Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy Program
(Revised as on 01 August 2023)

FROM THE DESK OF THE VICE-CHANCELLOR

AKS University is currently undergoing a process to revamp its curriculum into an outcome-based approach, with the aim of enhancing the teaching and learning process. The foundation of quality of quality education lies in the implementation of a curriculum that aligns with both societal and industrial needs, focusing on relevant outcomes. This entails dedicated and inspired

Faculty members, as well as impactful industry internships

Hence, it is of utmost importance to begin this endeavor by crafting an outcome-based curriculum in collaboration with academia and industry experts. This curriculum design should be informed by the latest technological advancements, market demands, the guidelines outlined in the National Education Policy (NEP) of 2020, and sustainable goals.

I'm delighted to learn that the revised curriculum has been meticulously crafted by the Rajiv Gandhi Institute of Pharmacy, in consultation with an array of experts from the industry, research institutes, and academia. This curriculum effectively integrates the principles outlined in the NEP-2020 guidelines, as well as sustainable goals. It also adeptly incorporates the latest advancements in the field of Pharmacy.

Furthermore, the curriculum takes into account the specific needs of the Indian Industries, focusing on the creation of effective and efficient managers as well as entrepreneurs. This curriculum will not only impart knowledge but also encourages students' independent thinking for potential enhancements in the area of Pharmaceutical science.

The curriculum goes beyond theoretical learning and embraces practical applications. To enhance students' skills, the curriculum integrates industrial visits, and On-Job Training experiences, research projects. This well-rounded approach ensures that students receive a comprehensive education, fostering their skill development and preparing them for success in the field of Pharmaceutical Science.

I am confident that the updated curriculum for Rajiv Gandhi Institute of Pharmacy will not only enhance students' managerial skills but also contribute significantly to their employability. During the process of revising the curriculum, I am pleased to observe that the Rajiv Gandhi Institute of Pharmacy has diligently adhered to the guidelines provided by the PCI& UGC. Additionally, they have maintained a total credit requirement of 210 for the B program.

It's worth noting that curriculum revision is an ongoing and dynamic process, designed to address the continuous evolution of managerial and technological advancements and both local

and global concerns. This ensures that the curriculum remains responsive and attuned to the changing landscape of education and industry.

AKS University warmly invites input and suggestions from industry experts and technocrats and Alumni students to enhance the curriculum and make it more student-centric. Your valuable insights will greatly contribute to shaping an education that best serves the needs and aspirations of our students.

01-Aug-2023

PROFESSOR B.A. CHOPADE
Vice-Chancellor

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy Program
(Revised as on 01 August 2023)

PREFACE

As part of our commitment to ongoing enhancement, the Rajiv Gandhi Institute Pharmacy consistently reviews and updates its B Pharmacy program curriculum every four years. Through this process, we ensure that the curriculum remains aligned with the latest managerial developments, as well as local and global industrial and social demands.

During this procedure, the existing curriculum for the B Pharmacy Program undergoes evaluation by a panel of industry specialists, and academicians. Following meticulous scrutiny, the revised curriculum has been formulated and is set to be implemented starting from August 01, 2023. This implementation is contingent upon the endorsement of the curriculum by the University's Board of Studies and Governing Body.

This curriculum closely adheres to the PCI model syllabus distributed in 2016. It seamlessly integrates the guidelines set forth by the Ministry of Higher Education, Government of India, through NEP- 2020, as well as the principles of Sustainable Development Goals. In order to foster the holistic skill development of students, a range of practical activities, including Industrial Visits, Project planning and execution, Report Writing, Seminars, and Industrial On-Job Training, have been incorporated. Furthermore, in alignment with PCI directives, the total credit allocation for the B Pharmacy program is capped at 209/211/212 credits.

The Bachelor of Pharmacy program typically follows a credit-based system where each subject is assigned a certain number of credits. These credits reflect the workload and importance of the subject in the curriculum. The credit system is designed to ensure that students receive a balanced education that covers all the necessary areas of pharmaceutical science and practice.

Theory Courses include lectures, practical's and tutorials on subjects like Pharmacology, Medicinal Chemistry, Pharmaceutical Analysis, etc. Each theory course may carry around 3 to 4 credits. Practical Courses: Laboratory sessions where students apply their theoretical knowledge. Practical courses usually carry fewer credits than theory courses, often around 1 to 2 credits. Core Subjects: Subjects that are fundamental to the field, such as Human Anatomy and Physiology, Pharmaceutical Chemistry, Pharmaceutics, etc., may have higher credit values. Elective Subjects: These allow students to specialize

in areas of interest and may vary in credit value. The importance of these subjects in the pharmaceutical industry cannot be overstated. They provide the foundational knowledge and skills necessary for various roles within the industry, such as:

Research and Development: Understanding the principles of drug action, formulation, and analysis is crucial for developing new medications. **Quality Control and Assurance:** Knowledge of analytical techniques and standards is essential for ensuring the safety and efficacy of pharmaceutical products.

Regulatory Affairs: Familiarity with pharmaceutical laws and regulations is important for compliance in the industry. **Sales and Marketing:** A strong grasp of pharmacology and therapeutics helps in effectively promoting pharmaceutical products. The total number of credits required to earn a B.Pharm degree may vary by institution but is typically around 209/211/212 credits.

In terms of career prospects, B.Pharm graduates can find opportunities in: **Pharmaceutical Companies:** In roles such as product development, production, quality control, and marketing. **Regulatory Bodies:** As drug inspectors or regulatory affairs specialists. **Research Institutes:** Engaging in cutting-edge research to develop new drugs and therapies. **Healthcare Settings:** As pharmacists in hospitals, clinics, and community pharmacies.

The subjects studied in the B.Pharm program are directly linked to the practical needs of the pharmaceutical industry, ensuring that graduates are well-prepared for Pharmaceutical industry expectations. For each course, a thorough mapping of Course Outcomes, Program Outcomes, and Program Specific Outcomes has been undertaken. As the course syllabus is being meticulously developed, various elements such as session outcomes, laboratory instruction, classroom instruction, self-learning activities, assignments, and mini projects are meticulously outlined.

We hold the belief that this dynamic curriculum will undoubtedly enhance independent thinking, skills, and overall employability of the students.

01-August-2023

Professor (Dr.) G.P. Richariya
Dean(I/C), Faculty of Pharmaceutical Science & technology
Rajiv Gandhi Institute of Pharmacy
AKS University, Satna

Introduction

Rajiv Gandhi Institute of Pharmacy was established in 2006, with the aim of providing quality education in pharmaceutical sciences. The college started with, Bachelor in Pharmacy 2006. The institution became a constituent unit of AKS University Satna, in 2012 and later on other some another courses were added like D. Pharm (2015), M. Pharm (2020), the Ph. D Programmes (2021). All courses at the institute are recognized by the Pharmacy Council of India (PCI). The institute has a strong alumni association with over 1100 active members, who are placed globally at various positions in Pharma Marketing, Industrial, Regulatory and Entrepreneurial services.

Vision

To be established as globally recognized academic & research excellence to sustain the needs of pharmacy profession and the society.

Mission

M1: To promote & trained as per global requirement of social and pharmaceutical needs in pharmaceutical education and research through prescribed training programmes like B. Pharm., M. Pharm. and PhD with professional pharmaceutical education and effective competency.

M2: Achieve academic excellence in Pharmaceutical science through the innovative teaching learning process.

M3: To establish recognized research center for needs of pharmacy profession and the society.

M4: To Promote Skills through **experimental knowledge** as per global requirement of social and pharmaceutical industry.

Program Educational Objectives

PE01: To trained with sound knowledge of fundamental principles and their applications in the area of Pharmaceutical Sciences and Technology

PE02: To develop pharmacy graduates with strong fundamental concepts in pharmaceutical sciences with innovative approaches.

PE03: To introduce regulation, professionalism, team spirit, communication skills, social and ethical commitment in the graduates in order to embellish leadership roles facilitating improvement in healthcare sector with a distinct professional identity, business acumen, global recognition and sustainable development.

PE04: To develop the skills for contribute in health care system by counseling for prophylaxis and prevention of diseases and creating awareness about healthcare issues.

PE05: To understand the concept of drug discovery and design, drug delivery, drug action and clinical sciences, drug analysis, drug regulatory affairs etc.

Program outcome

- 1. Pharmacy Knowledge:** Possess knowledge and comprehension of the core and basic knowledge associated with the profession of pharmacy, including biomedical sciences; pharmaceutical sciences; behavioral, social, and administrative pharmacy sciences; and manufacturing practices.
- 2. Planning Abilities:** Demonstrate effective planning abilities including time management, resource management, delegation skills and organizational skills. Develop and implement plans and organize work to meet deadlines.
- 3. Problem analysis:** Utilize the principles of scientific enquiry, thinking analytically, clearly and critically, while solving problems and making decisions during daily practice. Find, analyze, evaluate and apply information systematically and shall make defensible decisions.
- 4. Modern tool usage:** Learn, select, and apply appropriate methods and procedures, resources, and modern pharmacy-related computing tools with an understanding of the limitations.
- 5. Leadership skills:** Understand and consider the human reaction to change, motivation issues, leadership and team-building when planning changes required for fulfillment of practice, professional and societal responsibilities. Assume participatory roles as responsible citizens or leadership roles when appropriate to facilitate improvement in health and wellbeing.

6. **Professional Identity:** Understand, analyze and communicate the value of their professional roles in society (e.g. health care professionals, promoters of health, educators, managers, employers, employees).
7. **Pharmaceutical Ethics:** Honour personal values and apply ethical principles in professional and social contexts. Demonstrate behavior that recognizes cultural and personal variability in values, communication and lifestyles. Use ethical frameworks; apply ethical principles while making decisions and take responsibility for the outcomes associated with the decisions.
8. **Communication:** Communicate effectively with the pharmacy community and with society at large, such as, being able to comprehend and write effective reports, make effective presentations and documentation, and give and receive clear instructions.
9. **The Pharmacist and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety and legal issues and the consequent responsibilities relevant to the professional pharmacy practice.
10. **Environment and sustainability:** Understand the impact of the professional pharmacy solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
11. **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change. Self access and use feedback effectively from others to identify learning needs and to satisfy these needs on an ongoing basis.

Program Specific outcome

For B Pharmacy

The Graduate shall be able to:

PSO1. (Knowledge of drug discovery): Apply the knowledge of pharmaceutical and allied sciences in design, manufacture and evaluation of drug delivery systems.

PSO2.(Quality Analysis of API's): To understand the concept for classification and modern analysis of APIs and formulations in their quality control and enforce quality assurance standards.

PSO3.(MOA of Drug): To understand about complete the mechanism of action of drugs including their kinetics and adverse actions.

PSO4: (Biological evaluation of drug): Ability to do basic evaluation of bioactivity of drugs in *in-silico* models.

Consistence/Mapping of PEOs with Mission of Department

PEO	M1	M2	M3	M4
PEO1	2	1	3	2
PEO2	1	3	2	2
PEO3	3	2	1	1

GENERAL COURSE STRUCTURE & THEME

1. Definition of Credit:

1 Hr. Lecture (L) per week	1 Credit
1 Hr. Tutorial (T) per week	1 Credit
2 Hours Practical (P) per week	1 Credit

2. Range of Credits:

In the light of the fact that a typical Model Four-year Graduate degree program in Pharmacy has about 216 credits, the total number of credits proposed for the four year Bachelor of Pharmacy is kept as 216 considering NEP-20 and NAAC guideline.

3. Structure of UG Program in Bachelor of Pharmacy (B Pharm):

The structure of UG Program in Bachelor of Pharmacy shall have essentially the following categories of courses with the breakup of credits as given:

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy Program
(Revised as on 01August2023)

COMPONENTS OF CURRICULUM

(Program curriculum grouping based on course components)

Sr. No.	Course components	% of total numbers of credits of the program	Total number of credits
1	Pharmacy Core course (PCC)	74.43	161
2	Computer Application (CA)	1.85	4
3	Soft Skill development (SSD)	0.92	3
4	Environmental Science (EVS)	1.38	3
5	Indian Knowledge system (IKS)	0.92	2
6	Sustainable Development Goals(SDG)	0.92	2
7	Basic Science(BSC)	7.40	16
8	Life Science(LS)	4.60	10
9	Management Skills (MS)	1.85	4
10	Practice School(PS)	3.10	6
11	Project work(PJT)	3.10	6
Total		100%	216

COURSE LEVEL CODING SCHEME

Three-digit number (odd numbers are for the odd semester courses and even numbers are for even semester courses) used as suffix with the Course Code for identifying the level of the course. Digit at hundred's place signifies the year in which course is offered. *e.g.*

101, 102---for first semester	201, 202---for second semester	301, 302---for third semester
401, 402---for fourth semester	501, 502---for fifth semester	601, 602---for sixth semester
701, 702---for seventh semester	801, 802---for eighth semester	-

9	BP811ET	Advanced Instrumentation Techniques	VIII	4
10	BP812ET	Dietary Supplements and Nutraceuticals	VIII	4

GENERAL COURSE STRUCTURE AND CREDIT DISTRIBUTION

A Credit assignment

1. Theory and Laboratory courses Courses are broadly classified as Theory and Practical. Theory courses consist of lecture (L) and /or tutorial (T) hours, and Practical (P) courses consist of hours spent in the laboratory. Credits (C) for a course is dependent on the number of hours of instruction per week in that course, and is obtained by using a multiplier of one (1) for lecture and tutorial hours, and a multiplier of half (1/2) for practical (laboratory) hours. Thus, for example, a theory course having three lectures and one tutorial per week throughout the semester carries a credit of 4. Similarly, a practical having four laboratory hours per week throughout semester carries a credit of 2.

2. Minimum credit requirements The minimum credit points required for award of a B. Pharm. degree is 209. These credits are divided into Theory courses, Tutorials, Practical, Practice School and Project over the duration of eight semesters. The credits are distributed semester-wise as shown in Table IX. Courses generally progress in sequences, building competencies and their positioning indicates certain academic maturity on the part of the learners. Learners are expected to follow the semester-wise schedule of courses given in the syllabus. The lateral entry students shall get 52 credit points transferred from their D. Pharm program. Such students shall take up additional remedial courses of ‘Communication Skills’ (Theory and Practical) and ‘Computer Applications in Pharmacy’ (Theory and Practical) equivalent to 3 and 4 credit points respectively, a total of 7 credit points to attain 59 credit points, the maximum of I and II semesters.

Semester wise credits distribution

Table-

Semester	Credit Points
I	27/29 \$ /30 #
II	29
III	26
IV	28
V	26
VI	26
VII	24
VIII	22
Extracurricular/ Co curricular activities	01*
total credit points for the program	209/211\$ /212 #

*The credit points assigned for extracurricular and or co-curricular activities shall be given by the Principals of the colleges and the same shall be submitted to the University. The criteria to

acquire this credit point shall be defined by the colleges from time to time. \$Applicable ONLY for the students studied Physics / Chemistry / Botany / Zoology at HSC and appearing for Remedial Mathematics course. #Applicable ONLY for the students studied Mathematics / Physics / Chemistry at HSC and appearing for Remedial Biology course.

INDUCTION PROGRAM

Induction program for students to be offered right at the start of the first year. It is mandatory. AKS University has designed an induction program for 1st year student, details are below:

1. Physical activity
2. Creative Arts
3. Universal Human Values
4. Literary
5. Proficiency Modules
6. Lectures by Eminent speakers
7. Visits to local Areas
8. Familiarization to Dept./Branch & Innovations

MANDATORY VISITS/WORKSHOP/EXPERT LECTURES

1. It is mandatory to arrange one industrial visit every semester for the students.
2. It is mandatory to conduct a One week work shop during the winter break after third semester on professional /industry /entrepreneurial orientation.
3. It is mandatory to organize at least one expert lecture per semester for each branch by expert resource persons from industry.

EVALUATION SCHEME

1. For Theory Courses:

- The weightage of Internal assessment is 50% and;
- End Semester Exam is 50% the student has to obtain at least 50% marks individually both in internal assessment and end semester Exams to pass.

2. For Practical Courses:

- The weightage of Internal assessment is 50%
- End Semester Exam is 50%. The student has to obtain at least 50% marks individually both in internal assessment and end semester exams to pass.

3. For Summer Internship/Projects/Seminar etc.: Evaluation is based on work done, quality of report, performance in viva-voce, presentation etc.

Semester	L	T	P	Total Hour	No of Hours Per Sem.	Total Credit
Semester – I	20	4	20	44	44 x 15 = 660	34
Semester – II	18	04	14	36	36 x 15 = 540	29
Semester – III	12	04	16	32	32 x 15 = 480	24
Semester – IV	15	5	16	36	36 x 15 = 540	28
Semester – V	15	5	12	32	32 x 15 = 480	25
Semester – VI	18	6	12	36	36 x 15 = 540	30
Semester – VII	12	4	16	32	32 x 15 = 480	24
Semester - VIII	12	4	12	30	30 x 15 = 450	22
Total	114	36	118	278	4170	216

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (HAP-I) Program
(Revised as on 01 August 2023)

Semester -I

Course Code: BP101T/& BP107P

Course Title: Human Anatomy and Physiology -I

Prerequisite - The Student should have fundamental knowledge of the human body & its structures and functions of cell & tissues.

Scope

- This subject is designed to impart fundamental Knowledge on the structure and functions Of various systems of the human body.
- It also helps in understanding both homeostatic mechanisms.
- The subject provides the basic knowledge required to understand the various disciplines of Pharmacy.

Rationale/Objectives: Upon completion of this course the student should be able to

1. Explain the gross morphology, structure and functions of various organs of the human body.
2. Describe the various homeostatic mechanisms and their imbalances.
3. Identify the various tissues and organs of different systems of human body.
4. Perform the various experiments related to special senses and nervous system.
5. Appreciate coordinated working pattern of different organs of each system

Course outcomes:

CO-BP101.1: To recognize the various homeostatic mechanisms, basic anatomical Term, cellular level organization & characteristics of different types of tissues and their locations in various organs.

CO-BP101.2: To organize the structure and functions of skin, bones and joints of human body.

CO-BP101.3: To analyze the importance of blood, lymphatic system and immunity in humanbody.

CO-BP101.4: To relate the physiology of sympathetic, parasympathetic, spinal/cranial nerves and organization of special senses.

CO-BP101.5: To adapt the anatomy and physiology of heart and blood vessels, cardiac cycle & their disorders.

Curriculum of B Pharm (Human Anatomy & Physiology-I) Program Scheme of Studies

:Coursecode	Title of thecourse	Program Name	TOTAL Number of contact hours/Week						Credit

Percentage of Attendance
Theory /Practical

Sr. No	Percentage of Attendance	Theory	Practical
1	95 – 100	4	2
2	90 – 94	3	1.5
3	85 – 89	2	1
4	80 – 84	1	0.5
5	Less than 80	0	0

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

CO-BP101. 1: To recognize the various homeostatic mechanisms, basic anatomical term and cellular level organization & characteristics of different types of tissues and their locations in various organs.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	12
SW	1
SL	1
Total:	27

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction(CI)	Self Learning (SL)
<p>Theory SO1.1-Scope of anatomy&physiology SO1.2-understand homeostasis& their mechanism SO1.3-structure & function of cell. SO1.4-celldivision SO1.5-cellsignaling SO1.6-Tissue & their classification</p> <p>Practical SO1.1 Study of compound microscope</p> <p>SO1.2 study of microscopic structures ofepithelial & connective tissue</p> <p>SO1.3 Study of microscopic structures ofmuscular & nervous tissue</p>	<p>1.1 Study of compound microscope.</p> <p>1.2 Microscopic study of epithelial and connective tissue</p> <p>1.3 Microscopic study of muscular and nervous tissue</p>	<p>Unit I- Introduction to human body 1.1 Definition and scope of anatomy and physiology. 1.2 levels of structural organization and body systems & basic life processes, homeostasis & their mechanism 1.3 basic anatomical terminologies & Cellular level oforganization 1.4 Structure andfunctions of cell T1-Tutorial I 1.5 transport across cell membrane, 1.6 cell division –mitosis & meiosis 1.7 cell junctions. 1.8 a) General principles of cell communication, intracellular signaling pathway activation by extracellular signal molecule, b) Forms of intracellular signaling: a) Contact-dependent b) Paracrine c)Synaptic d) Endocrine</p> <p>T 2-Tutorial II Tissue level oforganization 1.9 Classification of tissues, structure, location and functions of epithelialtissue. 1.10(a) Structure, location and functions of muscular andnervous (b) Structure, location and functions of connective tissues</p> <p>T3. Tutorial III</p>	<p>1.1 Study & preparation ofsignaling pathway. 1.2 Types of cell junction & their mechanism</p>

Suggested Sessional work

A) Assignments: 1.Cell division & their types.

2. Tissue & their classification
3. Cell signaling & their forms
4. Structure & functions of cell
5. Homeostasis & their mechanism
6. cell junction

CO2- To organize the structure and functions of skin, bones and joints of human body.

Item	Approx hrs
Lecture & tutorial	10+3=13
practical	8
SW	2
SL	1
Total	24

Session outcomes(SOs)	Laboratory Instructions (LI)	Class room Instruction(CI)	Self Learning(SL)
<p>Theory SO2.1. understand the structure & functions of skin. SO2.2. skeletal system & their classification SO2.3.microscopic structure of skeletal muscle. SO2.4.joint & their classification SO2.5.physiology of muscle contraction</p> <p>Practical SO-P2.1 Identify name & numbers of axial bones SO-P2.2 Identify name & numbers of appendicular bones</p>	<p>2.1 Identificatio nof axial bones 2.2 Identificatio nof appendicular bones</p>	<p>Unit II Integumentary system 2.1 Structure and functions of skin. Skeletal system 2 Divisions of skeletal system, types of bone T1-Tutorial I 2.4 Organization of skeletal muscle 2.5 physiology of muscle contraction, 2.6 neuromuscular junction T2- Tutorial II Joints 2.7 Structural and functional classification of joint 2.8 Fibrous & cartilaginous joint 2.9 Synovial joint 2.10 Types of movements & its articulation T3- Tutorial III</p>	<p>1.1 Types of bone 1.2 Joint & their classification.</p>

Suggested Sessional work

Assignments –

1. Neuromuscular junction
2. Synovial joint & their classification
3. Structure & functions of skeletal muscle
4. Types of movement of joint
5. Description of axial & app

Suggested Sessional work A) Assignments:

1. Autonomic nervous system
2. cranial & spinal nerves
3. structure & functions of eye
4. structure & functions of ear
5. structure & functions of nose

CO-BP101.5 To adapt the anatomy and physiology of heart and blood vessels, cardiac cycle & their disorders

Item	Approx Hrs
Lecture & Tutorial	7+3=10
Practical(P)	8

Total:	20

Session Outcomes(SOs)	Laboratory Instruction (LI)	Room Instruction(CI)	Self Learning (SL)
<p>Theory SO5.1: SO5.1 Structure & functions of heart SO5.2. introduction of blood vessels SO5.3. study of blood pressure & their regulation SO5.4. Cardiac cycle SO5.5. Electrocardiogram</p> <p>Practical SO-P5.1 Determine the heart rate & pulse rate SO-P5.2 understand the process of blood pressure recording</p>	<p>5.1 Determination of heart rate and pulse rate. 5.2 Recording of blood pressure</p>	<p>Unit V Cardiovascular system 5.1 Heart – anatomy of heart & blood circulation, 5.2 blood vessels, structure and functions of artery, vein and capillaries T1- Tutorial I 5.3 elements of conduction system of heart and heart beat, its regulation by autonomic nervous system, 5.4 cardiac output, 5.5 cardiac cycle. T2- Tutorial II 5.6 Regulation of blood pressure, & pulse, 5.7 Electrocardiogram and disorders of heart. T3- Tutorial III</p>	<p>1. Structure & function of blood vessels</p>

Suggested Sessional work

A) Assignments:

1. Structure & functions of heart
2. Cardiac cycle
3. Blood pressure & their regulation
4. Electrocardiogram
5. Conductive system of heart

Brief of Hours suggested for the Course Outcome

Course Out comes	Class Lecture(CI)	(LI)	Session al Work (SW)	Self Learning (SI)	Total Hour (CI+SW+ SI+LI)
CO-BP101.1: To recognize the various homeostatic mechanisms, basic anatomical term and cellular level organization & characteristics of different types of tissues and their location in variousorgans.	13	12	1	1	27
CO-BP101.2: To organize the structure and functions of skin,bones and joints of human body.	13	8	2	1	24
CO-BP101.3: To analyze the importance of blood,lymphatic system and immunity in human body.	13	32	1	1	47
CO-BP101.4: To relate the physiology of sympathetic, parasympathetic, spinal/cranial nerves and organization of special senses.	11	0	1	1	13
CO-BP101.5: To adapt the anatomy and physiology of heart and blood vessels, cardiaccycle & their disorders	10	8	1	1	20
Total Hours	60	60	6	5	131

Suggestion for End Semester Assessment

Suggested Specification Table (For ESA)

CO	Unit Titles	Marks Distribution			Total Marks
		A	C	I	
CO-1	To recognize the various homeostatic mechanisms, basic anatomical term and cellular level organization & characteristics of different types of tissues and their location in various organs.	08	06	01	15
CO-2	To organize the structure and functions of skin, bones and joints of human body.	06	08	01	15
CO-3	To analyze the importance of blood, lymphatic system and immunity in human body.	06	07	02	15
CO-4	To relate the physiology of sympathetic, parasympathetic, spinal/cranial nerves and organization of special senses.	05	10	-	15
CO-5	To adapt the anatomy and physiology of heart and blood vessels, cardiac cycle & their disorders	05	07	3	15
Total		11	26	13	75

Legend: A: Analyze, C: Create, I: Interpret

The end of semester assessment for Human Anatomy & Physiology-I will be held with written examination of 75 marks

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Demonstration
7. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Face book, Twitter, Whats app, Mobile, Online sources)
8. Brainstorming

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy Program
(Revised as on 01 August 2023)
Semester-I

Course Code: BP102 T&BP108P

Course Title: Pharmaceutical Analysis-I

Pre-requisite: Student should have basic knowledge about analytical chemistry.

Rationale/Objectives:-

- Upon completion of the course student shall be able to
- Understand the principles of volumetric and electro chemical analysis
- Carry out various volumetric and electrochemical titrations develop analytical skills

Course Outcomes:

CO-BP-102.1. To explain about accuracy, precision, error, sources of errors & minimizing techniques & significant figure

CO-BP-102.2. To compute analytical results and understand the physiochemical concepts of analysis, theories of acids and bases, stoichiometry etc

CO-BP-102.3. To understand the principles of volumetric/gravimetric and gasometric analytical techniques

CO-BP-102.4. To analyze the technique of redox titration

CO-BP-102.5. To analyze various electro chemical titrations.

Scheme of Studies:

Board Of Study	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credit (C)
			CI (L&T)	LI	SW	SL	Total Study Hours (CI+LI+SW+S L)

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Pharmaceutics I) Program

(Revised as on 01 August 2023)Semester-I

Course Code: BP-103T & BP-109P

Course Title : Pharmaceutics I

Pre- requisite: Student should have basic knowledge about state of matter, Known about dosage form like tablet capsule and syrup etc.

Rationale: Understand the history of profession of pharmacy. Understand the basics of different dosage forms, pharmaceutical incompatibilities and pharmaceutical calculations. Understand the professional way of handling the prescription. Preparation of various conventional dosage forms.

Course Outcomes:

C0-BP103T&109P.1: Understand Historical background and development of profession of pharmacy, dosage form, prescription and posology.

C0-BP103T&109P.2: Learn about pharmaceutical calculation and preparation of powder dosage form and liquid dosage form and their preparation.

C0-BP103T&109P.3: Understand monophasic, biphasic liquid dosage form and learn about suspension and emulsion and preparation of above dosage form.

C0-BP103T&109P.4: Understand suppositories and evaluation of suppositories and pharmaceutical Incompatibilities.

C0-BP103T&109P.5: Learn about Semisolid dosage forms, penetration of drugs. Preparation of ointments, pastes, creams and gels. Evaluation of semi solid dosages forms.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)					Total Credits (C)	
			CI		LI	SW	SL		Total Study Hours (CI+LI+SW+S)
			L	T					
Pharmacy	BP 103T & BP09P	Pharmaceutics-I	4		4	1	1	10	6

Legend: **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),

LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

SW: Sessional Work (includes assignment, seminar, mini project etc.),

SL: Self Learning,

C: Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Scheme of Assessment:

Theory

Board of Study	Course Code	Course Title	Scheme of Assessment (Marks)					End Semester Assessment (ESA)	Total Marks (PRA+ ESA)
			Progressive Assessment (PRA)						
			Academic activity, Any three (Quiz/ Assignment, open book test, filed work and seminar)	Student teacher interaction	Class Attendance	Sessional exam	Total Marks		
Pharmacy	BP103T	Pharmaceutics I	3	3	4	15	25	75	100

Practical Assessment

Board of Study	Course Code	Course Title	Scheme of Assessment (Marks)						Total Marks (A+B)
			Internal Assessment (A)			End Semester Examination(B)			
			Attendance	Record	Sessional Exam	Synopsis	Experiment	Viva	
Pharmacy	BP109P	Pharmaceutics- I practical	2	3	10	5	25	5	50

Guidelines for the allotment of marks for attendance

Percentage of Attendance	Theory	Practical
95 – 100	4	2
90 – 94	3	1.5
85 – 89	2	1
80 – 84	1	0.5
Less than 80	0	0

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

C0-BP103T&109P.1: Understand Historical background and development of profession of pharmacy, dosage form, prescription and posology.

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Pharmaceutical Inorganic chemistry) Program
(Revised as on 01 August 2023)
Semester-I

Course Code: BP104T/BP110P

Course Title: Pharmaceutical Inorganic chemistry

Pre-requisite: The Student should have basic knowledge of Inorganic substance with their importance and Uses.

Rationale/Objective s: Up on completion of the course student shall be able to

- To understand the sources of impurities and methods to determine the impurities in drugs.
- To Use different chemical methods to prepare inorganic pharmaceuticals.
- Understand the medicinal and pharmaceutical importance of inorganic compounds

Course Out comes:

CO-BP104-1: To understand the sources of impurities and methods to determine the impurities in drugs and pharmaceuticals.

CO-BP104-2: TO determine the level of specific impurities in the given inorganic compounds by performing different limit tests.

CO-BP104-3: To Use different chemical methods to prepare inorganic pharmaceuticals.

CO-BP104-4: To perform identification tests as per Indian Pharmacopoeia.

CO-BP104-5: Understand the medicinal and pharmaceutical importance of radiopharmaceuticals.

Scheme of Studies

Course code	Title of the course	Program Name	TOTAL Number of contact hours/Week						Credit
			Classroom Instruction (A)		Practical (P)	S W	SL	Total Hours (H)

Curriculum of B. Pharmacy (Inorganic chemistry I)

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

CO-BP104-1: To understand the sources of impurities and methods to determine the impurities in drugs and pharmaceuticals.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	16
SW	1
SL	1
Total:	31

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
<p>Theory SO1.1: Impurities in pharmaceutical substances SO1.2: General methods of preparation</p> <p>Practical SO-P- 1.1: Test sample would be conform with standard solution for limit test of chloride & test sample may be pass or fail. SO-P- 1.2: Test sample would be conform with standard solution for limit test of Sulphate & test sample may be pass or fail. SO-P- 1.3: Test sample would be conforming with standard solution for limit test of Heavy metal & test sample may be pass or fail. SO-P- 1.4: Test sample</p>	<p>1.1: To perform the limit test of Sulphate 1.2: To perform the limit test of Chloride 1.3: To perform the limit test of Iron 1.4: To perform the limit test of Heavy metal.</p>	<p>1.1: History of Pharmacopoeia, Sources and types of impurities 1.2: principle involved in the limit 1.3: Limit test for Chloride. 1.4: , Limit test for Sulphate, 1T.1: Tutorial 1.5: Limit test for Heavy metals 1.6: Limit test for Iron, Arsenic, 1.7: Limit test for Heavy metals 1.8: Modified limit test 1T.2: Tutorial class</p> <p>for Chloride and Sulphate 1.9: Various assay</p>	<p>1.1: Advanced analytical methods for Conformation of limit test for inorganic salts. 1.2: Development of National Formulary & role of WHO</p>

would be conforming to standard solution for limit test of Iron & test sample may be pass or fail.		methods for compounds 1.10: Medicinal uses of inorganic compounds 1T3: Tutorial class	
--	--	---	--

Suggested Assignments: History of Pharmacopoeia, Sources and types of impurities & various limit tests

Unit II

CO-BP104-2: TO determine the level of specific impurities in the given inorganic compounds by performing different limit tests.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	8
SW	1
SL	1
Total:	23

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
<p>Theory SO2.1: Acids, Bases and Buffers SO2.2: Major extra and intracellular electrolyte SO1.3: Dental products</p> <p>Practical SO-P- 2.1: Preparation of WHO ORS salt Powder</p> <p>SO-P- 2.2: To perform the Measurement of pH of some inorganic solutions</p>	<p>2.1To Prepare WHO ORS salt Powder 2.2: To perform the Measurement of pH of some inorganic solutions.</p>	<p>2.1: Buffer equations and buffer capacity in general, buffers in pharmaceutical systems 2.2: preparation, stability, buffered isotonic solutions, 2.3: measurements of tonicity, calculations and methods of adjusting isotonicity. 2.4: Theories of Acid, base & Buffer 2T.1: Tutorial Class 2.5: Functions of major physiological ions, Electrolytes used in the replacement therapy: 2.6: Functions of major physiological ions, Electrolytes used in the replacement therapy: 2.7: Calcium gluconate* and Oral Rehydration Salt (ORS), Physiological acid base balance 2.8: Dental products: Dentifrices, role of fluoride in the treatment of dental caries, 2T.2: Tutorial class 2.9: Desensitizing agents 2.10: Calcium carbonate, Sodium fluoride, and Zinc eugenol cement. 2T3: Tutorial class</p>	<p>2.1:Study the role of some newer inorganic salt in preparation of dental products</p>

Suggested Assignments: Acids, Bases and Buffers, Major extra and intracellular electrolytes, Dental products:

Unit III

CO-BP104-3: To Use different chemical methods to prepare inorganic pharmaceuticals.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	12
SW	1
SL	1

Total		37	28	10	75

Legend: R: Remember, U: Understand, A: Apply

The end of semester assessment for Pharmaceutical Inorganic chemistry will be held with written examination of 75 marks

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Demonstration
7. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Face book, Twitter, What's app, Mobile, Online sources)
8. Brainstorming

Suggested Learning Resources:

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Communication Skills) Program
(Revised as on 01August2023)

Course Code: BP 105T/BP111P

Course Title: Communication Skills

Pre-requisite: Students must have basic knowledge of English language.

Rationale: In order to compete in this fast growing world, LSWR skills of the students should be well developed and enhanced. Besides, they must have effective communication skills as it plays a vital role in shaping individual's personality and career. It also boosts the confidence and prepares them to face the audience fearlessly.

Course Outcomes:

After completion of the course:

1. Students will be able to summarize and explain an expanded world perspective that demonstrates an appreciation of a diverse range of individuals, communities, and viewpoints.
2. Students will demonstrate an understanding of human communication styles and events related to culture, self-concept, perception, listening, verbal communication and non-verbal communication.
3. Students will paraphrase information from outside sources effectively and accurately therefore Strengthen their ability to write academic papers, essays and summaries using the process approach.
4. Students will earn any job they want both in the near future and later in their lives as well as it will enhance their professional profile by showcasing top-notch presentation skills that set them apart in their field.
5. Students will develop critical thinking skills, improve communication skills, increase self-confidence, and build teamwork.

Scheme of Studies:

Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy Program
(Revised as on 01 August 2023)
Semester-I

Course Code: BP106T/BP112RBP

Course Title: Remedial biology theory

Pre-requisite: The Students should have a basic knowledge body parts and their primary functions as well as some knowledge of animal kingdom and plants.

Rationale/Objectives: Upon completion of the course student shall be able to

- Know the classification and salient features of five kingdoms
- Understand the basic components of anatomy & physiology of plant.
- Know understand the basic components of anatomy & physiology animal with special reference to humans.

Course Outcomes:

CO-BP106-1: To understand about diversity in living world, five kingdom classification and morphology of different plants.

CO-BP106-2: To know the composition of blood, digestion and respiration in humans.

CO- BP106-3: To understand excretory products and their elimination, neural control in human as well as reproductive systems of humans.

CO-BP106-4: To understand about plants with essential minerals and their related different cycles including photosynthesis.

CO-BP106-5: Understand the overall development of the plants.

Course-Curriculum

Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

CO-BP104-1: To understand about diversity in living world, five kingdom classification and morphology of different plants.

Item	Approx Hrs
Lecture & Tutorial	7
Practical(P)	20
SW	1
SL	1
Total:	29

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self Learning(SL)
<p>Theory SO1.1:Introduction Definition and characters Of living organisms SO1.2: Binomial nomenclature. SO1.3: Five kingdoms of life. SO1.4:General anatomy of root, stem, leaf of monocotyledons and dicotylidones Practical- SO-P-1:Introduction to experiments in biology Study of Microscope Section cutting techniques Mounting and staining Permanent slide preparation. SO-P-1.2:Study of stem, root, leaf, seed,fruit,flower& their modification. SO-P-1.3: Microscope and identification of different tissue of plant.</p>	<p>1.1:Understand The microscope functioning 1.2:Perform The staining techniques 1.3: Study about the cell and its inclusions. 1.4: Permanent slide was prepared.</p>	<p>1.1:Introduction Definition And characters of Living organisms 1.2: Diversity in living world. 1.3:Binomial nomenclature 1.4: Five kingdoms of life. 1.5: Morphology of differen parts of flowering plants root stem, inflorescence. 1.6:Flower,leaf ,fruit, seed 1.7:General anatomy of roo stem, leaf of monocotyledons and di-cotylidones.</p>	<p>1.1 Student can read about some More special characters of five kingdoms. 1.2:Understand and divide cereal plants, fruit plants and commercial purpose plants on the basis of monocotyledons and dicotylidones.</p>

Suggested Assignments: Definition and characters of living organisms

Unit-II

CO-BP106-2:To know the composition of blood, digestion and respiration in humans.

Item	Approx Hrs
Lecture & Tutorial	7
Practical(P)	6
SW	2
SL	1
Total:	16

Session Outcomes(SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self Learning(SL)
<p>Theory SO2.1:Composition of blood , blood groups, & Coagulation of blood. SO2.2: Structure of heart and bold vessel. SO2.3: Digestion , absorption and assimilation of digested food. SO2.4: Exchange of gases.</p> <p>Practicals SO-P-2.1: Determination of blood groups. SO-P-2.2- Determination of blood pressure . SO-P-2.3- Determination of tidal volume.</p>	<p>2.1:Blood sample collected Carefully. 2.2: To study about blood groups. 2.3: To study about the working of sphygmomanometer. 2. 4: Blood pressure was determined. 2.5: To study about the tidal volume.</p>	<p>2.1: Composition of blood, blood groups, coagulation of blood. 2.2: Composition and functions of lymph ,Human circulatory system 2.3: Structure of human heart and blood vessels Cardiac cycle, cardiac output and ECG 2.4:Human alimentary canal and digestive glands, Role of digestive enzymes. 2.5:Digestion, absorption and assimilation of digested food. 2.6:Human respiration, mechanism. 2.7:Exchange of gases</p>	<p>2.1:What effects can occur if unmatched blood. Group is given to a patients. 2.2: Can read about how respiration occurs in different species.</p>

Suggested Assignments: Body fluids and circulation

Unit-III

CO-BP106-3:To understand excretory products and their elimination, neural control in human as well as reproductive systems of humans.

Item	Approx Hrs
Lecture & Tutorial	7
Practical(P)	6
SW	2
SL	1
Total:	16

Session Outcomes(SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self Learning(SL)
<p>Theory SO3.1:Modes of excretion, Human excretory system, structure and function SO3.2:Modes of excretion, Human excretory system structure and function, generation and conduction of nerve impulse. SO3.3:Partsof female reproductive system, Parts of male reproductive system. SO3.4 Spermatogenesis and Oogenesis, Menstrual. Practical SO-P-3.1:Detailed study of frog by using computer models.</p>	<p>3.1: Study about the frog by model.</p>	<p>3.1:Modes of excretion ,Human excretory,system. ,structure and function. 3.2. Urine Formation Rennin Angiotensin system 3.3Definition and classification of nervous system ,Structure of a neuron, Generation And conduction of nerve impulse. 3.4. Structure of brain and spinal cord, functions of cerebrum, cerebellum, hypothalamus and medulla oblongata. 3.5. Functions of hormones secreted by endocrine glands, Endocrine glands and their secretions 3.6. Parts of female reproductive system, Parts of male reproductive system. 3.7 Menstrual cycle, Spermatogenesis and Oogenesis</p>	<p>3.1:List the Different excretory Products that living organisms excrete. 3.2: Study about brain disease and Understand their mechanism</p>

Suggested Assignments: Modes of excretion, Human excretory system

Unit-IV:

CO-BP106-4:To understand about plants with essential minerals and their related different cycles including photosynthesis

Item	Approx Hrs
Lecture & Tutorial	5
Practical(P)	2
SW	1
SL	1
Total:	9

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self Learning(SL)
Theory SO4.1:Essential mineral, micro nutrients. mineral, macro SO4.2 Nitrogen metabolism. Nitrogen cycle, biological nitrogen fixation. SO4.3 Photosynthesis pigments. PRACTICALS- SO-P-4.1. Study of cell and its inclusion.	4.1:Understand And read about the cell	4.1:Essential mineral, macro and micro nutrients. 4.2:Nitrogen metabolism, Nitrogen cycle, biological nitrogen fixation 4.3:Autotrophic nutrition. 4.4:photosynthesis, Photosynthetic pigments 4.5: Factors affecting photosynthesis.	4.1: Determine the effect the of the factor affecting photosynthesis.

Suggested Assignments: Essential mineral, macro and micro nutrients.

Unit-V**CO-BP104-5: Understand the overall development of the plants.**

Item	Approx Hrs
Lecture & Tutorial	4

Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Remedial Mathematics) Program
(Revised as on 01 August 2023)

Semester-I

Course Code: BP 106RMT
Course Title: Remedial Mathematics

Pre-requisite: Students should have basic knowledge of whole numbers, counting, place value, rounding, exponents, and negative numbers; addition and subtraction; and multiplication and division.

Rationale/Objectives:

Upon completion of the course the student shall be able to:-

1. Know the theory and their application in Pharmacy
2. Solve the different types of problems by applying theory
3. Appreciate the important application of mathematics in Pharmacy

Course Out comes:

CO1- BP 106 RMT 1: Apply mathematical concepts and principles to perform computations for Pharmaceutical Sciences.

CO2- BP 106RMT: 2. Create, use and analyze mathematical representations and mathematical relationships

CO3- BP 106RMT.3: Communicate mathematical knowledge and understanding to help in the field of Clinic Pharmacy

CO4- BP 106RMT.4: Explain the relationship between the derivative of a function as a function and the notion of the derivative as the slope of the tangent line to a function at a point.

CO5- BP106RMT.5: Distinguish between linear, nonlinear, partial and ordinary differential equations.

Scheme of Studies

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (HAP-II) Program
(Revised as on 01 August 2023)

Course Code: BP201T/BP207P

Course Title: Human Anatomy & Physiology-II

Pre- requisite: Student should have basic knowledge about structure & functions of the various systems of human body.

Scope: This subject is designed to impart fundamental knowledge on the structure and functions of the various systems of the human body. It also helps in understanding both homeostatic mechanisms. The subject provides the basic knowledge required to understand the various disciplines of pharmacy.

Rationale/Objectives: Upon completion of this course the student should be able to

1. Explain the gross morphology, structure and functions of various organs of the human body.
2. Describe the various homeostatic mechanisms and their imbalances.
3. Identify the various tissues and organs of different systems of human body.
4. Perform the various experiments related to special senses and nervous system.
5. Appreciate coordinated working pattern of different organs of each system

Course Outcomes:

CO-BP 201.1: To relate the basic knowledge about central nervous system including nervous tissue, brain & spinal cord.

CO-BP201.2: To illustrate the structure & functions of gastrointestinal tract & to learn about ATP/CTP/BMR.

CO-BP201.3: To learn about structure and functions of respiratory system and various mechanism involved in regulation of respiration and categorize the anatomy of urinary system and physiology of urine formation / micturition

CO-BP201.4: To appraise the essentiality of endocrine glands, their hormones and disorders.

CO-BP201.5: To predict the anatomy and physiology of male and female reproductive organs, pregnancy, process of delivery and concept of genetics.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies (Hours/Week)				Total Study Hours (CI+LI+SW+SL)	Total Credits (C)
			CI (L+T)	LI	SW	SL		
Pharmacy	BP 201T	Human Anatomy & Physiology-II	4	4	1	1	10	6

Legend:

CI: Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),

LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

SW: Sessional Work (includes assignment, seminar, mini project etc.),

SL: Self Learning,

C: Credits

Note: SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning

Scheme of Assessment:

Theory Assessment

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Pharmaceutical organic chemistry - I) Program
Curriculum of B. Pharmacy Program (Revised as on 01 August 2023)
Semester-II

Course Code: BP202T/BP208P
Course Title: Pharmaceutical Organic Chemistry - I
Pre-requisite: The Student should have basic knowledge of organic substance with their importance and Uses.

Rationale/Objective s: Up on completion of the course student shall be able to

- To understand the sources of impurities and methods to determine the impurities in drugs.
- To Use different chemical methods to prepare organic pharmaceuticals.
- Understand the medicinal and pharmaceutical importance of organic compounds

Course Out comes:

CO- BP202T -1: To understand the Classification, nomenclature and isomerism of organic compound

CO- BP202T -2: To understand the alkanes, alkenes and conjugated dienes

CO- BP202T -3: To use different, kinetics, order of reactivity of alkyl-halides and Alcohols

CO- BP202T -4: Understand the Carbonyl compounds*(Aldehydes and ketones), Nucleophilic addition reaction.

CO- BP202T -5: Understand the Carboxylic acids and aliphatic amines.

Scheme of Studies

Course code	Title of the course	Program Name	TOTAL Number of contact hours/Week					Credit	
			Classroom Instruction (A)		Practical (P)	SW	SL		Total Hours (H)
			Lecture	Tutorial					
BP202T	Pharmaceutical Organic Chemistry-1 Theory	B. Pharmacy	3	1	4	1	1	10	6

Legend:

CI: Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others,

LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

SW: Sessional Work (includes assignment, seminar, mini project etc.),

SL: Self Learning, Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Theory Assessment

Guidelines for the allotment of marks for attendance

Percentage of Attendance	Theory	Practical
95 – 100	4	2
90 – 94	3	1.5
85 – 89	2	1
80 – 84	1	0.5
Less than 80	0	0

Course Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

CO-BP202-1: to understand the reaction of benzene for synthesis of product in medical field.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	16
SW	1
SL	1
Total:	31

Session Outcomes(SO)	Laboratory Instruction(LI)	Class room Instruction(CI)	Self Learg (SL)
<p>Theory SO1.1: Understand Classification of Organic Compounds SO1.2: Explain Common and IUPAC systems of nomenclature of organic compounds SO1.3 Structural isomerism's in organic compounds</p> <p>Practical SO-P- 1.1: To Systematic qualitative analysis of unknown organic compounds SO-P- 1.2: To Preliminary test: Color, odour, aliphatic/aromatic compounds, saturation and unsaturation, etc.</p>	<p>1.1: Explain hemicyclic compound.</p> <p>1.2 Explain cyclic compound</p>	<p>Unit- 1 1.1 what is organic compound. 1.2 Classification of organic compound. 1.3 saturated hydrocarbon 1.4 un-saturated hydrocarbon 1.5 IUPAC Nomenclature of organic compound. 1.6 what is Isomerism 1.7 classification of Isomerism 1.8 Structural Isomerism 1.9 classification of Structural Isomerism. 1.10 Tautomerism</p> <p>1T.1: to study of alkane, alkene, alkynes</p>	Classification of Organic Compounds

<p>1.3: Explain homo-cyclic compound.</p> <p>1.4 Explain cyclic compound</p>		<p>1T.2: study of open chain compound and closed chain compound.</p> <p>1T3: Chain and Ring chain Isomerism</p>	
--	--	---	--

Suggested Assignments: Discuss Common and IUPAC systems of nomenclature of organic compounds

Unit II

CO-BP202-2: To understand the alkenes, alkenes and conjugated dines

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	8
SW	1
SL	1
Total:	23

Session Outcomes(SO)	Laboratory Instruction(LI)	Class room Instruction(CI)	Self Learning(SL)
<p>Theory SO2.1: Understand the SP³ hybridization in alkanes, Halogenations of alkenes, uses of paraffin's. SO2.2: Stabilities of alkenes, SP² hybridization in alkenes SO2.3: Explain E₁ and E₂ reactions – kinetics, order of reactivity of alkyl halides. SO2.4 rearrangement of carbocations, Saytzeffs orientation. SO2.5 Understand and explain of Markownikoff's orientation, Anti Markownikoff's orientation.</p> <p>Practical SO-P- 2.1: Detection of elements like Nitrogen, Sulphur and Halogen, by Lassaigne's test SO-P-2.2: Solubility test</p>	<p>Detection of elements like Nitrogen, Sulphur and Halogen, by Lassaigne's test. Solubility test</p>	<p>Unit-2 2.1 SP³ hybridization in alkanes, Halogenation of alkanes, uses of paraffins. 2.2 Stabilities of alkenes, Stabilities of alkenes, 2.3 SP² hybridization in alkenes. E1 and E2 reactions 2.4 kinetics, order of reactivity of alkyl halides, 2.5 rearrangements of carbocations, Saytzeffs orientation and evidences. 2.6 E1 verses E2 reactions, Factors affecting E1 and E2 reactions. 2.7 Ozonolysis, electrophilic addition reactions of alkenes, 2.8 Markownikoff's orientation, free radical addition reactions of alkenes, Anti Markownikoff's orientation. 2.9 Stability of conjugated dienes, Diel-Alder, electrophilic addition, 2.10 free radical addition reactions of conjugated dienes, allylic rearrangement 2T.1: free radical addition reactions of alkenes, 2T.2: Stability of conjugated dienes , 2T3 Diel-Alder, electrophilic addition.</p>	<p>2.1: Study the E₁ and E₂ reactions – kinetics, order of reactivity of alkyl halides.</p>

Suggested Assignments: Discuss Mark ownik off's orientation, Anti Markownikoff's orientation

Unit III

CO-BP202-3: to use different, kinetics, order of reactivity of alkyl halides and alcohols.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	12
SW	1
SL	1
Total:	27

Session Outcomes(SOs)	Laboratory Instruction(LI)	Classroom Instruction(CI)	Self Learning (SL)
<p>Theory</p> <p>SO3.1 Understand of SN₁ and SN₂ reactions - kinetics, order of reactivity of alkyl halides.</p> <p>SO3.2 stereochemistry and rearrangement of carbo-cations.</p> <p>SO3.3 Explain SN₁ versus SN₂ reactions, Factors affecting SN₁ and SN₂ reactions.</p> <p>SO3.4 Explain Qualitative tests, Structure and uses of alcohol</p> <p>SO3.5 Structure and uses of ethyl chloride, Chloroform,</p> <p>Practical</p> <p>SO-P- 3.1: Determination of Functional group test like Phenols, Amides/ Urea,</p> <p>SO-P- 3.2: Determination of Melting point/Boiling point of organic compounds</p>	<p>3.3. Determination of Functional group test like Nitro compounds and anilines.</p>	<p>3.1 SN₁ and SN₂ reactions</p> <p>3.2 kinetics, order of reactivity of alkyl halides,</p> <p>3.3 stereochemistry and rearrangement of carbocations.</p> <p>3.4 SN₁ versus SN₂ reactions, Factors affecting SN₁ and SN₂ reactions</p> <p>3.5 Structure and uses of ethyl chloride,</p> <p>3.6 Chloroform, trichloroethylene, tetra chloro ethylene,</p> <p>3.7 dichloromethane, tetra chloromethane and iodo form.</p> <p>3.8 Alcohols*- Qualitative tests, Structure and uses of Methyl alcohol,</p> <p>3.9 Qualitative tests, Structure and uses of chlorobutanol, Cetyl alcohol,</p>	<p>3.1: Structure and uses of ethyl chloride, Chloroform,</p>

<p>SO-P-3.3: Determination of Functional group test like Nitro compounds and anilines.</p>		<p>3.10 Benzyl alcohol, Glycerol, Propylene</p> <p>3T.1: Tutorial Class Qualitative tests, Structure and uses of Ethyl alcohol.</p> <p>3T.2: Tutorial class Introduction of alkyl halide</p> <p>3T3: Tutorial class Properties of alcohols.</p>	
---	--	--	--

Suggested Assignments: Discuss Qualitative tests, Structure and uses of Ethylalcohol, Methyl alcohol,

Unit IV: CO-BP202-4: : Understand the Carbonyl compounds*(Aldehydes and ketones), Nucleophilic addition reaction.

Item	Approx Hrs
Lecture & Tutorial	10
Practical(P)	8
SW	1
SL	1
Total:	20

Session Outcomes (SOs)	Laboratory Instruction(LI)	Class room Instruction(CI)	Self Learning (SL)
<p>Theory SO4.1 Understand of Nucleophilic addition reaction . Electromeric effect, aldol condensation, Crossed aldol condensation.</p> <p>SO4.2 Explain Cannizzaro reaction, Crossed Cannizzaro reaction, Benzoin condensation.</p> <p>SO4.3 Explain Perkin condensation, qualitative tests, Structure and uses of Formaldehyde, Paraldehyde.</p> <p>SO4.4 Explain Acetone, Chloral hydrate, Hexamine.</p> <p>SO4.5 Benzaldehyde, Vanilin, Cinnamaldehyde.</p> <p>Practical SO-P- 4.1: Functional group test like Aldehydes and Ketones, Esters. SO-P- 4.2: student are perform to Identification of the unknown compound from the literature using melting point/ boiling point.</p>	<p>Functional group test like aldehydes and ketones, esters.</p> <p>: Identification of the unknown compound from the literature using melting point/ boiling point.</p>	<p>Unit-4</p> <p>4.1 Introduction of carbonyl compound</p> <p>4.2 Nucleophilic addition,</p> <p>4.3 Electrometric effect</p> <p>4.4 aldol condensation, Crossed Aldol condensation,</p> <p>4.5 Cannizzaro reaction, Crossed Cannizzaro reaction,</p> <p>4.6 Benzoin condensation, Perkin condensation,</p> <p>4.7 qualitative tests, Structure and uses of Formaldehyde,</p> <p>4.8 Paraldehyde, Acetone, Chloral hydrate.</p> <p>4.9 Hexamine, Benzaldehyde,</p> <p>4.10 Vanilin, Cinnamaldehyde.</p> <p>4T1: Properties of Aldehyde</p> <p>4T.2: Properties of ketone</p> <p>4T3: Properties of Acetone.</p>	<p>4.1 Perkin condensation, qualitative tests, Structure and uses of Formaldehyde, Paraldehyde</p>

Suggested Assignments: Discuss Nucleophilic addition, Electrometric effect.

Unit V

CO-BP202-5: Understand the Carboxylic acids and aliphatic amines.

Item	Approx Hrs
Lecture & Tutorial	8+2=10
Practical(P)	8
SW	1
SL	1
Total:	20

Session Outcomes (SOs)	Laboratory Instruction(LI)	Class room Instruction(CI)	Self Learning (SL)
<p>Theory</p> <p>SO5.1 Understand Acidity of carboxylic acids, effect of substituents on acidity.</p> <p>SO5.2 Explain inductive effect and qualitative tests for carboxylic acids, amide and ester.</p> <p>SO5.3 Structure and Uses of Tartaric acid, Citric acid, Succinic acid. Oxalic acid, Salicylic acid, Benzoic acid,</p> <p>SO5.4 Explain Dimethyl phthalate, Methyl salicylate and Acetyl salicylic acid</p> <p>SO5.5 Understand and explain Aliphatic amines* - Basicity, effect of substituent on Basicity.</p> <p>Practical</p> <p>SO-P- 5.1: Functional group test like amines, Nitro compounds and Anilides.</p> <p>SO-P- 5.2: student are perform to Identification of the unknown organic compound.</p>	<p>5.1: Functional group test like amines, Nitro compounds and Anilides.</p>	<p>5.1 Introduction of Carboxylic acid</p> <p>5.2 Acidity of carboxylic a</p> <p>5.3 effect of substituents on acidity</p> <p>5.4 inductive effect and qualitative tests for carboxylic acid.</p> <p>5.5 amide and ester</p> <p>5.6 Structure and Uses of Acetic acid, Lactic acid.</p> <p>5.7 Tartaric acid, Citric acid, Succinic acid.</p> <p>5.8 Oxalic acid, Salicylic acid, Benzoic acid</p> <p>5.9 Benzyl benzoate, Dimethyl phthalate,</p> <p>5.10 Methyl salicylate and Acetyl salicylic aci</p> <p>5T1: Tutorial Class Introduction of aliphatic amines.</p> <p>5T.2: Tutorial class Basicity, effect of substituent on Basicity.</p> <p>5T3 : Qualitative test, Structure and uses of Ethanolamine, Ethylenediamine, Amphetamine</p>	<p>5.1: Explain Aliphatic amines - Basicity, effect of substituent on Basicity.</p>

Brief of Hours suggested for the Course Outcome

Course Out comes	Class Lecture (Cl)	(L)	Sessio na l Work (SW)	Self Learning (Sl)	Total Hour (Cl+SW +Sl+Ll)
CO-BP202-1: To understand the Classification, nomenclature and isomerism of organic compound	13	16	1	1	31

COBP202-5:	Understand the Carboxylic acids and Aliphatic amines.	05	07	03	15
Total		37	28	10	75

Legend: R: Remember, U: Understand, A:Apply

The end of semester assessment for Pharmaceutical Organic chemistry I will be held with written examination of 75 marks

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Demonstration
7. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Face book, Twitter, Whats app, Mobile, Online sources)
8. Brainstorming

Suggested Learning Resources:

S. No.	Title	Author	Publisher	Edition & Year
1	Advanced Organic Chemistry	Morrison Boyd	Pearson education	Revised edition edition 2010
2	A Text book of Organic Chemistry	Arun Bahl , B.S Bahl	S.Chand	Revised edition, 2019
3	Organic Chemistry	P.L. Soni	Sultan Chand,	1983
4	Organic Chemistry	R. T. Morrison and R. N. Boyd	Prentice -Hall	6th Edition 2007
5	Advanced organic chemistry	Dr. Jagdamba singh, Dr. LDS Yadav	Pragati prakashan	Revised edition 2016
6	Organic Chemistry	J. Clayden	Oxford Press	Revised edition

Curriculum Development Team:

1. **Prof. SP Gupta**, Director, RGIP, AKS University
2. **Mr. Satyendra Garg**, Assistant professor, RGIP, AKS University
3. **Dr. Manoj Kumar Sharma**, Assistant professor, RGIP, AKS University

Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Biochemistry) Program
(Revised as on 01 August 2023)
Semester-IInd

Course Code: BP203T/BP209P

Course Title: Biochemistry (theory)

Pre-requisite: Students should have a basic knowledge of Biomolecules - Introduction, classification, chemical nature and biological role of carbohydrate, lipids, nucleic acids, amino acids and proteins.

Rationale/Objective s: Upon completion of course student shell able to

1. Understand the catalytic role of enzymes, importance of enzyme inhibitors in design of new drugs, therapeutic and diagnostic applications of enzymes.
2. Understand the metabolism of nutrient molecules in physiological and pathological conditions.
3. Understand the genetic organization of mammalian genome and functions of DNA in the synthesis of RNAs and proteins

Course Outcomes:-

CO-BP203-1: To explain about Bio-molecules and Bioenergetics such as carbohydrate, lipids, nucleic acids, amino acids and proteins.

CO-BP203-2: To understand about the Carbohydrate metabolism and Biological oxidation

CO-BP203-3: To understand about the Lipid metabolism and Amino acid metabolism

CO-BP203-4: To understand the Nucleic acid metabolism and genetic information transfer

CO-BP203-5: To understand about the enzymes, enzyme inhibitor and coenzymes

--	--	--	--

Suggested Assignments:

- Lipid metabolism** β -Oxidation of saturated fatty acid (Palmitic acid)
- Amino acid metabolism** General reactions of amino acid metabolism: Transamination, deamination & decarboxylation, urea cycle and its disorders

Unit IV:

CO-203.4: To understand the Nucleic acid metabolism and genetic information transfer

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	08
SW	1
SL	1
Total:	23

Session Outcomes(SOs)	Laboratory Instruction(LI)	Class room Instruction(CI)	Self Learning(SL)
<p>Theory SO4.1: Nucleic acid metabolism and genetic information transfer SO4.2: Biosynthesis of purine and pyrimidine nucleotides SO4.3: Catabolism of purine nucleotides and Hyperuricemia and Gout disease SO4.4: Organization of mammalian genome SO4.5: Structure of DNA , RNA and their functions DNA replication (semi conservative model) and Transcription or RNA synthesis</p> <p>Practical SO-P-4.1: To perform Qualitative analysis of urine for abnormal constituents has been done. SO-P-4.2: To prepare and submitted blood creatinine</p>	<p>1 Qualitative analysis of urine for abnormal constituents 2 Determination of blood creatinine</p>	<p>1 To brief introduction of Nucleic acid metabolism 2 Detail in genetic information transfer 3 Biosynthesis of purine and pyrimidine nucleotides 4T.1: Tutorial class 4 Catabolism of purine nucleotides and Hyperuricemia and Gout disease 5 Organization of mammalian genome 6 Structure of DNA , RNA and their functions 4T.2: Tutorial class 7 DNA replication (semi conservative model) 8 Transcription or RNA synthesis 9 Genetic code 10 Translation or Protein synthesis Discuss in Iinhibitors. 4T.3: Tutorial class</p>	<p>4.1. Nucleic acid metabolism and genetic information transfer 4.2 Genetic code, Translation or Protein synthesis and inhibitors</p>

Suggested Assignments:

1. Nucleic acid metabolism and genetic information transfer
2. Structure of DNA and RNA and their functions
3. Genetic code, Translation or Protein synthesis and inhibitors

Unit V

CO-BP203-5: To understand about the enzymes, enzyme inhibitor and coenzymes

Item	Approx Hrs
Lecture & Tutorial	8+3=11
Practical (P)	16
SW	1
SL	1
Total:	29

Session Outcomes(SOs)	Laboratory Instruction(LI)	Class room Instruction (CI)	Self Learning(SL)
<p>Theory SO5.1: Enzymes- Introduction, properties, nomenclature and IUB classification of enzymes SO5.2: Enzyme kinetics (Michael is plot, Line Weaver Burke plot) SO5.3: Enzyme inhibitors with examples Regulation of enzymes: enzyme induction and repression, allosteric enzymes regulation SO5.4: Therapeutic and diagnostic applications of enzymes and isoenzymes SO5.5: Coenzymes – Structure and biochemical functions Practical: SO-P-5.1 To perform the salivary amylase activity has been done. SO-P-5.2 To Study the effect of Temperature on Salivary amylase activity has been done. SO-P-5.3 To Study the effect of substrate concentration on salivary amylase</p>	<p>5.1 Determination of Salivary amylase activity 5.2 Study the effect of Temperature on Salivary amylase activity. 5.3 Study the effect of substrate concentration on salivary amylase activity 5.4 Study of enzymatic hydrolysis of starch</p>	<p>5.1 To brief introduction of enzymes 5.2 properties, nomenclature and IUB classification of enzymes 5.3 Enzyme kinetics (Michael is plot, Line Weaver Burke plot) 5T.1: Tutorial class 5.4 Enzyme inhibitors with examples and Regulation of enzymes 5.5 enzyme induction and repression, allosteric enzymes regulation 5.6 Therapeutic and diagnostic applications of enzymes 5T.2: Tutorial class 5.7 Therapeutic and diagnostic applications of isoenzymes 5.8 Coenzymes – Structure and</p>	<p>5.1: Enzymes- Introduction, properties, nomenclature and IUB classification of enzymes. 5.2: Coenzymes – Structure and biochemical functions</p>

activity has been done SO-P-5.4 To Study of enzymatic hydrolysis of starch has been perform.		biochemical functions 5T.3: Tutorial class	
--	--	--	--

Suggested Sessional work & Assignments:

1. Introduction, properties, nomenclature and IUB classification of enzymes.
2. Coenzymes –Structure and biochemical functions

Brief of Hours suggested for the Course Outcome

Course Out comes	Class Lecture (Cl)	(L)	Sessional Work (SW)	Self Learning (Sl)	Total Hour (Cl+SW+Sl+LI)
CO-BP203.1: To explain about Bimolecules and Bioenergetics such as carbohydrate, lipids, nucleic acids, amino acids and proteins	12	0	1	1	14

Total		37	28	10	75

Legend: R: Remember, U: Understand, A: Apply

The end of semester assessment for Biochemistry will be held with written examination of 75 marks **Note.** Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Demonstration
7. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Face book, Twitter, Whats app, Mobile, Online sources)
8. Brainstorming

Suggested Learning Resources:

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Pathophysiology) Program

Course Code: BP204T

Course Title: Pathophysiology

Pre-requisite: Pathophysiology is the study of causes of diseases and reactions of the body to such disease producing causes. This course is designed to impart a thorough knowledge of the relevant aspects of pathology of various conditions with reference to its pharmacological applications, and understanding of basic pathophysiological mechanisms. Hence it will not only help to study the syllabus of pathology, but also to get baseline knowledge required to practice medicine safely, confidently, rationally and effectively.

**Rationale/
Objectives:**

- Upon completion of the subject student shall be able to –
1. Describe the etiology and pathogenesis of the selected disease states;
 2. Name the signs and symptoms of the diseases; and
 3. Mention the complications of the diseases.

Course Outcome:

CO-BP204T-1: To know the basic principle of cell injury, Cell adaptations & inflammations.

CO-BP204T-2: TO know various causes symptoms of diseases related to cardiovascular system, Respiratory system& Urinary system

CO-BP204T-3: To understanding Disease progress process along with symptoms of endocrine system, Nervous system & Gastrointestinal system

CO-BP204T-4: To Describe the etiology and pathogenesis of various disease states, of bones and joints & Principles of cancer.

CO-BP204T-5: To understand the complications that can arise from the disease like HIV, Typhoid, Meningitis& Tuberculosis with their management

Scheme of Studies

Course code	Title of the course	Program Name	Total number of contact hours/week						Credit
			Classroom Instruction (A)		Practical (P)	S W	S L	Total Hours (H)	
			Lecture	Tutorial					
BP204T	Pathophysiology (Theory)	B. Pharmacy	3	1	4	1	1	10	6

Legend:

CI: Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),

LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

SW: Sessional Work (includes assignment, seminar, mini project etc.),

SL: Self Learning, Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Theory Assessment

Board of Study	Course Code	Course Title	Scheme of Assessment (Marks)					End Semester	Total Marks(A+B+C)

			Academic activity, Any three (Quiz/ Assignment, open book test, filed work and seminar)	Student teacher interaction	Class Attendance(A)	Total Marks (A)	Sessional Exam (B)		
Pharmacy	BP204T	Pathophysiology	3	3	4	10	15	75	100

Practical Assessment

Board of Study	Course Code	Course Title	Scheme of Assessment (Marks)						Total Marks (A+B)
			Internal Assessment (A)			End Semester Examination(B)			
			Attendance	Record	Sessional Exam.	Synopsis	Experiment	Viva	
Pharmacy	BP204	Pathophysiology	2	3	10	5	25	5	50

Guidelines for the allotment of marks for attendance

Percentage of Attendance	Theory	Practical
95 – 100	4	2
90 – 94	3	1.5
85 – 89	2	1
80 – 84	1	0.5
Less than 80	0	0

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

CO-BP204T-1: To Know the basic principle of cell injury, Cell adaptations & inflammations.

CO-BP204 T-4	: To Describe the etiology and pathogenesis of various disease states, of bones and joints & Principles of cancer.	10	02	03	15
CO-BP204 T-5:	To understand the complications that can arise from the disease like HIV, Typhoid, Meningitis& Tuberculosis with their management	05	07	03	15
Total		37	28	10	75

Legend:A: Analyze, C: Create, I: Interpret

The end of semester assessment for Pathophysiology will be held with written examination of 75 marks

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks.

Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Demonstration

Suggested Learning Resources:

S. No.	Title	Author	Publisher	Edition & Year
1	Pathologic Basis of Disease; South Asia	Vinay Kumar, Abul K. Abas, Jon C. Aster; Robbins & Cotran	Elsevier;	4 th edition 2014
2	Text book of Pathology	Harsh Mohan;	Jaypee Publications;	6 th edition 2010

Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Computer Applications in Pharmacy) Program
(Revised as on 01August2023)

Semester-II

Course Code: BP205T/BP 210P
Course Title: Computer Applications In Pharmacy
Pre-requisite: The Student should have basic knowledge of computer with their importance and Uses.

Rationale/Objectives: Upon completion of the course student shall be able to

- Design the prescription letter and patient history presentation.
- Use the computer application in lab and design the Google form for the pharmacy labs.
- Understand the medicinal and chemical formula by the computer application.

Course Outcomes:

- CO-BP205-1:** Understand the basic structure, operation and characteristics of digital computer.
CO- BP205-2: To determine the level of web programming and design the pharmacy database.
CO- BP205-3: To Use different Application of computers In Pharmacy.
CO- BP205-4: Know the concept of Bioinformatics and Impact of Bioinformatics in Vaccine discovery.
CO- BP205-5: Understand the Computers as data analysis in Preclinical development.

			Attendance	Record	Sessional Exam.	Synopsis	Experiment	Via	
Pharmacy	BP2 05T	Computer Applications In Pharmacy	2	3	10	5	25	5	50

Guidelines for the allotment of marks for attendance

Percentage of Attendance	Theory	Practical
95 – 100	4	2
90 – 94	3	1.5
85 – 89	2	1
80 – 84	1	0.5
Less than 80	0	0

Course Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

CO-BP104-1: Understand the basic structure, operation and characteristics of digital computer.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	16
SW	1
SL	1
Total:	31

Session Outcomes(SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self Learning (SL)
Theory SO1.1: Number system SO1.2: Types of Number system. SO1.3: Conversion of decimal to binary number system and binary to octal number system. SO1.4: Binary addition. And subtraction. SO1.5: One's and Two's complement, binary division and Multiplication.	1.1 Design a questionnaire using a word processing package to gather information about a particular disease. 1.2 Create a HTML web page to show personal information.	1.1 Number system: 1.2 Binary number system, 1.3 Decimal number system, 1.4 Octal number system, 1T1 Tutorial Class 1.5 Hexadecimal number systems, 1.6 conversion decimal to binary, 1.7 binary to decimal, 1T2 Tutorial Class 1.8 octal to binary etc, 1.9 binary addition, 1.10 binary subtraction – 1.11 One's complement 1T1 Tutorial Class , Two's complement method, binary Multiplication, binary division.	1.1: Conversion of binary to octal number system. 1.2: Conversion of decimal number system to binary number system.

Suggested Assignments: Types of Number system, binary multiplication and binary division

Unit II

CO-BP104-2: understand the client and server communication and develop the pharmacy drug data base.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	8
SW	1
SL	1
Total:	23

Session Outcomes(SOs)	Laboratory Instruction (LI)	om Instruction (CI)	f Learning (SL)
<p>Theory</p> <p>SO2.1: Introduction to HTML, XML,CSS and Programming languages</p> <p>SO2.2: introduction to web servers.</p> <p>So3.3: Introduction to databases.</p> <p>SO4: working with MYSQL, MS ACCESS.</p> <p>SO5: Understand the Pharmacy Drug database.</p>	<p>2.1 Retrieve the information of a drug and its adverse effects using online tools</p> <p>2.2 Creating mailing labels Using Label Wizard , generating label in MS WORD</p> <p>2.3 Create a database in MS Access to store the patient information with the required fields Using access</p>	<p>2.1Web technologies: Introduction to HTML,</p> <p>2.2 XML,CSS and Programming</p> <p>2.3languages,</p> <p>2.4 introduction to web servers and Server Products</p> <p>2T1 Tutorial Class</p> <p>2.5: Introduction to databases,</p> <p>2.6 MYSQL, MS ACCESS,</p> <p>2.7 Pharmacy Drug database</p>	<p>2.1: Design the web page for patient monitoring.</p> <p>2.2 Develop the patient database.</p>

Suggested Assignments: : introduction to web servers, Introduction to database, Understand the Pharmacy Drug database

Unit III

CO-205-3: To Use different Application of computers in Pharmacy.

Item	ApproxHrs
Lecture & Tutorial	10+3=13
Practical(P)	12
SW	1

Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Environmental Sciences) Program
(Revised as on 01August2023)

Semester-II

Course Code: BP206 T

Course Title: Environmental Sciences

Pre-requisite: Student should have basic knowledge of nature and their surroundings.

Rationale: The students studying Environmental Science should possess foundational understanding about environment and its components. They should also know the importance of ecosystems in our surroundings.

Course Outcomes:

BP206 T.1: Create the awareness about environmental problems among learners.

BP206 T.2: Impart basic knowledge about the environment and its allied problems.

BP206 T.3: Develop an attitude of concern for the environment.

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies (Hours/Week)				Total Credits (C)

a. Assignments:

- i. Write an essay on air pollution.
- ii. What do you mean by acid rain write its causes and effects.
- iii. Describe the effects of water pollution.
- iv. How soil pollution can be control?

b. Other Activities(Specify):

Visit to different polluted sites and study the source of pollution and their effects.

Brief of Hours suggested for the Course Outcome

Course Outcomes	Class Lecture (Cl)	Sessional Work (SW)	Self-Learning (Sl)	Total hour (Cl+SW+Sl)
BP206 T.1: Create the awareness about environmental problems among learners.	10	1	2	13
BP206 T.2: Impart basic knowledge about the environment and its allied problems.	10	2	2	14
BP206 T.3: Develop an attitude of concern for the environment.	10	2	2	14
Total Hours	30	05	06	41

Suggestion for End Semester Assessment

CO	Unit Titles	Marks Distribution			Total Marks
		R	U	A	
CO-1	Create the awareness about environmental problems among learners.	03	01	01	05
CO-2	Impart basic knowledge about the environment and its allied problems.	02	06	02	10
CO-3	Develop an attitude of concern for the environment.	03	07	05	15
Total		11	26	13	50

Legend: R: Remember, U: Understand, A: Apply

The end of semester assessment for Fundamental of Environmental Science will be held with written examination of 50 marks

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Visit to cement plant
7. Face book, twitter, What's App, Mobile, Online sources)
8. Brainstorming

Suggested Learning Resources:

S. No.	Title	Author	Publisher	Edition &Year
1	Environmental Science	Y.K. Sing	New Age International Pvt, Publishers, Bangalore	4 th edition 2011
2	Environmental Biology	Agarwal, K.C	Nidi Publ. Ltd. Bikaner.	Six edition2001

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Pharmaceutical organic chemistry-II) Program
(Revised as on 01August2023)
Semester-III

Course Code: BP301T/BP305P
Course Title: Pharmaceutical organic chemistry-II
Pre-requisite: The Student should have basic knowledge of organic substance with their importance and Uses.

Rationale/Objective s: Up on completion of the course student shall be able to

- To understand the sources of impurities and methods to determine the impurities in drugs.
- To Use different chemical methods to prepare organic pharmaceuticals.
- Understand the medicinal and pharmaceutical importance of organic compounds

Course Out comes:

CO-BP301T-1: To understand the Analytical, synthetic and other evidences in the derivation of Structure of benzene, Orbital picture, resonance in benzene, Reactions of benzene

CO-BP301T -2: To understand the Structure and uses of phenol , aromatic amine, aromatic acids.

CO-BP301T -3: To use different chemical methods to find acid value, Saponification value , Ester value, Iodine value.

CO-BP301T -4: Understand the medicinal and pharmaceutical importance of naphthalene, Phenanthrene, Anthracene,

CO-BP301T -5: Understand the Stabilities the cycloalkane.

90 – 94	3	1.5
85 – 89	2	1
80 – 84	1	0.5
Less than 80	0	0

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

CO-BP301-1: to understand the reaction of benzene for synthesis of product in medical field.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	16
SW	1
SL	1
Total:	31

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction(CI)	Self Learning (SL)
<p>Theory SO1.1: Analytical, synthetic and other evidences in the derivation of structure of benzene SO1.2: Explain Orbital picture, resonance in benzene, aromatic characters, Huckel's rule SO1.3 Explain Reactions of benzene SO1.4 Understand orientation of mono substituted benzene compounds SO1.5 Structure and uses of DDT.</p> <p>Practical SO-P- 1.1: To synthesis of benzanilide from aniline. SO-P- 1.2: To synthesis of 2,4,6 Tribromoaniline from Aniline SO-P-1.3: Acetanilide by halogenations(Bromination)reaction SO-P-1.4: Benzoic acid from Benzyl chloride by oxidation reaction</p>	<p>1.3: Acetanilide by halogenations (Brominating) reaction</p> <p>1.4: Benzoic acid from Benzyl chloride by oxidation reaction</p>	<p>Unit-1 1.1 Analytical, synthetic and other evidences in the derivation of structure of benzene, 1.2 Orbital picture, resonance in benzene, 1.3 aromatic characters, Huckel's rule. 1.4 Reactions of benzene - nitration, sulphonation, halogenations reactivity. 1.5 Friedel crafts alkylation-reactivity, limitations, 1.6 Friedel crafts acylation. 1.7 Substituent's, effect of substituent's on reactivity 1.8 orientation of mono substituted benzene compounds towards electrophilic substitution reaction. 1.9 Structure and uses of Saccharin. 1.10 Structure and uses of BHC and Chloramine 1T.1: Orbital picture of benzene 1T.2: Halogenations of benzene 1T.3: Structure and uses of DDT</p>	<p>1.1: Structure and uses of DDT, BHC 1.2: Structure and uses of Saccharin and Chloramines</p>

Suggested Assignments: Discuss Reactions of benzene - nitration, sulphonation, halogenations reactivity, Friedelcrafts alkylation-reactivity, limitations, Friedelcrafts acylation.

Unit II

CO-BP301-2: TO determine the acidity of phenols, and understand the aromatic acid and amines.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	8
SW	1
SL	1
Total:	23

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction(CI)	Self Learning (SL)
<p>Theory SO2.1: Understand of Acidity of phenols, effect of substituents on acidity, qualitative tests. SO2.2: Explain Structure and uses of phenol, cresols, resorcinol, naphthols. SO2.3: Explain Aromatic Amines - Basicity of amines, effect of substituents on basicity. SO2.4 Explain synthetic uses of aryl diazonium salt.</p> <p>SO2.5 Understand and explain of aromatic acids-acidity, effect of substituent on acidity and reaction of benzoic acid.</p> <p>Practical SO-P- 2.1: Preparation of 1-Phenylazo-2-naphthol from Aniline by diazotization and coupling SO-P-2.2: preparation of Benzil from Benzoin by oxidation reaction.</p>	<p>Preparation of 1-Phenylazo-2-naphthol from Aniline by diazotization and coupling oxidation reaction: 3. preparation of Benzil from Benzoin by oxidation reaction.</p>	<p>Unit-2 Phenols, Aromatic amines, Aromatic acids 2.1 Acidity of phenols, 2.2 effect of substituents on acidity. 2.3 qualitative tests of phenols. 2.4 Structure and uses of cresols, resorcinol, naphthols. 2.5 Aromatic Amines - Basicity of amines, 2.6 effect of substituents on basicity. 2.7 synthetic uses of aryl diazonium salt. 2.8 Acidity of aromatic acids. 2.9 effect of substituents on acidity. 2.10 important of benzoic acid 2T.1: Properties of Phenols. 2T.2: Properties of Aromatic amines. 2T3: Properties of Aromatic acids.</p>	<p>2.1: Study the Structure and uses of phenol, cresols, resorcinol, naphthols.</p>

Suggested Assignments: Discuss Acidity of phenols, Structure and uses of phenol, cresols, resorcinol, naphthols

Unit III

CO-BP301-3: To Use different chemical methods to prepare fats and oils and its properties.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	12
SW	1
SL	1
Total:	27

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction(CI)	Self Learning(SL)
<p>Theory SO3.1 Understand of fatty acid reaction SO3.2 Explain Hydrolysis, Hydrogenation, Saponification. SO3.3 Explain Rancidity of oils, drying of oils, SO3.4 Explain Analytical constants Acid value, Saponification. SO3.5 Explain Ester value, Iodine value,</p> <p>Practical SO-P- 3.1: Determination of saponification value in given oil sample. SO-P- 3.2: Determination of acid value in given oil sample. SO-P- 3.3: Determination of iodine value in given oil sample.</p>	<p>3.3. Determination and significance of saponification value, acid value, Iodine value, Acetyl value.</p>	<p>3.1: fatty acid reaction 3.2: Hydrolysis of oils. 3.3:Hydrogenation of oils. 3.4: Determination of saponification value. 3.5: Determination of acid value. 3.6: Determination of Ester value. 3.7: determination and significance of Iodine value, 3.8 Determination of Acetyl value, 3.9 Determination of Reichert Meissl (RM) value. 3.10 Determination of Rancidity of oils. 3T1: Difference between oils and fats. 3T2 significance of hydrolysis of oils. 3T3 Saponification value.</p>	<p>3.1: Hydrogenation of oils.</p>

Suggested Assignments: Discuss Fatty acids– reactions

Unit IV: CO-BP301-4: To study of polynuclear hydrocarbons of various reaction used in pharmaceutical industry.

Item	Approx Hrs
Lecture & Tutorial	13
Practical(P)	8
SW	1
SL	1
Total:	20

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction(CI)	Self Learning(SL)
<p>Theory SO4.1 Understand of reaction of Polynuclear hydrocarbons.</p> <p>SO4.2 Explain Structure and medicinal uses of Naphthalene.</p> <p>SO4.3 Explain Structure and medicinal uses of Anthracene</p> <p>SO4.4 Explain Structure and medicinal uses of Phenanthrene,</p> <p>Practical SO-P- 4.1: student are perform to crystallization of Naphthalene. SO-P- 4.2: student are perform to steam distillation.</p>	<p>To prepare & Identified the Ferrous sulphate : To prepare & Identified the Copper sulphate</p>	<p>Unit – 4 4.1 Introduction of Polynuclear Hydrocarbon. 4.2 classification of Polynuclear Hydrocarbon. 4.3 Introduction of Naphthalene. 4.4 Synthesis of Naphthalene 4.5 Reaction of Naphthalene 4.6 Synthesis of Phenanthrene. 4.7 Reaction of Phenanthrene. 4.8 Introduction of Anthracene 4.9 Synthesis of Anthracene. 4.10 Reaction of Anthracene.</p> <p>4T1: Structure and medicinal uses of Diphenylmethane 4T.2: Structure and medicinal uses of Triphenylmethane 4T3: Structure and medicinal uses of Anthracene.</p>	<p>4.1: Study the Structure and medicinal uses of Naphthalene.</p>

Suggested Assignments: Discuss reaction of Polynuclear hydrocarbons

Unit V

CO-BP301-5: To study of cyclo alkanes of various reaction used in pharmaceutical industry.

Item	Approx Hrs
Lecture & Tutorial	8+2=10
Practical(P)	0
SW	1
SL	1
Total:	20

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction(CI)	Self Learning (SL)
Theory SO5.1 Understand Baeyer's strain theory and stabilities of cycloalkane. SO5.2 Explain limitation of Baeyer's strain theory. SO5.3 Explain Coulson and Moffitt's modification. SO5.4 Explain Sachse Mohr's theory(Theory of strainless rings),, SO5.5 Understand and explain of reactions of cyclopropane and cyclobutane.	NA	Unit-5. 5.1 Introduction of Cycloalkanes. 5.2 Baeyer's strain theory 5.3 limitation of Baeyer's strain theory 5.4 Coulson and Moffitt's modification 5.5 Sachse Mohr's theory 5.6 Introduction of cyclopropane, 5.7 reactions of cyclopropane , cyclobutane. 5.8 reactions of cyclobutane. 5T1: Tutorial Class 5T.2: Tutorial class	5.1: Baeyer's strain theory and stabilities of cycloalkane.

Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Physical Pharmaceutics-I) Program
(Revised as on 01August2023)

Semester-III

Course Code: BP302T/BP306P

Course Title: Physical Pharmaceutics-I theory

Pre-requisite: The Student should have basic knowledge of solution, solute, solvent and their properties.

Rationale/Objectives: Upon completion of the course student shall be able to

- Understand various physicochemical properties of drug molecules in the designing the dosage forms
- Know the principles of chemical kinetics & to use them for stability testing and determination of expiry date of formulations
- Demonstrate use of physicochemical properties in the formulation development and evaluation of dosage Forms.

Course Outcomes:

BP302.1: To Understand the concept of solubility and its importance in preparation of pharmaceutical products.

BP 302.2: We read about the state of matter, their changes and physicochemical properties of drug molecule with importance.

BP 302.3: To understand the surface and interfacial phenomenon with their measurement and use of HLB scale.

BP302.4: To gain knowledge about complication, protein binding with complex and drug distribution.

BP302.5: To understand the functioning of pH , buffers and their uses in pharmaceutical and biological systems.

SO-P-1.2: pKa value by Half Neutralization Henderson Hasselbalch equation was determined. SO-P-1.3: Partition co-efficient of benzoic acid in benzene and water was determined. SO-P-1.4: Partition co-efficient of Iodine in CCl₄ and water was determined. SO-P-1.5: % Composition of NaCl in a solution using phenol- water system by CST method was determined.</p>	<p>1: Drug solution was prepared. 2: Half neutralization/ Henderson Hasselbalch equation determined. 3: To perform Partition co-efficient of benzoic acid in benzene and water 4: To perform Partition co-efficient of Iodine in CCl₄ and water. 5: To perform CST method</p>	<p>1. Solubility expression, mechanisms of solute 2. solvent interaction 3. Ideal solubility parameters 4. Salvation and association 5. Binary Solution 1T.1: Tutorial class 6. Quantitative approach to the factors influencing solubility of drugs. 7. Solubility of gas in liquids 7.1.7 Solubility of liquids in liquids. 1.8: Procedure of limit test of Arsenic. 1T.2: Tutorial class Critical solution temperature and application Distribution law and its limitation, application 1T3: Tutorial class</p>	<p>1.1 Study the aim, objectives and importance of solubility in various dosage forms.</p>

Suggested Assignments: Solubility parameters, quantitative approach to the factor influencing, solubility of drugs, salvation and association, Distribution Law and limitation, Critical Solution Temperature

Unit-II

CO-BP302-2: To Know about the state of matter, their changes and physicochemical properties of drug molecule with importance.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total:	15

Session Outcomes(SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self Learning (SL)
Theory SO1.1: State of Matter changes in state of matter. SO1.2: State of matter changes in state of matter. SO1.3: Physicochemical properties of drug molecules and determination		1: Changes in state of matter. 2: Latent Heat, vapour pressure. 3: Sublimation critical point, eutectic mixture. 4: Gases Aerosols 5. Inhalers, relative humidity. 2T.1: Tutorial Class liquid complexes, liquid crystals, glassy states solid-crystalline, amorphous & polymorphism. Refractive index, optical rotation dielectric constant, dipole moment, 1T.2: Tutorial class dissociation constant, determinations and applications 1T3: Tutorial class	2.1: Determination of different physical chemical properties and their effects

Suggested Assignments: Sublimation critical point, Eutectic mixtures, dissociation constant, changes in state of matter and polymorphism

Unit III

CO-BP302-3: Understand the surface and interfacial phenomenon with their measurement and use of HLB scale

Item	ApproxHrs
Lecture & Tutorial	10+3=13
Practical(P)	12
SW	1
SL	1
Total:	27

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
<p>Theory SO3.1: Surface and interfacial tensions with their measurements SO3.2: HLB scale value surface agent SO3.3: Solubilisation, detergency, adsorption at solid interface Practical SO-P-3.1: Determination of HLB number of a surfactants by saponification method. SO-P-3.2: Determination of critical micellar concentration of surfactants. SO-P-3.3: Determination of surface tension of given liquids by drop count and drop weight method.</p>	<p>3.1: Saponification method was performed. 3.2: Surfactants SLS solution was prepared. 3.3: Critical micelle concentration was determined 3.4. Surface tension using stalagmometer was performed 3.5 To performed drop count and drop weight method</p>	<p>31: Liquid interface 32: Surface and interfacial tensions 3.3: Surface free energy 3.4: Measurement of surface & interfacial tensions. 3T.1: Tutorial Class 35: Spreading coefficient 36: Adsorption at liquid interfaces 37: Surface active agents. 38: HLB Scale. 3T.2: Tutorial class 38: Solubilisation 39: Detergency, adsorption at solid interface. 3T3: Tutorial class</p>	<p>31: Study of different types of surfactants that different detergent contains, including shampoo preparation</p>

Suggested Assignments: Liquid interface, surface & interfacial tensions, Surface free energy, Measurement of surface & interfacial tensions, spreading coefficient

Unit IV: CO-BP302-4: To gain knowledge about complexation, protein binding with complex and drug distribution.

Item	Approx Hrs
Lecture & Tutorial	8+3=11
Practical(P)	12
SW	1
SL	1
Total:	25

Session Outcomes(SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self Learning (SL)
<p>Theory</p> <p>SO4.1: Introduction,</p> <p>SO4.2: Classification of complexation.</p> <p>SO4.3: Complexation applications</p> <p>SO4.4: Complexation and drug action.</p> <p>SO4.5: Thermodynamic treatment of stability constants</p> <p>Practical SO-P-4.1: Determination of stability constant and donor acceptor ratio of PABA-Caffeine complex by solubility method</p> <p>SO-P- 4.2: Determination of stability constant and donor acceptor ratio of Cupric-Glycine complex by pH titration method</p> <p>SO-P-4.3: Determination of Freundlich and Langmuir constants Using activated charcoal</p>	<p>1: Prepare the caffeine complex</p> <p>2: Donor/Acceptor ratio by solubility method was determined</p> <p>3: Glycine and Cupric solution was prepared.</p> <p>4: pH meter was calibrated</p> <p>5: pH titration method was performed</p>	<p>4.1: Introduction,</p> <p>4.2: Classification of complexation.</p> <p>4.3: Complexation applications.</p> <p>4.4: Methods of analysis.</p> <p>4T1: Tutorial Class</p> <p>4.5: Protein binding..</p> <p>4.6: Complexation and drug action</p> <p>4.7: Crystalline structures of complexes.</p> <p>4.8: Thermodynamic treatment of stability constants.</p> <p>3T.2: Tutorial class</p>	<p>4.1: Understanding the distribution Action after binding to a protein.</p>

Suggested Assignments: Introduction, Classification of Complexation, methods of analysis, protein binding, Complexation and drug action,

Unit-V

CO-BP302-5: To understand the functioning of pH , buffers and their uses in pharmaceutical and biological systems.

Item	Approx Hrs
Lecture & Tutorial	7+2=9
Practical(P)	0
SW	1
SL	1
Total:	11

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
Theory SO5.1: Sorensen's pH scale. SO5.2: pH determination (electrometric & calorimetric). SO5.3: Application of buffers. SO5.4: Buffered isotonic solution.	NA	5.1: Sorensen's pH scale. 5.2: pH determination (electrometric & calorimetric). 5.3: Application of buffers 5.4: Buffer equation. 5T1: Tutorial Class 5.5: Buffer capacity 5.6: Buffer in pharmaceutical & biological systems. 5.7: Buffered isotonic solution 5T.2: Tutorial class	5.1: Look at different body fluids pH & understand what effect they will have if their pH changes

Assignments: Sorensen's pH scale, pH determination (electrometric and calorimetric), applications of buffers, Buffer equation, buffer capacity

Brief of Hours suggested for the Course Outcome

Course Outcomes	Class Lecture (Cl)	(L)	Sessional Work (SW)	Self Learning (Sl)	Total Hour (Cl+SW+ Sl +Ll)
CO-BP302-1: To Understand the concept of solubility and it's importance in preparation of pharmaceutical products.	13	16	1	1	31
CO- BP302-2: We read about the state of matter, their changes and physicochemical properties of drug molecule with importance.	13	8	1	1	23
CO-BP302-3: To understand the surface and interfacial phenomenon with their measurement and use of HLB scale.	13	12	1	1	27
CO- BP302-4: To gain knowledge about complexation, protein binding with complex and drug distribution.	10	8	1	1	20
CO- BP302-5: To understand the functioning of pH , buffers and their uses in pharmaceutical and biological systems.	10	0	1	1	12

Curriculum of B. Pharmacy (Pharmaceutical Microbiology) Program
(Revised as on 01August2023)

Semester-III

CourseCode:	BP303T& BP307P
CourseTitle:	Pharmaceutical Microbiology
Pre-requisite:	Student should have basic knowledge of biology, related biological processes, biochemistry, microbial world and their products.
Rationale/Objectives:	Upon completion of the course students shall be able to <ul style="list-style-type: none">• Understand methods of identification, cultivation and preservation of various microorganisms.• To understand the importance and implementation of sterilization in pharmaceutical processing and industry.• Learn sterility testing of pharmaceutical products.• Carried out microbiological standardization of Pharmaceuticals.• Understand the cell culture technology and its applications in pharmaceutical industries.

Course Outcomes:

CO-BP303-1: To understand the methods of identification, cultivation and preservation of various micro-organisms.

CO-BP303-2: To understand the importance and implementation of sterilization in pharmaceutical processing and industry.

CO-BP303-3: To acquire knowledge of concepts of microbiology and learn sterility testing of pharmaceutical products.

CO-BP303-4: To evaluate the methods used in studying bacteria and classifying them. To carried out microbiological standardization of pharmaceuticals.

CO-BP303-5: To understand the cell culture technology and its application in pharmaceutical industries.

Scheme of Studies

Course code	Title of the course	Program Name	TOTAL Number of contact hours/Week						Credit
			Class room Instruction (A)		Practical (P)	S W	S L	Total Hours (H)

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

Unit I

CO-BP303-1: To understand the methods of identification, cultivation and preservation of various micro-organisms.

Item	ApproxHrs
Lecture & Tutorial	10+02=12
Practical(P)	03
SW	02
SL	01
Total:	18

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self-Learning (SL)
<p>Theory SO1.1: Introduction, history and scope of microbiology SO1.2: Applications of microbiology in pharmaceuticals industry. SO1.3: Classification of bacteria, culture media and growth. SO1.4: To learn different microscopy techniques. SO1.5: Principles of different staining techniques. Practical SO-P-1.1: Introduction and study of different equipment and processing. SO-P-1.2: Media preparation and culture techniques. SO-P-1.3: Isolation of pure cultures.</p>	<p>1.1 Introduction and study of different equipment's and processing, e.g., B.O.D. incubator, laminar flow, aseptic hood, autoclave, hot air sterilizer, deep freezer, refrigerator, microscopes used in experimental microbiology. 1.2 Sub culturing of bacteria and fungus. Nutrient stabs and slants preparations. 1.3 Isolation of pure culture of micro-organisms by multiple streak plate technique and other techniques.</p>	<p>Introduction, history of micro biology, its branches, scope and its importance. Introduction to prokaryotes and eukaryotes. Study of ultra structure and morphological classification of bacteria, nutritional requirements, raw material used for culture media and physical parameters for growth, growth curve, isolation and preservation method for pure cultures, cultivation of anaerobes, quantitative measurement of the bacterial growth (total and viable count). Study of different types of face contrast microscopy, dark field microscopy and electron microscopy. 1T.1: Ultra structure of bacterial cell. 1T.2: Types of microscopy.</p>	<p>1. Cell structure, cell organelles and cell division.</p>

Item	Approx Hrs
Lecture & Tutorial	10+2=12
Practical(P)	03
SW	01
SL	02
Total:	18

Suggested Assignments:

1. Role of microorganisms in production of pharmaceuticals products.
2. Diagrammatic representation of different types of microscopy.
3. Chart to show types of culture media used to grow different types of microorganisms.

Unit II

CO-BP303-2: To understand the importance and implementation of sterilization in pharmaceutical processing and industry.

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self-Learning (SL)
<p>Theory SO2.1: Identification of bacteria and biochemical tests.</p> <p>SO2.2: Methods of sterilization.</p> <p>SO2.3: Evaluation of sterilization methods.</p> <p>SO2.4: Sterility indicators.</p> <p>Practical</p> <p>SOP-2.1: Sterilization methods</p> <p>SOP2.2: Different staining techniques</p> <p>SO-P- 2.3: Biochemical tests</p>	<p>2.1: Sterilization of glassware,</p> <p>2.2 preparation and sterilization of media.</p> <p>2.3 Staining methods- Simple, Grams staining and acid fast staining (Demonstration with practical).</p> <p>2.4 Biochemical tests</p>	<p>Identification of bacteria using staining techniques (simple, Gram's & Acid-fast staining) and biochemical tests (IMViC).</p> <p>Study of principle procedure, merits, demerits and applications of physical, chemical gaseous, radiation and mechanical method of sterilization.</p> <p>Evaluation of the efficiency of sterilization methods.</p> <p>Equipments employed in large scale sterilization.</p> <p>Sterility indicators.</p> <p>2T .1 Evaluation of the efficiency of sterilization methods.</p> <p>2T.2 Equipments employed in large scale sterilization.</p>	<p>2.1. Mode of nutrition in micro-organisms.</p> <p>2.2 Different types of stains and their functions.</p>

Suggested Assignments: 1. Read research paper related to sterility indicators and their application in pharmaceuticals.

Unit III

CO-BP303-3: To acquire knowledge of concepts of microbiology and learn sterility testing of pharmaceutical products.

Item		Approx Hrs	
Lecture & Tutorial		10+2=12	
Practical(P)		02	
SW		1	
SL		1	
Total:		16	

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self Learning (SL)
<p>Theory SO3.1: Study of fungi and viruses. SO3.2: Disinfectants and their mode of action. SO3.3: Evaluation of disinfectants. SO3.4: Sterility testing of products. Practical SO-P-3.1: Bacteriological analysis of water. SO-P-3.2: Sterility testing of Pharmaceuticals.</p>	<p>Bacteriological analysis of water. Sterility testing of pharmaceuticals.</p>	<p>Study of morphology, classification, reproduction/replication and cultivation of fungi and viruses. Classification and mode of action of disinfectants. Factors influencing disinfection, antiseptics and their evaluation. For bacterio-static and bactericidal actions. Evaluation of bactericidal & bacterio-static. Sterility testing of products (solid, liquid, ophthalmic and other sterile products) according to IP, BP and USP. 3T.1 Cultivation of viruses. 3T.2 Sterility testing of products.</p>	<p>General structure of fungi and virus. Types of disinfectant and antiseptics.</p>

Suggested Assignments: 1. Diagrammatic representation of replication in viruses and reproduction in fungi

Unit IV

CO-BP303-4: To evaluate the methods used in studying bacteria and classifying them. To carried out microbiological standardization of pharmaceuticals.

Item	Approx Hrs
Lecture & Tutorial	08+2=11

Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Pharmaceutical Engineering) Program
(Revised as on 01August2023)
Semester-III

Course Code: BP304T/BP308P

Course Title: **Pharmaceutical Engineering**

Pre-requisite: The main purpose of subject is to impart the students the knowledge of how the secondary metabolites are produced in the crude drugs, how to isolate and identify and produce them industrially.

Rationale/Objectives: This course is designed to impart a fundamental knowledge on the art and science of various unit operations used in pharmaceutical industry.

Course Outcomes:

CO-BP304-1: To know the various unit operations used in Pharmaceutical industries.

CO-BP304-2: To understand the material handling techniques.

CO-BP304- 3: To perform various processes involved in pharmaceutical manufacturing process

CO-BP304-4: To carry out various test to prevent environmental pollution.

CO-BP304-5: To appreciate and comprehend significance of plant lay out design for optimum use of resources. Preventive methods used for corrosion control in Pharmaceutical industries.

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

CO-BP304-1: To know the various unit operations used in Pharmaceutical industries.

Item	Approx Hrs
Lecture & Tutorial	10+3=13

Total		37	28	10	75

Legend: A:Analyse , C: Create I: Interpret

The end of semester assessment for Pharmaceutical Engineering Will be held with written examination of 75 marks

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional /Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Demonstration
7. ICT Based Teaching Learning (Video Demonstration /Tutorials CBT, Blog, Face book, Twitter, Whats app, Mobile, Online sources)
8. Brainstorming

**Rajeev Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Organic Chemistry-III) Program
(Revised on 01 August 2023)**

Semester-IV

Course Code: BP401T

Course Title: Pharmaceutical Organic Chemistry - III

Pre-requisite: The Student should have basic knowledge of Inorganic substance with their importance and Uses.

Rationale/Objective s: Up on completion of the course student shall be able to

- To understand the sources of impurities and methods to determine the impurities in drugs.
- To Use different chemical methods to prepare organic pharmaceuticals.
- Understand the medicinal and pharmaceutical importance of organic compound

Course Out comes:

CO-BP401-1: To understand the Stereoisomerism, Optical isomerism– Optical activity, enantiomerism, diastereoisomerism, Mesocompounds.

CO-BP401-2: To determine the Geometrical isomerism Nomenclature of geometrical isomers.

CO-BP401-3: To Use different heterocyclic compounds: nomenclature and classification.

CO-BP401-4: To Use different Synthesis, reactions and medicinal uses of Pyrazole, Imidazole, Oxazole and Thiazole Compounds.

CO-BP401-5: To Understand the Reactions of synthetic importance.

Total		37	28	10	75

Legend: R: Remember, U: Understand, A: Apply

The end of semester assessment for Organic Chemistry-III will be held with written examination of 75 marks

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks.

Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Demonstration
7. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Face book, Twitter, Whats app, Mobile, Online sources)
8. Brainstorming

Curriculum of B. Pharmacy (organic chemistry I)

Suggested Learning Resources:

S. No.	Title	Author	Publisher	Edition & Year

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (**Medicinal Chemistry–I**) Program
(Revised as on 01August2023)
Semester-IV

CourseCode: BP402T/BP406P

CourseTitle: MEDICINAL CHEMISTRY–I

Pre-requisite: Students should have a basic knowledge of organic chemistry, and pharmaceutical or biological sciences and physical chemistry with Chemical compounds.

Rationale/Objectives: Upon completion of the course the student shall be able to

1. understand the chemistry of drugs with respect to their pharmacological activity
2. understand the drug metabolic pathways, adverse effect and therapeutic value of drugs
3. know the Structural Activity Relationship (SAR) of different class of drugs.
4. write the chemical synthesis of some drugs

Course Outcomes:

CO-BP402T -1: To understand the brief Introduction of Medicinal Chemistry, History and development of medicinal chemistry Physicochemical properties in relation to biological action & Drug metabolism.

CO-BP402T-2: To understand the Drugs acting on Autonomic Nervous System, Adrenergic Neurotransmitters,SAR of Sympathomimetic agents withstructure, mechanism of action, Structure activity relationship, synthesis anduses of Adrenergic Antagonists.

CO-BP402T-3: To understand the Cholinergic neurotransmitters, SAR of Parasympathomimetic agents,with structure, mechanism of action, Structure activity relationship, synthesis anduses of Parasympathomimetic agents and Cholinergic Blocking agents.

CO-BP402T-4: To understand the structure, mechanism of action, Structure activity relationship, synthesis anduses of Sedatives and Hypnotics, Antipsychotics & Anticonvulsants agents.

CO-BP402T-5: To understand the structure, mechanism of action, Structure activity relationship, synthesis of General anesthetics and Narcotic and non-narcotic analgesics.

Scheme of Studies

Curriculum of B. Pharmacy

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the over-all achievement of Course Outcomes (COs) upon the course's conclusion.

CO-BP402T -1: To understand the brief Introduction of Medicinal Chemistry, History and development of medicinal chemistry Physicochemical properties in relation to biological action & Drug metabolism.

Attendance Theory/ Practical

Item	Approx Hrs

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
<p>SO5.1To understand the Drugs acting on Central Nervous System.</p> <p>SO5.2. To understand the General anesthetics.</p> <p>SO5.3.To understand the Narcotic and non-narcotic analgesics.</p> <p>SO5.4To understands the Morphine and related drugs.</p> <p>SO5.5To understands the Narcotic antagonists.</p> <p>SO5.6To understands the Anti-inflammatory agents.</p>	<p>1. Assay of drugs Ibuprofen, Aspirin,</p>	<p>5.1 Brief introduction of General anesthetics with Structure, synthesis, SAR, MOA & uses of Inhalation anesthetics. Dissociative anesthetics.</p> <p>5.2Brief introduction of General anesthetics with Structure, synthesis, SAR, MOA & uses of Structure, synthesis, SAR, MOA & uses of Ultra short acting barbiturates.</p> <p>5T.1 Tutorial Class</p> <p>5.3Brief introduction of General anesthetics with Structure, synthesis, SAR, MOA & uses of Structure, synthesis, SAR, MOA & uses of Dissociative anesthetics.</p> <p>5.4Brief introduction of Narcotic and non-narcotic analgesics.</p> <p>5T.2Tutorial Class</p> <p>5.5Structure, synthesis, SAR, MOA & uses of Morphine and related drugs.</p> <p>5.6Structure, synthesis, SAR, MOA & uses of Anti-inflammatory agents.</p> <p>5.7Structure, synthesis, SAR, MOA & uses of Narcotic antagonists.</p> <p>5T.3Tutorial Class</p>	<p>5.1 Study of the Drugs acting on Central Nervous System</p> <p>5.2 study of the Structure, synthesis, SAR, MOA & uses of the Narcotic and non-narcotic analgesics,.</p>

Suggested Sessional work Assignments:

1. Explain the structure, synthesis, SAR, MOA and uses of Anti-inflammatory agent.
2. Short note about SAR of Morphine analogues.
3. Write the General anesthetics with structure, synthesis, SAR, Uses and MOA of Inhalation anesthetics.

AKS University

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Physical Pharmaceutics-II) Program
Semester-IV

Course Code: BP403T/BP407P

Course Title: Physical Pharmaceutics-II (theory)

Pre-requisite: Students should have a basic knowledge of particle size of various dosage forms such as liquid dosage form. Example- colloidal , emulsion , suspension etc.

Rationale/Objective s: Upon the completion of the course student shall be able to

1. Understand various physicochemical properties of drug molecules in the designing the dosage forms.
2. Know the principles of chemical kinetics & to use them for stability Testing and determination of expiry date of formulations.
3. Demonstrate use of physicochemical properties in the formulation Development and evaluation of dosage forms.

Course Out comes:

CO- BP 403.1: To understand various physicochemical properties of drug molecules in the designing the dosage forms.

CO- BP 403.2: To understand about the flow properties of Newtonian and non-Newtonian system.

CO- BP 403.3: Demonstrate use of physicochemical properties in the formulation development and evaluation of dosage forms.

CO- BP 403.4: To understand the Micromeretics- fundamental and derived properties such as Particle size and distribution by different methods and determination of date of formulations.

CO- BP 403.5: To understand the principles of chemical kinetics of drug stability. Accelerated stability testing in expiration dating of pharmaceutical dosage forms.

Scheme of Studies

Course code	Title of the course	Program Name	TOTAL Number of contact hours/Week						Credit
			Classroom Instruction (A)		Practical(P)	SW	SL	Total Hours(H)	
			Lecture	Tutorial					
BP403T	physical pharmaceuticals-II (Theory)	B. Pharmacy	3	1	4	1	1	10	6

Legend: CI: Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and dr)

LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

SW: Sessional Work (includes assignment, seminar, mini project etc.),

SL: Self Learning, Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Theory Assessment

Guidelines for the allotment of marks for attendance

Percentage of Attendance	Theory	Practical
95 – 100	4	2
90 – 94	3	1.5
85 – 89	2	1
80 – 84	1	0.5
Less than 80	0	0

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

CO-BP403-1: To understand various physicochemical properties of drug molecules in the designing the dosage forms.

Item	Approx Hrs
Lecture & Tutorial	8+3=11

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Pharmacology-I) Program
Semester-IV

Course Code: BP404T& BP408P

Course Title: Pharmacology-I

Pre-requisite: Student should have basic knowledge of General Pharmacology, Anatomy & Physiology of human body, Biochemistry, Pathophysiology.

Rationale/Objectives: Upon completion of the course student shall be able to

- To understand the pharmacological actions of different categories of drugs
- To explain the mechanism of drug action at organ system/sub-cellular/macro molecular levels.
- To apply the basic pharmacological knowledge in the prevention and treatment of various diseases.
- To observe the effect of drugs on animals by simulated experiments
- To appreciate correlation of pharmacology with other biomedical sciences

Course Outcomes:

- CO-BP404-1:** To understand the general pharmacology, introduction to pharmacology & pharmacokinetics.
- CO-BP404-2:** To acquire the knowledge of pharmacodynamics, adverse drug reactions, drug interactions, (pharmacokinetic and pharmacodynamics) & drug discovery and clinical .
- CO-BP404-3:** To understanding the pharmacology of drugs acting on peripheral nervous system.
- CO-BP404-4:** To familiarize with basic concept of pharmacology of drugs acting on central nervous system.
- CO-BP404-5:** To comprehend the basic concepts of pharmacology of drugs acting on central nervous system.

Scheme of Studies

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

Unit-I

CO-BP404-1: To understand the general pharmacology, introduction to pharmacology & pharmacokinetics.

Item	Approx Hrs
Lecture & Tutorial	08+3=11
Practical(P)	24
SW	1
SL	1
Total:	37

Session Outcomes(SOs)	Laboratory Instruction (LI)	Classroom Instruction(CI)	Self Learning (SL)
<p>Theory SO1.1: Introduction to Pharmacology SO1.2: Pharmacokinetics</p> <p>Practical SO-P-1.1: Introduction to experimental Pharmacology SO-P-1.2: Commonly used instruments in experimental pharmacology. SO-P-1.3: Study of common laboratory animals. SO-P-1.4: Maintenance of laboratory animals as per CPCSEA guidelines. SO-P-1.5: Common laboratory techniques. Blood withdrawal, serum and plasma separation, anesthetics and euthanasia used for animal studies. SO-P-1.6: Study of different routes of drug administration in Mice /rats.</p>	<p>1.1: To study the introduction to Experimental pharmacology 1.2: To study the commonly used instruments in experimental pharmacology. 1.3: To study the common laboratory animals. 1.4: To study the Maintenance of laboratory animals as per CPCSEA Guidelines. 1.5: To study the Common laboratory techniques. Blood withdrawal, serum and plasma separation, anesthetics and euthanasia used for animal studies. 1.6: To study the different routes of drugs administration in mice/rats.</p>	<p>1.1 Definition, historical landmarks and scope of pharmacology. 1.2 Nature and source of drugs, essential drugs concept and routes of drug administration. 1.3 Agonists, antagonists (competitive and non competitive), spare receptors. 1T.1 Tutorial Class 1.4 Addiction, tolerance, dependence, tachyphylaxis, idiosyncrasy, allergy 1.5 Membrane transport 1.6 Absorption, distribution, metabolism and excretion of drugs. 1T.2 Tutorial Class 1.7 Enzyme induction, enzyme inhibition. 1.8 Kinetics of elimination. 1T.3 Tutorial Class</p>	<p>1.1: Nature and source of drugs. 1.2: Membrane transport.</p>

Suggested Assignments: 1. Nature and source of drugs, 2. Routes of drug administration, 3. Membrane transport, 4. Absorption, distribution, metabolism and excretion of drugs, 5. Kinetics of elimination.

Unit-II

CO-BP404-2: To acquired the knowledge of pharmacodynamics, adverse drug reactions, drug interactions (pharmacokinetic and pharmacodynamics) & drug discovery and clinical evaluation of new drugs.

Item	Approx Hrs
Lecture & Tutorial	12+3=15
Practical(P)	0
SW	1
SL	1

CO-3	To understanding the Pharmacology of drugsacting on peripheral nervous system.	08	07	01	16
CO-4	To familiarize with basic concept of Pharmacology of drugs acting on central nervous system.	07	06	01	14
CO-5	To comprehend the basic concepts of Pharmacology of drugs acting on central nervous system.	08	07	01	16
Total		39	33	05	77

Legend: A: Analyze, C: Create, E: Evaluate

The end of semester assessment for Pharmacology-I will be held with written examination of 75 marks

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks.

Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Demonstration
7. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Facebook, Twitter, Whatsapp, Mobile,
8. online sources)
9. Brainstorming

Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Pharmacognosy and Phytochemistry-I) Program
(Revised as on 01August2023)**Semester-IV**

Course Code: BP405T/BP409P

Course Title: Pharmacognosy and Phytochemistry-I

Pre-requisite: The subject involves the fundamentals of Pharmacognosy like scope, classification of crude drugs, their identification and evaluation, phyto chemicals present in them and their medicinal properties.

Rationale/Objectives Upon completion of the course student shall be able to know the Introduction to Pharmacognosy and Quality control of crude drugs.

Course Outcomes:

CO-BP405-1: To know the techniques in the cultivation and production of crude drugs.

CO-BP405-2: To know the crude drugs, their uses and chemical nature.

CO-BP405-3: To know the evaluation techniques for the herbal drugs.

CO-BP405-4: To carry out the microscopic and morphological evaluation of crude drugs.

CO-BP405-5: To modern methods of extraction, application.

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (**Medicinal Chemistry – II**) Program
(Revised as on 01August2023)
Semester-V

Course Code: BP501T

Course Title: MEDICINAL CHEMISTRY – II

Pre-requisite: Students should have a basic knowledge of organic chemistry and pharmaceutical or biological sciences and physical chemistry with Chemical compounds.

Rationale/Objectives: Upon completion of the course the student shall be able to

1. Understand the chemistry of drugs with respect to their pharmacological activity
2. Understand the drug metabolic pathways, adverse effect and therapeutic value of drugs.
3. Know the Structural Activity Relationship of different class of drugs
4. Study the chemical synthesis of selected drugs

Course Out comes:

CO-BP501-1: To understand the structure, mechanism of action, Structure activity relationship, synthesis and uses of antihistaminic agent and anti-neoplastic agents.

CO-BP501-2: To understand the structure, mechanism of action, Structure activity relationship, synthesis and uses of Anti-anginal agents and Anti-hypertensive agents.

CO-BP501-3: To understand the structure, mechanism of action, Structure activity relationship, synthesis and uses of Anti-arrhythmic agents, Anti-hyperlipidemic agents, Coagulant & Anticoagulants, and Drugs used in Congestive Heart Failure agents.

CO-BP501-4: To understand the Drugs acting on Endocrine system and structure, mechanism of action, synthesis and uses of Sex hormones, Drugs for erectile dysfunction, Oral contraceptives, Corticosteroids and Thyroid and antithyroid drugs.

CO-BP501-5: To understand the structure, mechanism of action, Structure activity relationship, synthesis of Antidiabetic agents and Local Anesthetics with SAR of Local Anesthetics

Curriculum of B. Pharmacy (Medicinal Chemistry-II (Theory))

90 – 94	3	1.5
85 – 89	2	1
80 – 84	1	0.5
Less than 80	0	0

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

CO-BP501-1: To understand the structure, mechanism of action, Structure activity relationship, synthesis and uses of antihistaminic agents and Anti-neoplastic agents.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total:	15

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
Theory SO1.1: Antihistaminic agents SO1.2: H ₁ -antagonists SO1.3: H ₂ -antagonists SO1.4: Gastric Proton pump inhibitors. SO1.5: Anti-neoplastic agents of all Plant products drugs. SO1.6: Alkylating agents. antagonists drugs. SO1.7: Antimetabolites. SO1.8: Antibiotics. SO1.9: Plant products. SO1.10: Miscellaneous.		1.1 Detailed about Histamine, receptors and their distribution in the human body. 1.2 Synthesis, MOA & uses of all H ₁ - antagonists drugs. 1.3 Synthesis, MOA & uses of all H ₂ - Study of the Antihistaminic agents and Anti-neoplastic agents. 1T.1: Tutorial class 1.4 Synthesis, MOA & uses of all Gastric Proton pump inhibitors drugs. 1.5 introduction, classification of Anti-neoplastic agents. 1.6 Synthesis, MOA & uses of all Alkylating agents drugs. 1.7 Synthesis, MOA & uses of all Antimetabolites drugs. 1T.2: Tutorial class 1.8 Synthesis, MOA & uses of all Antibiotics drugs. 1.9 Synthesis, MOA & uses. 1.10 Synthesis, MOA & uses of all Miscellaneous drugs. 1T.3: Tutorial class	1. Study of the Antihistaminic agents and Anti-neoplastic agents.

Suggested Assignments:

Synthesis of Di-phenhydramine hydrochloride, Cimetidine, Meclorothamine, Mercaptopurine, Methotrexate
 Write the all structure, MOA and uses of GPPI (Gastric Proton pump inhibitors) drugs.

Write the all structure, MOA and uses of H₁-antagonists.

Explain Anti-neoplastic agents with classification.

Unit II

CO-BP502-2: To understand the structure, mechanism of action, Structure activity relationship, synthesis and uses of Anti-anginal agents and Anti-hypertensive agents.

Item	Approx Hrs

<p>SO3.1 To understand the structure, synthesis, mechanism of action, and uses of Anti- arrhythmic Drugs.</p> <p>SO3.2. To understand the structure, synthesis, mechanism of action, and uses of Anti- hyperlipidemic agents.</p> <p>SO3.3 To understand the structure, synthesis, mechanism of action, SAR and uses of Coagulant & Anticoagulants.</p> <p>SO3.4 To understand the structure, mechanism of action and uses Drugs used in Congestive Heart Failure.</p>		<p>3.1 Brief introduction of arrhythmia and</p> <p>3.2 Anti- arrhythmic Drugs with classification. Structure, Synthesis, SAR, MOA & uses of Quinidine sulphate, Procainamide hydrochloride,</p> <p>3.2 Structure, Synthesis, SAR, MOA & uses of Disopyramide phosphate,</p> <p>3.4 Phenytoin sodium, Lidocaine hydrochloride Structure, MOA & uses of Tocainide hydrochloride</p> <p>3T.1: Tutorial class</p> <p>3.5: Mexiletine hydrochloride, Lorcaïnide hydrochloride, Amiodarone,</p> <p>3.6: Structure, SAR, MOA & uses of Clofibrate, Lovastatin, Cholesteramine and Cholestipol.</p> <p>3.7: Brief introduction of Coagulant & anticoagulants</p> <p>3.8: Introduction, Synthesis, SAR, MOA & uses of Menadione</p> <p>3.9: Acetomenadione, Warfarin,</p> <p>3.10 Anisindione, clopidogrel.</p> <p>3T.2: Tutorial class</p> <p>3.11 Study of the Anti- arrhythmic Drugs, Anti-hyperlipidemic agents,</p> <p>3T.3: Tutorial class</p>	<p>3.1 Coagulant & anticoagulants and drugs used in Congestive Heart Failure. Synthesis, SAR, MOA & uses of Congestive Heart Failure drugs.</p> <p>Structure, MOA & uses of Digoxin, Digitoxin,</p> <p>Structure, MOA uses of Nesiritide, Bosentan, Tezosentan.</p>

Suggested Assignments:

Synthesis, MOA and uses of disopyramide phosphate.

Explain Anti-hyperlipidemic agents with structure, MOA, SAR and Uses.

Explain congestive heart failure drugs with structure, MOA and uses.

Explain all coagulant & anticoagulant agents with structure, MOA, synthesis and uses.

Unit IV:

CO-501.4: To understand the Drugs acting on Endocrine system and structure, mechanism of action, synthesis and uses of Sex hormones, Drugs for erectile dysfunction, Oral contraceptives, Corticosteroids and Thyroid and antithyroid drugs.

Item	Approx Hrs

<p>SO4.1 To understand the Drugs acting on Endocrine system.</p> <p>SO4.2 To understand the Drugs of Sex hormones.</p> <p>SO4.3 To understand the Drugs for erectile dysfunction.</p> <p>SO4.4 To understand the Drugs of Oral contraceptives.</p> <p>SO4.5 To understand the Drugs Thyroid and antithyroid drugs</p>		<p>4.1 Brief introduction of Endocrine system with Nomenclature, Stereochemistry and metabolism of steroids</p> <p>4.2 Structure, SAR, MOA & uses of Testosterone, Nandralone,</p> <p>4.3 Structure, SAR, MOA & uses of Progesterones, Oestriol, Oestradiol, Oestrione, Diethyl stilbestrol.</p> <p>4T.1: Tutorial class</p> <p>4.4 Structure, SAR, MOA & uses of Sildenafil, Tadalafil.</p> <p>4.5 Structure, SAR, MOA & uses of Mifepristone, Norgestrel, Levonorgestrol.</p> <p>4T.2: Tutorial class Structure, SAR, MOA & uses of Cortisone, Hydrocortisone, Prednisolone, Structure, SAR, MOA & uses Betamethasone, Dexamethasone.</p> <p>Structure, SAR, MOA & uses of L-Thyroxine, L- Thyronine, Propylthiouracil, Methimazole.</p> <p>4T.3: Tutorial class</p>	<p>Study of the Drugs acting on Endocrine system and Thyroid and antithyroid drugs.</p>

Suggested Assignments:

- Write the detail about the Endocrine system with Nomenclature, Stereochemistry and metabolism of steroids.
- Explain the structure, SAR, MOA and uses of Sex hormones drugs.
- Explain all drugs of Corticosteroids with structure, SAR, MOA and uses.
- Write the Thyroid and anti-thyroid drugs with structure, Uses and MOA.

Unit V

CO-BP501-5: To understand the structure, mechanism of action, Structure activity relationship, synthesis of Anti-diabetic agents and Local Anesthetics with SAR of local anesthetics.

Item	Approx Hrs
Lecture & Tutorial	7+3=10
Practical(P)	0
SW	1
SL	2
Total:	13

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
<p>SO5.1 To understand the Antidiabetic agents.</p> <p>SO5.2. To understand the SAR of Local anesthetics.</p> <p>SO5.3 To understand the Benzoic Acid derivatives.</p> <p>SO5.4 To understand the Benzoic Acid derivatives.</p> <p>SO5.5 To understand the Lidocaine/Anilide derivatives.</p> <p>SO5.6 To understand the Miscellaneous.</p>		<p>5.1 Brief introduction of Ant diabetic agent with Insulin and its preparations.</p> <p>5.2 Structure, synthesis, SAR, MOA & uses of Sulfonyl urea agents.</p> <p>5.3 Structure, SAR, MOA & uses of biguanides drugs.</p> <p>5.4 Structure, SAR, MOA & uses of thiazolidinediones drugs.</p> <p>5T.1 Tutorial Class</p> <p>5.5 Structure, SAR, MOA & uses of</p> <p>5.6 Meglitinides. Structure, SAR, MOA & uses of Glucosidase inhibitors.</p> <p>5.7 SAR of local anesthetics. Structure, SAR, MOA & uses of Benzoic Acid derivatives.</p> <p>5T.2 Tutorial Class</p> <p>5.8 Structure, synthesis, SAR, MOA & uses of Amino Benzoic acid derivatives.</p> <p>5.9 Structure, synthesis, SAR, MOA & uses of Lidocaine/Anilide derivatives.</p> <p>5.10 Structure, synthesis, SAR, MOA & uses of Phenacaine, Diperodon, Dibucaine</p> <p>5T.3 Tutorial Class</p>	<p>5.1 Study of the antidiabetic agents and Local anesthetics agents.</p>

Suggested Sessional work Assignments:

1. Explain the structure, synthesis, SAR, MOA and uses of Anti-diabetic agent.
2. Short note about SAR of Local anesthetics.
3. Write the Benzoic Acid derivatives drugs with structure, Uses and MOA.

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Industrial pharmacy-I) Program
(Revised as on 01 August 2023)
Semester-V

Course Code: BP502T/BP506P

Course Title: Industrial pharmacy-I

Pre-requisite: The Student should have basic knowledge of industrial pharmacy includes the research, production, packaging, quality control, marketing and sales of pharmaceutical goods.

Rationale/Objective s: Upon completion of the course the student shall be able to

1. Know the various pharmaceutical dosage forms and their Manufacturing techniques.
2. Know various considerations in development of pharmaceutical dosages forms.
3. Formulate solid, liquid and semisolid dosage forms and evaluate them for their quality.

Course Out comes:

CO-BP502-1: To understand the various pharmaceutical dosage forms and their manufacturing techniques

CO-BP502-2: To understand about various considerations in development of pharmaceutical dosage forms

CO-BP502-3 To Formulate solid, liquid and semisolid dosage forms and evaluates them for their quality

CO-BP502-4: To prepare and evaluate the sterile product and perform some Quality control tests (Parenteral Products Ophthalmic Preparations).

CO-BP502-5: Formulation and evaluation of the cosmetic product and Pharmaceutical Aerosols and packaging of pharmaceutical products.

Scheme of Studies

Course code	Title of the course	ProgramName	TOTAL Number of contact hours/Week						Credit
			Classroom Instruction (A)		Practical (P)	SW	SL	Total Hours(H)	
			Lecture	Tutorial					
BP502T	Industrial Pharmacy-I (Theory)	B. Pharmacy	3	1	4	1	1	10	6

Legend: CI: Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and other,

LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

SW: Sessional Work (includes assignment, seminar, mini project etc.),

SL: Self Learning, Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Theory Assessment

Board of Study	Course Code	Course Title	Scheme of Assessment (Marks)							Total Marks(A+B+C)
			Progressive Assessment (PRA)

Guidelines for the allotment of marks for attendance

Percentage of Attendance	Theory	Practical
95 – 100	4	2
90 – 94	3	1.5
85 – 89	2	1
80 – 84	1	0.5
Less than 80	0	0

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

CO-BP502-1: To understand the various pharmaceutical dosage forms and their manufacturing techniques.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	4
SW	1
SL	1
Total:	19

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction(CI)	Self Learning(SL)
<p>Theory SO1.1: Introduction, goals and objectives, of Preformulation. SO1.2: To study the Physical properties of preformulation SO1.3: To study the chemical properties of preformulation SO1.4: BCS classification of drugs & its significant Application of preformulation with solid, liquid oral and Parenteral dosage forms and its impact on stability of dosage forms</p> <p>Practical SO-P- 1.1 The preformulation parameter of the prepared granules were found to be done.</p>	<p>To preformulation studies on paracetamol/ aspirin/ or any other drugs.</p>	<p>1.1 Introduction and goal of preformulation studies 1.2 Objective of preformulation studies 1.3 Development of solid, liquid oral and Parenteral dosage forms 1T.1: Tutorial 1.4 Physical properties of preformulation Chemical properties of Preformulation 1.6 BCS classification of drugs. 1T.2: Tutorial 1.7 Impact on stability of solid dosage forms 1.8 Impact on stability of liquid oral dosage forms 1.9 Impact on stability of parenteral dosage forms 1.10 Application of preformulation study 1T.3: Tutorial</p>	<p>1.1 Study of Aim, Objective and importance of preformulation study in various dosage forms.</p>

Suggested Assignments:

1. BCS classification of drugs & its significant.
2. Application of preformulation considerations in the development of dosage form.

Mini Projects:

- Projects report on solid dosage form such as Tablets.

Unit II

CO-BP502-2: To understand about various considerations in development of pharmaceutical dosage forms.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	16
SW	1
SL	1
Total:	31

Session Outcomes(SOs)	Laboratory Instruction(LI)	Class room Instruction(CI)	Self Learning(SL)
<p>Theory</p> <p>SO2.1: Tablets-Introduction, ideal characteristics and classification of tablets and Excipients, Formulation of tablets granulation methods, compression and processing problems. Equipments and tablet tooling.</p> <p>SO2.2: Tablet coating: Types of coating, coating materials, formulation of coating Composition, methods of coating, equipment employed and defects in coating</p> <p>SO2.3: Quality control tests: In process and finished product tests</p> <p>SO2.4: Formulation and manufacturing of syrups, elixirs, suspensions and emulsions</p> <p>SO2.5: Filling and packaging; evaluation of liquid orals official in pharmacopoeia</p> <p>Practical</p> <p>SO-P-2.1: paracetamol tablets were prepared by wet granulation method and submitted.</p> <p>SO-P- 2.2: Aspirin tablets were prepared by wet granulation method and submitted.</p> <p>SO-P-2.3 10 tablets of paracetamol film coated tablets are prepared and submitted.</p> <p>SO-P-2.4 Quality control test of marketed tablets has been done</p>	<p>2.1 Preparation and Evaluation of paracetamol tablets.</p> <p>2.2 preparation and evaluation of aspirin tablets.</p> <p>2.3 prepare and submit of coating tablets.</p> <p>2.4 Quality control test of marketed tablets</p>	<p>2.1 to brief tablets and liquid orals</p> <p>2.2 Introduction and ideal characteristic of tablets</p> <p>2.3 Classification of tablets and Excipients</p> <p>2.4 Formulation of tablets and granulation methods</p> <p>2T.1: Tutorial</p> <p>2.5 Tablets compression and its processing problems.</p> <p>2.6 Equipments and tablet tooling</p> <p>2.7 Types of coating materials and formulation of coating composition</p> <p>2.8 methods of coating equipment and defects in coating process</p> <p>2T.2: Tutorial</p> <p>2.9 Quality control tests: In process And finished product tests</p> <p>2.10 Formulation and manufacturing consideration of syrups, elixirs, emulsion and suspension</p> <p>2.11 Filling, packaging and evaluation of liquid oral official in pharmacopoeia</p> <p>2T.3: Tutorial</p>	<p>2.1: Study of solid and liquid dosage form such as formulation of tablets and liquid oral preparation</p>

Suggested Assignments:

1. Formulation of tablets granulation methods and tablet coating processes.
2. Formulation and manufacturing consideration of syrups and elixirs.

Unit II

CO-BP502-3: To Formulate solid, liquid and semisolid dosage forms and evaluates them for their quality

Item	Approx Hrs

Session Out comes(SOs)	Laboratory Instruction(LI)	Class room Instructions	Self Learning (SL)
<p>Theory</p> <p>SO3.1 Capsules- Hard gelatin capsules: Introduction, Production of hard gelatin capsule shells.</p> <p>SO3.2 Soft gelatin capsules: Nature of shell and capsule content, size of capsules,</p> <p>SO3.3 Pellets: Introduction, formulation requirements and pelletization process, equipments for manufacture of pellets</p> <p>Practical</p> <p>SO-P- 3.1: tetracycline hydrochloride hard gelatin capsule were prepared and evaluated.</p> <p>SO-P-3.2 Quality control test of marketed capsules has been done.</p>	<p>3.1 To preparation and evaluation of tetracycline capsule.</p> <p>3.2 Quality control test of marketed capsules.</p>	<p>1.1 To brief capsule and pellets</p> <p>1.2 Introduction of Hard gelatin capsules and soft gelatin capsule</p> <p>1.3 Production of hard gelatin capsule shell and size</p> <p>1.4 Filling, finishing and special techniques of hard gelatin Capsules. its manufacturing defects</p> <p>3T.1: Tutorial Class</p> <p>1.5 In process and final product quality control tests for hard gelatin capsules</p> <p>1.6 Nature of shell and content of soft gelatin capsule</p> <p>1.7 Fillings and size of capsules</p> <p>3T.2: Tutorial class</p> <p>1.8 In Process and final product quality control tests of soft gelatin capsule</p> <p>1.9 Packing, storage and stability testing of soft gelatin capsules and their applications</p> <p>1.10 Pellets: Introduction, formulation requirements, pelletization process, equipments for manufacture of pellets.</p> <p>3T3: Tutorial class</p>	<p>3.1 Comparative study of capsule and pellets. production of hard gelatin capsule and soft gelatin capsule</p>

Suggested Assignments:

Production of hard gelatin capsule and capsule shell their size.

Mini Projects: Projects report on filling of capsule shell.

Unit IV:

CO-BP502-4: To prepare and evaluate the sterile product and perform some Quality control tests (Parenteral Products Ophthalmic Preparations).

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	16
SW	1
SL	2
Total:	32

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction(CI)	Self Learning (SL)
<p>Theory</p> <p>SO4.1: Parenteral Products: Definition, types, advantages and limitations. Preformulation factors and essential requirements, vehicles, additives, importance of isotonicity</p> <p>SO4.2: Production procedure, production facilities and controls, aseptic processing, Formulation of injections, sterile powders, large volume parenteral and lyophilized products</p> <p>SO4.3: Containers and closures selection, filling and sealing of ampoules, vials and infusion</p> <p>Fluids</p> <p>SO4.4: Ophthalmic Preparations: Introduction, formulation considerations; formulation of eye drops, eye ointments and eye lotions; methods of preparation; labeling, containers</p> <p>SO.5: Quality control tests of parenteral products and ophthalmic preparations</p> <p>Practical</p> <p>SO-P- 4.1: To preparation of calcium gluconate injection has been done.</p> <p>SO-P- 4.2: To prepare of ascorbic acid injection has been done.</p> <p>SO-P-4.3: To prepare of eye drop has been done.</p> <p>SO-P-4.4 To prepare of eye ointment injection has been done.</p>	<p>4.1 preparation of calcium gluconate injection</p> <p>4.2 preparation of ascorbic acid injection</p> <p>4.3 preparation of eyedrop preparation of eye ointments</p>	<p>4.1 To brief the Parenteral Products and Ophthalmic Preparations.</p> <p>4.2 Definition, types, advantages and limitations of parenteral product.</p> <p>4.3 Pre-formulation factors and essential requirements such as vehicles, additives and importance of isotonicity</p> <p>4T.1 Tutorial class</p> <p>4.4 Production procedure and facilities of aseptic processing</p> <p>4.5 Formulation of injections, sterile powders, large volume parenteral and lyophilized</p> <p>4.6 products Selection of Containers and closures, Filling and sealing of ampoules, vials and infusion Fluids.</p> <p>4T.2 Tutorial class</p> <p>4.7 Ophthalmic</p> <p>4.8: Preparations:- Introduction and formulation considerations formulation of eyedrops, eye ointments and eye lotions</p> <p>4.8 Methods of preparation labeling of containers</p> <p>4.9 Quality control tests of parenteral products and ophthalmic preparations</p> <p>4T.3: Tutorial class</p>	<p>4.1 Comparative study of parenteral product and ophthalmic preparation</p> <p>4.2 Analyse formulation of parenteral product and ophthalmic product</p>

Suggested Assignments:

1. Definition and types of parenteral product.
2. Write Pre-formulation factors and essential requirements (vehicles, additive).

Mini Projects: To create the labeling of ophthalmic product on container

Unit V

CO-BP502-5: Formulation and evaluation of the cosmetic product and Pharmaceutical Aerosols and packaging of pharmaceutical products.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	8
SW	1
SL	1

AKS University
 Faculty of Pharmaceutical Science & Technology
 Rajiv Gandhi Institute of Pharmacy
 Curriculum of B. Pharmacy (Pharmacology-II) Program
 (Revised as on 01August2023)Semester-V

Course Code: BP503T & BP507P

Course Title: Pharmacology-II

Pre-requisite: Student should have basic knowledge of General Pharmacology, Pharmacokinetics, Pharmacodynamics, Drug Interaction, Route of drug administration and Receptors.

Rationale/Objective s: Up on completion of the course student shall be able to

- To understand the mechanism of drug action and its relevance in the treatment of different diseases
- To demonstrate isolation of different organs/tissues from the laboratory animals by simulated experiments
- To demonstrate the various receptor actions using isolated tissue preparation
- To Appreciate correlation of pharmacology with related medical sciences

Course Out comes:

CO-BP503-1: To understand the mechanism of drug action and its relevance in the treatment of different diseases of cardio vascular system.

CO-BP503-2: To acquired the knowledge of mechanism of drug action and its relevance in the treatment of different diseases of cardio vascular system and urinary system.

CO-BP503-3: To understanding the various types of autacoids, their classification and related drugs.

CO-BP503-4: To familiarize with basic concept in endocrine pharmacology and action of drugs on endocrine system.

CO-BP503-5: To comprehend the basic concepts of bio-assay.

Scheme of Studies

Course code	Title of the course	Program Name	TOTAL Number of contact hours/Week						Credit
			Classroom Instruction (A)		Practical (P)	SW	SL	Total Hours (H)	
			Lecture	Tutorial					
BP503T	Pharmacology- II Theory	B. Pharmacy	3	1	4	1	1	10	6

Legend: CI: Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),

LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

SW: Sessional Work (includes assignment, seminar, mini project etc.),

SL: Self Learning, Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

95 – 100	4	2
90 – 94	3	1.5
85 – 89	2	1
80 – 84	1	0.5
Less than 80	0	0

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

Unit I

CO-BP503-1: To understand the mechanism of drug action and its relevance in the treatment of different diseases of cardio vascular system.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical (P)	12
SW	1
SL	1
Total:	27

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
<p>Theory SO1.1: Introduction to Hemodynamic and electrophysiology of heart. SO1.2: Drugs used in congestive heart failure SO1.3: Anti-hypertensive drugs. SO1.4: Anti-anginal drugs. SO1.5: Anti-arrhythmic drugs. SO1.6: Anti-hyperlipidemic drugs.</p> <p>Practical SO-P- 1.1:Introduction to <i>in-vitro</i> pharmacology and physiological salt solutions. SO-P- 1.2: Effect of drugs on isolated frog heart. SO-P- 1.3: Effect of drugs on blood pressure and heart rate of dog</p>	<p>1.1: Introduction to <i>in-vitro</i> pharmacology and physiological salt solutions. 1.2: To study the effect of drugs on isolated frog heart. 1.3: To study the effect of drugs on blood pressure and heart rate of dog.</p>	<p>1.1 Introduction to hemodynamic. 1.2 Introduction to electrophysiology of heart. 1.3 Drugs used in congestive heart failure 1T.1 Tutorial Class 1.4 Classification and mechanism of action of drugs used in CHF. 1.5 Anti-hypertensive drugs. 1.6 Classification and mechanism of action of Anti-hypertensive drugs. 1T.2 Tutorial Class 1.7 Anti-anginal drugs. Classification and mechanism of action of Anti-anginal drugs. 1.9 Anti-arrhythmic drugs. 1.10 Anti- hyperlipidemic drugs. 1T.3 Tutorial Class</p>	<p>1.1: Introduction to hemodynamic. 1.2: Introduction to electrophysiology of heart.</p>

. Suggested Assignments:

1. Anti-arrhythmic drugs.
2. Anti-hyperlipidemic drugs.
3. Drugs used in congestive heart failure.
4. Anti-hypertensive drugs.
5. Anti-anginal drugs.

Unit II

CO-BP503-2: To acquired the knowledge of mechanism of drug action and its relevance in the treatment of different diseases of cardio vascular system and urinary system.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	12
SW	1
SL	1
Total:	27

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
<p>Theory SO2.1: Drug used in the therapy of shock SO2.2: Hematinics, coagulants and anticoagulants SO2.3: Fibrinolytics and anti-platelet drugs SO2.4: Plasma volume expanders SO2.5: Diuretics SO2.6: Anti-diuretics</p> <p>Practical SO-P-2.1: Study of diuretic activity of drugs using rats/mice. SO-P-2.2: DRC of acetylcholine using frog rectus abdominis muscle. SO-P-2.3: Effect of physostigmine and atropine on DRC of acetylcholine using frog rectus abdominis muscle and rat ileum respectively.</p>	<p>2.1: To Study the diuretic activity of drugs using rats/mice. 2.2: To study the DRC of acetylcholine using frog rectus abdominis muscle. 2.3: To study the effect of physostigmine and atropine on DRC of acetylcholine using frog rectus abdominis muscle and rat ileum respectively.</p>	<p>2.1 Drug used in the therapy of shock 2.2 Hematinics 2.3 Coagulants and anticoagulants 2T.1 Tutorial Class 2.4 Classification and mechanism of action of Coagulants and anticoagulants 2.5 Fibrinolytics and anti-platelet drugs 2.6 Classification and mechanism of action of Fibrinolytics and anti-platelet drugs 2T.2 Tutorial Class 2.7 Plasma volume expanders Diuretics 2.9 Classification and mechanism of action of Diuretics 2.10 Anti-diuretics 2T.3 Tutorial Class</p>	<p>2.1: Hematinics 2.2: Plasma volume expanders</p>

Suggested Assignments:

1. Drug used in the therapy of shock.
2. Hematinics.

3. Coagulants and anticoagulants.
4. Fibrinolytics and anti-platelet drugs.
5. Plasma volume expanders.

Unit III

CO-BP503-3: To understanding the various types of autacoids, their classification and related drugs.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	12
SW	1
SL	1
Total:	27

Session Outcomes(SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self Learning (SL)
<p>Theory</p> <p>SO3.1: Introduction to autacoids and classification</p> <p>SO3.2: Histamine, 5-HT and their antagonists.</p> <p>SO3.3: Prostaglandins, Thromboxanes and Leukotrienes.</p> <p>SO3.4: Angiotensin, Bradykinin and Substance P.</p> <p>SO3.5: Non-steroidal anti-inflammatory agents</p> <p>SO3.6: Anti-gout drugs</p> <p>SO3.7: Anti-rheumatic drugs</p> <p>Practical</p> <p>SO-P-3.1 :Effect of spasmogens and Spasmolytics using rabbit jejunum.</p> <p>SO-P- 3.2: Anti-inflammatory activity of drugs using carrageenan induced paw-edema model.</p> <p>SO-P-3.3: Analgesic activity of drug using central and peripheral methods.</p>	<p>3.1: To study the effect of spasmogens and spasmolytics using rabbit jejunum.</p> <p>3.2: To study the Anti-inflammatory activity of drugs using carrageenan induced paw-edema model</p> <p>3.3: To study the analgesic activity of drug using central and peripheral methods.</p>	<p>3.1 Introduction to autacoids and classification</p> <p>3.2 Histamine and their antagonists.</p> <p>3.3 5-HT and their antagonists.</p> <p>3T.1 Tutorial Class</p> <p>3.4 Prostaglandins</p> <p>3.5 Thromboxanes and Leukotrienes.</p> <p>3.6 Angiotensin</p> <p>3T.2 Tutorial Class</p> <p>3.7 Bradykinin and Substance P.</p> <p>3.8 Non-steroidal anti- inflammatory agents</p> <p>3.9 Anti-gout drugs</p> <p>3.10 Anti-rheumatic drugs</p> <p>3T.3 Tutorial Class</p>	<p>3.1: Introduction to autacoids</p> <p>3.2: Non-steroidal anti-inflammatory agents</p>

Suggested Assignments: 1. Histamine and their antagonists, 2. 5-HT and their antagonists, 3. Prostaglandins, 4. Angiotensin, 5. Anti-gout drugs.

Unit IV

CO-BP503-4: To familiarize with basic concept in endocrine pharmacology and action of drugs on endocrine system.

Item	Approx Hrs
Lecture & Tutorial	08+3=11
Practical(P)	0
SW	1
SL	1

Total Hours	60	52	5	5	122

Suggestion for End Semester Assessment
Suggested Specification Table (For ESA)

CO	Unit Titles	Marks Distribution			Total Marks
		A	C	E	
CO-1	To understand the mechanism of drug action and its relevance in the treatment of different diseases of cardio vascular system.	08	06	01	15
CO-2	To acquired the knowledge of mechanism of drug action and its relevance in the treatment of different diseases of cardio vascular system and urinary system.	08	07	01	16
CO-3	To understanding the various types of autocooids, their classification and related drugs.	08	07	01	16
CO-4	To familiarize with basic concept in endocrine pharmacology and action of drugs on endocrine system.	07	06	01	14
CO-5	To comprehend the basic concepts of bio-assay	08	07	01	16
Total		39	33	05	77

Legend: A: Analyze, C: Create, E: Evaluate

The end of semester assessment for Pharmacology-II will be held with written examination of 75 marks

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Demonstration
7. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Face book, Twitter, WhatsApp, Mobile, Online sources)
8. Brainstorming

Suggested Learning Resources:

Rajiv Gandhi Institute of Pharmacy

Curriculum of B. Pharmacy (Pharmacognosy and Phyto-chemistry-II) Program
Semester-V

Course Code: BP504T/BP508P

Course Title: Pharmacognosy and Phyto-chemistry-II

Pre-requisite: The main purpose of subject is to impart the students the knowledge of how the secondary metabolites are produced in the crude drugs, how to isolate and identify and produce them industrially.

Rationale/Objectives:

Upon completion of the course student shall be able:

To know Also this subject involves the study of producing the plants and phytochemical through plant tissue culture, drug interactions and basic principles of traditional system of medicine

Course Outcomes:

CO-BP504-1: Discuss the general technique of biosynthesis of phytoconstituents in plants.

CO-BP504-2: Apprehended the composition, chemistry & chemical classes, bio-sources, therapeutic uses and commercial applications of different plants secondary metabolites.

CO-BP504- 3: Accomplished in the Isolation, Identification and Analysis of Phyto-constituents.

CO-BP504-4: Accomplished in the production estimation and utilization of
Phyto-constituents in industrial scale.

CO-BP504-5: Accomplished in the estimation and analysis of the different phytoconstituents with help of Instrument based on chromatography and spectroscopy.

Unit II

CO-BP504-2: Apprehended the composition, chemistry & chemical classes, bio-sources, therapeutic uses and commercial applications of different plants secondary metabolites

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	16
SW	1
SL	1
Total:	31

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
<p>Theory</p> <p>SO2.1 General introduction, composition, chemistry & chemical classes, biosources, therapeutic uses and commercial applications of Alkaloids, Phenyl propanoids and Flavonoids, Steroids, Cardiac Glycosides & Triterpenoids, Volatile oils, Tannins, Resins, Glycosides, Iridoids, Other terpenoids & Naphthaquinones</p> <p>SO-P- 2.2: Exercise involving isolation & detection of active principles</p> <p>b. Diosgenin from Dioscorea</p> <p>SO-P-2.3 Exercise involving isolation & detection of active principles Atropine from Belladonna</p> <p>SO-P-2.4.Exercise involving isolation & detection of active principles Sennosides from Senna</p>	<p>Exercise involving isolation & detection of active principles</p> <p>2.1. Caffeine - from tea dust.</p> <p>2.2. Diosgenin from Dioscorea.</p> <p>2.3. Atropine from Belladonna.</p> <p>2.4.Sennosides from Senna.</p>	<p>.1 Alkaloids: Vinca, Rauwolfia.</p> <p>2.2 Belladonna, Opium</p> <p>2.3 Phenylpropanoids : Lignans</p> <p>2.4. Flavonoids: Tea, Ruta</p> <p>2.5. Steroids: Liquorice,</p> <p>2.6 Cardiac Glycosides: , Dioscorea,</p> <p>2.7 Triterpenoids: Digitalis</p> <p>2.8 Volatile oils: Mentha, Clove.</p> <p>2.9 Cinnamon, Fennel, Coriander.</p> <p>2.10 Tannins: Catechu, Pterocarpus</p> <p>2.11 Tannins: Catechu, Pterocarpus</p> <p>2.12 Resins: Benzoin, Guggul, Ginger Asafoetida, Myrrh, Colophony</p> <p>2.13 Glycosides: Senna, Aloes, Bitter Almond</p> <p>2.14 Iridoids, Other terpenoids & aphtha quinones: Gentian, Artemisia, taxus, carotenoids</p>	<p>1knowledge on the general introduction, composition, chemistry & chemical classes, biosources, therapeutic uses and commercial applications.</p> <p>2.2. Resins: Benzoin, Guggul, Ginger Asafoetida, Myrrh, Colophony.</p>

Suggested Assignments:

- General introduction, composition, chemistry & chemical classes, biosources, therapeutic uses and commercial applications of Alkaloids.

Unit III

CO-BP504-3: Accomplished in the Isolation, Identification and Analysis of Phytoconstituents.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	8
SW	1
SL	1
Total:	23

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
Theory SO3.1 Glycosides: Glycyrrhetic acid & Rutin. SO3.2 Alkaloids: Reserpine, Caffeine. Practical SO-P- 3.1: Separation of sugars by Paper chromatography.	3.1 Separation of sugars by Paper chromatography.	3.1 Terpenoids: Menthol, Citral, 3.2 Terpenoids: Artemisin 3.3 Glycosides: Glycyrrhetic acid & Rutin. 3.4 Alkaloids: Atropine, Quinine Alkaloids: Reserpine, Caffeine 3.6 Resins: Podophyllotoxin, Curcumin. Tutorial Terpenoids: Artemisin	3.1 Isolation, Identification and Analysis of Phytoconstituents.

Suggested Assignments: Terpenoids, Artemisin, Glycosides: Glycyrrhetic acid, Alkaloids: Reserpine, Resins: Curcumin.

Unit IV:

CO-BP504-4: Accomplished in the production estimation and utilization of phytoconstituents in industrial scale.

Item	Approx Hrs
Lecture & Tutorial	10+3
Practical(P)	16
SW	1
SL	1
Total:	31

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
<p>SO4.1. Pharmacognosy in various systems of medicine.</p> <p>SO4.2. Introduction to secondary metabolites.</p> <p>Practical</p> <p>SO-P- 1. Determination of Ash value.</p> <p>SO-P- 2. Determination of Extractive values of crude drugs.</p>	<p>4.1 Determination of Ash value.</p> <p>4.2 Determination of Extractive values of crude drugs.</p>	<p>4.1 Role of Pharmacognosy in allopathy and traditional systems of medicine namely, Ayurveda, systems of medicine.</p> <p>4.2 Role of Pharmacognosy in allopathy and traditional systems of medicine namely, Unani, systems of medicine.</p> <p>4.3 Role of Pharmacognosy in allopathy and traditional systems of medicine namely Siddha, systems of medicine.</p> <p>4T1: Tutorial Class</p> <p>4.4. Role of Pharmacognosy in allopathy and traditional systems of medicine namely, Homeopathy and systems of medicine.</p> <p>4.5. Role of Pharmacognosy in allopathy and traditional systems of medicine namely, Chinese systems of medicine.</p> <p>4T2: Tutorial Class</p> <p>4.6 Definition, classification, properties and test for identification of Alkaloids.</p> <p>4.7 Definition, classification, properties and test for identification of Glycosides.</p> <p>4.8 Definition, classification, properties and test for identification of Flavonoids.</p> <p>4.9 Definition, classification, properties and test for identification of Tannins.</p> <p>4.10 Definition, classification, properties and test for identification of Volatile oil and Resins.</p> <p>4T3: Tutorial Class</p> <p>Role of pharmacognosy in allopathy and traditional systems of medicine.</p>	<p>4.1 Ayurveda, Unani, Siddha, Homeopathy and Chinese systems of medicine.</p> <p>4.2 Definition, classification, properties and test for identification of secondary metabolites.</p>

Suggested Assignments: Industrial production, estimation and utilization of the following phytoconstituents: Sennoside Diosgenin, Podophyllotoxin.

Unit V

CO-BP504-5: Accomplished in the estimation and analysis of the different phytoconstituents with help of instrument based on chromatography and spectroscopy.

Item	Approx Hrs
Lecture & Tutorial	10+3
Practical(P)	8
SW	1
SL	1
Total:	23

Session Outcomes(SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self Learning (SL)
<p>Theory SO5.1 Modern methods of extraction, application of latest techniques like Spectroscopy, 5.2 Chromatography and electrophoresis in the isolation, purification and identification of crude Drugs. Practical: SO-P-5. Analysis of crude drugs by chemical tests: (i) Asafetida (ii) Benzoin (iii) Colophony (iv) Aloes (v) Myrrh</p>	<p>5.1 Analysis of crude drugs by chemical tests: Asafetida Benzoin Colophony Aloes Myrrh</p>	<p>5.1. Modern methods of extraction. 5.2 Modern methods of extraction. 5.3 application of latest techniques Spectroscopy. 5.4 application of latest techniques Spectroscopy. 5T1 Tutorial Class 5.5 application of latest techniques chromatography. 5.6. application of latest techniques electrophoresis. 5.7 purification and identification of crude drugs. 5T2 Tutorial Class 5.8 purification and identification of crude drugs. 5T3: Tutorial application of latest techniques electrophoresis in the isolation</p>	<p>5.1 Basics of Phyto chemistry Modern methods of extraction, application of latest techniques. 5.2 purification and identification of crude Drugs.</p>

Suggested Assignments: Purification and identification of Crude drugs .

Brief of Hours suggested for the Course Outcome

Course Outcomes	Class Lecture (Cl)	(L)	Sessionl Work (SW)	Self Learning (Sl)	Total Hour (Cl+SW+ Sl+LI)
CO-BP504-1: Discuss the general technique of biosynthesis of phytoconstituents in plants.	13	4	1	1	19
CO-BP504-2: Apprehended the composition, chemistry & chemical classes, bio-sources, therapeutic uses and commercial applications of different plants secondary metabolites.	13	16	1	1	31
CO-BP504-3: Accomplished in the Isolation, Identification and Analysis of Phytoconstituents.	13	8	1	1	23
CO-BP504-4: Accomplished in the production estimation and utilization of phytoconstituents in industrial scale..	13	16	1	1	31

Legend:R: Remember,U: Understand, A:Apply

The end of semester assessment for Pharmacognosy and Phyto-chemistry-II will be held with written examination of 75 marks

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks.

Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional /Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Demonstration
7. ICT Based Teaching Learning (Video Demonstration /Tutorials CBT, Blog, Face book, Twitter, Whats app, Mobile, Online sources)
8. Brainstorming

Suggested Learning Resources:

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Pharmaceutical Jurisprudence) Program
Semester-V

Course Code: BP505T

Course Title: PHARMACEUTICAL JURISPRUDENCE

Pre-requisite: Students should have a basic knowledge of important legislations related to the profession of pharmacy in India

Rationale/Objective s: Upon completion of the course, the student shall be able to understand:

1. The Pharmaceutical legislations and their implications in the development and marketing of pharmaceuticals.
2. Various Indian pharmaceutical Acts and Laws.
3. The regulatory authorities and agencies governing the manufacture and sale of pharmaceuticals.
4. The code of ethics during the pharmaceutical practice.

Course Out comes:

CO- BP 505.1: To understand about the Pharmaceutical legislations and their implications in the development and marketing of pharmaceuticals.

CO- BP 505.2: To understand about the Various Indian pharmaceutical Acts and Laws.

CO- BP 505.3: To understand about the regulatory authorities and agencies governing the manufacture and sale of pharmaceuticals.

CO- BP 505.4: To understand about the code of ethics during the pharmaceutical practice.

CO- BP 505.5: To understand about the Medical Termination of Pregnancy Act and rights.

Scheme of Studies

90 – 94	3	1.5
85 – 89	2	1
80 – 84	1	0.5
Less than 80	0	0

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

Unit-1

CO-BP505-1: To understand about the Pharmaceutical legislations and their implications in the development and marketing of pharmaceuticals.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	2
Total:	16

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction(CI)	Self Learning (SL)
Theory SO1.1: Drugs and Cosmetics Act, 1940 and its rules 1945. SO1.2: Import of drugs – Classes of drugs and cosmetics prohibited from import, Import under License or permit. Offences and penalties. SO1.3: Manufacture of drugs– Prohibition of manufacture and sale of certain drugs, SO1.4: Conditions for grant of license and conditions of license for manufacture of drugs, Manufacture of drugs for test, examination and analysis, manufacture of new drug, loan License and repacking license.	NA	1.1 Introduction of Drugs and Cosmetics Act, 1940 and its rules 1945. 1.2 Objectives and Definitions of Drugs and Cosmetics Act. 1.3 Legal definitions of schedules to the drug and cosmetics Act and Rules 1T.1: Tutorial 1.4 brief discuss in Import of drugs 1.5 Classes of drugs and cosmetics prohibited from import, Import under license or permit. 1.6 Discuss in detail Offences and penalties 1T.2: Tutorial 1.7 Manufacture of drugs and Prohibition of manufacture and sale of certain drugs 1.8 Conditions for grant of license and conditions of license for manufacture of drugs. 1.9 Manufacture of drugs for test, examination and analysis. 1.10 manufacture of new drug, loan license and repacking license 1T.3: Tutorial	1.1 Drugs and Cosmetics Act, 1940 and its rules 1945 1.2 Import of drugs of Offences and penalties.

Suggested Assignments:

1. Write a note on Conditions for grant of license for manufacture of drugs.

Unit II

CO-BP505.2: To understand about the Various Indian pharmaceutical Acts and Laws.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	2
Total:	16

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction(CI)	Self Learning (SL)
<p>Theory SO2.1: Drugs and Cosmetics Act, 1940 and its rules 1945 SO2.2: Detailed study of Schedule G, H, M, N, P,T,U, V, X, Y, Part XII B, Sch F & DMR (OA) SO2.3: Sale of Drugs – Wholesale, Retail sale and Restricted license. Offences and penalties SO2.4: Labeling & Packing of drugs- General labeling requirements and specimen labels for Drugs and cosmetics, List of permitted colors. Offences and penalties. SO2.5: Administration of the Act and Rules – Drugs Technical Advisory Board, Central drugs Laboratory, Drugs Consultative Committee, Government drug analysts, Licensing authorities, controlling authorities, Drugs Inspectors</p>	NA	<p>2.1 brief introduction of Drugs and Cosmetics Act, 1940 and its rules 1945 2.2 Detailed study of Schedule G, H and M 2.3 Detailed study of Schedule N, P and T 2T.1: Tutorial class 2.4 Detailed study of Schedule U, V, X, Y, Part XII B, Sch F & DMR (OA) 2.5 Discuss in Sale of Drugs – Wholesale, Retail sale and restricted license. 2.6 Explain about the Offences and penalties of schedules. 2T.2: Tutorial class 2.7 Labeling & Packing of drugs- General labeling requirements and specimen labels for Drugs and cosmetics. 2.8 Explain the List of permitted colors of Labeling & Packing of drugs and Offences and penalties. 2.9 Administration of the Act and Rules – Drugs Technical Advisory Board, Central drugs 2.10 Laboratory, Drugs Consultative Committee, Government drug analysts, licensing authorities, controlling authorities, Drugs Inspectors. 2T.3: Tutorial class</p>	<p>2.1 Detailed study of Schedule – H. 2.2 Detailed study of Schedule M.</p>

Suggested Assignments:

1. Slandered design of Labeling & Packing of drugs and cosmetic product.

Unit III

CO-- BP 505.3: To understand about the regulatory authorities and agencies governing the manufacture and sale of pharmaceuticals.

Legend: R: Remember, U: Understand, A: Apply

The end of semester assessment for will be pharmaceutical jurisprudence held with written examination of 75 marks.

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks.

Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Demonstration
7. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Face book, Twitter, Whats app, Mobile, Online sources)
8. Brainstorming

Suggested Learning Resources:

S. No.	Title	Author	Publisher	Edition & Year
1	Forensic Pharmacy	DR. B. Suresh	Birla publication	4 th edition 1 January 2017
2	Text book of Forensic Pharmacy	B.M. Mithal	Vallabh prakashn, New Delhi	2 nd edition 1988
3	Hand book of drug law	M.L. Mehra	Lea & Febiger; Subsequent edition _	3 rd editions June 1992
4	A text book of Forensic Pharmacy	N.K. Jain	Vallabh prakashan	edition 2017
5	Drugs and Cosmetics Act/Rules	Govt. of India	Govt. of India publications	31 december 2016
6	Medicinal and Toilet preparations act 1955	Dr LN prasanthi	Govt. of India publications.	Six rdion4 october 2018
7	Narcotic drugs and psychotropic substances act	Bidyut kumar banerjee	Govt. of India publications	3 rd edition Reprint 2023
8	Drugs and Magic Remedies act	Govt. of India publication	Govt. of India publication	2024
9	Bare Acts of the said laws	Government. Reference books	Government. Reference books	2024

Curriculum Development Team:

1. **Prof. SP Gupta**, Director, RGIP, AKS University
2. **Mr. Satyendra Garg**, Assistant professor, RGIP, AKS University
3. **Mrs. Neelam Singh**, Assistant professor, RGIP, AKS University

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy Medicinal Chemistry-III) Program
(Revised as on 01August2023)

Semester-VI

Course Code: BP601T/ BP607P

Course Title: Medicinal Chemistry-III

Pre-requisite: Student should have basic knowledge about medicinal & synthetic chemistry.

Rationale/Objectives:

Up on completion of the course student shall be able to

- 1 Understand the importance of drug design and different techniques of drug design.
- 2 Understand the chemistry of drugs with respect to their biological activity.
- 3 Know the metabolism, adverse effects and therapeutic value of drugs.
- 4 Know the importance of SAR of drugs.

Course Outcomes:

CO-BP601.1: To recall the classification and nomenclature of drugs of natural and synthetic origin

COBP601.2: To explain the concept of pro-drugs and their importance

CO-BP601.3: To identify the mechanism of action and therapeutic uses of drugs

CO-BP601.4: To understand the relationship between structure of compound and its biological activity and to choose the synthetic out for selected category of drugs

CO-BP 601.5: To discuss the approaches in drug design including QSAR, pharmacophore modeling, docking and combinatorial chemistry.

Scheme of Studies

:Course code	Title of the course	Program Name	TOTAL Number of contact hours/Week						Credit
			Classroom Instruction(A)		Practical(P)	SW	SL	Total Hours (H)	
			Lecture	Tutorial					
BP601T	Medicinal Chemistry -III	B. Pharmacy	3	1	4	1	1	10	6

Legend CI: Class room Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial(T) and other,

LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other location using different instructional strategies)

SW: Sessional Work (includes assignment, seminar, mini-project etc.),

SL: Self Learning, Credits.

Note: SW&SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Percentage of Attendance	Theory	Practical
95–100	4	2
90–94	3	1.5
85–89	2	1
80–84	1	0.5
Less than 80	0	0

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) up on the course's conclusion.

CO-BP601.1.To recall the classification and nomenclature of drugs of natural and synthetic origin

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	1
SW	1
SL	1
Total:	16

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction(CI)	Self Learning (SL)
<p>Theory SO1.1 Understand the Historical background & Nomenclature of antibiotics SO1.2 Learn about the Structure activity relationship. SO1.3 learn about the Chemical degradation classification of antibiotics. SO1.4 Understand about the β- Lactam antibiotics: SO1.5 understand and about the Amino-glycosides. Practical SO-P-2.1 :- To prepare and submit Sulphanilamide.</p>	<p>1.1 To prepare and submit Sulphanilamide.</p>	<p>1.1 Historical background & Nomenclature of antibiotics 1.2 Basic concept of SAR 1.3 classifications of antibiotics. 1T1 Tutorial Class 1.4 Beta- Lactum antibiotics Concept 1.5 Mono- Lactum antibiotics Concept 1.6. Amino Glycosides 1T2 Tutorial Class 1.7 Tetracycline's & Oxytetracyclines 1.8 Hetrocyclynes & Aminocyclines 1.9 Sulphonamides 1T3 Tutorial Class 1.10 Doxycyclines & Mino cyclones</p>	<p>1.1 Historical development of antibiotic Historical background, 1.2 Nomenclature.</p>

Suggested Assignments:

1. What are antibiotics ? Classify them.
2. What are β -Lactam antibiotics ? Discuss about the Penicillin in detail.
3. What are β -Lactam antibiotics? Discuss about the cephalosporin's in detail.

Mini-Projects:

- Write in short about β -Lactamase inhibitors.

Unit-II

CO-BP601.2. To explain the concept of pro-drugs and their importance.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	4
SW	1
SL	1
Total:	19

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
<p>Theory SO2.1: Understand about the concept of malaria & its treatments</p> <p>SO2.2: Understand about the concept of prodrugs & its applications</p> <p>Practical SO-P-2.1: 7-Hydroxy, 4-methyl coumarin. SO-P-2.2: Drawing structures and reactions using chem. draw@. SO-P-2.3: Assay of drugs Dapsone, Chlorpheniramine, maleate, Benzyl penicillin.</p>	<p>2.1 Preparation of 7-Hydroxy, 4-methyl coumarin</p> <p>2.2 Drawing structures and reactions using chem draw.</p> <p>2.3 Assay of drugs Dapsone, Chlorpheniramine, maleate, Benzyl penicillin.</p>	<p>2.1 Antibiotics Historical background, Nomenclature, Stereo-chemistry, Structure activity relation-ship, Chemical degradation classification and important products of the following classes</p> <p>2.2 Macrolide: Erythromycin, Clarithromycin, Azithromycin.</p> <p>2.3 Miscellaneous: Chloramphenicol, Clindamycin.</p> <p>2.4 Prodrugs: Basic concepts and application of prodrugs design.</p> <p>2T.1: Tutorial Class</p> <p>2.5 Antimalarials- Etiology of malaria.</p> <p>2.6 Quinolines: SAR, Quinine sulphate, Chloroquine*</p> <p>2.7 Amodiaquine, Primaquine phosphate, 2T.2: Tutorial</p> <p>2.8 Pamaquine*, Quinacrine hydrochloride, Mefloquine.</p> <p>2.9 Biguanides and dihydro triazines: Cycloguanil pamoate, Proguanil.</p> <p>2.10 Miscellaneous: Pyrimethamine, Artesunate, Artemether, Atovaquone. 2T.3: Tutorial</p>	<p>2.1 Concept of malarial & its cycle</p> <p>2.2 Prodrugs concept</p>

Unit IV: CO-BP601.4. To understand the relationship between structure of compound and its biological activity and to choose the synthetic route for selected category of drugs.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	4
SW	1
SL	2
Total:	20

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
<p>Theory SO4.1: Learn about the antifungal antibiotics. SO4.2: Understand about the chemical structures & synthesis of antifungal agents. SO4.3: Learn about the protozoals & its treatments. SO4.4: Understand about the anthelmintics. Practical SO-P-4.1: Preparation of Triphenyl imidazole. SO-P-4.2: Assay of Is nicotinic acid hydrazine.</p>	<p>4.1 To prepare and submit of Triphenyl imidazole. 4.2: Assay of Is nicotinic acid hydrazine.</p>	<p>4.1 Antifungal agents: Antifungal antibiotics: Amphotericin-B, Misstating, Natamycin, Griseofulvin. 4.2 Synthetic Antifungal agents: Clotrimazole, Econazole, Butoconazole, Oxiconazole Tioconazole, Miconazole*, Ketoconazole, Terconazole, Itraconazole, Fluconazole, Naftifine hydrochloride, Tolnaftate*. 4.3 Anti-protozoal Agents: Metronidazole*, Tinidazole, Ornidazole, Diloxanide, Iodoquinol, Pentamidine Isethionate, Atovaquone, Eflornithine. 4T.1: Tutorial 4.4 Anthelmintics: Diethylcarbamazine citrate*, Thiabendazole, Mebendazole*, Albendazole, Niclosamide, Oxamniquine, Praziquantal, Ivermectin. Sulphonamides and Sulfones Historical development, chemistry, classification and SAR of 4.5 Sulfonamides: Sulphamethizole, Sulfisoxazole, Sulphamethizine, Sulfacetamide*, Sulphapyridine, Sulfamethoxazole*, 4T.2: Tutorial 4.6 Sulphadiazine, Mefenide acetate, Sulfasalazine. 4.7 Folate reductase inhibitors: Trimethoprim*, Cotrimoxazole. 4.8 Sulfones: Dapsone*. 4T.3: Tutorial</p>	<p>4.1 Learn about fungal & its treatments 4.2 About-anthelmintics.</p>

Suggested Assignments

1. Discuss about the anti-fungal agents with their chemical structures.
2. Classify anti-protozoal agents with their chemical structures & give the synthesis of anyone.
3. Classify anthelmintics with their chemical structures & give the synthesis of anyone.

Unit V

CO-BP 601.5. To discuss the approaches in drug design including QSAR, pharmacophore modeling, docking and combinatorial chemistry.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	4
SW	1
SL	1
Total:	19

Session Outcomes(SOs)	Laboratory Instruction(LI)	Class room Instruction(CI)	Self Learning(SL)
<p>Theory SO5.1: Understand about the basic concepts of drug design SO5.2 Understand about the combinatorial chemistry</p> <p>Practical SO-P-5.1: Preparation of Tolbutamide, Hexamine. SO-P-5.2: Assay of Chloroquine, Metronidazole.</p>	<p>.1 preparation of Triphenyl imidazole preparation of nicotinic acid hydrazine</p>	<p>Introduction to Drug Design Various approaches used in drug design. Physicochemical parameters used in quantitative structure activity relationship (QSAR) such as partition coefficient, 5T.1:Tutorial Hammer's electronic parameter, Tafts steric parameter and Hansch analysis. Pharmacophore modeling and docking techniques. 5T.2:Tutorial Combinatorial Chemistry: Concept and applications of combinatorial chemistry: solid phase solution phase synthesis. 5T.3:Tutorial</p>	<p>5.1: Physico-chemical parameters used in quantitative structure activity relationship(QSAR) 5.2 Combinatorial Chemistry: Concept and applications chemistry.</p>

Suggested Sessional work Assignments:

1. Various approaches used in drug design.
2. Discuss about the concept of combinatorial chemistry with its applications.

Brief of Hours suggested for the Course Outcome

Course Outcomes	Class Lecture(CI)	(L)	Sessional Work (SW)	Self Learning (SI)	Total Hour (CI+SW+ SI+LI)

Curriculum of B. Pharmacy (Pharmacology III) Program
(Revised as on 01August2023)

Semester-VI

Course Code: BP602T & BP608P

Course Title:

Pharmacology III

Pre-requisite:

The Student should have basic knowledge on various aspects of drugs acting on respiratory and gastrointestinal system,

Rationale/ Objectives:

1. Understand the mechanism of drug action and its relevance in the treatment of different infectious diseases.
2. comprehend the principles of toxicology and treatment of various poisonings
3. Appreciate correlation of pharmacology with related medical sciences.

Course Out comes:

CO- BP602-1: To understand the Pharmacology of drugs acting on Respiratory system& Gastrointestinal Tract

CO- BP602-2: To know the various principles of chemotherapy& various drugs used for the treatment of bacterial infections.

CO- BP602-3: To know the various chemotherapeutics agents for treatment of tuberculosis, leprotic, viral, fungal infections & malignancy along with Immune pharmacology of drugs.

CO- BP602-4: To know the drugs used for the treatment of urinary tract infections, sexually transmitted diseases.

CO- BP602-5: To understand the Principles of toxicology &Chrono pharmacology.

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Herbal Drug Technology) Program
(Revised as on 01August2023)
Semester-VI

Course Code: BP603 T/BP609P
Course Title: Herbal Drug Technology

Pre-requisite: This subject gives the student the knowledge of basic understanding of herbal drug industry, the quality of raw material, guidelines for quality of herbal drugs, herbal cosmetics, natural sweeteners, nutraceutical etc. The subject also emphasizes on Good Manufacturing Practices (GMP), patenting and regulatory issues of herbal drugs.

Rationale/Objectives: Upon completion of this course the student should be able to:

1. Understand raw material as source of herbal drugs from cultivation to herbal drug product.
2. Know the WHO and ICH guidelines for evaluation of herbal drugs.
3. Know the herbal cosmetics, natural sweeteners, Nutraceuticals.
4. Appreciate patenting of herbal drugs, GMP.

Course Outcomes:

- CO-BP603 -1:** To understand raw material as source of herbal drugs from cultivation to herbal drug product.
CO-BP603 -2: To know the WHO and ICH guidelines for evaluation of herbal drugs.
CO-BP603 - 3: To know the herbal cosmetics, natural sweeteners, nutraceuticals.
CO-BP603 -4: To carry out the appreciate patenting of herbal drugs, GMP.
CO-BP603 -5: To know Good Manufacturing Practice of Indian systems of medicine.

Scheme of Studies

90–94	3	1.5
85–89	2	1
80–84	1	0.5
Lessthan80	0	0

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

CO-BP603 -1: To understand raw material as source of herbal drugs from cultivation to herbal drug product.

Item	Approx Hrs
Lecture & Tutorial	10+3=13

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Bio-pharmaceutics and Pharmacokinetic) Program
(Revised as on 01August2023)

Semester-VI

Course Code: BP604

Course Title: Bio-pharmaceutics and Pharmacokinetic

Pre-requisite: The Student should have basic knowledge of solution, solute, solvent and their properties.

Rationale/Objectives: Understand the basic concepts in bio-pharmaceutics and pharmacokinetics and their significance. Use of plasma drug concentration-time data to calculate the pharmacokinetic parameters to describe the kinetics of drug absorption, distribution, metabolism, excretion, elimination.

Course Outcomes:

CO-BP604.1: To gain knowledge of drug absorption, distribution & protein binding with importance.

CO-BP604.2: Understand bio-availability & bioequivalence phenomenon as well as in-vivo & in-vitro correlations

CO-BP604.3: Understand definition & introduction of pharmacokinetics including their parameters.

CO-BP604.4: Study about the functioning construction & significance of multi-compartment model.

CO-BP604.5: Understand & learn about the nonlinear pharmacokinetics with factors causing nonlinearity.

Scheme of studies

Course code	Title of the course	Program Name	TOTAL Number of contact hours/Week					Credit	
			Classroom Instruction(A)		Practical (P)	S W	SL		Total Hours (H)
			Lecture	Tutorial					
BP604T	Biopharmaceutics & Pharmacokinetics theory	B. Pharmacy	3	1	0	1	1	6	4

Legend:

CI: Classroom Instruction (Include as different instructional strategies i.e. Lecture(L)and Tutorial(T)and others

LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

SW: Sessional Work (includes assignment, seminar, mini-project etc.),

SL: Self Learning, Credits.

Note: SW&SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Guidelines for the allotment of marks for attendance

Percentage of Attendance	Theory	Practical
95 – 100	4	2
90 – 94	3	1.5
85 – 89	2	1
80 – 84	1	0.5
Less than 80	0	0

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

CO-BP604.1: To gain knowledge of drug absorption, distribution & protein binding with importance.

Item	ApproxHrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total:	15

Session Outcomes(SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self Learning (SL)
Theory SO1.1. Mechanisms of drug absorption through GIT. SO1.2 factors influencing drug absorption through GIT. SO1.3 Tissue permeability of drugs. SO1.4 plasma and tissue protein binding of drugs. Factors affecting protein-drug binding. SO1.5 Clinical significance of protein binding of drugs.		Introduction Bio-pharmaceutics 1.1 Mechanisms of drug absorption through GIT 1.2 factors influencing drug absorption through GIT 1.3 absorption of drug from Non-peroral extra vascular routes. Distribution 1.4 Tissue permeability of drugs. 1.5 binding of drugs, Understand & classify the absorption rates of sustained released, control released & extended released tablets. 1.T-1: Tutorial 1.6 Apparent volume of drug distribution 1.7 plasma and tissue protein binding of drugs. 1.T-2: Tutorial 1.8 Factors affecting protein-drug binding. 1.9 Kinetics of protein binding. 1.10 Clinical significance of protein binding of drugs. 1.T-3: Tutorial	1.1 Can understand & classify the absorption rates of sustained released, control released & extended released tablets.

Suggested Sessional work

- Assignments:** 1. Mechanisms of drug absorption through GIT,
2. Factors influencing drug absorption through GIT.

CO-BP604.2: Understand bio-availability & bioequivalence phenomenon as well as in vivo & in-vitro correlations.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total:	15

Session Outcomes(SOs)	Laboratory Instruction (LI)	Classroom Instruction(CI)	Self Learning (SL)
Theory SO2.1. Drug metabolism and basic understanding metabolic pathways renal excretion of drugs. SO2.2 renal clearance, Non renal routes of drug excretion of drugs SO2.3 measurement of bioavailability. SO2.4, in-vitro drug dissolution models. SO2.5 methods to enhance the dissolution rates and bioavailability of poorly soluble drugs.		Elimination 2.1: Drug metabolism and basic understanding metabolic pathways renal excretion of drugs. 2.2: Factor effecting renal excretion of drugs. 2.3 Renal clearance, Non renal routes of drug excretion of drugs. Bioavailability and Bioequivalence 2.4 Definition and objectives of bioavailability. 2.5 Absolute and relative bioavailability. 2.6 Measurement of bioavailability. 2.7 in-vitro drug dissolution models. 2.T-1: Tutorial 2.8 Drug metabolism and basic understanding metabolic pathways renal excretion of drugs. 2.9 in-vitro-in-vivo correlations. 2.10 Bioequivalence studies. 2.11 Methods to enhance the dissolution rates and bioavailability of poorly soluble drugs. 2.T-2: Tutorial	2.1 Determine & calculate the percentage drug release of tablet formulation through dissolution apparatus.

Suggested Assignments- 1. Factors affecting renal excretion

CO-BP604.3: understand definition & introduction of pharmacokinetics including their parameters.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total:	15

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self learning (SL)
Theory SO3.1. Drug metabolism and basic understanding metabolic pathways renal excretion of drugs. SO3.2. renal clearance, Non renal routes of drug excretion of drugs SO3.3. measurement of bioavailability		Pharmacokinetics 3.1 Definition and introduction to Pharmacokinetics. 3.2 Compartment models. 3.3 Non compartment models 3.T-1 Tutorial 3.4 One compartment open model. 3.5(a). Intravenous Injection (Bolus)(b). Intravenous infusion. 3.6 Extra vascular administrations. Pharmacokinetics. 3.T-2 Tutorial 3.7 parameters-KE, $t_{1/2}$, Vd. 3.8 AUC, Ka, Clt and CLR- definitions methods of eliminations. 3.9 understanding of their significance and 3.10 application. 3.T-3 Tutorial	3.1: Study the role of some newer inorganic salt in preparation of dental products

Suggested Sessional work

- Assignments:** 1. Drug metabolism and basic understanding metabolic pathways renal excretion of drugs.
 2. Non renal routes of drug excretion of drugs

CO-BP604.4: study about the functioning construction & significance of multi-compartment model.

Item	ApproxHrs
Lecture & Tutorial	8+3=11
Practical(P)	0
SW	1
SL	1
Total:	14

Session Outcomes(SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self Learning (SL)
SO4.1 Two compartment open model. SO4.2 steady statedrug levels. SO4.3- significance in clinical settings.		Multi-compartment models 4.1 Two compartment open model. 4.2 IV bolus. 4.3 Kinetics of multiple dosing. 4.T-Tutorial : 4.4 steady state drug levels. 4.5 calculation of loading. 4.6 mainenance doses. 4.T-Tutorial: 4.7 significancein clinical settins. 4.8 significance in clinical settins. 4.T-3Tutorial	4.1: Two compartment open model functioning

Suggested Sessional work

Assignments: 1.Twocompartmentopenmodel.

CO-BP604.5: understand & learn about the nonlinear pharmacokinetics with factors causing nonlinearity.

Item	Approx Hrs
Lecture &Tutorial	7+3=10
Practical(P)	0
SW	2
SL	1
Total:	13

Session Outcomes	Laboratory Instructions	Class Room Instructions	Self Learning(SL)
Theory SO5.1 Introduction. SO5.2 Factors causing Non-linearity. SO5.3 Explanation with example of drugs.	NA	Non-linearity. 5.1 Introduction 5.2 Factors causing Nonlinearity. 5.3 Michaelis-menton method of estimating parameters. 5.4 Types of nonlinearity. 5.T-1: Tutorial 5.5 Michaelis-menton method 5.6 Example of drugs. 5.T-2: Tutorial 5.7 Example of drugs. 5.T-3: Tutorial	5.1 Read the significance of non-linearity in distribution & in excretion with drug example.

Suggested Sessional work

Assignments: 1. Factors causing Non-linearity.

Brief of Hours suggested for the Course Outcome

Course Outcomes	Class Lecture (C)	(L)	Sessional Work (SW)	Self Learning (SI)	Total Hour (CI+SW+SI+LI)
BP604.1 To gain knowledge of drug absorption	13	0	1	1	15
BP 604.2 To understand bio-availability & bioequivalence phenomenon as well as in-vivo & in- vitro correlations	13	0	1	1	15
BP604.3: Understand definition & introduction of pharmacokinetics including their parameters..	13	0	1	1	15
BP604.4: Study about the functioning construction & significance of multi-compartment model	11	0	1	1	13
BP604.5: TO Understand & learn about then non linear pharmacokinetics with factors causing nonlinearity.	10	0	2	1	13
Total Hours	60	0	6	5	71

Suggestion for End Semester Assessment
Suggested Specification Table (For ESA)

Course Outcom	Unit Titles	MarksDistribution			Total Marks
		A	C	I	
BP 604.1:	To gain knowledge of drug absorption	08	06	01	15
BP 604.2:	To understand bio-availability & bioequivalence phenomena as well as in- vivo & in-vitro correlations	12	07	01	20
BP 604.3:	Understand definition & introduction of pharmacokinetics including their parameters.	02	06	02	10
BP 604.4:	Study about the functioning construction & significance of multi-compartment model	10	02	03	15
BP 604.5:	Understand & learn about the nonlinear pharmacokinetics with factors causing Non-linearity.	05	07	03	15
Total		37	28	10	75

Legend: A: Analyse, C:Create, I:Interpret

The end of semester assessment for Bio-pharmaceutics & Pharmacokinetics will be held with written examination of 75 marks

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment

Suggested Instructional/ImplementationStrategies:

1. Improved Lecture
2. Tutorial
3. CaseMethod
4. GroupDiscussion
5. RolePlay
6. Demonstration
7. ICTBasedTeachingLearning(VideoDemonstration/TutorialsCBT,Blog, Face book, Twitter, Whats app, Mobile, Online sources)
8. Brain stormin

Curriculum of B. Pharmacy (Pharmaceutical Biotechnology) Program
(Revised as on 01August2023)

Semester-VI

Course Code:

BP605T

Course Title:

Pharmaceutical Biotechnology

Pre-requisite:

Student should have basic knowledge of Biological Sciences and Microbiology

Rationale/Objectives:

Up on completion of the course student shall be able to

- Understanding the importance of Immobilized enzymes in Pharmaceutical Industries
- Genetic engineering applications in relation to production of pharmaceuticals
- Importance of Monoclonal antibodies in Industries
- Appreciate the use of microorganisms in fermentation technology

Course Out comes:

CO-BP605-1: To elaborate the basic theories that corelate pharmaceutical science with biotechnology

CO- BP605-2: To acquire the knowledge of basic microbiological sciences and genetic engineering

CO- BP605-3: To explain the various mechanisms of Immunological response

CO- BP605-4: To determine the immunological techniques and mutational study

CO- BP605-5: To comprehend the basic concepts of Fermentation technology

Scheme of Studies

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

Unit I

CO-BP605-1: To elaborate the basic theories that correlate pharmaceutical science

With biotechnology

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	20
SW	1
SL	1
Total:	35

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self - Learning (SL)
<p>SO1: Elaborate the Inter correlation of pharmaceutical sciences and Biotechnology. SO2: Define the functions of Enzyme biotechnology SO3: Distinguishes among different functionalities of Biosensors SO4: Elucidate the mechanism behind Protein Engineering SO5: Interpret the functions of Microbial enzymes SO6: Determine the basic principles of genetic engineering</p>		<p>1.1: Brief introduction to Biotechnology with reference to Pharmaceutical Sciences. 1.2: Enzyme Biotechnology- Methods of enzyme immobilization and applications. 1.3: Biosensors- Working and applications of biosensors in Pharmaceutical Industries. 1.4: Brief introduction to Protein Engineering. 1.5: Use of microbes in industry. Production of Enzymes- General consideration - Amylase, Catalase, Peroxidase, Lipase, Protease, Penicillinase. 1.6: Basic principles of genetic engineering</p>	<p>SL1: Make a list of Indian Biopharmaceutical Companies and their unique Products. SL2: Write names of 10 Enzymes and their Biocatalyst role. SL3: Write down the basic steps used in Protein Engineering</p>

Unit II**CO-BP605-2: To acquire the knowledge of basic microbiological sciences and genetic engineering**

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	16
SW	1
SL	1
Total:	31

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
SO2.1: Elaborate the mechanism of Genetic Engineering SO2: Elucidate the mechanism of Recombinant DNA techniques SO3: Interpret the role of Genetic engineering in various biological Product development. SO4: Interpret the basic mechanism of Polymerase Chain Reaction (PCR)	.1: Study of cloning vectors, restriction endonucleases and DNA ligase 2.2: Recombinant DNA technology. Application of genetic engineering in medicine. 2.3 Application of DNA technology and genetic engineering in the production of: 1) Interferon 2) Vaccines:-B 3) Hormones- Insulin. 2.4 Brief introduction to PCR		SL1: List down the compounds and enzymes play role in Genetic engineering. SL2: Draw a diagram showing all steps used in rDNA technology. SL3: List down the applications of RDT in different sectors.

Suggested Assignments:

1. Make a project on “Various products derive from r-DNA technology”
2. Make a PowerPoint presentation on “Different Steps of Genetic Engineering” with Plasmids

Unit III

CO- BP605-3: To explain the various mechanisms of Immunological response

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	12
SW	1
SL	1
Total	27

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
SO1: Determine the structure of Immunoglobulins SO2: Differentiate among different classes of MHCs SO3: Interpret the mechanism of Hypersensitivity SO4: Elaborate the storage and preparation mechanism for vaccines SO5: Elaborate the Storage conditions and stability of official vaccines SO6: Explain the Hybridoma technology- Production, Purification and Applications SO7: Elaborate the Blood products and Plasma Substitutes	. 3.1: Structure of Immuno globulins 3.2: Structure and Function of MHC 3.3: Hypersensitivity reactions, Immune stimulation and Immune suppressions. 3.4: General method of the preparation of bacterial vaccines, toxoids, viral vaccine, antitoxins, serum-immune blood derivatives and other products relative to immunity. 3.5: Storage conditions and stability of official vaccines 3.6: Hybridoma technology- Production, Purification and Applications 3.7: Blood products and Plasma Substitutes		SL1: Write down the mechanism of Innate and Adaptive immunity SL2: Draw and label the diagrams of MHC class I, II and III SL3: List down the different vaccines made by Indian companies.

- Suggested Assignments:**
1. Make a project on “Difference between Innate and Adaptive Immunity”
 2. Make a Powerpoint presentation on “Mechanism of Vaccines and their types”

Unit IV

CO- BP605-4: To determine the immunological techniques and mutational study

Item	Approx Hrs
Lecture & Tutorial	08+3=11
Practical(P)	08
SW	1
SL	1
Total:	21

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
SO1. Distinguished among Blotting techniques and ELISA SO2: Distinguished among Genetic organization of Eukaryotes and Prokaryotes SO3: Elaborate transformation, transduction, conjugation, plasmids and transposons. SO4: Elucidate Microbial biotransformation and applications. SO5: Interpret and distinguishes among Mutation: Types of mutation/mutants		. 4.1: Immuno blotting techniques- ELISA, Western blotting, Southern blotting 4.2: Genetic organization of Eukaryotes and Prokaryotes 4.3: Microbial genetics including transformation, transduction, conjugation, plasmids and transposons. 4.4: Introduction to Microbial biotransformation and applications. 4.5: Mutation: Types of mutation/mutants	SL1: Writ down the different types of ELISA and their applications. SL2: List down the role of Transformation, Conjugation and Transduction. SL3: Find out latest research papers on “Vaccines against COVID-19”

- Suggested Assignments:** 1. Make a project on “Role of ELISA in identifying different viral Infections”
 2. Make a Powerpoint presentation on “Different Types of Mutations”

Unit V

CO- BP605-5: To comprehend the basic concepts of Fermentation technology

Item	Approx Hrs
Lecture & Tutorial	07+03=10
Practical(P)	0
SW	1
SL	1
Total:	28

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
SO1: Elaborate the mechanism of Fermentation process SO2: Elucidate the role of media, sterilization, aeration and stirrer process. SO3: Design the fermenter and explain its all parts SO4: Explain the production process of penicillin, citric acid, Vitamin B12 and Glutamic acid SO5: Elucidate the Collection and Storage of blood based products		5.1: Fermentation methods and general requirements 5.2: Study of media, equipment, sterilization methods, aeration process, stirring 5.3: Large scale production fermenter design and its various controls 5.4: Study of the production of - penicillin, citric acid, Vitamin B12 and Glutamic acid 5.5: Blood Products: Collection, Processing and Storage of whole human blood, dried human plasma, plasma Substitutes	SL1: List down different types of fermented products SL2: Make a table mentioning Bacteria, Yeast and Fungi and the products produced from them using fermentation. SL3: Write down the difference between Catabolic and Anabolic reactions

- Suggested Assignments:**
1. Make a project on “Role of Fermentation in Food and Pharmaceutical Sciences”
 2. Make a Powerpoint presentation on “Various Pharmaceutical products produced using Fermentation Technology”

Brief of Hours suggested for the Course Outcome

Course Out comes	Class Lecture (Cl)	(LI)	Sessional Work(SW)	Self Learning(SI)	Total Hour (Cl+SW+ SI+LI)
CO-BP605-1 To elaborate the basic theories that corelate pharmaceutical science	13	20	1	1	35
CO-BP605-2 To acquire the knowledge of basic microbiological sciences and genetic engineering	13	16	1	1	31
CO-BP605-3 To explain the various mechanisms of Immunological response	13	12	1	1	27
CO- BP605-4 To determine the immunological techniques and mutational study	11	08	1	1	21
CO- BP605-5 To comprehend the basic concepts of Fermentation technology	10	0	1	1	12
Total Hours	60	56	5	5	126

Suggestion for End Semester Assessment
Suggested Specification Table (For ESA)

CO	Unit Titles	Marks Distribution			Total Marks
		A	C	E	
CO-1	CO-BP605-1 To elaborate the basic theories that corelate pharmaceutical science	08	06	01	15
CO-2	CO-BP605-2 To acquire the knowledge of basic microbiological sciences and genetic engineering	08	07	01	16
CO-3	CO-BP605-3 To explain the various mechanisms of Immunological response	08	07	01	16
CO-4	CO- BP605-4 To determine the immunological techniques and mutational study	07	06	01	14
CO-5	CO- BP605-5 To comprehend the basic concepts of Fermentation technology	08	07	01	16
Total		39	33	05	77

The end of semester assessment for Pharmaceutical Biotechnology will be held with written examination of 75 marks

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Demonstration
7. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Face book, Twitter, Whats app, Mobile, Online sources)
8. Brainstorming

Suggested Learning Resources:

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Pharmaceutical Quality assurance) Program
(Revised as on 01August2023)
Semester-VI

Course Code: BP-606T

Course Title: Pharmaceutical Quality assurance (theory)

Pre-requisite: The Student should have basic knowledge of manufacturing process, their quality control as well as procedure involved in quality assurance.

Rationale/Objectives: Upon completion of the course student shall be able to

- Understand the cGMP aspects in a pharmaceutical industry appreciate the importance of documentation
- Understand the scope of quality certifications applicable to pharmaceutical
- Understand the responsibilities of QA industries & QC department

Course Outcomes:

CO-BP 606.1: To gain knowledge of ICH guidelines, Quality control processes.

CO-BP 606.2: Understanding the concept of Hygiene, premises and equipments and raw materials.

CO-BP 606.3: To understand about good Laboratories practices.

CO-BP 606.4: To gain knowledge about the complaints and their resolutions.

CO-BP606.5: To gain knowledge of different calibration and validation techniques.

Scheme of Studies

Course code	Title of the course	Program Name	TOTAL Number of contact hours/Week						Credit
			Classroom Instruction(A)		Practical (P)	SW	SL	Total Hours (H)

90 – 94	3	1.5
85 – 89	2	1
80 – 84	1	0.5
Less than 80	0	0

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

CO-BP606T -1: To gain knowledge of ICH guidelines, Quality control processes.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total:	15

Session Outcomes(SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self Learning (SL)
<p>Theory SO1.1: Definition and concept of Quality control, Quality assurance and GMP SO1.2: Quality by design SO1.3: steps for registration NABL accreditation</p>	N/A	<p>Quality Assurance and Quality Management concepts: 1.1 Definition and concept of Quality control, Quality assurance and GMP 1.2 Total Quality Management (TQM): Definition, elements, philosophies 1.3 ICH Guidelines: purpose, participants, process of harmonization, 1.4 Brief overview of QSEM, with special emphasis on Q-series guidelines, ICH stability testing guidelines 1T-1: Tutorial 1.5 Quality by design (QbD): Definition, overview 1.6 elements of Qb D program 1.7 tools ISO 9000& ISO14000: Overview, Benefits 1T-2: Tutorial 1.8 Elements 1.9 steps for registration NABL accreditation Principles and 1.10 procedures 1.T-3: Tutorial</p>	<p>1.1 Can understand about two different products quality assurance process.</p>

Suggested Sessional work

Assignments: Definition and concept of Quality control, Quality assurance and GMP

Unit-II

CO-BP606-2: Understanding the concept of Hygiene, premises and equipments and raw materials.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total:	15

Session Outcomes(SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self Learning (SL)
<p>Theory</p> <p>SO2.1: Organization and personnel: Personnel responsibilities, training</p> <p>SO2.2: Premises.</p> <p>SO2.3: purchase specifications and maintenance of stores for raw materials</p>	.	<p>2.1 Organization and personnel: Personnel responsibilities, training</p> <p>2.2 hygiene and personal records.</p> <p>2.3 Premises: Design, construction and plant layout</p> <p>2.4 maintenance, sanitation,</p> <p>2.T-1: Tutorial</p> <p>2.5 environmental control</p> <p>2.6 utilities and maintenance of sterile areas</p> <p>2.7 control of contamination.</p> <p>2.T-2: Tutorial</p> <p>2.8 Equipments and raw materials: Equipment selection, 2.9 purchase specifications, maintenance</p> <p>2.10 purchase specifications and maintenance of stores for raw materials.</p> <p>2.T-3: Tutorial</p>	<p>2.1 Comparative study of two different dosage form design and construction</p>

Suggested Sessional Work Assignments: hygiene and personal records

Unit III

CO-BP606-3: To understand about good Laboratories practices

Item	Approx Hrs.
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total:	15

Session Outcomes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self Learning (SL)
Theory SO3.1: Quality Control: Quality control test for containers SO3.2: Organization and Personnel. SO3.3: Records		3.1 Quality Control: Quality control test for containers 3.2 rubber closures and 3.3 secondary packing materials. 3.T-Tutorial 3.4 Good Laboratory Practices: General Provisions 3.5 Organization and Personnel 3.6 Facilities, 3.T-Tutorial 3.7 Equipment, Testing Facilities Operation, 3.8 Test and Control Articles 3.9 Protocol for Conduct of a Nonclinical Laboratory Study 3.10 Records and Reports, Disqualification of Testing Facilities 3.T-3 Tutorial	3.1 Can read about some more manufacturing process.

Suggested Sessional Work

Assignments:1. Records and Reports

2. Disqualification of Testing Facilities

Unit-IV**CO-BP606-4: To gain knowledge about the complaints and their resolutions.**

Item	Approx Hrs.
Lecture & Tutorial	8+3=11
Practical(P)	0
SW	2
SL	1
Total:	14

Session Out comes (SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self Learning (SL)
Theory SO4.1: Complaints SO4.2: Document maintenance in pharmaceutical industry SO4.3: distribution records.		4.1 Complaints: Complaints 4.2 evaluation of complaints 4.3 Handling of return good 4.4 recalling and waste disposal 4.T-1 Tutorial 4.5 Document maintenance in pharmaceutical industry, Batch Formula Record, Master Formula Record 4.T-2 Tutorial 4.6 SOP, Quality audit, Quality Review 4.7 Quality documentation 4.8 Reports and documents, distribution records. 4.T-3 Tutorial	4.1: Can read about the importance of documents maintenance.

Suggested Sessional work**Assignments:** Record, Master Formula Record

Unit-5

CO-BP606-5: To gain knowledge of different calibration and validation techniques

Item	Approx Hrs.
Lecture & Tutorial	7+3=10
Practical(P)	0
SW	2
SL	1
Total:	13

Session Outcomes(SOs)	Laboratory Instruction (LI)	Classroom Instruction (CI)	Self-Learning(SL)
<p>Theory</p> <p>SO5.1:Sorensen's pH scale.</p> <p>SO5.2:pH determination (electrometric & calorimetric).</p> <p>SO5.3:Application of buffers.</p> <p>SO5.4:Buffered isotonic solution.</p>		<p>5.1 Calibration and Validation: Introduction, definition</p> <p>5.2 general principles of calibration,</p> <p>5T-1. Tutorial</p> <p>5.3 qualification and validation, importance and scope of validation types of validation, validation master plan.</p> <p>5.4 Calibration of pH meter,</p> <p>5.5 Qualification of UV-Visible spectrophotometer, General</p> <p>5T-2 Tutorial</p> <p>5.6 principles of Analytical method Validation</p> <p>5.7 Warehousing: Good warehousing practice, materials management</p> <p>5T-3 Tutorial</p>	<p>5.1: Look at different body fluids pH & understand what effect they will have if their pH changes.</p>

Suggested Sessional Work

Assignments: principles of Analytical method Validation.

Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Instrumental Methods of Analysis) Program
(Revised as on 01August2023)

Semester-VII

Course Code: BP701T & BP705P

Course Title: Instrumental Methods of Analysis

Pre-requisite: Student should have basic knowledge of Spectroscopy, Ultraviolet and Visible radiation, Infra red rays, Chromatography.

Rationale/Objectives: Up on completion of the course student shall be able to

- To understand the interaction of matter with electromagnetic radiations and its applications in drug analysis
- To understand the chromatographic separation and analysis of Drugs.
- To Perform quantitative & qualitative analysis of drugs using various analytical instruments.

Course Out comes:

CO-BP701-1: To understand the basic principle, instrumentation & application of UV Visible spectroscopy & Fluorimetry.

CO-BP701-2: To acquire the knowledge of principle, instrumentation & application of IR spectroscopy flame photometry, atomic absorption spectroscopy & nepheloturbidometry.

CO-BP701-3: To understanding the various types of chromatography like- Adsorption and partition column chromatography, Thin layer chromatography, Paper chromatography & Electrophoresis.

CO-BP701-4: To familiarize with basic concept of Gas chromatography & High performance liquid chromatography (HPLC).

CO-BP701-5: To comprehend the basic concepts of Ion exchange chromatography, Gel chromatography & Affinity chromatography.

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Industrial Pharmacy II) Program
(Revised as on 01August2023)

Semester-VII

Course Code: BP702T
Course Title: Industrial Pharmacy II
Pre-requisite: Students should have knowledge about industrial pharmacy I.

Rationale/Objectives: Know the process of pilot plant and scale up of pharmaceutical dosage forms, Understand the process of technology transfer from lab scale to commercial batch, Know different Laws and Acts that regulate pharmaceutical industry, Understand the approval process and regulatory requirements for drug product.

Course Out comes:

- CO-BP702.1:** Understand Pilot plant scale up techniques, SUPAC guidelines, Introduction to platform technology.
- CO-BP702.2:** To Learn Technology development and transfer and TT agencies in India - APCTD, NRDC, TIFAC, BCIL, TBSE / SIDBI
- CO-BP702.3:** Understand Regulatory affairs and Regulatory requirements for drug approval.
- CO-BP702.4:** To Understanding Quality management systems in pharmaceutical.
- CO-BP702.5:** Learn about Central Drug Standard Control Organization (CDSCO) and State Licensing Authority

Scheme of Studies

Guidelines for the allotment of marks for attendance

Percentage of Attendance	Theory	Practical
95 – 100	4	2
90 – 94	3	1.5
85 – 89	2	1
80 – 84	1	0.5
Less than 80	0	0

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

Unit I**CO-BP702.1: Understand Pilot plant scale up techniques, SUPAC guidelines, Introduction to platform technology.**

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total:	15

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning(SL)
Theory SO1.1 Understanding large scale production in pharmaceutical industry SO1.2 Understand various requirements for R&D scale to scale up method. SO1.3 Learn Pilot plant scale up considerations for solids, liquid orals, semi solids. SO1.4 Understands about documentation and SUPAC guidelines SO1.5 Understanding Introduction to platform technology.		Unit-1. Pilot plant scale up techniques: 1.1 General considerations. Significance of personnel. 1.2 Including space requirements. 1T.1 Tutorial class. 1.3 Raw materials. 1.4 Pilot plant scale up 1.5 considerations for solids 1.6 Liquid orals. 1T.2 Tutorial class. 1.7 Semi solids. Relevant documentation. SUPAC guidelines. 1T.3 Tutorial class. 1.8. Introduction to platform technology	1. Small scale technique 2. Learn conventional technique of formulation.

Suggested Assignments: 1. Raw materials. 2. Semi solids. 3. Liquid orals.

Unit II

CO-BP702.2: Learn Technology development and transfer and TT agencies in India - APCTD, NRDC, TIFAC, BCIL, TBSE / SIDBI

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total:	15

Session Outcomes(SOs)	Laboratory Instruction(LI)	Class room Instruction(CI)	Self Learning (SL)
<p>Theory</p> <p>SO2.1 To Understand WHO guidelines for Technology Transfer(TT)</p> <p>SO2.2 Understand various preparations</p> <p>SO2.3 To learn about Transfer from R & D to production.</p> <p>SO2.4 To understand about Approved regulatory bodies and agencies.</p> <p>SO2.5 To learn about Approved regulatory bodies and agencies</p>		<p>UNIT 2 :Technology development and transfer:</p> <p>WHO guidelines for Technology Transfer(TT): Terminology, Technology transfer protocol, Quality risk management.</p> <p>Transfer from R & D to production(Process, packaging and cleaning). Granularity of TT Process (API, excipients, finished products, packaging materials).</p> <p>2T.1 Tutorial class.</p> <p>Documentation, Premises and equipments, qualification and validation, quality control, analytical method transfer. Approved regulatory bodies and agencies.</p> <p>Commercialization - practical aspects and problems (case studies).</p> <p>2T.2 Tutorial class.</p> <p>TT agencies in India - APCTD, NRDC, TIFAC, BCIL, TBSE / SIDBI.</p> <p>TT related documentation. Confidentiality agreement Licensing.</p> <p>2T.3 Tutorial class.</p> <p>MoUs, legal</p>	<p>1. Knowledge about . Various department in industry and their work in pharmaceutical industry.</p>

Suggested Assignments: 1. Technology Transfer. 2. qualification and validation. 3. APCTD

Unit III

CO-BP702.3: Understand Regulatory affairs and Regulatory requirements for drug approval.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total:	15

Session Outcomes(SOs)	Laboratory Instruction(LI)	Class room Instruction(CI)	Self Learning(SL)
<p>Theory</p> <p>SO3.1 Understand Introduction and History of Regulatory affairs.</p> <p>SO3.2 To understand about Professionals Drug Development Teams.</p> <p>SO3.3 To learn about Investigational New Drug (IND), New Drug Application (NDA).</p> <p>SO3.4 To understand Data Presentation for FDA Submission s.</p> <p>SO3.5 To learn Management of Clinical Studies.</p>		<p>Unit 3 Regulatory affairs and Regulatory requirements for drug approval:</p> <p>3.1 Introduction, Historical overview of Regulatory Affairs, Regulatory authorities,</p> <p>3.2 Role of Regulatory affairs department, Responsibility of Regulatory Affairs</p> <p>3.3 Professionals Drug Development Teams, Non-Clinical Drug Development, Pharmacology.</p> <p>3T.1 Tutorial class</p> <p>3.4 Drug Metabolism and Toxicology, General considerations of Investigational New Drug (IND)</p> <p>3.5 Application, Investigator's Brochure (IB) and New Drug Application (NDA),</p> <p>3.6 Clinical research / BE studies. 3T.2 Tutorial class</p> <p>3.7 Clinical Research Protocols,</p> <p>3.8 Biostatistics in Pharmaceutical Product Development,</p> <p>3.9 Data Presentation for FDA Submissions.</p> <p>3T.3 Tutorial class</p> <p>Management of Clinical Studies.</p>	<p>3.1 : Basic requirement of drug development team.</p>

Suggested Assignments: 1. NDA. 2. IND. 3. Non-Clinical Drug Development.

Unit IV

CO-BP702.4: Understanding Quality management systems in pharmaceutical.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total:	15

AKS University
 Faculty of Pharmaceutical Science & Technology
 Rajiv Gandhi Institute of Pharmacy
 Curriculum of B. Pharmacy (Pharmacy Practice) Program
 (Revised as on 01August2023)
Semester-VII

Course Code: BP703T
Course Title: Pharmacy Practice

Pre-requisite: The Student should have basic knowledge of Drugs, Adverse drug reactions, patient counseling & Basics of community pharmacy.

Rationale/Objectives:

The primary mission of the pharmacy Practice is to have a positive impact on the provision of public health service by ensuring the safe and effective use of medications.

Course Outcome

CO-BP-703.1: To Understand the Organization Structure of a Hospital and. Know the basics of ADR with regulatory accepts.

CO-BP-703.2: To know various drug distribution methods in a hospital. Monitor drug therapy of patient through medication chart review and clinical review

CO-BP-703.3: To know pharmaceutical care services & patient counseling in community pharmacy.

CO-BP-703.4: To know the appreciate rational uses of drug & budget preparation and implementation.

CO-BP-703.5: To understand the inventory management system & Interpretation of Clinical Laboratory Tests

2	90–94	3	1.5
3.	85–89	2	1
4	80–84	1	0.5
5.	Lessthan80	0	0

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the over all attainment of Course Outcomes (COs) upon the course's conclusion.

Unit I

CO-BP-703-01: To Understand the Organization Structure of a Hospital, and Medical staffs involved in the hospital and Hospital pharmacy with its organization. Know the basics of ADR with regulatory aspects.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total	15

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction(CI)	Self Learning (SL)
a) Hospital and it's organization b) Hospital pharmacy and its organization c) Adverse drug reaction d) Community Pharmacy		<p>1.1 Definition, Classification of hospital-Primary, Secondary and Tertiary hospitals, Classification based on Clinical and non-clinical basis,</p> <p>1.2 Organization structure of a hospital and medical staffs involved in the hospital and their functions.</p> <p>1.3 Organization structure, Location, Layout and staff requirements, and Responsibilities and Functions of hospital pharmacists.</p> <p>1.4 Adverse drug reaction: Classifications Excessive pharmacological effects, secondary pharmacological effects,</p> <p>1.5: idiosyncrasy, allergic drug reactions, genetically determined toxicity, toxicity following sudden withdrawal of drugs,</p> <p>1.6: Drug interaction- beneficial interactions, adverse interactions and pharmacokinetic drug interactions, Methods for detecting, spontaneous case reports and record linkage studies and Adverse drug reaction reporting and management.</p> <p>1.7 : Community Pharmacy Organization and structure of retail and whole sale drug store, types and design, Legal requirements for establishment and maintenance of a drug store,</p> <p>1.8 Dispensing of proprietary products, maintenance of records of retail and wholesale drug store.</p> <p>1T1. Classification of hospital</p> <p>1.9 hospital- Primary, Secondary and Tertiary hospitals, Classification based on clinic a land non-clinical basis,</p> <p>1T2 Organization</p> <p>1.10 structure, Location, Layout and staff requirements, and Responsibilities and functions of hospital</p> <p>1T3. Drug interaction beneficial interactions, adverse interactions</p>	1.1 Clinical trial & Post Marketing Surveillance reporting.

Suggested Sessional work

Drug interaction, adverse drug reaction Classifications, Organization structure, Location, Layout and staff requirements, and Responsibilities and functions of hospital

Unit II

Co-BP- 703.2: To know various drug distribution methods in a hospital. Monitor drug therapy of patient through medication chart review and clinical review

Total		37	28	10	75

Legend: A: Analyze, C: Create, E: Evaluate

The end of semester assessment for Pharmacy Practice will be held with written examination of 75marks

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks.

Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Demonstration
7. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Face book, Twitter, Whats app, Mobile, Online sources)
8. Brainstorming

Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Novel Drug Delivery Systems) Program
(Revised as on 01 August 2023)
Semester-VII

Course Code: BP704T

Course Title: Novel Drug Delivery Systems

Pre-requisite: This subject is designed to impart basic knowledge on the area of novel drug delivery systems.

Rationale/Objective s: Up on completion of the course student shall be able to

1. To understand various approaches for development of novel drug delivery systems.
2. To understand the criteria for selection of drugs and polymers for the development of Novel drug delivery systems, their formulation and evaluation.

Course Out comes:

CO- BP704 -1: To understand the various approaches for development of novel drug delivery systems.

CO- BP704 -2: To acquired the knowledge of Mucosal Drug Delivery system and Implantable Drug Delivery Systems

CO- BP704 -3: To understanding the various types of drug delivery systems.

CO- BP704 -4: To familiarize with basic concept in Targeted drug Delivery.

CO- BP704 -5: To acquired the knowledge of Ocular Drug Delivery Systems and Intrauterine Drug Delivery Systems.

Suggestion for End Semester Assessment
Suggested Specification Table (For ESA)

CO	Unit Titles	Marks Distribution			Total Marks
		A	C	E	
CO-BP704.1	Controlled drug delivery systems & Polymers:	08	06	01	15
CO-BP704.2	Microencapsulation, mucosal Drug Delivery system & Implantable Drug Delivery Systems	08	07	01	16
CO-BP704.3	Transdermal Drug Delivery System, Gastroretentive drug delivery systems & Nasopulmonary drug delivery system.	08	07	01	16
CO-BP704.4	Targeted drug Delivery.	07	06	01	14
CO-BP704.5	Ocular Drug Delivery System & Intrauterine Drug Delivery Systems.	08	07	01	16
Total		39	33	05	77

Legend: A: Analyze, C: Create, E: Evaluate

The end of semester assessment for Novel Drug Delivery Systems will be held with written examination of 75 marks.

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks. Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

- Improved Lecture
- Tutorial
- Case Method
- Group Discussion
- Role Play
- Demonstration
- ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Face book, Twitter, Whats app, Mobile, Online sources)
- Brainstorming

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Biostatistics and research methodology) Program
(Revised as on 01August2023)

Course Code: BP801T

Course Title : Biostatistics and research methodology

Pre- requisite: Students should have knowledge about MS word and excel.

Rationale: Upon completion of the course the student shall be able to Know the operation of M.S. Excel, SPSS, R and MINITAB, DOE (Design of Experiment). Know the various statistical techniques to solve statistical problems Appreciate statistical techniques in solving the problems.

Course Outcomes:

CO-BP801.1: To understand the applications of Biostatics in Pharmacy.

CO-BP801.2: This subject deals with descriptive statistics, Graphics, Correlation, Regression, logistic regression Probability theory, Sampling technique, parametric tests, Non Parametric tests, ANOVA.

CO-BP801.3: Understand introduction to Design of Experiments and Phases of Clinical trials.

CO-BP801.4: To Understanding observational and experimental studies, SPSS, R and MINITAB Statistical software's, analyzing the statistical data using Excel

CO-BP801.5: Learn about Design and Analysis of experiments, Factorial Design and Response, Surface methodology

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)						Total Credits (C)
			CI		LI	SW	SL	Total Study Hours (CI+LI+SW+SL)	
			L	T					
Pharmacy	BP-802 T	Biostatistics and Research Methodology (Theory)	3	1	0	1	1	6	4

Legend: CI: Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),

LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

SW: Sessional Work (includes assignment, seminar, mini project etc.),

SL: Self Learning,

C: Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Scheme of Assessment: Theory

Board of Study	Course Code	Course Title	Scheme of Assessment (Marks)						End Semester Assessment	Total Marks (PRA+ ESA)
			Progressive Assessment (PRA)					Total Marks		
			Academic activity, Any three (Quiz/ Assignment, open book test, filed work and seminar)	Student teacher interaction	Class Attendance	Sessional exam	Total Marks			
Pharmacy	BP801 T	Biostatistics and research methodology	3	3	4	15	25	75	100	

Guidelines for the allotment of marks for attendance

Percentage of Attendance	Theory	Practical
95 – 100	4	2
90 – 94	3	1.5
85 – 89	2	1
80 – 84	1	0.5
Less than 80	0	0

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

CO-BP801.1: Understand Pilot plant scale up techniques, SUPAC guidelines, Introduction to platform technology.

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Social and Preventive Pharmacy) Program
(Revised as on 01August2023)

Semester-VIII

Course Code:	BP802T
Course Title:	Social and Preventive Pharmacy
Pre-requisite:	The Student should have basic knowledge on various number of national health programs along with that patient's health issues and their challenges
Rationale/ Objectives:	After the successful completion of this course, the student shall be able to: <ul style="list-style-type: none">• Acquire high consciousness/realization of current issues related to health and• Pharmaceutical problems within the country and worldwide.• Have a critical way of thinking based on current healthcare development.• Evaluate alternative ways of solving problems related to health and• pharmaceutical issues

Course Out comes:

CO- BP802T -1: To understand Concept of health and diseases, Role of hygiene in health system.

CO- BP802T -2: To know the various treatment approach for microbial infections like Ebola virus, influenza, etc.

CO- BP802T -3: To know the various National health programs run by Govt. of India., its objectives, functioning and outcome

CO- BP802T -4: To know the role of WHO in national health intervention programs for mother child, elder *Etc* .

CO- BP802T -5: To understand the Community services in rural, urban and school health.

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

Unit I

CO- BP802T -1: To understand Concept of health and diseases, Role of hygiene in health system.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total:	15

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
Theory SO1.1: Concept of health and disease: SO1.2: Social and health education SO 1.3: Sociology and health SO1.4: Hygiene and health:		1.1: Definition, concepts and evaluation of public health 1.2 Understanding the concept of prevention and control of disease. 1.3 social causes of diseases 1.4: social problems of the sick. 1T1: Tutorial Class 1.5 Food in relation to nutrition and health, 1.6 Balanced diet, Nutritional deficiencies, Vitamin	1.1: Role & Society for health awareness.

		deficiencies 1.7 Malnutrition and its prevention. 1.8: Socio cultural factors related to health and disease, 1T2: Tutorial Class 1.9: Impact of urbanization on health and disease, Poverty and health 1.10: Hygiene and health: personal hygiene and health care; avoidable habits 1T3: Tutorial Class	
--	--	---	--

Suggested Assignments: Impact of urbanization on health and disease, Hygiene and health

Unit II

CO- BP802T -2: To know the various treatment approach for microbial infections like Ebola virus, influenza, etc

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total:	15

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
<p>Theory SO1.1: Preventive medicine</p>		<p>2.1: General principles of prevention and control of diseases cholera, 2.2: SARS, Ebola virus 2.3 influenza, acute respiratory infections, malaria, 2.4: chicken guinea, dengue,, 2T.1: Tutorial Class 2.5: lymphatic filariasis, pneumonia, 2.6: hypertension,, 2.7: diabetes mellitus, 2.8: cancer, 2T.2: Tutorial class 2.9: drug addiction 2.10: drug substance abuse 2T.3: Tutorial class</p>	<p>2.1: Study the General approaches& treatment approaches & pathogenesis of Infections .</p>

Suggested Assignments:: pneumonia, hypertension, diabetes mellitus, cancer, drug addiction-drug substance abuse

Unit III

CO- BP802T-3: To know the various National health programs run by Govt. of India., its objectives, functioning and outcome

Item	Approx Hrs
Lecture & Tutorial	10+3
Practical(P)	0
SW	1
SL	1
Total:	15

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
<p>Theory SO 3.1: National health programs, its objectives, functioning. .</p>		<p>Chemotherapy 3.1: National health programs HIV, 3.2: HIV AND AIDS control programme, 3.3 TB, Integrated disease surveillance program (IDSP), 3.4: National leprosy control programme 3T.1: Tutorial Class 3.5: National mental health program, 3.6: National mental health program 3.7: National 158 programme for prevention and control of deafness, 3.8: Universal Immunization programme, 3T.2: Tutorial class 3.9: National programme for control of blindness, 3.10: Pulse polio programme 3T.3: Tutorial class</p>	<p>3.1: Study the General approaches & treatment approaches & pathogenesis of Infections .</p>

Suggested Assignments: TB, Integrated disease surveillance program (IDSP), National leprosy control programme, National mental health program, National programme for prevention and control of deafness, Universal immunization programme.

Unit IV

CO- BP802T -4: To know the role of WHO in national health intervention programs for mother child, elder *Etc.*

Item	Approx Hrs
Lecture & Tutorial	8+3=11
Practical(P)	0
SW	1
SL	1
Total:	13

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
<p>Theory SO4.1 National health intervention programme for mother and child</p> <p>SO4.2: National programme for the health</p> <p>SO4.3: Role of WHO in Indian national program</p>		<p>4.1: National health intervention programme for mother and child, 4.2 National family welfare programme, 4.3: National tobacco control programme 4.4: National Malaria Prevention Program 4T1: Tutorial Class 4.5 National programme for the health care for the elderly, 4.6: Social health programme 4..7: Role of WHO in Indian national program</p>	<p>4.1: Study the General approaches for Various National health intervention programme.</p>

		4.8 National family welfare programme, 4T.2: Tutorial class 4T1: Tutorial Class	
--	--	--	--

Suggested Assignments: National health intervention programme for mother and child, National family welfare programme, National tobacco control programme, National Malaria Prevention Program, National programme for the health care for the elderly, Social health programme; role of WHO in Indian national program

Unit V

CO- BP802T -5: To understand the Community services in rural, urban and school health.

Item	Approx Hrs
Lecture & Tutorial	7+3=10
Practical(P)	0
SW	1
SL	1
Total:	12

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
Theory SO5.1: Community services in rural, urban and school health:		5.1: Community services 5.2: Improvement in rural sanitation 5.3: National urban health mission 5.4: Health promotion and education in school 5T1: Tutorial class 5.5: Functions of PHC 5.6: Role of PHC in	5.1: Understand the importance of Community services .

		rural health care sanitation 5.7: Importance of urban health mission 5T.2: Tutorial class 5T.3: Tutorial class	
--	--	--	--

Suggested Assignments: National health intervention programme for mother and child, National family welfare programme, National tobacco control programme, National Malaria Prevention Program, National programme for the health care for the elderly, Social health programme; role of WHO in Indian national program

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Pharma Marketing Management) Program
(Revised as on 01August2023)

Semester-VIII

Course Code: BP803ET
Course Title: Pharma Marketing Management
Pre-requisite: Student should have basic knowledge of General Marketing, Pharma Marketing, Marketing management, Consumer behaviour.

Rationale/Objective s: Up on completion of the course student shall be able to

- To understand the marketing concepts and techniques and their applications in the pharmaceutical industry.
- To describe, classify, structure and combine concepts, theories, methods and models taught.
- To identify and develop relevant issues within pharmaceutical marketing.
- To analyze and synthesize specific issues within pharmaceutical marketing by using the concepts, theories, methods and models taught.
- To assess and communicate problem-solving on a reflective, scientific basis.

Course Out comes:

- CO-BP803-1:** To understand the marketing & pharmaceutical market.
CO-BP803-2: To acquired the knowledge of product decision & product management in pharmaceutical industry
CO-BP803-3: To understanding the promotion & online promotional techniques for OTC Products.
CO-BP803-4: To familiarize with basic concept of pharmaceutical marketing channels & professional sales, representative (PSR)
CO-BP803-5: To comprehend the basic concepts of pricing & emerging concepts in marketing.

80–84	1	0.5
Less than 80	0	0

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

Unit I

CO-BP803-1: To understand the marketing & pharmaceutical market.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total:	15

Session Outcomes(SOs)	Laboratory Instruction(LI)	Class room Instruction (CI)	Self Learning (SL)
Theory SO1.1: Marketing SO1.2: Pharmaceutical Marketing	NA	.1 Definition, general concepts and scope of marketing 1.2 Distinction between marketing & selling; Marketing environment 1.3 Industry and competitive analysis 1T.1 Tutorial Class 1.4 Analyzing consumer buying behavior & industrial buying behavior. 1.5 Quantitative and qualitative aspects & size and composition of the market. 1.6 Demographic descriptions and socio-psychological characteristics of the consumer. 1T.2 Tutorial Class 1.7 Market segmentation & targeting & Consumer profile. 1.8 Motivation and prescribing habits of the Physician. 1.9 Patients' choice of physician and retail pharmacist. 1.10 Analyzing the Market; Role of market research. 1T.3 Tutorial Class	1.1: Motivation and prescribing habits of the physician; 1.2: patients' choice of physician and retail pharmacist

Suggested Assignments:

1. General concepts and scope of marketing
2. Analyzing consumer buying behavior.
3. Socio-psychological characteristics of the consumer.
4. Size and composition of the market.
5. Patient's choice of physician and retail pharmacist

Unit II

CO-BP803-2: To acquired the knowledge of product decision & product management in pharmaceutical industry.

Item	Approx Hrs
Lecture & Tutorial	08+3=11
Practical (P)	0
SW	1
SL	1
Total:	13

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
Theory SO2.1: Product decision SO2.2: Product life cycle SO2.3: New product decisions SO2.4: Product management in pharmaceutical industry.	NA	2.1 Product decision & Classification. 2.2 Product line and product mix decisions. 2.3 Product life Cycle. 2T.1 Tutorial Class 2.4 Product portfolio analysis & product positioning. 2.5 New product decisions. 2.6 Product branding. 2T.2 Tutorial Class 2.7 Product packaging and labeling decisions. 2.8 Product management in pharmaceutical industry. 2T.3 Tutorial Class	2.1: Product life cycle 2.2: Product packaging and labeling decisions.

Suggested Assignments: 1. Product line 2. Product mix decisions 3. Product life cycle 4. New product decisions 5. Product packaging and labeling decisions

Unit III

CO-BP803-3: To understanding the promotion & 501 The promotional techniques for OTC Products.

Item	Approx Hrs
Lecture & Tutorial	07+3=10
Practical(P)	0
SW	1
SL	1

Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Pharmaceutical Regulatory Science) Program
(Revised as on 01August2023)

Semester-VIII

Course Code: BP804ET

Course Title: Pharmaceutical Regulatory Science

Pre-requisite: The Student should have basic knowledge of drug discovery and development.

Rationale/Objective s:

Up on completion of the course student shall be able to

- Know about the process of drug discovery and development
- Know the regulatory authorities and agencies governing the manufacture and sale of pharmaceuticals
- Know the regulatory approval process and their registration in Indian and international markets

Course Out comes:

CO-BP804ET-1: To understand about the drug discovery and development of generic drug.

CO-BP804ET-2: To know about the processes and rules during new drug development.

CO-BP804ET-3: To understand about the procedure of registration of Indian drug product in overseas market.

CO-BP804ET-4: To gain the knowledge about clinical trials protocols & ethics committee.

CO-BP804ET-5: Understand about the technical terms, guidelines, law and acts and code of federal regulatory.

Scheme of Studies

Course code	Title of the course	Program Name	TOTAL Number of contact hours/Week						Credit
			Classroom Instruction (A)		Practical (P)	SW	SL	Total Hours (H)	
			Lecture	Tutorial					
BP804ET	Pharmaceutical Regulatory Science	B. Pharmacy	3	1	4	1	1	10	6

Legend: **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),

LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

SW: Sessional Work (includes assignment, seminar, mini project etc.),

SL: Self Learning, Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

CO-BP804ET-1: To understand about the drug discovery and development of generic drug

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical (P)	0
SW	1
SL	1
Total	15

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
Theory SO1.1: Understand New drug delivery concept SO1.2: Understand drug development process. SO1.3: Generic drug product development.		1.1: New drug delivery concept. 1.2: development concept. 1.3: Stages of drug discovery. 1.4: Drug development process 1T.1: Tutorial 1.5: pre-clinical studies 1.6: non-clinical activities, 1.7: clinical studies 1T.2: Tutorial class 1.8: clinical studies 1.9: Concept of generics 1.10: Generic drug product development. 1T.3: Tutorial class	1.1: To study about the drug development process of two different categories drugs.

Suggested Assignments: Stages of drug discovery, Drug development process, pre-clinical studies

Unit II

CO-BP104-2: To know about the processes and rules during new drug development.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total	15

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
SO2.1: Understand the Approval processes. SO2.2: New Drug Application (NDA). SO2.3: Organization structure and types of applications.		2.1: Approval processes 2.2: timelines involved in Investigational New Drug (IND) 2.3: New Drug Application (NDA) 2.4: Abbreviated New Drug Application (ANDA). 2T.1: Tutorial 2.5: Changes to an approved NDA /ANDA 2.6: Overview of regulatory authorities of India. 2T.2: Tutorial 2.7: United States 2.8: European Union 2.9: Australia, Japan 2.10: Canada (Organization structure and types of appli	2.1: Study about the detailed process of new drug application and their modern perspective.

Suggested Assignments: New Drug Application (NDA), Abbreviated New Drug Application (ANDA), Changes to an approved NDA / ANDA.

Unit III

CO-BP804ET-3: To understand about the procedure of registration of Indian drug product in overseas market

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total:	15

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
Theory SO3.1: Registration of Indian drug product SO3.2: Procedure for export of pharmaceutical products SO3.3: Common Technical Document (CTD) SO3.4: Common Technical Document (ACTD) research		3.1: Registration of Indian drug product 3.2: overseas market 3.3: Procedure for export of pharmaceutical products 3.4: Procedure for export of pharmaceutical products 3T.1: Tutorial Class 3.5 : Technical documentation 3.6: Drug Master Files (DMF) 3.7: Common Technical Document (CTD) 3.8: electronic Common Technical Document (Ectd) 3T.2: Tutorial class 3.9: ASEAN 3.10: Common Technical Document (ACTD) research 3T3: Tutorial class	3.1: Study the various drugs registration process

Suggested Assignments: Procedure for export of pharmaceutical products, Technical documentation, Drug Master Files (DMF)

Unit IV

CO-BP804ET-4: To gain the knowledge about clinical trials protocols & ethics committee.

Item	Approx Hrs
Lecture & Tutorial	8+3=11
Practical(P)	0
SW	1
SL	1
Total:	13

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
<p>Theory</p> <p>SO4.1: Understand Developing clinical trial protocols</p> <p>SO4.2: Informed consent process and procedures, GCP obligations of Investigators</p> <p>SO4.3: Pharmacovigilance - safety monitoring in clinical trials</p>		<p>4.1: Developing clinical Trial protocols.</p> <p>4.2: Institutional Review</p> <p>4.3: Board / Independent Ethics committee</p> <p>4.4: formation and working procedures</p> <p>4T1: Tutorial</p> <p>4.5: Informed consent process and procedures, GCP obligations of Investigators</p> <p>4.6: sponsors & Monitor</p> <p>4T2: Tutorial</p> <p>4.7: Managing and Monitoring clinical trials</p> <p>4.8: Pharmacovigilance - safety monitoring in clinical trials</p> <p>4T3: Tutorial</p>	<p>4.1: Study about the different committee working in the Pharmaceutical field.</p>

Unit V

CO-BP104-5: Understand about the technical terms, guidelines, law and acts and code of federal regulatory

Item	Approx Hrs
Lecture & Tutorial	7+3=10
Practical(P)	0
SW	1
SL	1
Total:	12

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
Theory SO5.1: Understand Basic terminology SO5.2: Federal Register, Code of Federal Regulatory		5.1: Basic terminology 5.2: , guidance, guidelines 5.3: regulations: Half life, 5T1: Tutorial 5.4: Laws and Acts 5.5: Orange book 5T2: Tutorial 5.6: Federal Register, Code of Federal Regulatory 5.7: Purple book 5T.3: Tutorial	5.1: Write the difference between orange book and purple book with importance.

Suggested Assignments: Orange book, Federal Register, Code of Federal Regulatory, Purple book

Brief of Hours suggested for the Course Outcome

Course Out comes	Class Lecture (C)	(LI)	Sessional Work (SW)	Self Learning (SI)	Total Hour (C+S+SI+LI)
CO-BP804ET-1: To understand about the drug discovery and development of Generic drug.	13	10	1	1	15

(Revised as on 01August2023))

Semester-VIII

Course BP805T

Code:

Course **Pharmacovigilance**

Title:

Pre-requisite:

The student to learn about development of pharmacovigilance as a science, basic terminologies used in pharmacovigilance, global scenario of Pharmacovigilance, train students on establishing pharmacovigilance program in an organization, various methods that can be used to generate safety data and signal detection. This paper also develops the skills of classifying drugs, diseases and adverse drug reactions

**Rationale/
Objectives:**

After the successful completion of this course, the student shall be able to:

- Important for drug safety monitoring
- National and international scenario of pharmacovigilance
- Dictionaries, coding and terminologies used in pharmacovigilance
- Methods to generate safety data during pre clinical, clinical and post approval phases of drugs' life cycle

Course Out comes:

CO- BP805T -1: To understand the need & development of Pharmacovigilance System.

CO- BP805T -2: To know the various basic terminology, establishment & regulatory drugs dictionary used in Pharmacovigilance

CO- BP805T -3: To know the various active surveillance methods for vaccine safety & drug safety in Pharmcovigilance study.

CO- BP805T -4: To know the ICH Guidelines for Pharmacovigilance

CO- BP805T -5: To understand the role of CIOMS, CDSCO & Pharmacogenomics of adverse drug reactions.

Scheme of Studies

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Quality control and standardization of herbals) Program
(Revised as on 01August2023)
Semester-VIII

Course Code: BP806ET

Course Title: Quality control and standardization of herbals

Pre-requisite: The Student should have basic knowledge of Quality control and standardization of herbals includes various methods and guidelines for evaluation and standardization of herbs and herbal drugs.

Rationale/Objective s: Upon completion of the subject student shall be able to;

1. know WHO guidelines for quality control of herbal drugs
2. know Quality assurance in herbal drug industry
3. know the regulatory approval process and their registration in Indian and international markets
4. appreciate EU and ICH guidelines for quality control of herbal drugs

Course Out comes:

CO-BP806.1ET: To understand the WHO guidelines for quality control of herbal drugs.

CO-BP806.2ET: To understand about the Quality assurance in herbal drug industry

CO-BP806.3ET: To appreciate EU and ICH guidelines for quality control of herbal drugs

CO-BP806.4ET: To understand about the regulatory approval process and their registration in Indian and international markets

CO-BP806.5ET: To understand about Regulatory requirements for herbal medicines.

Scheme of Studies

Course code	Title of the course	Program Name	Total Number of contact hours/Week					Total Hours (H)	Credit
			Classroom Instruction (A)		Practical (P)	SW	SL		
			Lecture	Tutorial					
BP806ET	Quality control and standardization of herbals	B. Pharmacy	3	1	0	1	1	6	4

Legend: **CI:** Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and **LI:** Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

SW: Sessional Work (includes assignment, seminar, mini project etc.),

SL: Self Learning, Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Theory Assessment

Board of Study	Course Code	Course Title	Scheme of Assessment (Marks)						Total Marks(A+B+C)	
			Progressive Assessment (PRA)					Sessional Exam (B)		End Semester Assessment(C)
			Academic activity, Any three (Quiz/ Assignment, open book test, filed work and seminar)	Student teacher interaction	Class Attendance	Total Marks				
Pharmacy	BP-806ET	Quality control and standardization of herbals	3	3	4	10	15	75	100	

Guidelines for the allotment of marks for attendance

Percentage of Attendance	Theory	Practical
95 – 100	4	2
90 – 94	3	1.5
85 – 89	2	1
80 – 84	1	0.5
Less than 80	0	0

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

CO-BP806.1: To understand the WHO guidelines for quality control of herbal drugs.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	2
Total:	16

Session Outcomes(SOs)	Laboratory Instruction(LI)	Class room Instruction(CI)	Self Learning (SL)
Theory SO1.1: Basic tests for drugs SO1.2: WHO guidelines for quality control of herbal drugs SO1.3: Evaluation of commercial crude drugs	NA	1.1 Introduction of pharmaceutical drugs 1.2 Basic tests for drugs 1.3 Pharmaceutical substances 1T.1: Tutorial class 1.4 Discuss the Medicinal plants materials 1.5 Defined and types of Dosage forms 1.6 General introduction of WHO guidelines 1T.2: Tutorial class 1.7 Basic concept of herbal drugs 1.8 WHO guidelines for quality control of herbal drugs. 1.9 quality control test of herbal drugs 1.10 Evaluation of commercial crude drugs intended for use 1T.3: Tutorial class	1.1 WHO guidelines for quality control of herbal drugs 1.2 Basic concept of herbal drugs

Suggested Assignments:

1. Basic knowledge of herbal drugs and given various dosage form.
2. WHO guidelines for quality control of herbal drugs

Unit II

CO-BP806.2: To understand about the Quality assurance in herbal drug industry.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	2
Total	16

Session Outcomes(SOs)	Laboratory Instruction(LI)	Class room Instruction(CI)	Self Learning (SL)
<p>Theory SO2.1: Quality assurance in herbal drug industry of cGMP, GAP, GMP and GLP in traditional system of medicine. SO2.2: WHO Guidelines on current good manufacturing Practices (cGMP) for Herbal Medicines SO2.3: WHO Guidelines on GACP for Medicinal Plants.</p>	NA	<p>2.1 Introduction of Quality assurance 2.2 Discuss about the Q.A. in herbal drug industry 2.3 Quality assurance in herbal drug industry of cGMP and GAP in traditional system of medicine 2T.1: Tutorial class 2.4 Quality assurance in herbal drug industry of GMP in traditional system of medicine 2.5 QA in herbal drug industry of GLP in traditional system of medicine 2.6 Discuss about the WHO guideline for Herbal Medicines 2T.2: Tutorial class 2.7 WHO Guidelines on current good manufacturing Practices (cGMP) for Herbal Medicine 2.8 General introduction of medicinal plants. 2.9 General discussion of GACP(good agricultural and collection practices) 2.10 WHO Guidelines on GACP for Medicinal Plants. 2T.3: Tutorial class</p>	<p>2.1: What about the WHO Guidelines on current good manufacturing Practices (cGMP) for Herbal Medicines. 2.2: What about the WHO Guidelines on GACP for Medicinal Plants</p>

Suggested Assignments:

1. To know about WHO Guidelines on GACP (good agricultural and collection practices) for Medicinal Plants.
2. Write about the Quality assurance in herbal drug industry of cGMP and GAP in traditional system of medicine

Unit III

CO- BP806.3 To appreciate EU and ICH guidelines for quality control of herbal drugs

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total:	15

Session Outcomes(SOs)	Laboratory Instruction(LI)	Class room Instruction(CI)	Self Learning (SL)
<p>Theory SO3.1 EU and ICH guidelines for quality control of herbal drugs.</p> <p>SO3.2 Research Guidelines for Evaluating the Safety and Efficacy of Herbal Medicines</p>	NA	<p>3.1 general introduction of EU (European union). 3.2 Explain about ICH guidelines 3.3 EU (European union) for quality control of herbal drugs 3T.1: Tutorial class 3.4 ICH guidelines for quality control of herbal drugs 3.5 Research Guidelines of Herbal Medicines 3.6 Evaluating of Herbal Medicines 3T.2: Tutorial class 3.7 Safety of Herbal Medicines 3.8 Efficacy of Herbal Medicines 3.9 General introduction of herbal medicines 3.10 explain about herbal product 3T.3: Tutorial class</p>	<p>3.1 Research Guidelines for Evaluating of the Herbal Medicines</p>

Suggested Assignments:

1. EU and ICH guidelines for quality control of herbal drugs.
2. Evaluating the Safety and Efficacy of Herbal Medicines.

Unit IV:

CO- **BP806.4:** To understand about the regulatory approval process and their registration in Indian and international markets.

Item	Approx Hrs
Lecture & Tutorial	8+3=11
Practical(P)	0
SW	1
SL	2
Total:	14

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction(CI)	Self Learning(SL)
<p>Theory SO4.1: Stability testing of herbal medicines SO4.2: chromatographic techniques in standardization of herbal products. SO4.3: GMP requirements and Drugs & Cosmetics Act provisions</p>	NA	<p>4.1 Brief in Stability testing of herbal medicines. 4.2 General introduction of chromatographic techniques 4.3 Application of various chromatographic techniques in herbal products. 4T.1: Tutorial class 4.4 Preparation of documents for new drug application 4.5 Preparation of documents for export registration 4T.2: Tutorial class 4.6 GMP requirements of herbal medicines 4.7 Drugs & Cosmetics Act provisions of herbal medicines 4.8 Application and standardization of herbal products. 4T.3: Tutorial class</p>	<p>4.1 Stability testing of herbal medicines 4.2 Application of various chromatographic techniques in herbal products.</p>

Suggested Assignments:

1. What are Drugs & Cosmetics Act provisions of herbal medicines?
2. Describe chromatographic techniques.

Unit V: CO- BP806.5: To understand about Regulatory requirements for herbal medicines

Item	Approx Hrs
Lecture & Tutorial	7+3=10
Practical(P)	0
SW	1
SL	2
Total:	13

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
<p>Theory</p> <p>SO5.1: WHO guidelines on safety monitoring of herbal medicines</p> <p>SO5.2: Regulatory requirements for herbal medicines</p> <p>SO5.3: Role of chemical and biological markers in standardization of herbal products</p>	NA	<p>5.1 Regulatory requirements for herbal medicines</p> <p>5.2 WHO guidelines on safety monitoring of herbal medicines</p> <p>5T.1: Tutorial class</p> <p>5.3 herbal medicines in pharmacovigilance systems</p> <p>5.4 Comparison of various Herbal Pharmacopoeias.</p> <p>5T.2: Tutorial class</p> <p>5.5 Role of chemical markers in herbal products</p> <p>5.6 Role of biological markers in herbal products</p> <p>5.7 standardization of herbal products</p> <p>5T.3: Tutorial class</p>	<p>5.1 what about Regulatory requirements for herbal medicines</p> <p>5.2 Role of biological markers in herbal products</p>

Suggested Sessional work

Assignments:

1. Role of chemical and biological markers in standardization of herbal products.

Course Out comes	Class Lecture(CI)	(LI)	Sessional Work (SW)	Self Learning (SI)	Total Hour (CI+SW+SI+LI)
CO-BP806.1ET- To understand the WHO guidelines for quality control of herbal drugs.	13	0	1	2	16
CO-BP806.2ET- To understand about the Quality assurance in herbal drug industry	13	0	1	2	16

Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Computer Aided Drug Design) Program
(Revised as on 01 August 2023)

Semester-8

Course Code: BP 807 ET

Course Title: Computer Aided Drug Design

Pre-requisite: This subject is designed to provide detailed knowledge of rational drug design process and various techniques used in rational drug design process.

Rationale/Objectives:

Upon completion of the course, the student shall be able to understand

1. Design and discovery of lead molecules
2. The role of drug design in drug discovery process
3. The concept of QSAR and docking
4. Various strategies to develop new drug like molecules.
5. The design of new drug molecules using molecular modeling software

Course Outcome:

CO-BP807 ET. 1: To understand the Introduction to Drug Discovery and Development.

CO-BP807 ET.2: To understand the Study of Quantitative Structure Activity Relationship.

CO-BP807 ET.3: To understand the Molecular Modeling and virtual screening techniques.

CO-BP807 ET.4: To understand the Informatics & Methods in drug design.

CO-BP807 ET.5: To understand the Molecular Modeling.

Scheme of Studies

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Cell and Molecular Biology) Program
(Revised as on 01 August 2023)
Semester-VIII

Course Code: BP808ET

Course Title: Cell and Molecular Biology

Pre-requisite: Cell biology is a branch of biology that studies cells – their physiological properties, their structure, the organelles they contain, interactions with their Environment, their life cycle, division, death and cell function.

Rationale/ Objectives: : After the successful completion of this course, the student shall be able to:

- Summarize cell and molecular biology history.
- Summarize cellular functioning and composition.
- Describe the chemical foundations of cell biology.
- Summarize the DNA properties of cell biology.
- Describe protein structure and function.
- Describe cellular membrane structure and function.
- Describe basic molecular genetic mechanisms.
- Summarize the Cell Cycle

Course Out comes:

CO- BP808T -1: To Know & understand the Cell & Cell organelles with their importance.

CO- BP885T -2: To Know & understand the Nucleic acid with their contents. Importance of DNA & RNA

CO- BP808T -3: To know the various types of Proteins, Protein Pathways & significance of Protein Synthesis.

CO- BP808T -4: To know about cell cycle, gene, Mitosis and Meiosis & Cellular activities

CO- BP808T -5: To understand the role of Cell Signals: Receptors for Cell Signals.

Scheme of Studies

:Course code	Title of the course	Program Name	TOTAL Number of contact hours/Week						Credit
			Classroom Instruction (A)		Practical (P)	S W	SL	Total Hours (H)	
			Lecture	Tutorial					
BP808ET	Cell and molecular Biology	B. Pharmacy	3	1	4	1	1	10	6

Legend: CI: Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),

LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

SW: Sessional Work (includes assignment, seminar, mini project etc.),

SL: Self Learning, Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Theory Assessment

Board of Study	Course Code	Course Title	Scheme of Assessment (Marks)

			Academic activity, Any three (Quiz/ Assignment, open book test, filed work and seminar)	Student teacher interaction	Class Attendance (AT)	(A) Total Marks	Sessional Exam (B)	EndSemester Assessment(C)	Total Marks(A+B+C)
Pharmacy	BP808ET	Cell and Molecular Biology	3	3	4	10	15	75	100

Guidelines for the allotment of marks for attendance

Percentage of Attendance	Theory	Practical
95 – 100	4	2
90 – 94	3	1.5
85 – 89	2	1
80 – 84	1	0.5
Less than 80	0	0

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

Unit I

CO- BP808T -1: To Know & understand the Cell & Cell organelles with their importance.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical (P)	0
SW	1
SL	1
Total:	15

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
Theory SO1.1: Cell and Molecular Biology SO1.2: Cell and Molecular Biology: History and Summation. SO 1.3: Properties of cells & Cell membrane SO 1.4: Cellular Reproduction		1.1: History and development of Cells 1.2 Types of Cells& theory and basics and Applications. 1.3 Properties of cells. 1.4: Compositions of cell wall and cell membrane 1T1: Tutorial Class 1.5 Prokaryotic versus Eukaryotic 1.6: Cellular Reproduction 1.7 Chemical Foundations – an Introduction and Reactions 1.8: Chemical Foundations – an Introduction and Reactions 1T2: Tutorial Class 1.9: Types of Cell division. 1.10 1T3: Tutorial Class	1.1: Application of Different kind of cell

Suggested Assignments: Cell, cell division & importance of cell

Unit II

CO- BP808T -2: To Know & understand the Nucleic acid with their contents. Importance of DNA & RNA

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total:	15

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
Theory SO2.1: DNA and the Flow of Molecular Information SO2.2: DNA & RNA Functioning SO2.3: Transcription and Translation		2.1: Nucleic acid & Their Compositions. 2.2: Molecular Structure of DNA 2.3 Models of DNA Understanding 2.4: Different function of DNA 2T.1: Tutorial Class 2.5: Molecular Structure of RNA 2.6: Flow of Molecular information of RNA 2.7 Theories of RNA 2.8: Transcription 2T.2: Tutorial class 2.9 Translation 2.10: Types of RNA 2T.3: Tutorial class	2.1: Detection & Isolation tech. of DNA & RNA.

Suggested Assignments: DNA and the Flow of Molecular Information, DNA Functioning, DNA and RNA, Types of RNA, Transcription and Translation.

CO- BP808T -3: To know the various types of Proteins, Protein Pathways & significance of Protein Synthesis.

Item	Approx Hrs
Lecture & Tutorial	10+3
Practical(P)	0
SW	1
SL	1
Total:	15

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
Theory SO 3.1: Proteins SO3.2: Regularities in Protein Pathways SO3.3: Cellular Processes SO3.4: Positive Control and significance of Protein Synthesis		3.1: Historical Development of Protein 3.2: Definition & Basics of Proteins 3.3 Types of Amino acid 3.4: Structure & Functions of Protein 3T.1: Tutorial Class 3.5: Process of protein synthesis 3.6: Regularities in Protein Pathways 3.7 Cellular process 3.8: Importance of amino acid 3T.2: Tutorial class 3.9: Protein synthesis pathway 3.10: Positive Control and significance of Protein Synthesis 3T.3: Tutorial class	3.1 Detection techniques of amino acids & proteins

Suggested Assignments: Proteins: Defined and Amino Acids, Protein Structure Regularities in Protein Pathways, Cellular Processes, Positive Control and significance of Protein Synthesis.

Unit IV

CO- BP808T -4: To know about cell cycle, gene, Mitosis and Meiosis & Cellular activities

Item	Approx Hrs
Lecture & Tutorial	8+3=11
Practical(P)	0
SW	1
SL	1
Total:	13

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
Theory SO4. 1: Basics of genes. SO4.2 Transgenics and SO4.3 Genomic Analysis Mitosis and Meiosis		4.1 Science of Genetics 4. 2. Transgenics and Genomic Analysis 4.3 Importance of Genomic 4.4 Cell Cycle& cell division 4T1: Tutorial Class 4.5 Mitosis 4.6: Meiosis 4.7s Cellular activities 4.8 Cell development process. 4T.2: Tutorial class	4.1: Role of Genetics in pharmaceutical industry.

Suggested Assignments: Science of Genetics, Transgenic and Genomic Analysis, Cell Cycle analysis, Mitosis and Meiosis

Unit V

CO- BP808T -5: To understand the role of Cell Signals: Receptors for Cell Signals.

Item	Approx Hrs
Lecture & Tutorial	7+3=10
Practical(P)	0
SW	1
SL	1
Total:	12

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
Theory SO5.1: Cell Signals: SO5.2: Receptors for Cell Signals SO5.3: Signaling Pathways: Overview SO5.4: Misregulation of Signaling Pathways		5.1 Introduction Cell Signals: 5.2 Understand the concept of cell signals 5.3: Receptors with their types. 5.4 Receptors for Cell Signals 5T1: Tutorial class 5.5: Misregulation of Signaling Pathways 5.6 Signaling Pathways: Overview 5.7 Misregulation of Signaling Pathways 5.8 Protein-Kinases: Functioning 5T.2: Tutorial class	5.1: Cell signals importance.

Suggested Assignments: Cell Signals: Introduction, Receptors for Cell Signals, Signaling Pathways: Overview, Misregulation of Signaling Pathways, Protein-Kinases: Functioning

Brief of Hours suggested for the Course Outcome

Course Out comes	Class Lecture (Cl)	(L)	Sessional Work (SW)	Self Learning (Sl)	Total Hour (Cl+SW+Sl+LI)
Course Out comes: CO- BP808T -1: To Know & understand the Cell & Cell organelles with their importance.	13	16	1	1	31
CO- BP808T -2: To Know & understand the Nucleic acid with their contents. Importance of DNA & RNA	13	8	1	1	23
CO- BP808T -3: To know the various types of Proteins, Protein Pathways,& significance of Protein Synthesis.	13	12	1	1	27
CO- BP808T -4: To know about cell cycle, gene, Mitosis and Meiosis & Cellular activities	10	8	1	1	20
CO- BP808T -5: To understand the role of Cell Signals: Receptors for Cell Signals.	10	0	1	1	12
Total Hours	59	44	5	5	113

Suggestion for End Semester Assessment

Suggested Specification Table (For ESA)

Course Outcome	Unit Titles	Marks Distribution			Total Marks
		R	U	A	
CO- BP808T -1:	To Know & understand the Cell & Cell organelles with their importance.	08	06	01	15
CO- BP808T -2:	To Know & understand the Nucleic acid with their contents. Importance of DNA & RNA	12	07	01	20
CO- BP808T -3	To know the various types of Proteins, Protein Pathways,& significance of Protein Synthesis.	02	06	02	10
CO- BP808T -4:	To know about cell cycle, gene, Mitosis and Meiosis & Cellular activities	10	02	03	15
CO- BP808T -5:	To understand the role of Cell Signals: Receptors for Cell Signals.	05	07	03	15
Total		37	28	10	75

Legend: R: Remember, U: Understand, A:Apply

The end of semester assessment for Cell and Molecular Biology will be held with written examination of 75 marks

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks.

Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Demonstration

Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Cosmetic science) Program
(Revised as on 01August2023)
Semester-VIII

Course Code: BP809ET

Course Title: Cosmetic science

Pre-requisite: Students should have a basic knowledge Basic knowledge of anatomy and physiology is needed to understand the structure and function of the skin, hair, lips, teeth, and so on, to where products are Usually applied.

Rationale/Objective s: Upon completion of the course the student shall be able to

1. Classification of cosmetic and cosmeceutical products.
2. Cosmetic Excipients: Surfactants.
3. Rheology modifiers, humectants.
4. Emollients, preservatives. Classification and application.

Course Out comes:

CO- BP809ET -1: To understand the details of cosmetic excipients and basic structure and function of skin, basic structure of hair with described the Oral Cavity.

CO- BP809ET -2: To understand the Principles of formulation and building blocks of skin care product Anti-perspants & deodorants and Principles of formulation and building blocks of Hair care products.

CO- BP809ET -3: To acquired the knowledge of Role of herbs in cosmetics and Analytical cosmetics.

CO- BP809ET -4: To understand the Principles of Cosmetic Evaluation.

CO- BP809ET -5: Basic understanding of the terms cosmedogenic, dermatitis Cosmetic with explain Problems associated with Hair and scalp, Cosmetic problems associated with skin and Anti per spirant and Deodorants.

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
SO4.1 To understand the Principles of Cosmetic Evaluation.	NA	4.1 Principles of sebumeter. 4.2 Principles of, corneometer. 4.3 Measurement of TEWL. 4.4 Measurement of Skin Color, 4T.1: Tutorial class 4.5 Measurement of Hair tensile strength, 4.6 Measurement of Hair combing properties Soaps, 4T.2: Tutorial class 4.7 Measurement of syndet bars. 4.8 Evolution and skin benefits. 4T.3: Tutorial class	4.1 Study of the Principles of Cosmetic Evaluation.

Suggested Assignments:

1. Write the detail about Principles of sebumeter.
2. Explain the Hair combing properties Soaps, and syndet bars.
3. Explain the Evolution and skin benefits.

Unit – V:-

CO- BP809ET -5: Basic understanding of the terms Comedogenic, dermatitis with explain Cosmetic problems associated with Hair and scalp, Cosmetic problems associated with skin and Antiperspirants and Deodorants.

Item	Approx Hrs
Lecture & Tutorial	7+3=10
Practical (P)	0
SW	1
SL	2
Total:	13

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
<p>SO5.1 To understand the Cosmetic problems associated with Hair and scalp.</p> <p>SO5.2. To understand the Cosmetic problems associated with skin.</p> <p>SO5.3 To understand the Actives and mechanism of action Antiperspirants and Deodorants.</p>	NA	<p>5.1 Oily and dry skin causes leading to dry skin, skin miniaturization.</p> <p>5.2 Basic understanding of the terms come androgenic, dermatitis.</p> <p>5T.1 Tutorial Class</p> <p>5.3 Cosmetic problems associated with Hair and scalp: Dandruff, Hair fall causes.</p> <p>5.4 Cosmetic problems associated with skin: blemishes, wrinkles.</p> <p>5T.2 Tutorial Class</p> <p>5.5 Cosmetic problems associated with skin: prickly heat and body odor.</p> <p>5.6 Actives and mechanism of action Antiperspirants.</p> <p>5.7. Actives and mechanism of action Deodorants.</p> <p>5T.3 Tutorial Class</p>	<p>1 Study of the Cosmetic problems associated with Hair and scalp, skin.</p> <p>2 Actives and mechanism of action Antiperspirants and Deodorants.</p>

Suggested Sessional work Assignments:

1. Explain the Actives and mechanism of action Antiperspirants and Deodorants.
2. Short note about Oily and dry skin.
3. Write the Basic understanding of the terms Comedogenic, dermatitis.
4. Write the details about Cosmetic problems associated with Hair and scalp: Dandruff, Hair fall cause

Brief of Hours suggested for the Course Outcome

Course Out comes	Class Lecture (Cl)	(L)	Sessional Work (SW)	Self Learning (Sl)	Total Hour (Cl+S W+ Sl+Ll)
CO- BP809ET -1: To understand the details of Cosmetic Excipients and Basic structure and function of skin, Basic structure of hair with described The Oral Cavity.	13	0	1	2	16
CO- BP809ET -2: To understand the Principle of formulation and building blocks of skin care products, Antiperspirants & deodorants and Principles of formulation and building Blocks of Hair care products.	13	0	1	2	16
CO- BP809ET -3: To acquired the knowledge of Role of herbs in cosmetics and Analytical cosmetics.	13	0	1	1	15
CO- BP809ET -4: To understand the Principles of Cosmetic Evaluation.	11	0	1	1	13
CO- BP809ET -5: Basic understanding of the terms comedogenic, dermatitis with explain cosmetic problems associated with Hair and scalp, cosmetic problems associated with skin and antiperspirants and deodorants.	10	0	1	2	13
Total Hours	60	0	05	08	73

Suggestion for End Semester Assessment
Suggested Specification Table (For ESA)

Course Outcome	Unit Titles	Marks Distribution			Total Marks
		A	C	E	
CO- BP809E T -1:	To understand the details of Cosmetic Excipients and Basic structure and Function of skin, Basic structure of hair with described the Oral Cavity.	08	06	01	15
CO- BP809E T -2:	To understand the Principle of formulation and building blocks of skin care products, Antiperspirants & deodorants and Principles of formulation and building blocks of Hair care Products.	10	07	01	18
CO- BP809 ET -3:	To acquired the knowledge of Role of herbs in cosmetics and Analytical cosmetics.	02	06	02	10
CO- BP809 ET -4:	To understand the Principles of Cosmetic Evaluation.	10	03	02	15
CO- BP809 ET -5:	Basic understanding of the terms Comedogenic, dermatitis with explain Cosmetic problems associated with Hair and scalp, Cosmetic problems associated with skin and Antiperspirants and Deodorants	05	07	03	15
Total		35	29	9	73

Legend: A: Analyse, C: Create, E: Evaluate

The end of semester assessment for cosmetic science will be held with written examination of 75 marks.

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks.

Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Demonstration
7. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Face book, Twitter, Whats app, Mobile, Online sources)
8. Brainstorming

Suggested Learning Resources:

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Experimental Pharmacology) Program
(Revised as on 01August2023)

Semester-VIII

Course Code: BP810 ET
Course Title : Experimental Pharmacology
Pre- requisite: Students should have basic knowledge of practical pharmacology.

Rationale: Upon completion of the course the student shall be able to, Appreciate the applications of various commonly used laboratory animals. Appreciate and demonstrate the various screening methods used in preclinical research, Appreciate and demonstrate the importance of biostatistics and research methodology. Design and execute a research hypothesis independently

Course Outcomes:

- CO- BP810 ET.1:** Appreciate the applications of various commonly used laboratory animals.
- CO-BP810 ET.2:** Appreciate and demonstrate the various screening methods used in preclinical research, animal dose calculation.
- CO-BP810 ET.3:** Appreciate and demonstrate the various screening methods used in preclinical research.
- CO-BP810 ET.4:** Appreciate and demonstrate the various screening methods used in preclinical research.
- CO-BP810 ET.5:** Appreciate and demonstrate the importance of biostatistics and research methodology

Scheme of Studies:

Board of Study	Course Code	Course Title	Scheme of studies(Hours/Week)						Total Credits (C)
			CI		LI	SW	SL	Total Study Hours (CI+LI+SW+SL)	
			L	T					
Pharmacy	BP810 ET	Experimental Pharmacology	3	0	1	1	1	6	4

Legend:

CI: Classroom Instruction (Includes different instructional strategies i.e. Lecture (L) and Tutorial (T) and others),

LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

SW: Sessional Work (includes assignment, seminar, mini project etc.),

SL: Self Learning,

C:Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Scheme of Assessment:

Theory

Course code	Title of the course	Program Name	TOTAL Number of contact hours/Week						Credit
			Classroom Instruction (A)		Practical (P)	SW	SL	Total Hours (H)	
			Lecture	Tutorial					
BP701T	Experimental Pharmacology	B. Pharmacy	3	1	0	1	1	6	4

			Internal Assessment (A)			End Semester Examination(B)			Total Marks (A+B)
			Attendance	Record	Sessional exam	Synopsis	Experiment	Viva	
Pharmacy	BP810 ET	Experimental Pharmacology	2	3	10	5	25	5	50

Guidelines for the allotment of marks for attendance

Percentage of Attendance	Theory	Practical
95 – 100	4	2
90–94	3	1.5
85–89	2	1
80–84	1	0.5
Less than 80	0	0

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

CO-BP810 ET.1: Appreciate the applications of various commonly used laboratory animals.

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Advanced Instrumentation Techniques) Program
(Revised as on 01August2023)

Semester-VIII

Course Code:	BP811ET
Course Title:	Advanced Instrumentation Techniques
Pre-requisite:	Student should have basic knowledge of General Marketing, Pharma Marketing, Marketing management, Consumer behaviour.
Rationale/Objective s:	Up on completion of the course student shall be able to <ul style="list-style-type: none">• To understand the advanced instruments used and its applications in drug analysis.• To understand the chromatographic separation and analysis of drugs.• To understand the calibration of various analytical instruments.• To know analysis of drugs using various analytical instruments.

Course Out comes:

CO-BP811-1: To understand the Nuclear Magnetic Resonance spectroscopy & Mass Spectrometry.

CO-BP811-2: To acquired the knowledge of Thermal Methods of Analysis & X-Ray Diffraction Methods.

CO-BP811-3: To understanding the Calibration and validation.

CO-BP811-4: To familiarize with basic concept of Radio immune assay & Extraction techniques.

CO-BP811-5: To comprehend the basic concepts of Hyphenated techniques.

LI: Laboratory Instruction (Includes Practical performances in laboratory workshop, field or other locations using different instructional strategies)

SW: Sessional Work (includes assignment, seminar, mini project etc.),

SL: Self Learning, Credits.

Note: SW & SL has to be planned and performed under the continuous guidance and feedback of teacher to ensure outcome of Learning.

Theory Assessment

Scheme of Assessment (Marks)				
--------------------------------	--	--	--	--

			Progressive Assessment (PRA)					Total Marks(A+B+C)	
			Academic activity, Any three (Quiz/ Assignment, open book test, filed work and seminar)	Student teacher interaction	Class Attendance (AT)	(A) Total Marks	Sessional Exam (B)		Assessment (C)
Pharmacy	BP805T	Advanced Instrumentation Techniques	3	3	4	10	15	75	100

Guidelines for the allotment of marks for attendance

Percentage of Attendance	Theory	Practical
95 – 100	4	2
90–94	3	1.5
85–89	2	1
80–84	1	0.5
Less than 80	0	0

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

Unit I

CO-BP811-1: To understand the Nuclear Magnetic Resonance spectroscopy & Mass Spectrometry.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total:	15

<p>Theory SO1.1: Nuclear Magnetic Resonance spectroscopy SO1.2: Mass Spectrometry</p>	<p>NA</p>	<p>1.1 Introduction to NMR 1.2 Principles of H-NMR and C-NMR, chemical shift 1.3 factors affecting chemical shift 1T.1 Tutorial Class 1.4 coupling constant, Spin - spin coupling, relaxation 1.5 instrumentation and Applications of NMR. 1.6 Introduction to Mass Spectrometry 1T.2 Tutorial Class 1.7 Principles, Fragmentation of Mass Spectrometry 1.8 Ionization techniques – Electron impact, chemical ionization 1.9 MALDI, FAB, Analyzers-Time of flight and Quadrupole 1.10 instrumentation and applications of Mass Spectrometry 1T.3 Tutorial Class</p>	<p>1.1: Application of NMR 1.2: Application of Mass Spectrometry</p>
--	------------------	--	--

Suggested Assignments:

1. Chemical shift
2. Spin - spin coupling
3. Ionization techniques
4. MALDI
5. FAB

Unit II

CO-BP811-2: To acquired the knowledge of Thermal Methods of Analysis & X-Ray Diffraction Methods.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total:	15

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
Theory SO2.1: Thermal Methods of Analysis SO2.2: X-Ray Diffraction Methods	NA	2.1 Principles of Thermogravimetric Analysis (TGA) 2.2 instrumentation of Thermogravimetric Analysis (TGA) 2.3 Applications of Thermogravimetric Analysis (TGA) 2T.1 Tutorial Class 2.4 Differential Thermal Analysis (DTA) 2.5 Differential Scanning Calorimetry (DSC) 2.6 Origin of X-rays & basic aspects of crystals 2T.2 Tutorial Class 2.7 X-ray Crystallography 2.8 Rotating crystal technique 2.9 Single crystal diffraction & powder Diffraction 2.10 structural elucidation and applications of X-Ray Diffraction Methods 2T.3 Tutorial Class 603	2.1: Applications of Radio immuno assay 2.2: Origin of X-rays

Suggested Assignments: 1. Basic aspects of crystals 2. X-ray Crystallography, 3. Powder diffraction
3. Differential Thermal Analysis (DTA) 5. Differential Scanning Calorimetry (DSC)

Unit III

CO-BP811-3: To understanding the Calibration and validation.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total:	15

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
Theory SO3.1: Calibration and validation SO3.2: Calibration of various Instruments	NA	3.1 Calibration as per ICH guidelines 3.2 Validation-as per ICH guidelines 3.3 Calibration as per USFDA guidelines 3.4 Validation as per USFDA guidelines 3T.1 Tutorial Class 3.5 Calibration of Electronic balance 3.6 Calibration of UV-Visible spectrophotometer 3.7 Calibration of IR spectrophotometer 3T.2 Tutorial Class 3.8 Calibration of Fluorimeter 3.9 Calibration of Flame Photometer 3.10 Calibration of HPLC and GC 3T.3 Tutorial Class	3.1: Calibration and validation-as per ICH guidelines 3.2: Calibration and validation-as per USFDA guidelines

Suggested Assignments: 1. ICH guidelines 2. USFDA guidelines 3. Electronic balance 4. Fluorimeter 5. Flame Photometer

Unit IV

CO-BP811-4: To familiarize with basic concept of Radio immune assay & Extraction techniques.

Item	Approx Hrs
Lecture & Tutorial	08+3=11
Practical(P)	0
SW	1
SL	1
Total:	13

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
<p>Theory SO4.1: Radio immune assay SO4.2: Extraction techniques</p>	NA	<p>4.1 Importance & various components of Radio immuno assay 4.2 Principle of Radio immuno assay 4.3 Different methods of Radio immuno assay 4T.1 Tutorial Class 4.4 Limitation of Radio immuno assay 4.5 Applications of Radio immuno assay 4.6 General principle of Extraction techniques 4T.2 Tutorial Class 4.7 Procedure involved in the solid phase extraction 4.8 liquid-liquid extraction 4T.3 Tutorial Class</p>	<p>4.1: Applications of Radio immuno assay 4.2: liquid-liquid extraction</p>

- Suggested Assignments:**
1. General principle of Extraction techniques
 2. Applications of Radio immuno assay
 3. Limitation of Radio immuno assay
 4. Principle of Radio immuno assay
 5. Different methods of Radio immuno assay

Unit V

CO-BP811-5: To Compare and the basic concepts of Hyphenated techniques.

Item	Approx Hrs
Lecture & Tutorial	07+03=10
Practical(P)	0
SW	1
SL	1
Total:	12

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
<p>Theory</p> <p>SO5.1: Hyphenated techniques</p> <p>SO5.2: LC-MS</p> <p>SO5.3: GC-MS</p> <p>SO5.4: HPTLC-MS</p>		<p>5.1 LC-MS</p> <p>5.2 MS</p> <p>5T.1 Tutorial Class</p> <p>5.3 GC-MS</p> <p>5.4 GC</p> <p>5.5 HPTLC-MS</p> <p>5T.2 Tutorial Class</p> <p>5.6 HPTLC</p> <p>5.7 Hyphenated techniques</p> <p>5T.3 Tutorial Class</p>	<p>5.1: HPTLC</p> <p>5. 2: Liquid Chromatography</p>

Suggested Assignments: 1. HPTLC 2. LC 3. MS 4. GC 5. Hyphenated techniques

Brief of Hours suggested for the Course Outcome

Course Out comes	Class Lecture (Cl)	(LI)	Sessional I Work (SW)	Self Learning (SI)	Total Hour (Cl+SW+ SI+LI)
CO-BP811-1: To understand the Nuclear Magnetic Resonance spectroscopy & Mass Spectrometry.	13	0	1	1	15
CO-BP811-2: To acquired the knowledge of Thermal Methods of Analysis & X-Ray Diffraction Methods.	13	0	1	1	15
CO-BP811-3: To understanding the Calibration and validation.	13	0	1	1	15
CO-BP811-4: To familiarize with basic concept of Radio immune assay & Extraction Techniques.	11	0	1	1	13
CO-BP811-5: To comprehend the Basic concepts of Hyphenated techniques.	10	0	1	1	12
Total Hours	60	0	5	5	70

Suggestion for End Semester Assessment

Suggested Specification Table (For ESA)

CO	Unit Titles	Marks Distribution			Total Marks
		R	U	A	
CO-1	To understand the Nuclear Magnetic Resonance spectroscopy & Mass Spectrometry.	08	06	01	15
CO-2	To acquired the knowledge of Thermal Methods of Analysis & X-Ray Diffraction Methods	8	7	1	16
CO-3	To understanding the Calibration and validation.	08	07	01	16
CO-4	To familiarize with basic concept of Radio immune assay & Extraction techniques.	07	06	01	14
CO-5	To comprehend the basic concepts of Hyphenated techniques.	08	07	01	16
Total		39	33	05	77

Legend: R: Remember, U: Understand, A: Apply

The end of semester assessment for Advanced Instrumentation Techniques will be held with written examination of 75 marks

Note. Detailed Assessment rubric need to be prepared by the course wise teachers for above tasks.

Teachers can also design different tasks as per requirement, for end semester assessment.

Suggested Instructional/Implementation Strategies:

1. Improved Lecture
2. Tutorial
3. Case Method
4. Group Discussion
5. Role Play
6. Demonstration
7. ICT Based Teaching Learning (Video Demonstration/Tutorials CBT, Blog, Face book, Twitter, Whats app, Mobile, Online sources)
8. Brainstorming

Suggested Learning Resources:

S. No.	Title	Author	Publisher	Edition & Year
1	Instrumental Methods of Chemical Analysis	B.K Sharma	--	--
2	Organic spectroscopy	Y.R Sharma	--	--
3	Text book of Pharmaceutical Analysis	Kenneth A. Connors	--	--
4	Vogel's Text book of Quantitative Chemical Analysis	A.I. Vogel	--	--
5	Practical Pharmaceutical Chemistry	A.H. Beckett and J.B. Stenlake	--	--
6	Organic Chemistry	I. L. Finar	--	--
7	Organic spectroscopy	William Kemp	--	--

AKS University
Faculty of Pharmaceutical Science & Technology
Rajiv Gandhi Institute of Pharmacy
Curriculum of B. Pharmacy (Dietary Supplements and nutraceuticals) Program
(Revised as on 01August2023)
Semester-VIII

Course Code: BP812ET

Course Title: Dietary Supplements and nutraceuticals

Pre-requisite: The Student should have basic knowledge of Basic diet, mineral, vitamins and biochemistry.

Rationale/Objective s:

- Up on completion of the course student shall be able to
- Understand the need of supplements by the different group of people to maintain healthy life.
- Understand the outcome of deficiencies in dietary supplements.
- Appreciate the components in dietary supplements and the application.
- Appreciate the regulatory and commercial aspects of dietary supplements including health claims.

Course Out comes:

- CO-BP812ET-1:** To understand the importance of public health nutrition and healthy diet with source.
- CO-BP812ET-2:** To gain the knowledge about phyto-chemicals, their occurrence and characteristics.
- CO-BP812ET-3:** Understand about the free radicals and dietary fibres with significance
- CO-BP812ET-4:** Understand about the involvement of free radicals in diseases and Functional food for chronic diseases prevention
- CO-BP812ET-5:** Understand about the regulatory aspects on food safety.

Scheme of Studies

95 – 100	4	2
90 – 94	3	1.5
85 – 89	2	1
80 – 84	1	0.5
Less than 80	0	0

Course-Curriculum Detailing:

This course syllabus illustrates the expected learning achievements, both at the course and session levels, which students are anticipated to accomplish through various modes of instruction including Classroom Instruction (CI), Laboratory Instruction (LI), Sessional Work (SW), and Self Learning (SL). As the course progresses, students should showcase their mastery of Session Outcomes (SOs), culminating in the overall achievement of Course Outcomes (COs) upon the course's conclusion.

CO-BP812ET-1: To understand the importance of public health nutrition and healthy diet with source.

Item	Approx Hrs
Lecture & Tutorial	7+2=9
Practical(P)	0
SW	1
SL	1
Total:	11

Session Outcomes (SOs)	Laboratory Instruction (LI)	Class room Instruction (CI)	Self Learning (SL)
Theory SO1.1: Understand the Definitions of Functional foods, Nutraceuticals and Dietary supplements SO1.2: Study about Source, Name of marker compounds and their chemical nature		1.1: Definitions of functional foods, Nutraceuticals and Dietary supplements. Classification of Nutraceuticals, 1.2: Health problems and diseases that can be prevented or cured by Nutraceuticals i.e. weight control, diabetes, cancer, 1.3: heart disease, stress, osteoarthritis, hypertension etc. 1T.1: Tutorial 1.4: Public health nutrition, maternal and child nutrition 1.5: nutrition and ageing, nutrition education in community 1.6: Source, Name of marker compounds and their chemical nature 1.7: Medicinal uses and health benefits of following used as nutraceuticals/functional foods: Spirulina, Soyabean, Ginseng, Garlic, Broccoli, Ginkgo, Flaxseeds 1T.2: Tutorial	1.1: To study and prepare a comparative chart of medicinal use of Soyabean, Ginseng, Garlic 1.2: to study about the nutraceuticals working principle for prevention of disease.

Suggested Assignments: Definitions of Functional foods, Nutrition and ageing, nutrition education in community

Unit II

CO-BP812ET-2: To gain the knowledge about photochemical, their occurrence and characteristics.

Item	Approx Hrs
Lecture & Tutorial	15+3=18
Practical (P)	0
SW	1
SL	1
Total:	20

Session Outcomes(SOs)	Laboratory Instruction(LI)	Class room Instruction(CI)	Self Learning (SL)
<p>Theory</p> <p>SO2.1: Understand Phytochemicals as nutraceuticals: Occurrence and characteristic features(chemical nature medicinal benefits) of following a) Carotenoids-α and β-Carotene</p> <p>SO2.2: Allyltrisulfide</p> <p>Polyphenolics: Resveratrol</p> <p>SO2.3: Anthocyanidins, catechins, Flavones.</p> <p>SO2.4: Anthocyanidins, catechins, Flavones</p> <p>SO2.5: coffee, tea and the like</p>		<p>2.1: Phytochemicals as nutraceuticals: Occurrence and characteristic features(chemical nature medicinal benefits) of following a) Carotenoids-α and β- Carotene</p> <p>2.2: Lycopene, Xanthophylls, leutin</p> <p>2.3: Sulfides: Diallylsulfides.</p> <p>2.4: Allyl trisulfide</p> <p>2.5: Polyphenolics: Resveratrol</p> <p>2.1: Tutorial</p> <p>2.6: Flavonoids- Rutin, Naringin, Quercetin</p> <p>2.7: Anthocyanidins, catechins, Flavones:</p> <p>2.8: Prebiotics/ Probiotics.: Fructo oligosaccharides, Lactobacillum</p> <p>2.9 Phyto estrogens : Isoflavones, daidzein</p> <p>2.10: Geebustin, lignin</p> <p>2T.2: Tutorial</p> <p>2.11: Tocopherols Proteins</p> <p>2.12: vitamins, minerals, cereal, vegetables</p> <p>2.13: beverages as functional foods: oats</p> <p>2.14: wheat bran, rice bran, sea foods</p> <p>2.15: coffee, tea and the like</p> <p>2T.3: Tutorial</p>	<p>2.1: Study about the importance of nutraceuticals and developing their preparation.</p>

Suggested Assignments: Carotenoids- α and β -Carotene and Lycopene.

Unit-III**CO-BP812ET-3: Understand about the free radicals and dietary fibres with significance .**

Item	Approx Hrs
Lecture & Tutorial	7+2=9
Practical(P)	0
SW	1
SL	1
Total:	11

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction(CI)	Self Learning(SL)
Theory SO3.1: understand Introduction to free radicals: Free radicals SO3.2: damaging reactions of free radicals on lipid SO3.3: complex carbohydrates as functional food ingredients		3.1: Introduction to free radicals: Free radicals 3.2: reactive oxygen species 3.3: production of free radicals in cells, 3.4: damaging reactions of free radicals on lipid 3T.1: Tutorial 3.5: Proteins, Carbohydrates, nucleic acids 3.6 :Dietary fibres 3.7: complex carbohydrates as functional food ingredients. 3T.2: Tutorial	3.1: Study the free radicals effects .

Suggested Assignments: damaging reactions of free radicals on lipids, proteins, Carbohydrates, nucleic acids

Unit -IV

CO-BP812ET-4: Understand about the involvement of free radicals in diseases and functional food for chronic diseases prevention.

Item	Approx Hrs
Lecture & Tutorial	10+3=13
Practical(P)	0
SW	1
SL	1
Total:	15

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction(CI)	Self Learning (SL)
<p>Theory</p> <p>SO4.1: Understand Free radicals in Diabetes mellitus, Inflammation, Ischemic reperfusion injury</p> <p>SO4.2: kidney damage, muscle damage. Free radicals involvement in other disorders</p> <p>SO4.3: Antioxidants: Endogenous antioxidants – enzymatic and nonenzymatic antioxidant defence, Superoxid</p> <p>SO4.4: Functional foods for chronic disease prevention</p>		<p>4.1: Free radicals in Diabetes mellitus, Inflammation, Ischemic reperfusion injury</p> <p>4.2: Cancer, Atherosclerosis, Free radicals in brain metabolism and pathology,</p> <p>4.3: kidney damage, muscle damage. Free radicals involvement in other disorders</p> <p>4.4: Free radical theory of ageing.</p> <p>4T1: Tutorial 4.5: Antioxidants: Endogenous antioxidants – enzymatic and nonenzymatic antioxidant defence, Superoxid</p> <p>4.6: dismutase, catalase, Glutathione peroxidase, Glutathione</p> <p>4.7: Vitamin C, Vitamin E, α- Lipoic acid, melatonin</p> <p>4T.2: Tutorial 4.8: Synthetic antioxidants: Butylated hydroxy Toluene 4.9; Butylated hydroxy Anisol</p> <p>4.10: Functional foods for chronic disease prevention</p> <p>4T .3: Tutorial</p>	<p>4.1: comparative study of free radicals effects in various disease.</p>

Suggested Assignments: Free radicals in Diabetes mellitus

Unit V**CO-BP104-5: Understand about the regulatory aspects on food safety .**

Item	Approx Hrs
Lecture & Tutorial	6+2=8
Practical(P)	0
SW	1
SL	1
Total:	10

Session Outcomes(SOs)	Laboratory Instruction (LI)	Class room Instruction(CI)	Self Learning(SL)
Theory SO5.1: Understand : Effect of processing, storage interactions of various environmental factors on the potential of nutraceuticals. SO5.2: Pharmacopoeial Specifications for dietary supplements and nutraceuticals	NA	5.1: Effect of processing, storage 5.2: interactions of various environmental factors on the potential of nutraceuticals. 5.3: Regulatory Aspects; FSSAI, FDA, FPO, MPO, 5.4: AGMARK. HACCP 5T1: Tutorial Class 5.5: GMPs on Food Safety. Adulteration of foods. 5.6:) Pharmacopoeial Specifications for dietary supplements and nutraceuticals. . 5T.2: Tutorial	5.1: Study about the importance of various regulatory aspects in pharmaceutical manufacturing.

Suggested Assignments: FSSAI & FDA study.
