment (ESA) | Total Marks (PRA+ ESA) |
|                |             |                                | Class/Homework Assignment    | Class Test 2 (2 best out of 3) | Seminar one | Class Activity | Class Attendance | Total |                               |                        |
| DSE            | 05CA722-A   | Introduction to Cyber Security | 15                           | 20                             | 5           | 5              | 5                | 50    | 50                            | 100                    |

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

#### 05CA722-A.1: Recall the basics of Cyber Security

### a. Assignments:

# A K S University

Faculty of Computer Application & Information Technology and Science  
 Department of Computer Application & Information Technology  
 BSc (Bachelor of Science [Information Technology])  
 (Revised as on 01 August 2023)

- i. Modes of digital payments- Banking Cards, Unified Payment Interface (UPI), e-Wallets, Unstructured Supplementary Service Data (USSD), Aadhar enabled payments,
- b. **Mini Project:**
  - i. Analyze real-world cybersecurity incidents.
- c. **Other Activities (Specify):**

Case Study: Explore regulations and compliance requirements.

**05CA722-A.5: Analyse and evaluate the digital payment system security and remedial measures against Digital Payment frauds.**

**Approximate hours**

| Item  | AppXHrs |
|-------|---------|
| CI    | 12      |
| LI    | 0       |
| SW    | 2       |
| SL    | 2       |
| Total | 16      |

| Session Outcomes (SOs)   | Laboratory Instruction (LI) | Classroom Instruction (CI)  | Self-Learning (SL)  |
|--|-----------------------------|---|---|
| <p><b>SO5.1</b> Understand about End Point device and Mobile phone security, Password policy,</p> <p><b>SO5.2</b> Security patch management, Data backup, Downloading and management of third party software, Device security policy,</p> <p><b>SO5.3</b> understand about Cyber Security best practices,</p> <p><b>SO5.4</b> understand to Significance of host firewall and Ant-virus,</p> |                             | <p><b>Module 5.0 Digital Devices Security , Tools and Technologies</b></p> <p>5.1 End Point device and Mobile phone security, Password policy,</p> <p>5.2 Security patch management, Data backup, Downloading and management of third-party software, Device security policy,</p> <p>5.3 Cyber Security best practices,</p> <p>5.4 Significance of host</p> | <p>1 Students, after completion of this module will be able to understand the basic security aspects related to Computer and Mobiles. They will be able to use basic tools and technologies to protect their devices.</p> |

(Revised as on 01 August 2023)

|       |  |    |    |    |    |
|-------|--|----|----|----|----|
|       | Security.  |    |    |    |    |
| CO-4  | E-Commerce and Digital Payments                  | 2  | 03 | 05 | 10 |
| CO-5  | Digital Devices Security Tools and Technologies. | -  | 05 | 05 | 10 |
| Total |  | 11 | 16 | 23 | 50 |

Legend: R: Remember, U: Understand, A: Apply

The end of semester assessment for Introduction to Cyber Security will be held with written examination of 50 marks

**Note.** Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks.

Teachers can also design different tasks as per requirement, for end semester assessment.

## Suggested Instructional/Implementation Strategies:

### Improved Lecture

1. Tutorial
2. Case Method
3. Group Discussion
4. Role Play
5. Visit to IT Industry.
6. Demonstration
7. ICTBased Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)
8. Brainstorming

## Suggested Learning Resources:

| S. No | Title | Author | Publisher | Edition & Year |
|-------|-------|--------|-----------|----------------|
| .     |       |        |           |                |

Department of Computer Application & Information Technology  
BSc (Bachelor of Science [Information Technology])  
(Revised as on 01 August 2023)

## Semester-VII

**Course Code:** 05CA722-B

**Course Title :** AI for Everyone

**Pre- requisite:** Student should have good knowledge of mathematics, analytical skills, programming language and ability to understand complex algorithm.

**Rationale:** Artificial intelligence (AI) has the potential to revolutionize education by providing students with personalized learning experiences, real-time feedback, and access to a wealth of educational resources.

**Course Outcomes :** After completion of course, students will able to

05CA722-B.1 Understand the basic concepts of AI and machine learning.

05CA722-B.2 Understand the working of self-driving systems.

05CA722-B.3 Understand how to build different AI projects.

05CA722-B.4 Evaluate the impact of AI on society.

05CA722-B.5 Apply AI techniques to any application domain.

### Scheme of Studies:

| Board of Study | Course Code | Course Title    | Scheme of studies(Hours/Week) |    |    |    |                                 | Total Credits (C) |
|----------------|-------------|-----------------|-------------------------------|----|----|----|---------------------------------|-------------------|
|                |             |                 | CI                            | LI | SW | SL | Total Study Hours (CI+LI+SW+SL) |                   |
| DSE            | 05CA722-B   | AI for everyone | 4                             | 0  | 2  | 1  | 6                               | 4                 |

**Legend:** **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),  
**LI:** Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)  
**SW:** Sessional Work (includes assignment, seminar, mini project etc.),  
**SL:** Self Learning,  
**C:** Credits.

# A K S University

Faculty of Computer Application & Information Technology and Science  
 Department of Computer Application & Information Technology  
 BSc (Bachelor of Science [Information Technology])  
 (Revised as on 01 August 2023)

**Note:** SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

 (Revised as on 01 August 2023)

Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self-Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

## 05CA722-B.1 Understand the basic concepts of AI and machine learning.

### Approximate Hours

| Item  | AppX Hrs |
|-------|----------|
| CI    | 12       |
| LI    | 0        |
| SW    | 2        |
| SL    | 1        |
| Total | 15       |

| Session Outcomes (SOs)   | Laboratory Instruction (LI) | Class room Instruction (CI)  | Self Learning (SL)  |
|--|-----------------------------|--|---|
| <p><b>SO1.1</b> Understand the concept of machine learning.</p> <p><b>SO1.2</b> Explanation of various terminologies of AI</p> <p><b>SO1.3</b> Understand non technical explanation of deep learning.</p> <p><b>SO1.4</b> Understand Basics of neural network.</p> <p><b>SO1.5</b> Examples and application domains of AI.</p> |                             | <p><b>Unit-1.0 Introduction to Artificial Intelligence.</b></p> <p>1.1. Understanding definition and role of data in machine learning.</p> <p>1.2. Overview of machine learning.</p> <p>1.3. Learning various terminologies like deep learning, machine learning and artificial intelligence.</p> <p>1.4. What do we need to establish an AI company.</p> <p>1.5. What Machine Learning Can and Cannot Do.</p> <p>1.6. Understanding basics of neural network like – Neurons, Layers,</p> <p>1.7. Weights and Biases etc.</p> <p>1.8. Learning about examples of AI like virtual</p> | <p>1. Understand how to manipulate and prepare data for machine learning.</p> |

## SW-1 Suggested Sessional Work (SW):

### a. Assignments:

- i) Explore the application of AI in processing and understanding human language.
- ii) Explore the societal impacts and ethical considerations of AI.

### b. Mini Project:

- i) Choose a dataset (e.g., from Kaggle) and load it using a Python library like Pandas. Explore the data, handle missing values, and perform basic preprocessing.

### Other Activities (Specify):

Write a short essay or create a presentation discussing the ethical considerations in AI. Address topics like bias, transparency, and accountability.

## 05CA722-B.2 Understand the working of self-driving systems.

### Approximate Hours

|--|--|---|---|

## SW-2 Suggested Sessional Work (SW):

### a. Assignments:

- i. Explore a dataset of your choice. Clean the data, visualize key trends using graphs or charts, and perform basic statistical analysis.
- ii. Create a guide or presentation on essential technical tools for AI teams.

### b. Mini Project:

Develop a simple AI project using Python. This could be a basic machine learning model, a data analysis task, or a script to interact with an API

### c. Other Activities (Specify):

Form a hypothetical AI team and assign roles to each member. Develop a communication plan, set up collaborative tools, and outline a project management strategy for a given AI project.

## 05CA722-B.3 Understand how to build different AI projects.

 BSc (Bachelor of Science [Information Technology])  
 (Revised as on 01 August 2023)

## SW-4 Suggested Sessional Work (SW):

### a. Assignments:

- i. Highlight AI applications that have made positive impacts, such as healthcare diagnostics, language translation and automation.
- ii. Explore how the job market may require new skill sets due to AI integration.

### c. Mini Project:

Create a report to discuss potential policy interventions to manage the impact on employment, such as retraining programs and social safety nets.

### d. Other Activities (Specify):

Power Point Presentation on adverse uses of AI.

## 05CA722-B.5 Apply AI techniques to any application domain.

### Approximate Hours

### SW-5 Suggested Sessional Work (SW):

- a. Assignments:**
  - i.** Find out uses AI to make trading decisions based on market trends and historical data.
  - ii.** Adapts educational content to individual student needs.
- b. Mini Project:**  
Implement self-driving vehicle algorithm.
- c. Other Activities (Specify):**  
Demonstrate the versatility of AI in addressing complex challenges and optimizing processes across various industries.

### Brief of Hours suggested for the Course Outcome

| Course Outcomes   | Class Lecture (Cl) | Sessional Work (SW) | Self-Learning (SI) | Total hour (Cl+SW+SI) |
|---|--------------------|---------------------|--------------------|-----------------------|
| OE004.1 Understand the basic concepts of AI and machine learning. | 12                 | 2                   | 1                  | 15                    |
| OE004.2 Understand the working of self-driving systems.           | 12                 | 2                   | 1                  | 15                    |
| OE004.3 Understand how to build different AI projects.            | 10                 | 2                   | 1                  | 13                    |

## Suggestion for End Semester Assessment

### Suggested Specification Table (For ESA)

| CO    | Unit Titles   | Marks Distribution |    |    | Total Marks |
|-------|---|--------------------|----|----|-------------|
|       |   | R                  | U  | A  |             |
| CO-1  | Understand the basic concepts of AI and machine learning. | 03                 | 01 | 01 | 05          |
| CO-2  | Understand the working of self-driving systems.           | 02                 | 06 | 02 | 10          |
| CO-3  | Understand how to build different AI projects.            | 03                 | 07 | 05 | 15          |
| CO-4  | Evaluate the impact of AI on society.                     | 02                 | 08 | 05 | 15          |
| CO-5  | Apply AI techniques to any application domain.            | 03                 | 02 | -  | 05          |
| Total |   | 13                 | 24 | 13 | 50          |

**Legend: R: Remember, U: Understand, A: Apply**

The end of semester assessment for AI for everyone will be held with written examination of 50 marks

**Note.** Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

### Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play

# A K S University

*Faculty of Computer Application & Information Technology and Science*

# A K S University

Faculty of Engineering and Technology

Department of Computer Science & Engineering

Curriculum of B.Tech. (Computer Science & Engineering) Program

(Revised as on 01 August 2023)

## Semester-VII

**Course Code:** 06CA752

**Course Title:** Minor Project

**Pre-requisite:** Student should have knowledge of programming languages, Software Engineering, and Many more tools and framework.

- Rationale:**
- To apply the knowledge and skills learnt in previous semesters, to solve real life industrial / engineering / professional problems.
  - To modify/ improve the existing engineering / professional systems.
  - To develop systems / components / methods / processes / resources to cater the needs of the nearby small scale / medium industry.
  - To learn to solve real life engineering / professional problems which often have many aspects to be considered and addressed.

### Course Outcomes:

06CA752.1: - The student will be able to prepare a detailed project plan for solving any real-life related engineering / technical / professional / industrial problem.

06CA752.2: - The student will be able to implement the project plan and manage the project.

06CA752.3: - The student will be able to present the completed project work.

### Scheme of Studies:

| Board of Study | Course Code | Course Title  | Scheme of studies (Hours/Week) |    |    |    | Total Study Hours (CI+LI+SW+SL) | Total Credits (C) |
|----------------|-------------|---------------|--------------------------------|----|----|----|---------------------------------|-------------------|
|                |             |               | CI                             | LI | SW | SL |                                 |                   |
| Project        | 06CA752     | Minor Project | 0                              | 12 | 0  | 0  | 12                              | 6                 |

The Course on Project Work consists of five phases: -

|   | Description of phases   | Learn Hrs. |
|---|---|------------|
| 1 | Literature / industry's need survey and finalization of topic / title | 15 Hrs     |
| 2 | Detailed planning of the project work                                 |            |
| 3 | Implementing the detailed project plan                                | 60 Hrs     |
| 4 | Managing the project activities                                       |            |
| 5 | Reporting of the project work output/outcome / prototype              | 15 Hrs     |
|   | Total   | 90 Hrs     |

# A K S University

*Faculty of Computer Application & Information Technology and Science*

**Department of Computer Application & Information Technology**

**Curriculum of BSC (IT) (Bachelor of Science)**

(Revised as on 01 August 2023)

## **General Guidelines for Project Work**

- The project topics should be related to concerned branch of engineering / profession, but should not be the exact content of the curriculum taught in the discipline.
- Student's project topics should be preferably 'real life' topics. It means the project topics should have substantial element of uncertainty, complexity and multi-disciplinary-ness which can be coped up by the students. These elements offer opportunities to students to apply engineering/ professional knowledge in real life settings, solve real life problems and to take real life decisions. As a project guide, concerned teacher should ensure these by suitably altering / framing / reframing the statement of topic / title.
- The project topics should be such that students can get opportunity to refer IS codes, Manuals, Handbooks, norms and standards, opportunity to conduct standard tests, and opportunity to operate modern laboratory equipment's following SOPs.
- For student's interest, active participation and ownership in the project work, their self-motivation is necessary. Therefore, students should be actively involved in finalizing the topic of project.
- Students should be asked to conduct a brief review of literature for problems and issues in their engineering / professional areas of interest, where they think they can contribute effectively. The project guide should facilitate them in this regard, through his/her expertise and experience.
- Every student group should be asked to propose at least three topics of their interest. The topics proposed by student project groups should be assessed by the facilitator-teacher on following three criteria: -
  - **The work on the topic should be theoretically and practically feasible.**
  - **The project work on the topic should be completed within approx. Three and half months.**
  - **Availability of required resources should be certain. Cost of project work should also be bearable.**
- Normally, students' project works should be carried out in small groups (1 to 2 students).
- All faculty members of department should be engaged as project guides. Every faculty member should be project guide of at least one student project group.
- Normally, project guides should be assigned to the students through lottery system and students under each faculty should be asked to form their small groups.

# A K S University

Faculty of Computer Application & Information Technology and Science

Department of Computer Application & Information Technology

BSc (Bachelor of Science [Information Technology])

(Revised as on 01 August 2023)

## Semester VIII

**Course Code:** 06RM801

**Course Title:** English for Research Paper Writing

**Pre- requisite:** Students should have basic knowledge of presenting themselves, their thoughts and ideas

**Rationale:** Writing a research paper is the primary channel for passing on knowledge to the scientist working in the same field or related fields. It is important to know the skill of writing papers to demonstrate your ability to understand, relate to what has been learnt, as well as receive critical peer feedback.

06RM801 1: Student will learn how to improve their writing skills, and level of readability

06RM8012: Students will understand the concept of plagiarism, and how to avoid ambiguity and vagueness

06RM8013: Students will learn about what to write in each section of paper

06RM8014: Students will understand significance of each section of paper, and learn how to write it at the same time.

06RM8015: Ensure the good quality of paper at very first-time submission

### Course-Curriculum Detailing

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

**06RM801 1:** Student will learn how to improve their writing skills, and level of readability

## Suggestion for End Semester Assessment 1

### Suggested Specification Table (For ESA)

| CO    | Unit Titles                                  | Marks Distribution |    |    | Total Marks |
|-------|--|--------------------|----|----|-------------|
|       |  | R                  | U  | A  |             |
| 1     | Unit 1: Preparation of Research Paper        | 2                  | 5  | 3  | 10          |
| 2     | Unit 2: Paraphrasing and checking Plagiarism | 3                  | 4  | 3  | 10          |
| 3     | Unit 3: Planning Sections of a Paper         | 2                  | 3  | 5  | 10          |
| 4     | Unit 4: Finalising the Research Paper        | 2                  | 2  | 6  | 10          |
| 5     | Unit 5: Research Paper Publication           | 1                  | 2  | 7  | 10          |
| Total |  | 10                 | 16 | 24 | 50          |

**Legend:**      **R: Remember,**                      **U: Understand,**                      **A: Apply**

The end of semester assessment for English for Research Paper Writing s will be held with written examination of 50 marks

**Note.** Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

### Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Brainstorming

### Suggested Studies:

1. Goldbort R (2006) Writing for Science, Yale University Press (available on Google Books)
2. Day R (2006) How to Write and Publish a Scientific Paper, Cambridge University Press
3. Highman N (1998), Handbook of Writing for the Mathematical Sciences, SIAM. Highman'sbook.
4. Adrian Wallwork, English for Writing Research Papers, Springer New York Dordrecht Heidelberg London, 2011

### COs, POs and PSOs Mapping

**Program: B.Sc. IT**

# AKS University

Faculty of Computer Application & Information Technology and Science

Department of Computer Application & Information Technology

BSc (Bachelor of Science [Information Technology])

(Revised as on 01 August 2023)

## Semester-VIII

**Course Code:** 01CA811

**Course Title :** Statistical Thinking for Data Science

**Pre-requisite:** Student should have basic knowledge of Statistics and database

**Rationale:** Statistical Thinking for Data Science boosts the discovery of new and unexpected insights from data.

### Course Outcomes:

01CA811.1: Understand the statistical foundation for data science

01CA811.2: Apply statistical thinking in collecting, modeling and analyzing data

01CA811.3: Apply statistical thinking in collecting, modeling and analyzing data

01CA811.4: Ability to visualize all types of data

01CA811.5: Understand how to use R for different types of data

### Scheme of Studies:

| Board of Study | Course Code | Course Title                          | Scheme of studies(Hours/Week) |    |    |    |                                 | Total Credits (C) |
|----------------|-------------|---------------------------------------|-------------------------------|----|----|----|---------------------------------|-------------------|
|                |             |                                       | CI                            | LI | SW | SL | Total Study Hours (CI+LI+SW+SL) |                   |
| Major          | 01CA811     | Statistical Thinking for Data Science | 4                             | 4  | 2  | 1  | 11                              | 6                 |

**Legend:** **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),

**LI:** Laboratory Instruction (Includes Practical performance laboratory workshop, field or other locations using different instructional strategies)

**SW:** Sessional Work (includes assignment, seminar, mini project etc.),

**SL:** Self Learning,

**C:** Credits.

**Note:** SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

### Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

**01CA811.1: Understand the statistical foundation for data science**

Learn forecasting problem</p> |

SW-5Suggested Seasonal Work (SW):

**a. Assignments:**

- (i) Explain in detail about Bayesian hierarchical modeling

**b. Presentation:**

**c. Other Activities (Specify): Group discussion of important topics.**

| <b>Total Hours</b>  | 60                 | 60                         | 5                   | 5                  | 130                   |

## Suggestion for End Semester Assessment

Suggested Specification Table (For ESA)

| CO           | Unit Titles  | Marks Distribution |    |    | Total Marks |
|--------------|--|--------------------|----|----|-------------|
|              |  | R                  | U  | A  |             |
| 01CA811-1    | Unit 1: Introduction to Data Science                 | 03                 | 02 | 03 | 08          |
| 01CA811-2    | Unit-2: Statistical Thinking 1                       | 03                 | 01 | 05 | 09          |
| 01CA811-3    | Unit3:Statistical Thinking2                          | 03                 | 07 | 02 | 12          |
| 01CA811-4    | Unit-4 : Exploratory Data Analysis and Visualization | 03                 | 05 | 05 | 13          |
| 01CA811.5    | Unit5: Introduction to Bayesian Modeling             | 03                 | 02 | 03 | 08          |
| <b>Total</b> |  | 15                 | 17 | 18 | 50          |

**Legend: R: Remember, U: Understand, A: Apply**

The end of semester assessment for Statistical Thinking for Data Science will be held with written

## A K S University

Faculty of Computer Application & Information Technology and Science

Department of Computer Application & Information Technology

BSc (Bachelor of Science [Information Technology])

(Revised as on 01 August 2023)

examination of 50 marks

**Note.** Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

### Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Pla
6. Demonstration
7. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Facebook, Twitter, WhatsApp, Mobile, Online sources)
8. Brainstorming

### Suggested Learning Resources:

#### A. Books:

| S. No. | Title  | Author      | Publisher            | Edition & Year |
|--------|--|-------------|----------------------|----------------|
| 1      | Computational Thinking: A Primer For Programmers And Data Scientists | G Venkatesh | Notion Press         | 2022           |
| 2      | Data Science A Beginner's Guide                                      | C. Raju     | Penguin Random House | 2023           |

#### B. Alternative NPTEL/SWAYAM/MOOC Course (if any): NA

#### Curriculum Development Team

1. Dr. Akhilesh K. Wao, HOD, Department of Computer Science and Engineering.
2. Dr. Pramod Singh, Associate Professor, Department of Computer Science and Engineering.
3. Ms. Shruti Gupta, Assistant Professor, Department of Computer Science and Engineering.
4. Ms. Pragya Shrivastava, Assistant Professor, Department of Computer Science and Engineering.
5. Mr. Lokendra Gaur, Assistant Professor, Department of Computer Science and Engineering.
6. Mr. Vinay Kumar Dwivedi, Assistant Professor, Department of Computer Science and Engineering.
7. Ms. Pinki Sharma, Assistant Professor, Department of Computer Science and Engineering.
8. Ms. Pushpa Kushwaha, Assistant Professor, Department of Computer Science and Engineering.

Faculty of Computer Application & Information Technology and Science

Department of Computer Application & Information Technology

BSc (Bachelor of Science [Information Technology])

(Revised as on 01 August 2023)

## Semester-VIII

**Course Code:** 06CA852

**Course Title:** Research Project/Thesis Submission

**Pre-requisite:** Student should have knowledge of programming languages, Software Engineering, and Many more tools and framework.

- Rationale:**
- To apply the knowledge and skills learnt in previous semesters, to solve real life industrial / engineering / professional problems.
  - To modify/ improve the existing engineering / professional systems.
  - To develop systems / components / methods / processes / resources to cater the needs of the nearby small scale / medium industry.
  - To learn to solve real life engineering / professional problems which often have many aspects to be considered and addressed.

### Course Outcomes:

06CA852.1: - The student will be able to prepare a detailed project plan for solving any real-life related engineering / technical / professional / industrial problem.

06CA852.2: - The student will be able to implement the project plan and manage the project.

06CA852.3: - The student will be able to present the completed project work.

### Scheme of Studies:

| Board of Study | Course Code | Course Title                       | Scheme of studies (Hours/Week) |    |    |    | Total Study Hours (CI+LI+SW+SL) | Total Credits (C) |
|----------------|-------------|------------------------------------|--------------------------------|----|----|----|---------------------------------|-------------------|
|                |             |                                    | CI                             | LI | SW | SL |                                 |                   |
| Project        | 06CA852     | Research Project/Thesis Submission | 0                              | 20 | 0  | 0  | 20                              | 10                |

The Course on Project Work consists of five phases: -

|   | Description of phases   | Learn Hrs. |
|---|---|------------|
| 1 | Literature / industry's need survey and finalization of topic / title | 15 Hrs     |
| 2 | Detailed planning of the project work                                 |            |
| 3 | Implementing the detailed project plan                                | 60 Hrs     |
| 4 | Managing the project activities                                       |            |
| 5 | Reporting of the project work output/outcome / prototype              | 15 Hrs     |
|   | Total   | 90 Hrs     |

# A K S University

*Faculty of Computer Application & Information Technology and Science*  
**Department of Computer Application & Information Technology**  
**Curriculum of BSC (IT) (Bachelor of Science)**  
(Revised as on 01 August 2023)

## **General Guidelines for Project Work**

- The project topics should be related to concerned branch of engineering / profession, but should not be the exact content of the curriculum taught in the discipline.
- Student's project topics should be preferably 'real life' topics. It means the project topics should have substantial element of uncertainty, complexity and multi-disciplinary-ness which can be coped up by the students. These elements offer opportunities to students to apply engineering/ professional knowledge in real life settings, solve real life problems and to take real life decisions. As a project guide, concerned teacher should ensure these by suitably altering / framing / reframing the statement of topic / title.
- The project topics should be such that students can get opportunity to refer IS codes, Manuals, Handbooks, norms and standards, opportunity to conduct standard tests, and opportunity to operate modern laboratory equipment's following SOPs.
- For student's interest, active participation and ownership in the project work, their self-motivation is necessary. Therefore, students should be actively involved in finalizing the topic of project.
- Students should be asked to conduct a brief review of literature for problems and issues in their engineering / professional areas of interest, where they think they can contribute effectively. The project guide should facilitate them in this regard, through his/her expertise and experience.
- Every student group should be asked to propose at least three topics of their interest. The topics proposed by student project groups should be assessed by the facilitator-teacher on following three criteria: -
  - **The work on the topic should be theoretically and practically feasible.**
  - **The project work on the topic should be completed within approx. Three and half months.**
  - **Availability of required resources should be certain. Cost of project work should also be bearable.**
- Normally, students' project works should be carried out in small groups and thesis by one only.
- All faculty members of department should be engaged as project guides. Every faculty member should be project guide of at least one student project group.
- Normally, project guides should be assigned to the students through lottery system and students under each faculty should be asked to form their small groups.

## COs, POs and PSOs Mapping

Course Title: BSc IT

Course Code: 06CA852

Course Title: Research Project/Thesis Submission

| Course Outcomes  | Program Outcomes      |                  |                                 |                                       |                             |                       |                                |        |                          |               |                                |                   | Program Specific Outcome  |   |  |   |  |

|  | Engineering knowledge | Problem analysis | Design/development of solutions | Conduct studies of difficult problems | Utilization of modern tools | Engineers and society | Environment and sustainability | Ethics | Individual and team work | Communication | Project management and finance | Life-longlearning | Use fundamental knowledge of math, science, and engineering to comprehend, evaluate, and create computer Programmes in the fields of algorithms, multimedia, big data analytics, machine learning, artificial intelligence, and networking for the effective design of computer-based systems of various complexity | Utilize relevant methods and cutting-edge hardware and software engineering tools to develop and integrate computer systems and related technologies. This PSO2 also encourages lifelong learning for the advancement of technology and its use in multidisciplinary settings | Applying professional engineering solutions for societal improvement while taking into account the environmental context, being conscious of professional ethics, and being able to effectively communicate. | Learn and use the most recent Artificial Intelligence and Data Science technologies in the fields of engineering and computer science | Recognize and examine issues in real life, then offer creative software solutions with the help of AI and Data Science Technologies. |
| CO 1: The student will be able to prepare a detailed project plan for solving any real-life related engineering / technical / professional / industrial problem. | 2                     | 3                | 3                               | 2                                     | 3                           | 2                     | 3                              | 1      | 3                        | 1             | 3                              | 3                 | 2   | 3   | 3  | 1   | 2  |
| CO 2: The student will be able to implement the project plan and manage the project.   | 2                     | 3                | 3                               | 2                                     | 3                           | 2                     | 3                              | 1      | 3                        | 1             | 3                              | 3                 | 2   | 2   | 2  | 2   | 3  |
| CO 3: The student will be able to present the completed project work.  | 2                     | 2                | 3                               | 1                                     | 3                           | 2                     | 2                              | 1      | 3                        | 1             | 3                              | 3                 | 2   | 3   | 2  | 2   | 2  |
